Read the passage given below and answer the questions that follow (Q. 31-40):

Read not to contradict and confute; nor to believe and take for granted; nor to find talk and discourse; but to weigh and consider. Some books are to be tasted, others to be swallowed, and some few to be chewed and digested; that is, some books are to be read only in parts; others to be read, but not curiously; and some few to be read wholly, and with diligence and attention. Some books also may be read by deputy, and extracts made of them by others; but that would be only in the less important arguments, and the meaner sort of books, else distilled books are like common distilled waters, flashy things. Reading maketh a full man; conference a ready man; and writing an exact man.

And therefore, if a man write little, he had need have a great memory; if he confer little, he had need have a present wit: and if he read little, he had need have much cunning, to seem to know that he doth not. Histories make men wise; poets witty; the mathematics subtle; natural philosophy deep; moral grave; logic and rhetoric able to contend.

31. Which of the following is the central theme of the above passage?
    A. How and why to read books
    B. Value of reading and learning
    C. Role of books in one's life
    D. Purpose of reading and writing

    B. To be read with diligence and attention
    C. Simply read, but not with great curiosity
    D. To be read just for fun and in parts
    E. To be tasted and left out
33. Consider the following statements:
    I. Reading is a profound activity, must not be seen superficially
    II. The art of writing lends perfection to a man's character

    Which of the above statement(s) is/are true?
    A. I only
    B. Both I and II
    C. II only
    D. Neither I nor II
    E. None of the above
34. Which of the following statement(s) is/are supported by the passage?
    I. the books to be 'read wholly' are meant to be read with diligence
    II. a man who doesn't write much can make up for it through memorizing.
    III. The 'meaner' sort of books must be read only in bits and pieces.
    A. I and II
    B. I and III

    D. I , II and III
    E. None of the above
35. The author's tone seems to be:
    A. Critical
    B. Laudatory
    C. Expository
    D. Thought provoking
    E. Analytically

The most important reason for this state of affairs, perhaps, is that India was the only country in the world to truly recognise the achievements of the Soviet Union-rather than merely focus on the debilitating faults that Communism brought to its people. The people of India realised that the achievement of one hundred per cent literacy in a country much, much larger than its own and with similarly complicated ethnic and religious groupings, the rapid industrialization of a nation that was a primarily agrarian society when the Bolshevik revolution took place in 1917, the attendant revolutionary steps in science and technology, the accessibility of health care (primeval according to Western standards, perhaps, but not according to Indian ones) to the general population, and despite prohibition of the government of the time the vast outpourings in literature, music, art, etc. are momentous and remarkable feats in any country. In contrast, all that the West focused on were the massive human rights violations by the Soviet State on its people, the deliberate uprooting and mass migrations of ethnic peoples from one part of the country to another in the name of industrialization, the end of religion. In short, all the tools of information were employed to condemn the ideology of Communism, so much at variance with capitalist thinking. The difference with the Indian perception, I think here is, that while the Indians reacted as negatively to what the Soviet governments did to its people in the name of good governance (witness the imprisonment of Boris Pasternak and the formation of an international

committee to put pressure for his release with Jawaharlal Nehru at its head), they took the pain not to condemn the people of that broad country in black and white terms; they understood that mingled in the shades of grey were grains of uniqueness (The Russians have never failed that characteristic in themselves; they have twice experimented with completely different ideologies, Communism and Capitalism both in the space of a century).

36. Which of the following statements according to the passage is correct?
    A. India took heed on the weak faults of Russian policies and system
    B. India seriously commended the achievement of Russia, i.e.. cent per cent literacy and rapid industrialization
    C. The process of industrialization had already started when Russian revolution took place in 1917
    D. The literature, art and music received a setback during the communist regime in Russia
    E. West did not focus on the massive human rights violation
37. The West did not focus on:
    A. rapid growth of nuclear weapons in Russia
    B. massive human rights violation by the soviet state on its people
    C. deliberate uprooting and mass migration of ethnic people in the name of industrialisation.
    D. hundred percent literacy of the people of Russia.
    E. Both B&C
38. Russia was primarily a/an:
    A. industrialised society
    B. revolutionary society
    C. agrarian society
    D. capitalist society
    E. none of the above
39. The passage is
    A. descriptive
    B. paradoxical
    C. analytical
    D. thought provoking
    E. reflective
40. What has been India's stance in respect to the USSR:
    A. Vehement supporter of the country's policies
    B. Staunch critic of the country
    C. Like West always pinned upon the violation of human rights
    D. Preferred a nuanced position in contrast to many other countries
    E. None of the above

