B.Tech C.S

First Term Examination, 2017-18

Course: B.Tech **Year: II** **Semester: III**

Data Structures & Algorithms (CSE-3001)

Uni. Roll No: .....

Time: 1.5 Hrs. **Total Marks: 20**

Notes:

1. All parts of a question should be answered at one place.
2. Answer should be brief and to-the-point and be supplemented with neat sketches.
3. Any missing or wrong data may be assumed suitably giving proper justification.
4. Figures on the right-hand side margin indicate full marks.

Section A

Note: Attempt All Questions **(1x5=5)**

I. Write two applications of stack in Computer Science.

II. Discuss the condition of single node in circular linked list and doubly linked list.

III. Explain Linear Data Structures.

IV. Write the polish notation of (A + B) / (C – D) *E.

V. Explain Big O notation.

Section B

Note: Attempt any Three Questions **(2x3=6)**

I. Discuss the advantages and disadvantages of linked list over arrays.

II. Write an algorithm to evaluate a postfix expression. Find the infix equivalent to given expression 12,7,3,-,/,2,1,5,+,*,+.

III. Write an algorithm to delete duplicates in a sorted linked list.

IV. Let S be a stack of size n >= 1. Starting with the empty stack, suppose we push the first n natural numbers in sequence, and then perform n pop operations. Assume that Push and Pop operation take X seconds each, and Y seconds elapse between the end of one such stack operation and the start of the next operation. For m >= 1, define the stack-life of m as the time elapsed from the end of Push(m) to the start of the pop operation that removes m from S. Calculate the average stack-life of an element in stack with an assumption of n=4(1,2,3,4).

Section C

Note: Attempt any Three Questions **(3x3=9)**

I. What is recursion? Compare it with iteration. Consider the following recursive function.

```
int g(int e)
{
    if (e > 4)
    return (2 + g(e – 5) + g(e – 2));
    return 1;
}
```

Calculate the value of g(15).

II. Write two applications of Queue in Computer Science. Write an algorithm to implement a queue using two stacks.

III. Write an algorithm to reverse a number using stack. Assume that the operators +, -, × are left associative and ^ is right associative. The order of precedence (from highest to lowest) is ^, x , +, -. Find the postfix expression corresponding to the infix expression:

$$a + b \times c - d \wedge e \wedge f.$$

IV. Write a recursive algorithm to reverse a linked list. Also convert your algorithm into iterative version.

First Term Examination, 2017-18
Course: B.Tech (CSE) Year: II Semester: III
Computer Organization (CSE3102)

Uni. Roll No: .....

Time: 1.5 Hrs. **Total Marks: 20**

Notes:

1. All parts of a question should be answered at one place.
2. Answer should be brief and to-the-point and be supplemented with neat sketches.
3. Any missing or wrong data may be assumed suitably giving proper justification.
4. Figures on the right-hand side margin indicate full marks.

Section A

Note: Attempt All Questions **(1x5=5)**

I. The smallest integer that can be represented by an 8-bit number in 2's complement form is?

II. In order to realize an adder that can add two 16-bit numbers, how many full-adders and half-adders would be required?

III. What would be the bias value for a base-2 exponent in a 6-bit field?

IV. Differentiate exponent overflow and significant overflow.

V. In the implementation of a binary multiplier circuit, which set of logic gates is used?

Section B

Note: Attempt any Three Questions **(2x3=6)**

I. Design and explain a common bus system for 4 registers of four bits each.

II. Consider the following operation on a binary word. Start with the least significant bit, Copy all bits that are 0 until the first bit is reached and copy that bit, too. Then take the compliment of each bit thereafter. What is the result?

III. Represent the number $(+46.5)_{10}$ as a floating-point binary number with 24 bits. The normalized fraction mantissa has 16 bits and the exponent has 8 bits.

IV. Given x = 00101 and y = 11010 in twos complement notation (i.e., x = 4, y = -6), compute the product p = x × y with Booth's algorithm also write the steps involved in this computation.

Section C

Note: Attempt any Three Questions **(3x3=9)**

I. Consider the binary numbers in the following addition and subtraction problems to be signed, 6-bit values in the 2's-compliment representations. Perform the operations indicated, specify whether or not arithmetic overflow occurs, and check your answers by converting operands and results to decimal sign-and-magnitude representation.

010110	101011	111111
+001001	+100101	+000111
011001	110111	010101
+010000	+111001	+101011
010110	111110	100001
- 011111	- 100101	- 011101
111111	000111	011010
- 000111	- 111000	- 100010

II. It is necessary to formulate the Hamming Code for four data bits D_3, D_5, D_6 and D_7, together with three parity bits P_1, P_2 and P_4.

a) Evaluate the 7-bit composite code word for data word 0101.

b) Evaluate the three check bits C_1, C_2 and C_4, assuming no error.

c) Assume an error bit D_5 during storage into memory. Show how the error in the bit is detected and corrected.

III. Draw and explain the signed-magnitude addition and subtraction process using its hardware and flow chart.

IV. Explain the Register Transfer and Memory Transfer language in details with suitable example and also enlist the type of registers utilized in computing device.

First Term Examination, 2017-18

Course: B.Tech.(CSE) **Year: II** **Semester: III**

Database Management System (CSE3003)

Uni. Roll No: .....

Time: 1.5 Hrs. **Total Marks: 20**

Notes:

1. All parts of a question should be answered at one place.
2. Answer should be brief and to-the-point and be supplemented with neat sketches.
3. Any missing or wrong data may be assumed suitably giving proper justification.
4. Figures on the right-hand side margin indicate full marks.

Section A

Note: Attempt All Questions **(1x5=5)**

I. Define Database Management System.

II. What do you understand by entity integrity constraint in relational model?

III. How is sophisticated user different from end user in a database system?

IV. Give examples of physical and logical data independence in database systems.

V. What does the following tuple relational expression represent?

$$\forall t \in r(P(t))$$

Section B

Note: Attempt any Three Questions **(2x3=6)**

I. Identify the following in the given Student Relation:

Student (Stu_id, Name, DOB, Course, Section, Phno, Email)

I. Candidate Key
II. Primary Key
III. Alternate Key
IV. Key Attribute
V. Non-key Attribute
VI. Multi-valued Attribute

II. Suppose (A, B) and (C, D) are two relation schemas. Let r1 and r2 be the corresponding relation instances. B is a foreign key that refers to C in r2. If data in r1 and r2 satisfy referential integrity constraints, which of the $\pi_B(r1) - \pi_C(r2)$ or $\pi_C(r2) - \pi_B(r1)$ will be NULL and why?

III. Consider the relations A, B, C as given below. Assume that the schema of A U B is the same as that of A. Find the result of the following relational algebra expression, where ∞ denotes the join operation: $(A \cup B) \infty_{A.Id>40 \text{ or } C.Id<15} C$

Table A

Id	Name	Age
12	Arun	60
15	Shreya	24
99	Rohit	11

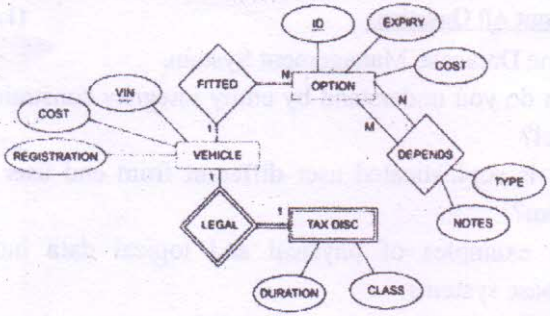

Table B

Id	Name	Age
15	Shreya	24
25	Hari	40
98	Rohit	20
99	Rohit	11

Table C

Id	Phone	Area
10	2200	02
99	2100	01

IV. Convert the following ER diagram to relational tables:

Section C

Note: Attempt any Three Questions **(3x3=9)**

I. Explain the three schema architecture of database systems by clearly defining the different levels and mapping among them.

II. How does database system offer the advantages of atomicity and concurrent updates over file system? Explain with example.

III. Design an ER/EER Diagram that models the following objects and relationships in the world of football: teams, players, games, managers and contracts. Note that:

- Each team has a unique team name, and a city it plays in.
- Each person (as part of the FIFA-world) has a unique ssn and a name. Additionally, for players their weight, height, position and birth dates are of importance.
- Players have a contract with at most one team and receive a salary for

their services,

• Each team can have more than one manager; managers can work for more than one team and receive a salary for each of their employments.

• Players cannot be managers.

• A game involves a home-team and visiting-team; additionally, the day of the game, and the score of the game are of importance; teams play each other several times in a season (not on the same day!).

• For each game played we like to know which players participated in the game and how many minutes they played.

Indicate the keys of entity types, cardinalities for each relationship type; assign roles (role names) to each relationship if there are ambiguities. State clearly any assumptions you make.

