First Term Examination, 2013-14
Course: B.Tech. (CSE), Year: 2nd, Semester: IVth
Operating Systems (CSE 221)

Uni. Roll No: .....

Time: 1.5 Hrs. **Total Marks: 20**

Notes:

1. All parts of a question should be answered at one place.
2. Answer should be brief and to-the-point and be supplemented with neat sketches.
3. Any missing or wrong data may be assumed suitably giving proper justification.
4. Figures on the right-hand side margin indicate full marks.

Section A

Note: Attempt All Questions (1x5=5)

I. Define Time Sharing Systems.
II. Define Reentrant Kernel.
III. Define Context Switching.
IV. Define Real Time Operating System.
V. List five services provided by an OS in regard with process management.

Section B

Note: Attempt any Three Questions (2x3=6)

I. Give the difference between multiprogramming and multiprocessing.
II. Define process. Describe the contents of a Process Control Block (PCB).
III. Explain process state transition diagram.
IV. What do you mean by principle of concurrency? Explain with the help of producer consumer problem.

Section C

Note: Attempt any Three Questions (3x3=9)

I. What is an operating system? List the typical functions of operating systems.
II. Explain various operating system structures along with their advantages and disadvantages.
III. What are threads? Why are they required? Differentiate between Kernel level and User level threads?
IV. What is meant by Inter Process Communication? Explain the two fundamental models of Inter Process Communication.

First Term Examination, 2013-14
Course: B. Tech. (CSE), Year: II, Semester: IV
Computer Networks (CSE224)

Uni. Roll No:

Time: 1.5 Hrs. **Total Marks: 20**

Notes:

1. All parts of a question should be answered at one place.
2. Answer should be brief and to-the-point and be supplemented with neat sketches.
3. Any missing or wrong data may be assumed suitably giving proper justification.
4. Figures on the right-hand side margin indicate full marks

Section A

Note: Attempt All Questions **(1x5=5)**

I. What are the responsibilities of the transport layer in the TCP/IP model?

II. Design a hybrid topology with star backbone connecting two bus backbones. Each bus backbone connects three ring networks.

III. If the peak voltage value of a signal is 20 times the peak voltage value of the noise, what is the SNR? What is the SNR in db?

IV. Differentiate between Base band and broad band transmission.

V. Differentiate between point to point and multipoint connection.

Section B

Note: Attempt any Three Questions **(2x3=6)**

I. Draw the graph of manchester and differential manchester scheme for the following data stream-
   i. 11010010
   ii. 01101100

II. Name the advantages of optical fiber over twisted pair and coaxial cable?

III. Compare and contrast a datagram network and virtual circuit network? A path in digital circuit switched network has a data rate of 10 Mbps. The exchange of 1000 bits required for setup and tear down phases. The distance between two parties is 500 km. What is the total delay, if 10000 bits of data are exchanged during data transfer phase?

IV. What is computer network topology? Explain any three topologies with diagram.

Section C

Note: Attempt any Three Questions **(3x3=9)**

I. What is OSI model? Briefly explain the function of different layers in OSI model?

II. a) Discus the different type of addressing used in the internet employing the TCP/IP network model?

b) We have a channel with a 1-MHz bandwidth. The SNR for this channel is 63. What is the appropriate bit rate and signal level?

III. a) What are the various types of transmission impairment? Explain in brief.

b) A non periodic composite signal has a bandwidth of 200 kHz, with a middle frequency of 140 kHz and peak amplitude of 20 V. The two extreme frequencies have amplitude of 0. Draw the frequency domain of the signal.

IV. Write short notes on any two-

a) ISDN
b) Unguided transmission media
c) LAN, MAN & WAN

First Term Examination, 2013-14
Course: B.Tech. (CSE), Year: II, Semester: IV
Computer Graphics (CSE-223)

Uni. Roll No:

Time: 1.5 Hrs. **Total Marks: 20**

Notes:

1. All parts of a question should be answered at one place.
2. Answer should be brief and to-the-point and be supplemented with neat sketches.
3. Any missing or wrong data may be assumed suitably giving proper justification.
4. Figures on the right-hand side margin indicate full marks.