Read the passage given below and answer the questions that follow (Q. 31-40):

On August 15, 1947, India was granted independence from British colonial dominance. This was an event of international significance. From this day onwards, the Indian Union assumed a role in world politics that was appropriate enough to modify the thinking of nations. Concepts like non-alignment tolerance, non-violence and peaceful co existence were introduced by India into the international vocabulary.

"Our dreams concern India", said the first Prime Minister of the country, Pt Jawaharlal Nehru, on the eve of achieving freedom, "but they also

concern the whole world, for the world has become one".

Mahatma Gandhi chose Nehru to become the first PM of independent India. With his vision of unity of the nation, he became the architect of modern India. It was to be a federal state based on secularism – the commitment to an Indian identity, which was above all races, castes, and religions. It was a vision of extraordinary dimensions.

Nehru and his daughter as well as successor, Smt. Indira Gandhi, were well aware that only a firm anchorage in the Indian identity could unite the nation and enable it to make an impact on the world. In these days of mutual interdependence, the western powers and America cannot afford to ignore what is happening in this region. It is possible that the fate of the Asian democracies would one day be decided on the banks of the Ganges. If India fails to remain a democracy, this would trigger the fall of the whole of South and South-east Asia. That is why the Indian Prime Minister has to play a role that goes well beyond duties related to internal affairs only. It is of international political significance.

31. Which of the following is the central theme of the given passage?
    A. Need for mutual interdependence between India and World.
    B. Post independence Nation building in India.
    C. India's rise as a strong Nation with a global outlook
    D. Global contributions by post independent India.
    E. Global contributions to the post independent India.
32. Consider the following statements:
    I. Nehru's vision to make an impact on the world earned him the title of 'the architect of modern India'.
    II. Nehru's internationalistic vision was based on the assumption of world as one integrated whole.
    III. Nehru became the first prime minister of India as he helped secure independence to the country.

    Which of the above statement(s) is/are correct?
    A. I only
    B. I and III
    C. II only
    D. II and III
    E. None of the above
33. Consider the following statements:
    I. Concept of Non-alignment tolerance was missing in International Vocabulary till India contributed in this direction.
    II. The idea of nation building has been anchored on the concept of the Indian identity

    Which of the above statement(s) is/are correct?
    A. I only
    B. Both I and II
    C. II only
    D. Neither I and II
    E. None of the above
34. What does the author infer in context of "fate of Asian Democracies"?
    A. Western powers hold sway over the fate of Asian countries
    B. Newly independent Asian countries have an uncertain fate
    C. India will possibly have an instrumental role in Asian affairs
    D. Asian democracies will have a fateful role to play in the Non alignment regime.
    E. Asian countries will play pivotal role in world politics
35. As per the passage, Indian Prime Minister's role goes beyond the duties related to internal affairs, because
    A. It creates an impact on World
    B. Indian happenings influence the Asian affairs and politics
    C. It is needed to avoid interference of Western powers
    D. It helps strengthen the idea of non-alignment and peaceful co-existence.
    E. It helps in coordination among different power blocks.

The destruction caused to a significant part of the Chennai coastline from the oil spill that followed a collision between two ships is both tragic and ironic. A large quantity of oil was released into the sea, affecting marine life and livelihoods of coastal communities. What makes the collision ironic is that it comes at a time when there is steadily declining pollution due to such incidents. Ship collisions are less common today because GPS-based navigation systems have made their operation much safer. It is apparent that the first response to the Chennai collision involving an LPG tanker and the fuel carrier off the Kamarajar Port was seriously deficient. The port initially denied any significant environmental damage from oil, but as the scale of the disaster began to unfold, and a large number of dead turtles and fish were washed ashore, it became obvious that the

spill had not been quickly contained. Such failure calls into question the efficacy of the National Oil Spill Disaster Contingency Plan that is updated periodically for all stakeholders, notably ports, under the leadership of the Coast Guard. That the removal of the coastal sludge depended in large part on volunteers wielding buckets does not inspire much confidence in the protocol for mitigation.