IV. Consider the relational schema given below, where the primary keys are underlined.

employee (person-name, street, city)
works (person-name, company-name, salary)
company (company-name, city)
manages (person-name, manager-name)

Give an expression in the Relational Algebra to express each of the following queries:

1. Find the names, street address, and cities of residence of all employees who work for First Bank Corporation and earn more than $10,000 per annum.

2. Find the names of all employees who live in the same city and on the same street as do their managers.

3. Give all managers in this database a 10 percent salary raise, unless the salary would be greater than $100,000. In such cases, give only a 3 percent raise.

4. Find those companies whose employees earn a higher salary, on average, than the average salary at First Bank Corporation.

B. Tech Data

University Roll No. : _____

FIRST Term Examination, 2017 – 2018

Sub.:- Engg. Mathematics - III (AHM – 3101)

Time: - 1 Hr. 30 Min. **Course: - B. Tech. III Sem.** **Max. Marks:- 20**

Note - Attempt **ALL** Sections.

SECTION A (1 x 5 = 5 marks)

Note : ALL questions of this section are **COMPULSORY.** Here, $D \equiv \frac{\partial}{\partial x}, D' \equiv \frac{\partial}{\partial y}$

Q.1. Define a partial differential equation. How will you determine the order and degree of

$$(D+2D')(D-3D')z = x+y^2$$

Q.2. Consider the flow of heat in a uniform bar. It is assumed that the sides of the bar are insulated and loss of heat from the sides by conduction or radiation is negligible. One end of the bar is assumed as origin and direction of flow is along positive x - axis. The temperature u at any point of the bar depends on the distance x of the point from one end and time t.

(a) Determine, which partial differential equation will be the governing equation for the temperature function u(x, t)?
(b) Can you classify the partial differential equation obtained in part (a)? If yes, classify.

Q.3. Form a partial differential equation by eliminating a and b from $z = (x^2+a)(y^2+b)$

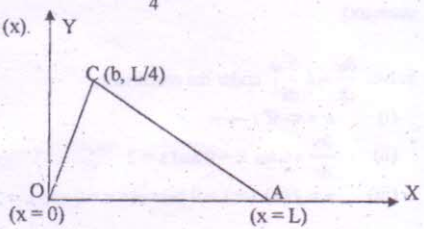

Q.4. Find the particular integral of the partial differential equation:

$$(D-D'-1)(D+D'+1)z = e^{2x+y}$$

Q.5. In the given figure, OA is a tightly stretched violin string of length L and fixed at both ends. It is plucked at x = (L/4) and assumed initially the shape of a triangle OCA of height 'b'. If the initial displacement is

$$y(x,0) = \begin{cases} f(x), 0 < x < \frac{L}{4} \\ g(x), \frac{L}{4} \le x < L \end{cases}$$

Then find f (x) and g (x).

SECTION B (2 x 3 = 6 marks)

Note : Attempt any **THREE** questions. The terms have their usual meanings.

Q.1. (i) Solve the partial differential equation: $(y^2+z^2)\,p - x\,y\,q + z\,x = 0$

(ii) Classify the partial differential equation: $r - 4s + 4t = p - 2q + z + x + y$

Q.2. Solve the partial differential equation: $\frac{\partial^2 z}{\partial x^2} - \frac{\partial^2 z}{\partial x \partial y} + \frac{\partial z}{\partial y} - z = \sin(x+2y)$

Q.3. Use the method of separation of variables to solve the differential equation:

$$\frac{\partial u}{\partial x} = 2\frac{\partial u}{\partial t} + u \qquad \text{given that } u(x, 0) = 4e^{-3x}$$

Q.4. Solve the partial differential equation: $\frac{\partial^2 z}{\partial x^2} - \frac{\partial^2 z}{\partial x \partial y} = \sin x \cos y$

SECTION C (3 x 3 = 9 marks)

Note : Attempt any **THREE** questions. The terms have their usual meanings.

Q.1. Solve the partial differential equations: (1.5 + 1.5)

(i) $(m\,z - n\,y)\,p + (n\,x - l\,z)\,q = l\,y - m\,x$, where l, m, n are constants.

(ii) $\frac{\partial^2 V}{\partial x^2} + \frac{\partial^2 V}{\partial y^2} = 12(x+y)$

Q.2. Solve the partial differential equations: (2 +1)

(i) $(D^2 - DD' - 2D'^2)z = (y-1)e^x$ (ii) $\frac{p}{x} + \frac{q}{y} = \frac{1}{z}$

Q.3. If a string of length L is initially at rest in equilibrium position and each of its points is given the velocity $\left(\frac{\partial y}{\partial t}\right)_{t=0} = b\sin^3\left(\frac{\pi x}{L}\right)$, find the displacement y (x, t). (Assume b as a constant).

Q.4. Solve: $\frac{\partial u}{\partial t} = k\frac{\partial^2 u}{\partial x^2}$ under the conditions,

(i) $u \neq \infty$ if $t \to \infty$

(ii) $\frac{\partial u}{\partial x} = 0$ for x = 0 and x = 2

(iii) $u = f(x)$ for t = 0 between x = 0 and x = 2.

I - Mid Term Examination 2017-18

B. Tech – Year II, Semester – III

Title of Paper: Industrial Economics **Paper Code: MBA 5031**

Time allotted: 90 Minutes **Maximum Marks: 20**

Instructions:

1) Attempt **(Total All Questions from Section A), (Three questions from Section B) & (Three questions from Section C) Only.**
2) Answer should be to-the-point and must be supplemented with **neat graphical** illustration.

Section: A

Note: Attempt All Questions **1 X 5= 5 Marks**

I. What is diminishing marginal Utility?
II. If the price of product "X" decreases, what will happen to the demand of its substitute Product "Y"?
III. Define Positive approach.
IV. Write any two exceptions of law of demand.
V. Define Deductive approach in Economics

PTO

Section –B

Note: Attempt Any Three Questions **3 X 2 = 6 Marks**

I. Discuss demand and its components.
II. Why demand curve is downward sloping from left to right?
III. Discuss elasticity of demand with mathematical expression of cross demand elasticity.
IV. Define **Degrees** of elasticity of demand with graphical representation.

Section – C

Note: Attempt Any Three Questions **3 X 3 = 9 Marks**

I. Industrial Economics is multi-disciplinary in approach. Justify the statement.
II. What do mean by ceteris paribus? Explain law of demand with its assumptions.
III. Discuss demand for complimentary goods. Show the demand curve for complimentary goods make a graphical illustration.
IV. Differentiate between dynamic and static economy. How they are important in explaining economical conditions of a country.

[SET A]

Printed Page: 8 **University Roll No:**

First-Term Exam (B.TECH II yr)/MCA II Yr)-2017

Ethics & Values: AHE 3001

Time: 1 ½ Hours **Max. Marks: 20**

Note: There are five passages in this paper. Read the passages carefully and answer the given questions. Each question is followed by multiple statements numbered 1,2,3,4. Please note that there is only ONE CORRECT ANSWER (one among a, b, c, d) Choose the most appropriate one. **Please don't forget to mark the SET No. on your OMR Sheet.**

Passage 1

The field of ethics (or moral philosophy) involves systematizing, defending, and recommending concepts of right and wrong behaviour. Philosophers today usually divide ethical theories into three general subject areas: meta-ethics, normative ethics, and applied ethics. Meta-ethics investigates where our ethical principles come from, and what they mean. Are they merely social inventions? Do they involve more than expressions of our individual emotions? Meta-ethical answers to these questions focus on the issues of universal truths, the will of God, the role of reason in ethical judgments, and the meaning of ethical terms themselves. Normative ethics takes on a more practical task, which is to arrive at moral standards that regulate right and wrong conduct. This may involve articulating the good habits that we should acquire, the duties that we should follow, or the consequences of our behaviour on others. Finally, applied ethics involves examining specific controversial issues, such as infanticide, animal rights, environmental concerns or capital punishment.