Section A

Note: Attempt All Questions **(1x5=5)**

I. Enlist the drawbacks of Beam penetration method over shadow mask method.

II. A Standard TV has 360 scan lines. If the aspect ratio is ¾, what is the capacity of frame buffer needed if 8 bits per pixel are used?

III. In a 600x400 pixels, how many KB does a frame buffer need?

IV. How long would it take to load a 640x480 buffer with 12 bits/pixel if 10^5 bits can be transferred per second?

V. What is computer graphics? Write two applications of computer graphics.

Section B

Note: Attempt any Three Questions **(2x3=6)**

I. Differentiate between Random and Raster scan system (At least four).

II. A laser printer is capable of printing two pages of size 10x12 inch/second at a resolution of 600 pixels/inch. How many bits per second does such a device requires?

III. Write Midpoint Circle Drawing algorithm.

IV. Differentiate between boundary fill and flood fill algorithm.

Section C

Note: Attempt any Three Questions **(3x3=9)**

I. Explain the working of color CRT by using delta shadow mask method.

II. Explain concave and convex polygons with proper example. Discuss Sutherland- Hodgeman polygon clipping algorithm by all possible cases.

III. Write Bresenham's algorithm for line drawing. Rasterized the line between the points (20,10) and (30,18) by using the same.

IV. Write Liange Barsky algorithm for Line Clipping. Use Liange Barsky line clipping algorithm to clip the line P1(-15,-30) to P2(30,60) against the window having diagonally opposite corners as (0,0) and (15,15).

First Term Examination, 2013-14
Course: B.Tech. (CSE), Year: II, Semester: IV
Introduction to Microprocessors (CSE 222)

Uni. Roll No:

Time: 1.5 Hrs. **Total Marks: 20**

Notes:

1. All parts of a question should be answered at one place.
2. Answer should be brief and to-the-point and be supplemented with neat sketches.
3. Any missing or wrong data may be assumed suitably giving proper justification.
4. Figures on the right-hand side margin indicate full marks.

Section A

Note: Attempt All Questions **(1x5=5)**

1. How many address lines are necessary to address two megabytes (2048K) of memory?
2. Why data bus is bidirectional?
3. What is the function of **ALE** ?
4. While executing a program, when the 8085 MPU completes the fetching of the machine code located at the memory address 2057H, what is the content of the program counter?
5. If the clock frequency is 5 MHz, how much time is required to execute an instruction of 18 T-states?

Section B

Note: Attempt any Three Questions **(2x3=6)**

1. What do you understand by multiplexing of address and data bus. Explain using diagram?
2. What is the use of addressing modes, mention different types of Addressing modes used in 8085 with example.
3. Draw and explain the timing diagram for opcode fetch operation.
4. How many machine cycles does 8085 have, mention them along with the value of status and IO/M pins.

Section C

Note: Attempt any Three Questions **(3x3=9)**

1. Explain in detail the following instructions:-
   (i) DAD (ii) RAR (iii) DAA
2. Draw and explain the architectural diagram of a microprocessor 8085.
3. Write an 8085 assembly language program using minimum number of instructions to add 16 bit no. in BC, DE & HL. Store the 16 bit result in DE pair and count the T States in the same program.
4. What is PSW? Write ALP to exchange the contents of Accumulator and Flag registers.

First Term Examination, 2013-14
Course: B.Tech. (CSE), Year: 2nd, Semester: 4th
Database Management System (ITE 221)

Uni. Roll No: _____

Time: 1.5 Hrs. **Total Marks: 20**

Notes:

1. All parts of a question should be answered at one place.
2. Answer should be brief and to-the-point and be supplemented with neat sketches.
3. Any missing or wrong data may be assumed suitably giving proper justification.
4. Figures on the right-hand side margin indicate full marks.