An independent inquiry is vital to determine whether the training and acquisition of equipment to handle such accidents for all agencies passed muster. Moreover, pollution response equipment for all major ports and 26 non-major ports is funded to the extent of 50% by the Centre, casting a responsibility on ports to contribute the other half and build the capabilities to handle disasters. Obfuscation of facts after an oil spill is counterproductive, since the impact is prolonged; moreover, it could erode the confidence of the international community in the country's ability to fulfil its commitments within the UN system to protect marine life and biodiversity. Failure to safeguard marine turtle and bird habitats, for example, is a clear violation of the provisions of the Convention on the Conservation of Migratory Species of Wild Animals, and its specific memorandum on the Indian Ocean-Southeast Asian region to which India is a signatory. Considerable oil pollution is caused not just by catastrophes but through the discharge of ballast, sludge and water used for the cleaning of tanks. On the other hand, the efficacy of chemical dispersants to degrade oil at sea remains controversial. All this underscores the importance of timely advice from agencies such as the Indian National Centre for Ocean Information Services, which is mandated to forecast the course of an oil spill.

36. In the contemporary period, the clash between two ships is
    A. Frequent
    B. Ironic
    C. Seldom
    D. Common place
    E. None of the above
37. Misrepresentation along with erroneous analysis of facts is

    A. discharge of sludge and ballast
    B. discharge of chemical dispersants
    C. water used for cleaning of tanks
    D. A & B
    E. A, B & C
39. The recent oil spill in Chennai points out
    A. the irony of the situation
    B. the inefficacy of the National Oil Spill Disaster Contingency Plan
    C. the efficient service rendered by the volunteers to remove costal sludge
    D. A, B & C
    E. A & B
40. Which of the words in the passage means "An event resulting in great loss and misfortune"
    A. Mandated
    B. Catastrophe
    C. Sludge
    D. Mitigation
    E. Obfuscation

Read the passage given below and answer the questions that follow (Q. 31-40):

Literature and history are twin sisters, inseparable. In the days of our own grandfathers, and for many generations before them, the basis of education was the Greek and Roman classics for the educated, and the Bible for all. In the classical authors and in the Bible, history and literature were closely intervolved, and it is that circumstance which made the old form of education so stimulating to the thought and imagination of our ancestors. To read the classical authors and to read the Bible was to read at once the history and the literature of the three greatest races of the ancient world. No doubt the classics and the Bible were read in a manner we now consider uncritical but they were read according to the best tenets of the time and formed a great humanistic education. Today the study both of the classics and of the Bible has dwindled to small proportions. What has taken their place? To some extent the vacuum has been filled by a more correct knowledge of history and a wider range of literature. But I fear that the greater part of it has been filled up with rubbish.

31. Which of the following is the central theme of the given passage?
    A. Study of literature is meaningless without historical knowledge.
    B. Literature and history are inseparably linked together in the classics and Bible.
    C. Literature and History are mutually exclusive as the basis of education
    D. Need for both literature and history as the basis of Humanistic Education.
    E. Literature and History are mutually delimiting for each other.
32. Which word in the passage means to become smaller or lose substance
    A. uncritical
    B. stimulating
    C. dwindle
    D. tenets
    E. intervolved
33. Which of the following statement(s) is/are correct with respect to the ancestral study of classics and the Bible?
    A. They were studied with great emphasis on their literary value.
    B. They were studied with critical discrimination in a methodical manner.
    C. They were studied in a manner that created a tradition of humanistic education.
    D. They were studied independently
    E. They were interrelated to each other.
34. As per the author, the old form of education, based on the study of the classics and of the Bible has:
    A. been totally wiped out with passage of time
    B. been rediscovered in the light of modern education
    C. formed the core of great humanistic education.
    D. succeeded in creating interest in religion
    E. been replaced by subjects of greater value
35. Consider the following statements:
    I. The reading of classics and Bible had some deficiencies yet it was beneficial in a holistic sense.
    II. The reading of classics and Bible here stood the test of time without dwindling.
    III. The vacuum created in terms of reading of classics and Bible has not been adequately compensated.