Questions: (5 x .5=2.5 marks)

1. Which of the following statements describe the field of ethics?
   1. A systematic study of concepts of right and wrong.
   2. It involves defending concepts of right and wrong behaviour.
   3. One should merely follow the manners and customs of the society.
   4. Ethics deals with recommending one form of action over another.

   a)1,2&3 b)1,3&4 c) 1,2&4 d) 1&2
2. " We should do to others what we would want others to do to us " is a rule that belongs to

   1. Meta Ethics 2. Normative Ethics 3. Applied Ethics 4. None of these

   a) 1 b)1&3 c) 2 d)None of these

3. Which among the following statements are **not** true ?
   1. The issue of nuclear war is a matter of applied ethics.
   2. The study of principles of moral actions belong to meta-ethics
   3. Moral psychology studies link between reason and emotion.
   4. Reason and arguments have little role to play in ethical judgements.

   a)1&2 b)1&3 c)3&4 d)2&4
4. How is ethics different from science ?
   1. Ethics is descriptive while science is prescriptive.
   2. Ethics is prescriptive while science is descriptive
   3. Ethics requires emotion only while science requires reason.
   4. Ethics is theoretical while science is practical.

   a)1 b)2 c)3 d)4
5. Ethics is applicable in our
   1. personal life 2. Social life 3. Professional life 3. All of these

   a) 1 b) 2 c) 3 d) 4

Passage 2

The term "meta" means after or beyond, and, consequently, the notion of metaethics involves a removed, or bird's eye view of the entire project of ethics. We may define metaethics as the study of the origin and meaning of ethical concepts. Two issues, though, are prominent: (1) metaphysical issues concerning whether morality exists independently of humans, and (2) psychological issues concerning the underlying mental basis of our moral judgments and conduct. The metaphysical component of metaethics involves discovering specifically whether moral values are eternal truths that exist in a spirit-like world, or simply human conventions. There are two general directions that discussions of this topic take, one other-worldly and one this-worldly. Proponents of the other-worldly view typically hold that moral values are objective in the sense that they exist in a spirit-like realm beyond subjective human conventions. They also hold that they are absolute, or eternal, in that they never change, and also that they are universal insofar as they apply to all rational creatures around the world and throughout time. A different other-worldly approach to the metaphysical status of morality is divine commands issuing from God's will. God wills all moral values into existence. The second and more this-worldly approach to the metaphysical status of morality denies the objective status of moral values. Moral values, they argue, are strictly human inventions, a position that has since been called moral relativism. There are two distinct forms of moral relativism. The first is individual relativism, which holds that individual people create their own

moral standards. The second is cultural relativism which maintains that morality is grounded in the approval of one's society - and not simply in the preferences of individual people. In addition to accepting relativism, this-worldly approaches to the metaphysical status of morality deny the absolute and universal nature of morality and hold instead that moral values in fact change from society to society throughout time and throughout the world.

Questions: (5 x .5=2.5 marks)

6. What does objectivism mean in meta-ethics?

1. It means that morality depends on society.
2. It says that morality changes from time to time.
3. It believes that moral values exist independent of humans
4. It believes that moral truths are universal and eternal.

a)1&2 b)2&3 c)1&4 d) 3&4

7. Which of the following is true about a this-worldly approach to ethics ?

1. It denies the universal nature of morality.
2. It does not believe that moral values change from time to time.
3. This approach believes that ethical facts are commanded by God.
4. It favours the view that moral values change from place to place.

a)1&4 b)2&3 c)3&4 d) 2,3&4

8. What do you mean by individual relativism?

1. Moral truths exist independently of humans.
2. Each person can create his own moral code.
3. It takes a this-worldly approach to ethics.
4. Ethics is a matter of individual opinion and taste.

a)1,2&3 b)2,3&4 c)1,3&4 d)1,2&4

9. What does the other-worldly approach to ethics involve?

1. This approach takes the view that ethical truths are man-made.
2. It believes that moral values are subjective.
3. The objective nature of morality is emphasized in this approach.
4. It considers moral truths to be eternal and universal.

a)1&2 b)3&4 c)2&3 d)1&4

10. The difference between right and wrong according to the cultural relativist depends on

1. the attitudes of individuals.
2. the difference between various societies and their practices
3. the difference in the environmental and climatic conditions.
4. the view of morality held by the majority in a society.

a)1&3 b)1&4 c) 2&3 d)2&4

Passage 3 (5 x .5=2.5 marks)

A second area of meta-ethics involves the psychological basis of our moral judgments and conduct, particularly understanding what motivates us to be moral. We might explore this subject by asking the simple question, "Why be moral?" Even if I am aware of basic moral standards, such as don't kill and don't steal, this does not necessarily mean that I will be psychologically compelled to act on them. Some answers to the question "Why be moral?" are to avoid punishment, to gain praise, to attain happiness, to be dignified, or to fit in with society. One important area of moral psychology concerns the inherent selfishness of humans. 17th century British philosopher Thomas Hobbes held that many, if not all, of our actions are prompted by selfish desires. Even if an action seems selfless, such as donating to charity, there are still selfish causes for this, such as experiencing power over other people. This view is called psychological egoism and maintains that self-oriented interests ultimately motivate all human actions. Closely related to psychological egoism is a view called psychological hedonism which is the view that pleasure is the specific driving force behind all of our actions. 18th century British philosopher Joseph Butler agreed that instinctive selfishness and pleasure prompt much of our conduct. However, Butler argued that we also have an inherent psychological capacity to show kindness to others. This view is called psychological altruism and maintains that at least some of our actions are motivated by instinctive kindness.

Questions

11. The psychological aspect of ethics involves
    1. finding out what motivates us to be moral
    2. exploring the role of praise and punishment in ethics
    3. investigating the meaning of moral concepts
    4. discovering how human instincts and desires shape morality.

    a)1,2&3 b)2,3&4 c)1,3&4 d)1,2&4
12. How does "psychological egoism" explain human behaviour ?
    1. All human actions are selfless in nature.
    2. People are motivated to do good to others naturally.
    3. All human actions are motivated by self-interest.
    4. Even unselfish actions have some selfish motive.

    a)1&3 b)1&4 c) 2&3 d)3&4
13. Which of the following are **not** true about Psychological hedonism ?
    1. The basic motive behind all actions is fear of God.
    2. The only motive of our actions is to attain pleasure and avoid pain.
    3. The driving force behind human action is the sense of duty.

4. It is reason that governs all human actions.

a)1,2&3 b)2,3&4 c)1,3&4 d)1,2&4

14. The Emotivist school argues that
    1. A moral statement is an expression of rational thinking
    2. A moral statement is an expression of feelings only.
    3. A moral judgement cannot have a true or false value.
    4. Morality is only prescriptive in nature.

    a)1&3 b)1&4 c) 2&3 d)2&4

15. The rationalist school of ethics believes that
    1. Reason is a slave of passions.
    2. Reason is capable of governing our actions.
    3. Ethics is about application of logic and reason.
    4. All moral judgements are emotional reactions.

    a)1&3 b)1&4 c) 2&3 d)3&4

Passage 4 (5 x .5=2.5 marks)

Normative ethics involves arriving at moral standards that regulate right and wrong conduct. In a sense, it is a search for an ideal litmus test of proper behaviour. The Golden Rule is a classic example of a normative principle: We should do to others what we would want others to do to us. Since I do not want my neighbour to steal my car, then it is wrong for me to steal her car. Since I would want people to feed me if I was starving, then I should help feed starving people. Using this same reasoning, I can theoretically determine whether any possible action is right or wrong. So, based on the Golden Rule, it would also be wrong for me to lie to, harass, victimize, assault, or kill others. The Golden Rule is an example of a normative theory that establishes a single principle against which we judge all actions. Other normative theories focus on a set of foundational principles, or a set of good character traits. The key assumption in normative ethics is that there is only one ultimate criterion of moral conduct, whether it is a single rule or a set of principles. Three strategies will be noted here: (1) virtue theories, (2) duty theories, and (3) consequentialist theories.

Questions

16. What do you mean by Normative Ethics?
    1. the origin and meaning of ethical concepts.
    2. the principles of human conduct.
    3. the standards by which human behaviour can be measured.
    4. theories that explain how moral judgement should be made.

    a)1,2&3 b)2,3&4 c)1,3&4 d)1,2&4

17. Which of the following are **not** areas of concern for Normative Ethics?
    1. The nature of morality
    2. The meaning of moral terms and concepts.
    3. The principles on which actions can be called right or wrong.
    4. The issue of universal moral truths and the will of God.

    a)1,2&3 b)2,3&4 c)1,3&4 d)1,2&4

18. The aim of virtue theories is
    1. to judge the action on the basis of its effects
    2. to judge an action on the basis of the character of the agent
    3. to consider whether an action follows the golden mean
    4. to see whether it follows the will of God or not.

    a)1&3 b)1&4 c) 2&3 d)2&4

19. What does the "Duty theory" school of normative ethics say?
    1. Rightness of an action depends on the character of the person.
    2. The duty of a person is to follow one's heart.
    3. Performance of one's duty is the standard for judging an action.
    4. The duty in a situation does not simply depend on results of the act.

    a)1&3 b)1&4 c) 2&3 d)3&4

20. What do you understand by the "consequentialist" school of ethics?
    1. An action should be judged by its results
    2. What matters in an action is the character of the agent.
    3. The only important thing to look at is the intention of the actor.
    4. An action is right if its consequences are favourable.

    a)1&3 b)1&4 c) 2&3 d)2&4

Passage-5 (10 X 1 = 10 Marks)

Imagine you are driver of a runaway trolley hurtling down the tracks towards five workers who cannot hear it coming. Even if they do spot it, they won't be able to move out of the way in time. As you think about preventing this disaster, you suddenly see a side track away from the five workers. However, down this side track is one lone worker, who is as unaware as his colleagues. So, would you switch to the side track leading to one death but saving five?