Section A

Note: Attempt All Questions **(1x5=5)**

I. Define Physical and Logical data independence

II. What are two types of DMLs? Define them.

III. Define DEGREE of relationship with help of example.

IV. Consider relation UserDetail (adhaar#, name, username, password, email, mobile, address, photo)
Identify what you think should be various candidate keys. Specify any assumption clearly if you make.

V. What is union compatibility?

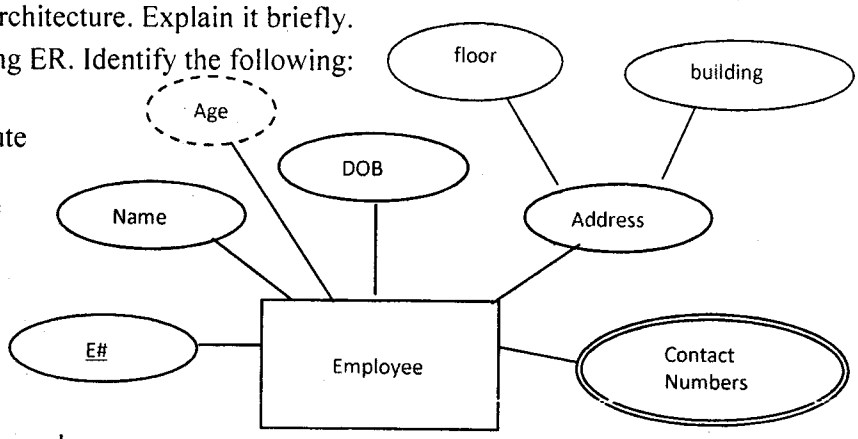

Section B

Note: Attempt any Three Questions **(2x3=6)**

I. Draw three schema architecture. Explain it briefly.

II. Consider the following ER. Identify the following:

a. Simple Attribute
b. Composite attribute
c. Multi-valued
d. Derived Attribute

III. Consider the Following schema:
Student(S#, Sname, City, Course, GPA)
Give tuple relational calculus queries:

a. Give all details of S# greater than 5.
b. Give name of students who live in Mathura and doing course B. Tech
c. Give name of student who are not from city Agra
d. Give the S# & Sname for students pursuing course B.Tech or MBA

IV. Explain the following with their notation:

a. Cartesian Product b. Theta Join

Section C

Note: Attempt any Three Questions **(3x3=9)**

I. Why one should go for Database over File system? Explain.

II. Explain the following:

a. Primary Key, c. Super Key, e. Non-Key attributes

b. Candidate Key, d. Key attributes and

Consider a relation R1(A, B, C, D, E, F) and the following attribute(s) can uniquely identify the records of relation R.

1) B 2) C, D 3) A,D

Identify the following in relation R1?

Candidate Key(s) :

Primary Key:

Alternate Key:

Key attribute(s) :

Non-key attribute(s):

III. A lending library uses a relational database to record details of books, book loans and borrowers.

- A unique International Standard Book Number (ISBN) is assigned to each book title such as "The Art of Passing Computing Examinations".
  The library assigns a unique Accession Number to each copy of a book in the library.
  BookLoan (AccessionNumber, BorrowerNumber, DateDueBack)
- The library assigns a unique Borrower Number to each borrower. The relational database uses four tables Book, Book Copy, BookLoan and Borrower with attributes (primary key is underlined) as follows:
  Book(ISBN, AuthorName, Title, NumberOfCopies)
  BookCopy(AccessionNumber, ISBN, DateAcquired, ReplacementCost)
  Borrower(BorrowerNumber, Surname, Initials, Address)
  Write the relational algebra query for following:
  a. Find the name of the author and ISBN of a book with the AccessionNumber 1234
  b. Find the number of books of Author "ELMASRI NAVATHE"
  c. Find Due Date of return of book having ISBN "1-57820-082-2" by Borrower Number 123

IV. A university database contains information about professors (identified by social security number, or SSN) and courses (identified by courseid). Professors teach courses; each of the following situations concerns the Teaches relationship set. For each situation, draw an ER diagram that describes it (assuming no further constraints hold).

a. Every professor must teach some course.

b. Every professor teaches exactly one course (no more, no less).

c. Every professor teaches exactly one course (no more, no less), and every course must be taught by some professor.