    Which of the above statements is correct?
    A. I and II
    B. I and III
    C. II and III
    D. All the above
    E. None of the above

The presidential race in France may be gaining momentum, but clarity it is not. Centre-right Les Républicains candidate François Fillon, until recently seen to be the most likely to win the race, is engulfed by allegations of payments made to his wife, Penelope Fillon, and their children for official work they may not have done. What looked like a passing storm now looks like a weather pattern that could linger. In a rival camp to the left, Benoit Hamon's recent victory in the French Socialist Party's presidential primaries indicates voters are disenchanted with the ideological drift and absence of acuity in the ruling party's policies. His comfortable victory over the centre-left rival, former Prime Minister Manuel Valls, represents a shift leftward for the Socialists, back to their ideological roots, stemming a drift towards the centre seen not just in their party but also in the Republicans. With the business-friendly Mr. Valls out of the race, Mr. Hamon faces the prospect of losing his opponent's supporters to former Economy Minister Emmanuel Macron, a 39-year-old independent centrist who is a better ideological fit for many centre-left Socialists than is Mr. Hamon. Following the election, rifts in the party have become more open, with some senior leaders

saying they cannot support Mr. Hamon and others asking him to adopt policies that would appeal to a broader spectrum of voters. Among Mr. Hamon's policies are a universal basic income of about €750 a month, further cuts in the 35-hour work week, and a plan to legalise marijuana. Not all these are palatable to Socialists to Mr. Hamon's right.

A poll last week placed nativist Marine Le Pen of the far-right National Front in the lead for round one of the presidential race, with Mr. Fillon and Mr. Macron neck-and-neck behind him. The Socialists were expected to come in fourth. This did not last, however. Growing dissatisfaction with Mr. Fillon's response to 'Penelopegate' has altered the results significantly; one poll showed that over 60% of respondents want Mr. Fillon to step down. The party is considering finding a replacement candidate. This has bolstered the chances of Mr. Macron and Ms. Le Pen, a candidate who has benefited from the anti-European Union, anti-migrant, populist wave washing over Europe and across the Atlantic. She is still unlikely to win the second round of the race since her opponent will attract the mainstream vote. This is a good thing as the National Front coming to power would further unravel Europe and be a destabilising force in a world much in need of tolerance and stability. For the moment the Élysée Palace appears well within sight for Mr. Macron.

36. According to the author the most favourable candidate to win the race of presidential election is:
    A. Francois Fillon
    B. Benoit Hamon
    C. Manuel Valls
    D. Emmanuel Macron
    E. Élysée Palace
37. Who among the following is business friendly:

Time: 1.5 Hrs. **Total Marks: 20**

Notes:

1. All parts of a question should be answered at one place.
2. Answer should be brief and to-the-point and be supplemented with neat sketches.
3. Any missing or wrong data may be assumed suitably giving proper justification.
4. Figures on the right-hand side margin indicate full marks.

Section A

Note: Attempt All Questions **(1x5=5)**

I. What are the advantages of a multiprocessor system?

II. Which scheduling policy will you prefer to use, if the processes arrive at large time intervals? Justify your answer.

III. When a process requests for I/O, how many process switches take place?

IV. What are the main differences between operating systems for mainframe computers and personal computers?

V. In which operating system structure, there is a very little overhead in the system call interface or in communication with the kernel?

Section B

Note: Attempt any Three Questions **(2x3=6)**

I. Draw and explain five state process transition diagram with mentioning various process states.

II. Explain multilevel queuing scheduling. What advantage is there in having different time-quantum sizes on different levels of a multilevel queuing system?

III. What are the circumstances in which a parent may terminate the execution of one of its children?

IV. An operating system uses shortest remaining time first scheduling algorithm for pre-emptive scheduling of processes. Consider the following set of processes with their arrival times and CPU burst times (in milliseconds):

Process	Arrival Time	Burst Time
P1	0	12
P2	2	4
P3	3	6
P4	8	5

Find out the average turnaround time (in milliseconds) of the processes.