This is the crux of the classic thought experiment known as the trolley dilemma. The trolley dilemma allows us to think through the consequences of an action and consider whether its moral value is determined only by its outcome. The trolley dilemma has since proven itself to be a helpful guide in understanding our moral sense. Consider now the second variation of this problem.

Imagine you are standing on a footbridge above the tracks. You can see the runaway trolley hurtling towards the same five unaware workers. There's no

side track this time. However, there is large man standing next to you on the footbridge. You're confident that his bulk would stop the trolley in its tracks. So, would you push the man on to the tracks, sacrificing him in order to stop the trolley and thereby saving five others?

The outcome of this scenario is identical to the previous one: one person dies; five people live. What do you think is the majority response this time? If a person dies in both scenarios, and both deaths directly result from an action you take, what's the difference between the two? Philosophical questions like this have real-world implications for how people behave in society, governments, science, law and even war.

Questions (10x1 mark=10 marks)

21) Why do you think the majority decline to push the large man ?

1. They feel that human life cannot be treated in this manner.
2. Majority feel that it will not help to save five lives.
3. They feel that it violates human rights.
4. Majority feel that the life of a fat man is useless.

a) 1&2 b)2&4 c)1&3 d) 1&4

22) What would be the intention and the reason of the people who decide to save the five men in all versions?

1. They decide on the basis of numbers only.
2. They would all be strict consequentialists.
3. They value the freedom and right of people to live.
4. Their choice is always based on cost benefit analysis.

a)2&4 b)1&3 c)3&4 d)1,2&4

23) In the second version, if one pushes the large fat man, the justification would be that

1. It maximizes happiness of the maximum number
2. The life of a fat man is less worthy than a healthy man.
3. One person can be sacrificed to save many lives.
4. The fat man has no individual right.

a) 1&2 b)1&4 c)2&3 d) 1&3

24) Which of the following statements are **not** true about the second version of trolley car case?

1. The trolley car can be turned on the side track in this version.
2. Majority is not as confident about saving six lives as they were in the first case.
3. Majority would push the fat man.
4. Majority would decline to save six men.

a) 1&2 b) 2&3 c) 3&4 d)1&3

25) In the first version, the majority think that
1. It is morally optional to turn
2. It is morally required to turn
3. It is immoral to turn
4. It is neither moral nor immoral to turn.

a)1 b)2 c)3 d)4

26) What are the insights from the Run way trolley car case?
1. Our automatic response is often based on unclear reasons.
2. Our mind has several moral principles which may conflict at times.
3. Emotions are a better guide than thinking in decision making.
4. There are moral standards that exert pressure on our decisions.

a)2&4 b)1&3 c) 3&4 d)1,2&4

27) The difference in the majority's response to the first and the second version is because
1. In the first version we are not concerned about saving lives
2. In the second version we are not concerned about human life
3. In the second version individual rights also becomes a factor
4. The choice is easier in the first version than the second one.

a)1&2 b)3&4 c)2&3 d)2&4

28) Which of the following is **not** a majority decision in the Trolley case?
1) Turning the trolley to the side track in the first version 2) Not turning the trolley to the side track in the first version 3) Pushing the large man in the second version 4) Not Pushing the large man in the second version

a)1&2 b)3&4 c)2&3 d)2&4

29) The trolley case is an example of a _____ experiment.
1) Real 2)Thought c) Laboratory d) possible

a)1 b)2 c)3 d)4

30) In the first version, the majority response is based only on
1) rights 2) duty 3)Results 4) Destiny

a)1 b)2 c)3 d)4

Ethics & Values: AHE 3001

Time: 1 ½ Hours **Max. Marks: 20**

Note: There are five passages in this paper. Read the passages carefully and answer the given questions. Each question is followed by multiple statements numbered 1,2,3,4. Please note that there is only ONE CORRECT ANSWER **(one among a, b, c, d)** Choose the most appropriate one. **Please ENSURE that the SET No. has been marked.**

Passage 1

A second area of meta-ethics involves the psychological basis of our moral judgments and conduct, particularly understanding what motivates us to be moral. We might explore this subject by asking the simple question, "Why be moral?" Even if I am aware of basic moral standards, such as don't kill and don't steal, this does not necessarily mean that I will be psychologically compelled to act on them. Some answers to the question "Why be moral?" are to avoid punishment, to gain praise, to attain happiness, to be dignified, or to fit in with society. One important area of moral psychology concerns the inherent selfishness of humans. 17th century British philosopher Thomas Hobbes held that many, if not all, of our actions are prompted by selfish desires. Even if an action seems selfless, such as donating to charity, there are still selfish causes for this, such as experiencing power over other people. This view is called psychological egoism and maintains that self-oriented interests ultimately motivate all human actions. Closely related to psychological egoism is a view called psychological hedonism which is the view that pleasure is the specific driving force behind all of our actions. 18th century British philosopher Joseph Butler agreed that instinctive selfishness and pleasure prompt much of our conduct. However, Butler argued that we also have an inherent psychological capacity to show kindness to others. This view is called psychological altruism and maintains that at least some of our actions are motivated by instinctive kindness.

Questions(5 x .5=2.5 marks)

1. The psychological aspect of ethics involves
   1. finding out what motivates us to be moral
   2. exploring the role of praise and punishment in ethics
   3. investigating the meaning of moral concepts
   4. discovering how human instincts and desires shape morality.

   a)1,2&3 b)2,3&4 c)1,3&4 d)1,2&4

2. How does "psychological egoism" explain human behaviour ?
   1. All human actions are selfless in nature.
   2. People are motivated to do good to others naturally.
   3. All human actions are motivated by self-interest.
   4. Even unselfish actions have some selfish motive.

   a)1&3 b)1&4 c) 2&3 d)3&4

3. Which of the following are **not** true about Psychological hedonism ?
   1. The basic motive behind all actions is fear of God.
   2. The only motive of our actions is to attain pleasure and avoid pain.
   3. The driving force behind human action is the sense of duty.
   4. It is reason that governs all human actions.

   a)1,2&3 b)2,3&4 c)1,3&4 d)1,2&4

4. The Emotivist school argues that
   1. A moral statement is an expression of rational thinking
   2. A moral statement is an expression of feelings only.
   3. A moral judgement cannot have a true or false value.
   4. Morality is only prescriptive in nature.

   a)1&3 b)1&4 c) 2&3 d)2&4

5. The rationalist school of ethics believes that
   1. Reason is a slave of passions.
   2. Reason is capable of governing our actions.
   3. Ethics is about application of logic and reason.
   4. All moral judgements are emotional reactions.

   a)1&3 b)1&4 c) 2&3 d)3&4

Passage 2

Normative ethics involves arriving at moral standards that regulate right and wrong conduct. In a sense, it is a search for an ideal litmus test of proper behaviour. The Golden Rule is a classic example of a normative principle: We should do to others what we would want others to do to us. Since I do not want my neighbour to steal my car, then it is wrong for me to steal her car. Since I would want people to feed me if I was starving, then I should help feed starving people. Using this same reasoning, I can theoretically determine whether any possible action is right or wrong. So, based on the Golden Rule, it would also be wrong for me to lie to, harass, victimize, assault, or kill others. The Golden Rule is an example of a normative theory that establishes a single principle against which we judge all actions. Other normative theories focus on a set of foundational principles, or a set of good character traits. The key assumption in normative ethics is that there is only one ultimate criterion

of moral conduct, whether it is a single rule or a set of principles. Three strategies will be noted here: (1) virtue theories, (2) duty theories, and (3) consequentialist theories.

Questions (5 x .5=2.5 marks)

6. What do you mean by Normative Ethics?
   1. the origin and meaning of ethical concepts.
   2. the principles of human conduct.
   3. the standards by which human behaviour can be measured.
   4. theories that explain how moral judgement should be made.

   a)1,2&3 b)2,3&4 c)1,3&4 d)1,2&4
7. Which of the following are **not** areas of concern for Normative Ethics?
   1. The nature of morality
   2. The meaning of moral terms and concepts.
   3. The principles on which actions can be called right or wrong.
   4. The issue of universal moral truths and the will of God.

   a)1,2&3 b)2,3&4 c)1,3&4 d)1,2&4
8. The aim of virtue theories is
   1. to judge the action on the basis of its effects
   2. to judge an action on the basis of the character of the agent
   3. to consider whether an action follows the golden mean
   4. to see whether it follows the will of God or not.

   a)1&3 b)1&4 c) 2&3 d)2&4
9. What does the "Duty theory" school of normative ethics say?
   1. Rightness of an action depends on the character of the person.
   2. The duty of a person is to follow one's heart.
   3. Performance of one's duty is the standard for judging an action.
   4. The duty in a situation does not simply depend on results of the act.

   a)1&3 b)1&4 c) 2&3 d)3&4
10. What do you understand by the "consequentialist" school of ethics?
    1. An action should be judged by its results
    2. What matters in an action is the character of the agent.
    3. The only important thing to look at is the intention of the actor.
    4. An action is right if its consequences are favourable.

    a)1&3 b)1&4 c) 2&3 d)2&4

Passage 3 (5 x .5=2.5 marks)

The field of ethics (or moral philosophy) involves systematizing, defending, and recommending concepts of right and wrong behaviour. Philosophers today usually divide ethical theories into three general subject areas: meta-

ethics, normative ethics, and applied ethics. Meta-ethics investigates where our ethical principles come from, and what they mean. Are they merely social inventions? Do they involve more than expressions of our individual emotions? Meta-ethical answers to these questions focus on the issues of universal truths, the will of God, the role of reason in ethical judgments, and the meaning of ethical terms themselves. Normative ethics takes on a more practical task, which is to arrive at moral standards that regulate right and wrong conduct. This may involve articulating the good habits that we should acquire, the duties that we should follow, or the consequences of our behaviour on others. Finally, applied ethics involves examining specific controversial issues, such as infanticide, animal rights, environmental concerns or capital punishment.