Univ. Roll No.----------

Course: B.Tech. II Year , I Mid Term (Even Sem.),Examination,2013-14

Subject: Environmental Studies (CEE 201)

Time: 90 Minutes **M.M.:20**

Notes:

1. Answer All questions from Section A, 03 questions from Section B & 03 questions from Section C.
2. All questions of the particular Section should be answered collectively at one place.
3. Answer should be to the point and wherever required, be supplemented with neat sketches.
4. Any missing data may be assumed suitably giving proper justification.
5. Figure on the right hand side margin indicate marks.

Section-A (Attempt All questions) (01 X 05= 05 marks)

I. When the World Environment Day is observed ?

II. What are saprophytes ?

III. What is meant by rain water harvesting ?

IV. How food chain contributes to the stability of an ecosystem ?

V. Why afforestation is needed ?

Section-B (Attempt any three questions) (02 X 03 =06 marks)

I. How Environmental Studies is important in view of conservation of natural resources?

II. Discuss environmental consequences of over exploitation of mineral resources.

III. Classify the natural ecosystem on the basis of surrounding by giving suitable examples.

IV. Suggest some effective methods to solve the problem of water crisis.

Section-C (Attempt any three questions) (03 X 03 =09 marks)

I. Explain the structure and functions of atmosphere with the help of neat labelled diagram.

II. What is ecological succession ? Explain it's types by giving suitable examples.

III. Explain structural and functional features of biotic components in an ecosystem.

IV. Enumerate environmental effects of deforestation.

SET-C

GLA University

I-Mid Term Exam, 2013-14 (Even Sem)

Soft Skills

Code- AHE-282

Course- B.Tech + MCA **Year- II** **Branch-All Branches**

Instructions :

- There are two sections in the question paper. Section I contains 20 questions and section II contains 40 questions.
- Attempt all questions.
- The maximum marks for the test are 100.
- The total time allocated is 75 minutes.
- You have to write your answers **(A/B/C/D)** in the Answer sheet.
- There will be negative marking. 25% marks will be deducted for each wrong answer.

  Name of Student:

  Branch:

  Section-

  University Roll No:

- **Signature of Invigilator-**

SECTION I (No of Questions=20, Max Marks: 50, **2.5** marks for correct answer and **-.63** for wrong answer)

1). The incomes of A, B and C are in the ratio of 7: 9: 12 and their expenses are in the ratio of 8: 9: 15. If A saves $1/4^{th}$ of his income, then what is the ratio of their savings?

(1) 56: 99: 69 (2) 33: 19: 23 (3) 15: 18: 27 (4) Cannot be determined

2). which one the equations best describes the data provided?

T	-2	-1	0	2	3
V	2.5	1	- 0.5	- 3.5	-5

(1) $V = 1.5\,t - 0.5$ (2) $v = 1.5\,t + 0.5$ (3) $v = -2.5\,t - 2.5$ (4) $v = 3.5\,t + 9.5$

3). If a: b = 2: 7 & b: c = 5:4, then what is the ratio of a: b: c?

(1) 15: 18: 27 (2) 10:28:35 (3) 10: 35: 28 (4) 14: 35:28

4) The cost of three apples, two mangoes and four oranges is Rs 43. The cost of five apples, three mangoes and six oranges is Rs 66. Find the cost of each apple

(a) Rs 5 (b) Rs 6 (c) Rs 3 (d) Cannot be determined

5). A quantity P varies directly as the sum of Q and R. if Q increases by 2 and R increases by 2, then by how much does P increase?

(a) 0 (b) 2 (c) 4 (d) cannot be determined

6) A retailer marks his goods 25% above cost price, but allows a discount of 12% on the marked price for sale. What is the gain per cent?