Section C

Note: Attempt any Three Questions **(3x3=9)**

I. What are the different scheduling criteria? Consider the 3 processes P1, P2 and P3 shown in the table-

Process	Arrival time	Burst Time

What will be the completion order of the 3 processes under the policy round robin scheduling with CPU quantum of 2 time units?

II. Explain layered and micro kernel approach with their advantages and disadvantages.

III. List and explain all services provided by an operating system.

IV. Define the essential properties of the following types of operating systems: Time sharing, Real time system and Multithreaded system.

First Term Examination, 2016-17
Course: B. Tech. (CSE), Year: II, Semester: IV
Introduction to Microprocessor (CSE 4002)

Uni. Roll No:.....

Time: 1.5 Hrs. **Total Marks: 20**

Notes:

1. All parts of a question should be answered at one place.
2. Answer should be brief and to-the-point and be supplemented with neat sketches.
3. Any missing or wrong data may be assumed suitably giving proper justification.
4. Figures on the right-hand side margin indicate full marks.

Section A

Note: Attempt All Questions **(1x5=5)**

I. Which interrupt has the highest priority?

II. What is the name of machine cycle if IO/M =1, S1=0 and S0=1?

III. Which microprocessor pins are used to request and acknowledge a DMA transfer?

IV. What is the difference between microprocessor and microcontroller?

V. Specify at least three important applications of microprocessor.

Section B

Note: Attempt any Three Questions **(2x3=6)**

I. Write 8085 instruction for

(a) Load 2010H data to HL Register Pair.
(b) Transfer contents of 1050H memory location to B Register.
(C) Load 40H to A register.
(d) Copy contents of H register to L register.
(e) Add contents of accumulator with accumulator.
(f) Add 40H as immediate data with contents of accumulator.

II. Explain the following instructions with suitable example. Also indicate the flag condition.
a) ADI b) DAA c) RAR

III. Draw the pin diagram of 8085 and discuss any three classified group of pins in 8085 microprocessor.

IV. How microprocessor can fetch OPCODE from memory? Draw the timing diagram of OPCODE Fetch from memory to microprocessor unit.

Section C

Note: Attempt any Three Questions **(3x3=9)**

I. Describe the types of 8085 Instructions? Also Describe the 8085 Interrupts?

II. Compare the following pairs of instructions with their operation, instruction bytes, addressing modes, affected flags and show results in table
MVI A, 00H and XRA A
LDA 2000H and LHLD 2000H
SUB B and CMP B

III. Write an assembly language program for exchange the contents of memory locations 1000H and 2000H with proper description of each instruction.

IV. Draw the internal architecture of 8085 microprocessor and explain its all components. Also enlist names of addressing modes used in 8085 microprocessor.

First Term Examination, 2016-17

Computer Networks (CSE4003)

Uni. Roll No: .....

Time: 1.5 Hrs. **Total Marks: 20**

Notes:

1. All parts of a question should be answered at one place.
2. Answer should be brief and to-the-point and be supplemented with neat sketches.
3. Any missing or wrong data may be assumed suitably giving proper justification.
4. Figures on the right-hand side margin indicate full marks.

Section A

Note: Attempt All Questions **(1x5=5)**

I. If the maximum amplitude of sine wave is 2v then what is the minimum amplitude?

II. We modulate several voice signals and send them through the air , is this baseband and broadband transmission.

III. HTTP describe the structure of web pages true or false

IV. What is the reason of twisting in twisted pair?

V. Match the following to one or more layer of OSI

a) Reliable process to process message delivery

b) Route selection

c) Define frame

d) Provide user service such as e mail and file transfer

Section B

Note: Attempt any Three Questions **(2x3=6)**

I. In a TDM medium access control bus LAN, each station is assigned one time slot per cycle for transmission. Assume that the length of each time slot is the time to transmit 100 bits plus the end-to-end propagation delay. Assume a propagation speed of 2×10^8 m/sec. The length of the LAN is 1 km with a bandwidth of 10 Mbps. What are the maximum number of

stations that can be allowed in the LAN so that the throughput of each station can be 2/3 Mbps.