Questions: (5 x .5=2.5 marks)

11. Which of the following statements describe the field of ethics?
    1. A systematic study of concepts of right and wrong.
    2. It involves defending concepts of right and wrong behaviour.
    3. One should merely follow the manners and customs of the society.
    4. Ethics deals with recommending one form of action over another.

    a)1,2&3 b)1,3&4 c) 1,2&4 d) 1&2

12. " We should do to others what we would want others to do to us " is a rule that belongs to
    1. Meta Ethics 2. Normative Ethics 3. Applied Ethics 4. None of these

    a) 1 b)1&3 c) 2 d)None of these

13. Which among the following statements are **not** true ?
    1. The issue of nuclear war is a matter of applied ethics.
    2. The study of principles of moral actions belong to meta-ethics
    3. Moral psychology studies link between reason and emotion.
    4. Reason and arguments have little role to play in ethical judgements.

    a)1&2 b)1&3 c)3&4 d)2&4

14. How is ethics different from science ?
    1. Ethics is descriptive while science is prescriptive.
    2. Ethics is prescriptive while science is descriptive
    3. Ethics requires emotion only while science requires reason.
    4. Ethics is theoretical while science is practical.

    a)1 b)2 c)3 d)4

15. Ethics is applicable in our
    1. personal life 2. Social life 3. Professional life 3. All of these

    a) 1 b) 2 c) 3 d) 4

Passage 4 (5 x .5=2.5 marks)

The term "meta" means after or beyond, and, consequently, the notion of metaethics involves a removed, or bird's eye view of the entire project of ethics. We may define metaethics as the study of the origin and meaning of ethical concepts. Two issues, though, are prominent: (1) metaphysical issues concerning whether morality exists independently of humans, and (2) psychological issues concerning the underlying mental basis of our moral judgments and conduct. The metaphysical component of metaethics involves discovering specifically whether moral values are eternal truths that exist in a spirit-like world, or simply human conventions. There are two general directions that discussions of this topic take, one other-worldly and one this-worldly. Proponents of the other-worldly view typically hold that moral values are objective in the sense that they exist in a spirit-like realm beyond subjective human conventions. They also hold that they are absolute, or eternal, in that they never change, and also that they are universal insofar as they apply to all rational creatures around the world and throughout time. A different other-worldly approach to the metaphysical status of morality is divine commands issuing from God's will. God wills all moral values into existence. The second and more this-worldly approach to the metaphysical status of morality denies the objective status of moral values. Moral values, they argue, are strictly human inventions, a position that has since been called moral relativism. There are two distinct forms of moral relativism. The first is individual relativism, which holds that individual people create their own moral standards. The second is cultural relativism which maintains that morality is grounded in the approval of one's society - and not simply in the preferences of individual people. In addition to accepting relativism, this-worldly approaches to the metaphysical status of morality deny the absolute and universal nature of morality and hold instead that moral values in fact change from society to society throughout time and throughout the world.

Questions: (5 x .5=2.5 marks)

16. What does objectivism mean in meta-ethics?

1. It means that morality depends on society.
2. It says that morality changes from time to time.
3. It believes that moral values exist independent of humans
4. It believes that moral truths are universal and eternal.

a)1&2 b)2&3 c)1&4 d) 3&4

17. Which of the following is true about a this-worldly approach to ethics ?
1. It denies the universal nature of morality.
2. It does not believe that moral values change from time to time.
3. This approach believes that ethical facts are commanded by God.
4. It favours the view that moral values change from place to place.

a)1&4 b)2&3 c)3&4 d) 2,3&4

18. What do you mean by individual relativism?
1. Moral truths exist independently of humans.
2. Each person can create his own moral code.
3. It takes a this-worldly approach to ethics.
4. Ethics is a matter of individual opinion and taste.

a)1,2&3 b)2,3&4 c)1,3&4 d)1,2&4

19. What does the other-worldly approach to ethics involve?
1. This approach takes the view that ethical truths are man-made.
2. It believes that moral values are subjective.
3. The objective nature of morality is emphasized in this approach.
4. It considers moral truths to be eternal and universal.

a)1&2 b)3&4 c)2&3 d)1&4

20. The difference between right and wrong according to the cultural relativist depends on
1. the attitudes of individuals.
2. the difference between various societies and their practices
3. the difference in the environmental and climatic conditions.
4. the view of morality held by the majority in a society.

a)1&3 b)1&4 c) 2&3 d)2&4

Passage-5 (10 X 1 = 10 Marks)

Imagine you are driver of a runaway trolley hurtling down the tracks towards five workers who cannot hear it coming. Even if they do spot it, they won't be able to move out of the way in time. As you think about preventing this disaster, you suddenly see a side track away from the five workers. However, down this side track is one lone worker, who is as unaware as his colleagues. So, would you switch to the side track leading to one death but saving five? This is the crux of the classic thought experiment known as the trolley dilemma. The trolley dilemma allows us to think through the consequences of an action and consider whether its moral value is determined only by its outcome. The trolley dilemma has since proven itself to be a helpful guide in understanding our moral sense. Consider now the second variation of this problem.

Imagine you are standing on a footbridge above the tracks. You can see the runaway trolley hurtling towards the same five unaware workers. There's no side track this time. However, there is large man standing next to you on the footbridge. You're confident that his bulk would stop the trolley in its tracks. So, would you push the man on to the tracks, sacrificing him in order to stop the trolley and thereby saving five others?

The outcome of this scenario is identical to the previous one: one person dies; five people live. What do you think is the majority response this time? If a person dies in both scenarios, and both deaths directly result from an action you take, what's the difference between the two? Philosophical questions like this have real-world implications for how people behave in society, governments, science, law and even war.

Questions (10x1 mark=10 marks)

21) Why do you think the majority decline to push the large man ?

1. They feel that human life cannot be treated in this manner.
2. Majority feel that it will not help to save five lives.
3. They feel that it violates human rights.
4. Majority feel that the life of a fat man is useless.

a) 1&2 b)2&4 c)1&3 d) 1&4

22) What would be the intention and the reason of the people who decide to save the five men in all versions?

1. They decide on the basis of numbers only.
2. They would all be strict consequentialists.
3. They value the freedom and right of people to live.
4. Their choice is always based on cost benefit analysis.

a) 1,2&4 b)1&3 c)3&4 d) 2&4

23) In the second version, if one pushes the large fat man, the justification would be that

1. It maximizes happiness of the maximum number
2. The life of a fat man is less worthy than a healthy man.
3. One person can be sacrificed to save many lives.
4. The fat man has no individual right.

a) 1&3 b)1&4 c)2&3 d) 1&2

24) Which of the following statements are **not** true about the second version of trolley car case?

1. The trolley car can be turned on the side track in this version.
2. Majority is not as confident about saving six lives as they were in the first case.

3. Majority would push the fat man.
4. Majority would decline to save six men.

a) 1&3 b) 2&3 c) 3&4 d) 1&2

25) In the first version, the majority think that
1. It is morally optional to turn
2. It is morally required to turn
3. It is immoral to turn
4. It is neither moral nor immoral to turn.

a)1 b)2 c)3 d)4

26) What are the insights from the Run way trolley car case?
1. Our automatic response is often based on unclear reasons.
2. Our mind has several moral principles which may conflict at times.
3. Emotions are a better guide than thinking in decision making.
4. There are moral standards that exert pressure on our decisions.

a) 1,2&4 b)1&3 c) 3&4 d) 2&4

27) The difference in the majority's response to the first and the second version is because
1. In the first version we are not concerned about saving lives
2. In the second version we are not concerned about human life
3. In the second version individual rights also becomes a factor
4. The choice is easier in the first version than the second one.

a)1&2 b)3&4 c)2&3 d)2&4

28) Which of the following is **not** a majority decision in the Trolley case?

1) Turning the trolley to the side track in the first version 2) Not turning the trolley to the side track in the first version 3) Pushing the large man in the second version 4) Not Pushing the large man in the second version

a) 2&3 b)3&4 c) 1&2 d)2&4

29) The trolley case is an example of a _____ experiment.