(1) 13% (2) 25% (3) 10% (4) 50%

7) If the length of a rectangle is increased by 20% & breadth by 10%, then by how much percentage the perimeter of the rectangle is increased?

(1) 10 (2) 32 (3)21 (4) Cannot be determined.

8) The selling price of a product is such that the profit made on selling 3 units is equal to the cost price of 2 units. What is the percentage of profit per sale of one unit?

(a) 66.67% (b) 50% (c) 83.33% (d) 60%

9) Rajesh and Manoj started a business. Rajesh invested Rs 10,000 for eight months of the year and Manoj invested Rs 6,000 for the entire year. If the profit at the end of the year was Rs 5,700, what was the share of Manoj? (in Rs)

(a) 2,850 (b) 2,700 (c) 1,710 (d) 1,620

10) A's weight is 10% less than that of B and C's weight is 10% more than that of B. By what percent is A's weight than that of C?

(a) 20% (b) 18.18% (c) 1.8% (d) 16.67%

11) How many times in a day the two hands of a clock are in a straight line?

(1) 22 (2) 44 (3) 24 (4) 48

12) If 3rd January 2003 was Wednesday, then what was the day on 3rd June 2009?

(1) Wednesday (2) Sunday (3) Tuesday (4) Monday

13) At what exact time between 2pm & 3pm, the two hands of the clock are at right angles to each other ?

(1) 2:29: 13pm (2)2: 28: 11pm (3) 2:27: 16 pm (4) 2:27: 10pm

14) If 20th January 2000 was a Thursday, then what day of the week was 26th February, 1997?

(A) Tuesday (B) Sunday (C) Wednesday (D) Thursday

15) What the day of the week is on the day which is 15 days after a day which is 26 days prior to a Sunday

(A)Wednesday (B) Thursday (C) Friday (D) Saturday

16) After walking 7m straight I took a turn towards the left and jogged for 15m .After this I turned left and walked for 7 m , then turned right and jogged a few meters more .Now I am moving towards East .Towards which direction did I start my journey?

(A) East (B) West (C) North (D) South

17) How is my brother's grandfather's only son's only child related to me ?

(A) Brother (B) cousin (C) Nephew (D) mother

Directions for Questions 18-19: Read the following statements carefully and answer the questions that follow.

There are six persons P, Q, R, S, T and U, R is the sister of U, Q is the brother of T's husband. S is the father of P and grandfather of U. There are two fathers, three brothers and a mother in the group.

18) How many male members are there in the group?

(1) Three (2) Four (3) Two (4) One

19) How is U related to T?

(1) Uncle (2) Husband (3) Son (4) Daughter

20) A man goes to a park and sees a girl who he recognized to be his relative .The girl was the daughter of his sister's husband wife .How is the girl related to man.?

(A) Sister (B) niece (C) wife (D) Sister-in law

SECTION II (No of Questions=40, Max Marks: 50, **1.25** marks for correct answer and **-.31** for wrong answer)

21) The Process of Communication starts with:

A) Receiver B) Message C) Sender D) Channel

22) _____ is an acknowledgement that the message has been received.

A) Paraphrasing B) Feedback C) Listening D) Summarising

23) The external obstacles are distortions which exist outside both the sender and receiver, and prevent effective communication. These are called-

A) Filters B) Barriers C) Channels D) Means

24) Which of the following in not a filter?

A) Superiority complex B) Rigid attitude C) NoiseD) Pre-conceived notions

25) The internal obstacles that exist within the sender and the receiver are called –

A) Filters B) Barriers C) Channels D) Means

26) Which of the following is a barrier?

A) Language B) Anger C) Disappointment D) Shyness

27) Percentage impact of non verbal components in communication is -

A) 25 B) 35 C) 45 D) 55

28) Phones, newspapers, radio, internet etc. are all examples of different -

A) Barriers B) Filters C) Senders D) Channels

29) Which of the following two are the barriers?