II. A network with CSMA/CD protocol in the MAC layer is running at 1 Gbps over a 1 km cable with no repeaters. The signal speed in the cable is 2×10^8 m/sec. What is The minimum frame size for this network

III. What is the need of switching explain any one switching in brief.

IV. Define controlled access and also explain any two controlled access popular method

Section C

Note: Attempt any Three Questions (3x3=9)

I. A network has a data transmission bandwidth of 20×10^6 bits per second. It uses CSMA/CD in the MAC layer. The maximum signal propagation time from one node to another node is 40 microseconds. Then what is the minimum size of a frame in the network.

II. In a software company a user write the command on browser www.google.com user see the google.com page on browser ,then exactly what happen through which page is open on browser, write each and every step that follow to open google.com in user system. And also explain who is responsible for such kind of thing.

III. In a baseband channel with a 10MHz bandwidth. What is the data rate for this channel if we use one of the following line schemes?
a) NRZ-L
b) Manchester

IV. What characteristic of analog signal are changed to represent the digital signal in each of the following digital to analog coversion
a) ASK
b) FSK

First Term Examination, 2016-17

Object Oriented Programming (CSE4004)

Uni. Roll No: .....

Time: 1.5 Hrs. **Total Marks: 20**

Notes:

1. All parts of a question should be answered at one place.
2. Answer should be brief and to-the-point and be supplemented with neat sketches.
3. Any missing or wrong data may be assumed suitably giving proper justification.
4. Figures on the right-hand side margin indicate full marks.

Section A

Note: Attempt All Questions **(1x5=5)**

I. Describe Multiplicity of Associations with symbols.

II. How a UML Use Case Diagram is different from a traditional Flow Chart?

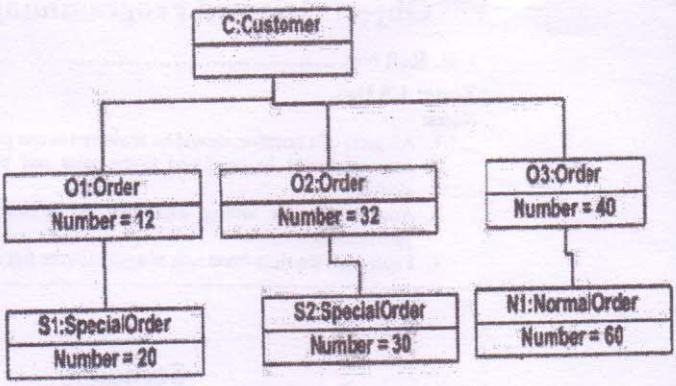

III. When the constructor of a class is invoked?

IV. What is the output of the fallowing code segment?

```
public class StaticVariable
{
  static int a =10;
  public static void main(String args[])
   {
    StaticVariable s1 = new StaticVariable();
    StaticVariable s2 = new StaticVariable();
    System.out.println("s1.a value :"+s1.a);
    System.out.println("s2.a value :"+s2.a);
    s1.a=20;
    System.out.println("s1.a value :"+s1.a);
    System.out.println("s2.a value :"+s2.a);
   }
}
```

V. Prepare a class diagram from given object diagram.

Object diagram of an order management system

Section B

Note: Attempt any Three Questions (2x3=6)

I. What are the roles played by packages, modules and wrappers in UML?

II. Write short notes on any two.
(a) Generalization (b) Association (c) Aggregation

III. Explain how Java supports encapsulation and data abstraction.

IV. What is meant by method overloading in Java? Describe with a suitable program.

Section C

Note: Attempt any Three Questions (3x3=9)

I. Define Events and States. Draw a state diagram for telephone line.

II. Prepare a class diagram for a graphical document editor that supports grouping. Assume that a document consists of several sheets. Each sheet contains drawing objects, including text, geometrical objects, and groups. A group is simply a set of drawing objects, possibly including other groups. A group must contain at least two drawing objects.

A drawing object can be a direct member of at most one group. Geometrical objects include circles, ellipses, rectangles, lines and squares.

III. Write a Java class Student to meet the following specification: The class should be able to support a 5 digit ID, student name, marks for three subjects. You should have methods to set and get each of the attributes, and calculate the average for the student. Write a program to test your class.