1) Real 2)Thought c) Laboratory d) possible

a)1 b)2 c)3 d)4

30) In the first version, the majority response is based only on

1) rights 2) duty 3)Results 4) Destiny

a)1 b)2 c)3 d)4

Passage 1

Normative ethics involves arriving at moral standards that regulate right and wrong conduct. In a sense, it is a search for an ideal litmus test of proper behaviour. The Golden Rule is a classic example of a normative principle: We should do to others what we would want others to do to us. Since I do not want my neighbour to steal my car, then it is wrong for me to steal her car. Since I would want people to feed me if I was starving, then I should help feed starving people. Using this same reasoning, I can theoretically determine whether any possible action is right or wrong. So, based on the Golden Rule, it would also be wrong for me to lie to, harass, victimize, assault, or kill others. The Golden Rule is an example of a normative theory that establishes a single principle against which we judge all actions. Other normative theories focus on a set of foundational principles, or a set of good character traits. The key assumption in normative ethics is that there is only one ultimate criterion of moral conduct, whether it is a single rule or a set of principles. Three strategies will be noted here: (1) virtue theories, (2) duty theories, and (3) consequentialist theories.

Questions (5 x .5=2.5 marks)

1. What do you mean by Normative Ethics?
   1. the origin and meaning of ethical concepts.
   2. the principles of human conduct.
   3. the standards by which human behaviour can be measured.
   4. theories that explain how moral judgement should be made.

   a)1,2&3 b)2,3&4 c)1,3&4 d)1,2&4
2. Which of the following are **not** areas of concern for Normative Ethics?
   1. The nature of morality
   2. The meaning of moral terms and concepts.
   3. The principles on which actions can be called right or wrong.

4. The issue of universal moral truths and the will of God.

a)1,2&3 b)2,3&4 c)1,3&4 d)1,2&4

3. The aim of virtue theories is
   1. to judge the action on the basis of its effects
   2. to judge an action on the basis of the character of the agent
   3. to consider whether an action follows the golden mean
   4. to see whether it follows the will of God or not.

   a)1&3 b)1&4 c) 2&3 d)2&4
4. What does the "Duty theory" school of normative ethics say?
   1. Rightness of an action depends on the character of the person.
   2. The duty of a person is to follow one's heart.
   3. Performance of one's duty is the standard for judging an action.
   4. The duty in a situation does not simply depend on results of the act.

   a)1&3 b)1&4 c) 2&3 d)3&4
5. What do you understand by the "consequentialist" school of ethics?
   1. An action should be judged by its results
   2. What matters in an action is the character of the agent.
   3. The only important thing to look at is the intention of the actor.
   4. An action is right if its consequences are favourable.

   a)1&3 b)1&4 c) 2&3 d)2&4

Passage 2

A second area of meta-ethics involves the psychological basis of our mor judgments and conduct, particularly understanding what motivates us to b moral. We might explore this subject by asking the simple question, "Why b moral?" Even if I am aware of basic moral standards, such as don't kill ar don't steal, this does not necessarily mean that I will be psychological compelled to act on them. Some answers to the question "Why be moral?" a to avoid punishment, to gain praise, to attain happiness, to be dignified, or fit in with society. One important area of moral psychology concerns th inherent selfishness of humans. 17th century British philosopher Thom Hobbes held that many, if not all, of our actions are prompted by selfis desires. Even if an action seems selfless, such as donating to charity, there a still selfish causes for this, such as experiencing power over other people. Th view is called psychological egoism and maintains that self-oriented interes ultimately motivate all human actions. Closely related to psychologic egoism is a view called psychological hedonism which is the view th pleasure is the specific driving force behind all of our actions. 18th centu British philosopher Joseph Butler agreed that instinctive selfishness ar

C

pleasure prompt much of our conduct. However, Butler argued that we also have an inherent psychological capacity to show kindness to others. This view is called psychological altruism and maintains that at least some of our actions are motivated by instinctive kindness.

Questions (5 x .5=2.5 marks)

6. The psychological aspect of ethics involves
   1. finding out what motivates us to be moral
   2. exploring the role of praise and punishment in ethics
   3. investigating the meaning of moral concepts
   4. discovering how human instincts and desires shape morality.

   a)1,2&3 b)2,3&4 c)1,3&4 d)1,2&4
7. How does "psychological egoism" explain human behaviour ?
   1. All human actions are selfless in nature.
   2. People are motivated to do good to others naturally.
   3. All human actions are motivated by self-interest.
   4. Even unselfish actions have some selfish motive.

   a)1&3 b)1&4 c) 2&3 d)3&4
8. Which of the following are **not** true about Psychological hedonism ?
   1. The basic motive behind all actions is fear of God.
   2. The only motive of our actions is to attain pleasure and avoid pain.
   3. The driving force behind human action is the sense of duty.
   4. It is reason that governs all human actions.

   a)1,2&3 b)2,3&4 c)1,3&4 d)1,2&4
9. The Emotivist school argues that
   1. A moral statement is an expression of rational thinking
   2. A moral statement is an expression of feelings only.
   3. A moral judgement cannot have a true or false value.
   4. Morality is only prescriptive in nature.

   a)1&3 b)1&4 c) 2&3 d)2&4
10. The rationalist school of ethics believes that
    1. Reason is a slave of passions.
    2. Reason is capable of governing our actions.
    3. Ethics is about application of logic and reason.
    4. All moral judgements are emotional reactions.

    a)1&3 b)1&4 c) 2&3 d)3&4

Passage 3 (5 x .5=2.5 marks)

The term "meta" means after or beyond, and, consequently, the notion of metaethics involves a removed, or bird's eye view of the entire project of

ethics. We may define metaethics as the study of the origin and meaning of ethical concepts. Two issues, though, are prominent: (1) metaphysical issues concerning whether morality exists independently of humans, and (2) psychological issues concerning the underlying mental basis of our moral judgments and conduct. The metaphysical component of metaethics involves discovering specifically whether moral values are eternal truths that exist in a spirit-like world, or simply human conventions. There are two general directions that discussions of this topic take, one other-worldly and one this-worldly. Proponents of the other-worldly view typically hold that moral values are objective in the sense that they exist in a spirit-like realm beyond subjective human conventions. They also hold that they are absolute, or eternal, in that they never change, and also that they are universal insofar as they apply to all rational creatures around the world and throughout time. A different other-worldly approach to the metaphysical status of morality is divine commands issuing from God's will. God wills all moral values into existence. The second and more this-worldly approach to the metaphysical status of morality denies the objective status of moral values. Moral values, they argue, are strictly human inventions, a position that has since been called moral relativism. There are two distinct forms of moral relativism. The first is individual relativism, which holds that individual people create their own moral standards. The second is cultural relativism which maintains that morality is grounded in the approval of one's society - and not simply in the preferences of individual people. In addition to accepting relativism, this-worldly approaches to the metaphysical status of morality deny the absolute and universal nature of morality and hold instead that moral values in fact change from society to society throughout time and throughout the world.

Questions: (5 x .5=2.5 marks)

11. What does objectivism mean in meta-ethics?

1. It means that morality depends on society.
2. It says that morality changes from time to time.
3. It believes that moral values exist independent of humans
4. It believes that moral truths are universal and eternal.

a)1&2 b)2&3 c)1&4 d) 3&4

12. Which of the following is true about a this-worldly approach to ethics ?

1. It denies the universal nature of morality.
2. It does not believe that moral values change from time to time.
3. This approach believes that ethical facts are commanded by God.
4. It favours the view that moral values change from place to place.

a)1&4 b)2&3 c)3&4 d) 2,3&4

13. What do you mean by individual relativism?
1. Moral truths exist independently of humans.
2. Each person can create his own moral code.
3. It takes a this-worldly approach to ethics.
4. Ethics is a matter of individual opinion and taste.

a)1,2&3 b)2,3&4 c)1,3&4 d)1,2&4

14. What does the other-worldly approach to ethics involve?
1. This approach takes the view that ethical truths are man-made.
2. It believes that moral values are subjective.
3. The objective nature of morality is emphasized in this approach.
4. It considers moral truths to be eternal and universal.

a)1&2 b)3&4 c)2&3 d)1&4

15. The difference between right and wrong according to the cultural relativist depends on
1. the attitudes of individuals.
2. the difference between various societies and their practices
3. the difference in the environmental and climatic conditions.
4. the view of morality held by the majority in a society.

a)1&3 b)1&4 c) 2&3 d)2&4

Passage 4 (5 x .5=2.5 marks)

The field of ethics (or moral philosophy) involves systematizing, defending, and recommending concepts of right and wrong behaviour. Philosophers today usually divide ethical theories into three general subject areas: meta-ethics, normative ethics, and applied ethics. Meta-ethics investigates where our ethical principles come from, and what they mean. Are they merely social inventions? Do they involve more than expressions of our individual emotions? Meta-ethical answers to these questions focus on the issues of universal truths, the will of God, the role of reason in ethical judgments, and the meaning of ethical terms themselves. Normative ethics takes on a more practical task, which is to arrive at moral standards that regulate right and wrong conduct. This may involve articulating the good habits that we should acquire, the duties that we should follow, or the consequences of our behaviour on others. Finally, applied ethics involves examining specific controversial issues, such as infanticide, animal rights, environmental concerns or capital punishment.