I) Language II) Sorrow III) Cross-talk IV) Disinterest

Choose the correct option from A to D:

A) I, II B) II, III C) I, III D) IV, I

30) Which of the following is Non Verbal Communication?

A) Rohan stopping his car at the traffic signal when the light goes red.
B) Teacher discussing important topic in the class.
C) A victim reporting about crime to the police.
D) Students writing their final examinations

Read the following passage and answer the Questions 31-35:

Suresh is a 27 years old person, who is a food service manager at a casual dining restaurant. Suresh is responsible for supervising and managing all employees in the restaurant. Employees working in the restaurant are in the age group of 16 years to 55 years.

In addition, the employees come from diverse cultural and ethnic backgrounds. For many, English is not their primary language. Suresh tries his best to keep up with food safety issues in the kitchen but he admits it's not easy. Employees receive "on the job training" about food safety basics (for example, appropriate hygiene and hand washing, time/temperature, and cleaning and sanitizing). But with high turnover of employees, training is often rushed and some new employees are put right onto the job without training if it is a busy day. Eventually, most employees get some kind of food safety training.

The owners of the restaurant are supportive of Suresh in his food safety efforts because they know if a food safety outbreak were ever linked to their restaurant; it would likely put them out of business. Still, the owners note that there are additional costs for training and making sure food is handled safely. One day Suresh comes to work and is rather upset even before he steps into the restaurant. Things haven't been going well at home and he was lucky to rummage through some of the dirty laundry and find a relatively clean outfit to wear for work. He admits he needs a haircut and a good hand scrubbing, especially after working on his car last evening. When he walks into the kitchen, he notices several trays of uncooked meat sitting out in the kitchen area. It appears these have been sitting at room temperature for quite some time. Suresh is frustrated and doesn't know what to do. He feels like he is beating his head against a brick wall when it comes to getting employees to practice food safety. Suresh has taken many efforts to get employees to be safe in how they handle food. He has huge signs posted all over the kitchen with these words: KEEP HOT FOOD HOT AND COLD FOOD COLD and WASH YOUR HANDS ALWAYS AND OFTEN. All employees are given a thermometer when they start so that they can temp food. Hand sinks, soap, and paper towels are available for employees so that they are encouraged to wash their hands frequently.

31) What are the communication challenges and barriers Suresh faces?

I) Language barriers II) Generational (age) barriers

III) Cultural and ethnic barriers IV) Emotional barriers

Choose the correct option from A to D:

A) I, II, III B) II, III, IV

C) I, III, IV D) All of the above

32) What solutions might Suresh consider in addressing each of these challenges and barriers?

I) Put signage with visuals, not just words.

II) Have only similar age group employees

III) Suresh must focus on non-verbal communication as well.

IV) To discuss his personal emotions with everybody

Choose the correct option from A to D:

A) IV, III, II, I B) II, III, IV

C) IV, III, I D) III, II, I

33) What are some ways in which Suresh might use effective communication as a motivator for employees to follow safe food handling practices?

I) Be a role model
II) Have one on one communication
III) Use only non verbal communication
IV) Communicate in a group
Choose the correct option from A to D:

A) I, II, III B) II, III, IV

C) III, IV, I D) I, II, IV

34) What are the factors that are creating a negative image of Suresh in front of his employees?

I) Personal appearance
II) His Age
III) Negative emotions due to family problems
IV) Experience

Choose the correct option from A to D:

A) I,II and III B) I and III

C) III, IV, I D) I, II, IV

35) Putting signboards in English is a _____ barrier.

A) Cultural B) Generational C) Language D) Non Verbal

36) What does this gesture imply -Arms folded across chest?

A) Feeling of negativity

B) Not Interested

C) Lack of confidence or belief in solution

D) Closed, Unreceptive

37) Which of the following is not a sign a high self esteem?

A) Friendly contact with others
B) Little or no hesitation
C) Working in co – operation
D) Giving excuses for failures

38) Which of the following is not a strategy to build confidence?