IV. If an inner class has an instance variable named x and the outer class also has an instance variable named x, which variable is being referred to when x is used in a method in the inner class? Why?

I Mid - Term Examination, 2016-17

Subject: Discrete Mathematics Paper Code - (CSE 4005)

Course: B.Tech, Year: II, Semester: IV, Branch: CSE

Time: 90 Minutes Max. Marks: 20

Section – A

Note: Attempt All Questions. (1 × 5 = 05 Marks)

Q.1. Solve the recurrence relation $a_r - 16\, a_{r-2} = 0$.

Q.2. Find the generating function of the sequence $S(k) = b\, a^k$.

Q.3. In how many ways 5 boys and 3 girls can be seated in a row so that no two girls are together ?

Q.4. Two finite sets have x and y number of elements .The total number of subsets of the first set are four times the total number of subsets of the second set. Find the value of x – y.

Q.5.A relation R is defined from set A = {2, 3, 4, 5} to set B = {3, 6, 7, 10} as follows : $(x, y) \in R \Leftrightarrow x \text{ divides } y$ .Express R as a set of ordered pairs and also find R^{-1}

Section – B

Note: Attempt Any Three Questions. (2 × 3 = 06 Marks)

Q.1. If A, B, C be three sets then prove that $A \cap (B \Delta C) = (A \cap B) \Delta (A \cap C)$

Q.2. Solve the recurrence relation $a_r - 4\, a_{r-1} + 4a_{r-2} = (r+1)^2$, $r \geq 2$.

Q.3. Let R = { (1 ,2), (2 , 3), (3 , 1)} and P = {1 , 2 , 3}, find the reflexive, symmetric and transitive closure of R, using composition of matrix relation R.

Q.4.How many arrangements can be made with the letters of the word 'MATHEMATICS'? In how many of them vowels are together?

Section – C

Note: Attempt Any Three Questions. (3 × 3 = 09 Marks)

Q.1. Suppose $A_1, A_2, A_3, \ldots, A_{30}$ are thirty sets each with five elements and $B_1, B_2, \ldots, B_n$ are n sets each with three elements. Let $\bigcup_{i=1}^{30} A_i = \bigcup_{j=1}^{n} B_j = S$. Assume that each elements of S belongs to exactly ten of the A_i's and exactly 9 of B_j's. Find n.

Q.2. Using generating function solve the recurrence relation $a_r = 3\,a_{r-1} + 2$, $r \geq 1$ with $a_0 = 1$.

Q.3. Let a relation R_1 on the set R of real numbers be defined as $(a, b) \in R \Leftrightarrow 1 + ab > 0, \forall\, a, b \in R$. Check whether R_1 is an equivalent relation on R.

Q.4. In a class of 80 students, 50 students know English, 55 know French and 46 know German language, 37 know English and French, 28 students know French and German, 25 students know English and German, 7 students know none of the language. Then

(i) How many students know all the 3 languages?

(ii) How many students know exactly 2 language?

(iii) How many know only one language?

First Term Examination,
Even Semester 2016-17

Course: B. Tech. II Yr.
Title of Paper: Environmental Studies
Time: 1.5 Hours

Univ. No. ----------
Paper Code: AHS-3001
Max. Marks: 20

Section-A

Note: Attempt All Questions **1 X 5 = 5 Marks**

I. Temperature in thermosphere can not be measured with thermometer, why.
II. What do you mean by xerosere?
III. What is holocoenosis?
IV. Differentiate autecology and synecology.
V. Define food web..

Section-B

Note: Attempt Any three Questions **2 x 3 = 6 Marks**

I. Engineers should have knowledge of environmental education. Comment.
II. Classify ecosystem with example.
III. What are the abstract and exhaustible type of resources? Give examples.
IV. Outline the problems associated with excessive intake of fluoride in potable water.

Section-C

Note: Attempt Any Three Questions **3 x 3 = 9 Marks**

I. Describe functions of atmosphere, hydrosphere and lithosphere (two from each).
II. What are your views about career opportunities as the scopes of environmental studies?
III. Write short notes on (a) Hazards of deforestation (b) Biomass of pyramid
IV. What are natural resources? Mentioned the major reasons of depletion of natural resources.