Questions: (5 x .5=2.5 marks)

16. Which of the following statements describe the field of ethics?
    1. A systematic study of concepts of right and wrong.
    2. It involves defending concepts of right and wrong behaviour.
    3. One should merely follow the manners and customs of the society.
    4. Ethics deals with recommending one form of action over another.

    a)1,2&3 b)1,3&4 c) 1,2&4 d) 1&2

17. " We should do to others what we would want others to do to us " is a rule that belongs to
    1. Meta Ethics 2. Normative Ethics 3. Applied Ethics 4. None of these

    a) 1 b)1&3 c) 2 d)None of these

18. Which among the following statements are **not** true ?
    1. The issue of nuclear war is a matter of applied ethics.
    2. The study of principles of moral actions belong to meta-ethics
    3. Moral psychology studies link between reason and emotion.
    4. Reason and arguments have little role to play in ethical judgements.

    a)1&2 b)1&3 c)3&4 d)2&4

19. How is ethics different from science ?
    1. Ethics is descriptive while science is prescriptive.
    2. Ethics is prescriptive while science is descriptive
    3. Ethics requires emotion only while science requires reason.
    4. Ethics is theoretical while science is practical.

    a)1 b)2 c)3 d)4

20. Ethics is applicable in our
    1. personal life 2. Social life 3. Professional life 3. All of these

    a) 1 b) 2 c) 3 d) 4

Passage-5 (10 X 1 = 10 Marks)

Imagine you are driver of a runaway trolley hurtling down the tracks towards five workers who cannot hear it coming. Even if they do spot it, they won't be able to move out of the way in time. As you think about preventing this disaster, you suddenly see a side track away from the five workers. However, down this side track is one lone worker, who is as unaware as his colleagues. So, would you switch to the side track leading to one death but saving five? This is the crux of the classic thought experiment known as the trolley dilemma. The trolley dilemma allows us to think through the consequences of an action and consider whether its moral value is determined only by its

outcome. The trolley dilemma has since proven itself to be a helpful guide in understanding our moral sense. Consider now the second variation of this problem.

Imagine you are standing on a footbridge above the tracks. You can see the runaway trolley hurtling towards the same five unaware workers. There's no side track this time. However, there is large man standing next to you on the footbridge. You're confident that his bulk would stop the trolley in its tracks. So, would you push the man on to the tracks, sacrificing him in order to stop the trolley and thereby saving five others?

The outcome of this scenario is identical to the previous one: one person dies; five people live. What do you think is the majority response this time? If a person dies in both scenarios, and both deaths directly result from an action you take, what's the difference between the two? Philosophical questions like this have real-world implications for how people behave in society, governments, science, law and even war.

Questions (10x1 mark=10 marks)

21) Why do you think the majority decline to push the large man ?

1. They feel that human life cannot be treated in this manner.
2. Majority feel that it will not help to save five lives.
3. They feel that it violates human rights.
4. Majority feel that the life of a fat man is useless.

a) 1&2 b)2&4 c)1&3 d) 1&4

22) What would be the intention and the reason of the people who decide to save the five men in all versions?

1. They decide on the basis of numbers only.
2. They would all be strict consequentialists.
3. They value the freedom and right of people to live.
4. Their choice is always based on cost benefit analysis.

a)2&4 b)1&3 c)3&4 d)1,2&4

23) In the second version, if one pushes the large fat man, the justification would be that

1. It maximizes happiness of the maximum number
2. The life of a fat man is less worthy than a healthy man.
3. One person can be sacrificed to save many lives.
4. The fat man has no individual right.

a) 1&2 b)1&4 c)2&3 d) 1&3

24) Which of the following statements are **not** true about the second version of trolley car case?

1. The trolley car can be turned on the side track in this version.
2. Majority is not as confident about saving six lives as they were in the first case.
3. Majority would push the fat man.
4. Majority would decline to save six men.

a) 1&2 b) 2&3 c) 3&4 d)1&3

25) In the first version, the majority think that

1. It is morally optional to turn
2. It is morally required to turn
3. It is immoral to turn
4. It is neither moral nor immoral to turn.

a)1 b)2 c)3 d)4

26) What are the insights from the Run way trolley car case?

1. Our automatic response is often based on unclear reasons.
2. Our mind has several moral principles which may conflict at times.
3. Emotions are a better guide than thinking in decision making.
4. There are moral standards that exert pressure on our decisions.

a)2&4 b)1&3 c) 3&4 d)1,2&4

27) The difference in the majority's response to the first and the second version is because

1. In the first version we are not concerned about saving lives
2. In the second version we are not concerned about human life
3. In the second version individual rights also becomes a factor
4. The choice is easier in the first version than the second one.

a)1&2 b)3&4 c)2&3 d)2&4

28) Which of the following is **not** a majority decision in the Trolley case?

1) Turning the trolley to the side track in the first version 2) Not turning the trolley to the side track in the first version 3) Pushing the large man in the second version 4) Not Pushing the large man in the second version

a)1&2 b)3&4 c)2&3 d)2&4

29) The trolley case is an example of a _____ experiment.

1) Real 2)Thought c) Laboratory d) possible

a)1 b)2 c)3 d)4

30) In the first version, the majority response is based only on

1) rights 2) duty 3)Results 4) Destiny

a)1 b)2 c)3 d)4

Passage 1

The term "meta" means after or beyond, and, consequently, the notion of metaethics involves a removed, or bird's eye view of the entire project of ethics. We may define metaethics as the study of the origin and meaning of ethical concepts. Two issues, though, are prominent: (1) metaphysical issues concerning whether morality exists independently of humans, and (2) psychological issues concerning the underlying mental basis of our moral judgments and conduct. The metaphysical component of metaethics involves discovering specifically whether moral values are eternal truths that exist in a spirit-like world, or simply human conventions. There are two general directions that discussions of this topic take, one other-worldly and one this-worldly. Proponents of the other-worldly view typically hold that moral values are objective in the sense that they exist in a spirit-like realm beyond subjective human conventions. They also hold that they are absolute, or eternal, in that they never change, and also that they are universal insofar as they apply to all rational creatures around the world and throughout time. A different other-worldly approach to the metaphysical status of morality is divine commands issuing from God's will. God wills all moral values into existence. The second and more this-worldly approach to the metaphysical status of morality denies the objective status of moral values. Moral values, they argue, are strictly human inventions, a position that has since been called moral relativism. There are two distinct forms of moral relativism. The first is individual relativism, which holds that individual people create their own moral standards. The second is cultural relativism which maintains that morality is grounded in the approval of one's society - and not simply in the preferences of individual people. In addition to accepting relativism, this-worldly approaches to the metaphysical status of morality deny the absolute

and universal nature of morality and hold instead that moral values in fact change from society to society throughout time and throughout the world.

Questions: (5 x .5=2.5 marks)

1. What does objectivism mean in meta-ethics?

1. It means that morality depends on society.
2. It says that morality changes from time to time.
3. It believes that moral values exist independent of humans
4. It believes that moral truths are universal and eternal.

a)1&2 b)2&3 c)1&4 d) 3&4

2. Which of the following is true about a this-worldly approach to ethics ?

1. It denies the universal nature of morality.
2. It does not believe that moral values change from time to time.
3. This approach believes that ethical facts are commanded by God.
4. It favours the view that moral values change from place to place.

a)1&4 b)2&3 c)3&4 d) 2,3&4

3. What do you mean by individual relativism?

1. Moral truths exist independently of humans.
2. Each person can create his own moral code.
3. It takes a this-worldly approach to ethics.
4. Ethics is a matter of individual opinion and taste.

a)1,2&3 b)2,3&4 c)1,3&4 d)1,2&4

4. What does the other-worldly approach to ethics involve?

1. This approach takes the view that ethical truths are man-made.
2. It believes that moral values are subjective.
3. The objective nature of morality is emphasized in this approach.
4. It considers moral truths to be eternal and universal.

a)1&2 b)3&4 c)2&3 d)1&4

5. The difference between right and wrong according to the cultural relativist depends on

1. the attitudes of individuals.
2. the difference between various societies and their practices
3. the difference in the environmental and climatic conditions.
4. the view of morality held by the majority in a society.

a)1&3 b)1&4 c) 2&3 d)2&4

Passage 2

The field of ethics (or moral philosophy) involves systematizing, defending, and recommending concepts of right and wrong behaviour. Philosophers today usually divide ethical theories into three general subject areas: meta-

ethics, normative ethics, and applied ethics. Meta-ethics investigates where our ethical principles come from, and what they mean. Are they merely social inventions? Do they involve more than expressions of our individual emotions? Meta-ethical answers to these questions focus on the issues of universal truths, the will of God, the role of reason in ethical judgments, and the meaning of ethical terms themselves. Normative ethics takes on a more practical task, which is to arrive at moral standards that regulate right and wrong conduct. This may involve articulating the good habits that we should acquire, the duties that we should follow, or the consequences of our behaviour on others. Finally, applied ethics involves examining specific controversial issues, such as infanticide, animal rights, environmental concerns or capital punishment.