A) Emphasize Strengths
B) Avoid Risks
C) Use Self-Talk
D) Self –Evaluate

39) What are the components face-to-face communication can be broken into?

A) Intonation, Pitch and Words
B) Gestures, Postures and Pitch
C) Words, Tone of Voice and Body language
D) Eye contact, Clarity and Vocabulary

40) In effective communication, what percentage do words contribute?

A) 70% B) 25% C) 50% D) 7%

41) Which of the following statements is False?

A) Communication is a two way process.
B) Communication is complete only when there is feedback.
C) Communication can happen with only one person present.
D) Communication can be verbal or non-verbal.

42) Which of the following is a Language barrier?

A) Use of Jargons
B) Talking too loudly
C) Talking too slowly
D) None of the above

43) In the communication process, to encode means to -

A) Speak to large groups of people.
B) Translate ideas into a code.
C) Block a pathway between the sender and the receiver of a message.
D) Interpret a code.

44) An example of a filter is -

A) A humming air conditioner unit.
B) A speaker using complex terms
C) A lawn mower.
D) A listener reviewing weekend plans in his or her head.

45) A message can only be deemed effective when it is-

A) Repeated as a proof of understanding.
B) Understood by others and produces the intended results.
C) Delivered with confidence.
D) Communicated face-to-face.

46) .....skills are those values/personality traits that reside deep within an individual. It deals with the emotions, feelings, thoughts that are stirred upon within an individual which the person next to them might not even be aware of.

A) Interpersonal
B) Intrapersonal
C) Communication
D) Team Building

47) Which of the following does not constitute intrapersonal skills?

A) Self Awareness
B) Assertiveness
C) Self Confidence
D) Team Building

48)..... is the ability to express our thoughts, feelings, opinions, beliefs and needs directly, openly, honestly and appropriately, while not violating the personal rights of others.

A) Self Awareness
B) Assertiveness
C) Self Confidence
D) Team Building

49)..... refers to the process by which individuals evaluate their thoughts, feelings, behaviour and abilities in relation to other people.

A) Self Awareness
B) Self Esteem
C) Social comparison
D) Self Image

50) Self confidence in a person implies-

A) The ability to do anything

B) Feeling confident in all the areas of life

C) Taking a risk in grey areas

D) Using past experience for any action

Read the following and answer Questions 51 - 55:

Malini is a bright student and has high hopes for her future. On the day before the examinations, she decides to spend her time alone doing some revisions of her lessons. When she is engrossed in her work, one of her friends approaches her to clear some doubts. Malini gets very impatient and tells her that she can't do it. The friend feels that Malini is very rude and decides never to interact with her again.

51) What is the main reason of a negative outcome in this situation?

A) Physiological factors
B) Malini's friend's behaviour
C) Noise in communication
D) Malini's behavior

52) What is the barrier in this case?

A) Pre conceived Notions
B) Stress
C) Physiological
D) Impatience

53) What is the filter in this case?

A) Language
B) Disinterest
C) Rigid Attitude
D) Superiority Complex

54) What Malini could have done to handle the situation better?

A) Showed patience and politeness
B) Showed Pity
C) Avoided her friend
D) Showed sympathy

55) What Malini's friend could have done to handle the situation better?

A) Be aggressive
B) Be persistent
C) Showed empathy
D) Showed sympathy

Read the following and answer Questions 56 - 57:

A CEO is giving a presentation about the company's quarterly performance. The board of directors applaud at the end of the presentation.

56) What is the message in this communication process?

A) Gestures
B) Company's quarterly performance
C) Presentation
D) Applause for CEO

57) What is the feedback in this communication process?

A) Board of directors
B) Applause for CEO
C) Power Point Presentation
D) Body Language of CEO

Read the following and answer Questions 58 - 60:

You read a newspaper article written by Barkha Singh on women's rights but are not able to comprehend it due to the complex language of the article.