Questions: (5 x .5=2.5 marks)

6. Which of the following statements describe the field of ethics?
   1. A systematic study of concepts of right and wrong.
   2. It involves defending concepts of right and wrong behaviour.
   3. One should merely follow the manners and customs of the society.
   4. Ethics deals with recommending one form of action over another.

   a)1,2&3 b)1,3&4 c) 1,2&4 d) 1&2

7. " We should do to others what we would want others to do to us " is a rule that belongs to
   1. Meta Ethics 2. Normative Ethics 3. Applied Ethics 4. None of these

   a) 1 b)1&3 c) 2 d)None of these

8. Which among the following statements are **not** true ?
   1. The issue of nuclear war is a matter of applied ethics.
   2. The study of principles of moral actions belong to meta-ethics
   3. Moral psychology studies link between reason and emotion.
   4. Reason and arguments have little role to play in ethical judgements.

   a)1&2 b)1&3 c)3&4 d)2&4

9. How is ethics different from science ?
   1. Ethics is descriptive while science is prescriptive.
   2. Ethics is prescriptive while science is descriptive
   3. Ethics requires emotion only while science requires reason.
   4. Ethics is theoretical while science is practical.

   a)1 b)2 c)3 d)4

10. Ethics is applicable in our
    1. personal life 2. Social life 3. Professional life 3. All of these

    a) 1 b) 2 c) 3 d) 4

Passage 3 (5 x .5=2.5 marks)

Normative ethics involves arriving at moral standards that regulate right and wrong conduct. In a sense, it is a search for an ideal litmus test of proper behaviour. The Golden Rule is a classic example of a normative principle: We should do to others what we would want others to do to us. Since I do not want my neighbour to steal my car, then it is wrong for me to steal her car. Since I would want people to feed me if I was starving, then I should help feed starving people. Using this same reasoning, I can theoretically determine whether any possible action is right or wrong. So, based on the Golden Rule, it would also be wrong for me to lie to, harass, victimize, assault, or kill others. The Golden Rule is an example of a normative theory that establishes a single principle against which we judge all actions. Other normative theories focus on a set of foundational principles, or a set of good character traits. The key assumption in normative ethics is that there is only one ultimate criterion of moral conduct, whether it is a single rule or a set of principles. Three strategies will be noted here: (1) virtue theories, (2) duty theories, and (3) consequentialist theories.

Questions (5 x .5=2.5 marks)

11. What do you mean by Normative Ethics?
    1. the origin and meaning of ethical concepts.
    2. the principles of human conduct.
    3. the standards by which human behaviour can be measured.
    4. theories that explain how moral judgement should be made.

    a)1,2&3 b)2,3&4 c)1,3&4 d)1,2&4

12. Which of the following are **not** areas of concern for Normative Ethics?
    1. The nature of morality
    2. The meaning of moral terms and concepts.
    3. The principles on which actions can be called right or wrong.
    4. The issue of universal moral truths and the will of God.

    a)1,2&3 b)2,3&4 c)1,3&4 d)1,2&4

13. The aim of virtue theories is
    1. to judge the action on the basis of its effects
    2. to judge an action on the basis of the character of the agent
    3. to consider whether an action follows the golden mean
    4. to see whether it follows the will of God or not.

    a)1&3 b)1&4 c) 2&3 d)2&4

14. What does the "Duty theory" school of normative ethics say?
    1. Rightness of an action depends on the character of the person.
    2. The duty of a person is to follow one's heart.
    3. Performance of one's duty is the standard for judging an action.
    4. The duty in a situation does not simply depend on results of the act.

    a)1&3 b)1&4 c) 2&3 d)3&4
15. What do you understand by the "consequentialist" school of ethics?
    1. An action should be judged by its results
    2. What matters in an action is the character of the agent.
    3. The only important thing to look at is the intention of the actor.
    4. An action is right if its consequences are favourable.

    a)1&3 b)1&4 c) 2&3 d)2&4

Passage 4 (5 x .5=2.5 marks)

A second area of meta-ethics involves the psychological basis of our moral judgments and conduct, particularly understanding what motivates us to be moral. We might explore this subject by asking the simple question, "Why be moral?" Even if I am aware of basic moral standards, such as don't kill and don't steal, this does not necessarily mean that I will be psychologically compelled to act on them. Some answers to the question "Why be moral?" are to avoid punishment, to gain praise, to attain happiness, to be dignified, or to fit in with society. One important area of moral psychology concerns the inherent selfishness of humans. 17th century British philosopher Thomas Hobbes held that many, if not all, of our actions are prompted by selfish desires. Even if an action seems selfless, such as donating to charity, there are still selfish causes for this, such as experiencing power over other people. This view is called psychological egoism and maintains that self-oriented interests ultimately motivate all human actions. Closely related to psychological egoism is a view called psychological hedonism which is the view that pleasure is the specific driving force behind all of our actions. 18th century British philosopher Joseph Butler agreed that instinctive selfishness and pleasure prompt much of our conduct. However, Butler argued that we also have an inherent psychological capacity to show kindness to others. This view is called psychological altruism and maintains that at least some of our actions are motivated by instinctive kindness.

Questions

16. The psychological aspect of ethics involves
    1. finding out what motivates us to be moral
    2. exploring the role of praise and punishment in ethics

3. investigating the meaning of moral concepts
4. discovering how human instincts and desires shape morality.

a)1,2&3 b)2,3&4 c)1,3&4 d)1,2&4

17. How does "psychological egoism" explain human behaviour ?
    1. All human actions are selfless in nature.
    2. People are motivated to do good to others naturally.
    3. All human actions are motivated by self-interest.
    4. Even unselfish actions have some selfish motive.

    a)1&3 b)1&4 c) 2&3 d)3&4

18. Which of the following are **not** true about Psychological hedonism ?
    1. The basic motive behind all actions is fear of God.
    2. The only motive of our actions is to attain pleasure and avoid pain.
    3. The driving force behind human action is the sense of duty.
    4. It is reason that governs all human actions.

    a)1,2&3 b)2,3&4 c)1,3&4 d)1,2&4

19. The Emotivist school argues that
    1. A moral statement is an expression of rational thinking
    2. A moral statement is an expression of feelings only.
    3. A moral judgement cannot have a true or false value.
    4. Morality is only prescriptive in nature.

    a)1&3 b)1&4 c) 2&3 d)2&4

20. The rationalist school of ethics believes that
    1. Reason is a slave of passions.
    2. Reason is capable of governing our actions.
    3. Ethics is about application of logic and reason.
    4. All moral judgements are emotional reactions.

    a)1&3 b)1&4 c) 2&3 d)3&4

Passage-5 (10 X 1 = 10 Marks)

Imagine you are driver of a runaway trolley hurtling down the tracks towards five workers who cannot hear it coming. Even if they do spot it, they won't be able to move out of the way in time. As you think about preventing this disaster, you suddenly see a side track away from the five workers. However, down this side track is one lone worker, who is as unaware as his colleagues. So, would you switch to the side track leading to one death but saving five? This is the crux of the classic thought experiment known as the trolley dilemma. The trolley dilemma allows us to think through the consequences of an action and consider whether its moral value is determined only by its outcome. The trolley dilemma has since proven itself to be a helpful guide in

understanding our moral sense. Consider now the second variation of this problem.

Imagine you are standing on a footbridge above the tracks. You can see the runaway trolley hurtling towards the same five unaware workers. There's no side track this time. However, there is large man standing next to you on the footbridge. You're confident that his bulk would stop the trolley in its tracks. So, would you push the man on to the tracks, sacrificing him in order to stop the trolley and thereby saving five others?

The outcome of this scenario is identical to the previous one: one person dies; five people live. What do you think is the majority response this time? If a person dies in both scenarios, and both deaths directly result from an action you take, what's the difference between the two? Philosophical questions like this have real-world implications for how people behave in society, governments, science, law and even war.

Questions (10x1 mark=10 marks)

21) Why do you think the majority decline to push the large man ?

1. They feel that human life cannot be treated in this manner.
2. Majority feel that it will not help to save five lives.
3. They feel that it violates human rights.
4. Majority feel that the life of a fat man is useless.

a) 1&2 b)2&4 c)1&3 d) 1&4

22) What would be the intention and the reason of the people who decide to save the five men in all versions?

1. They decide on the basis of numbers only.
2. They would all be strict consequentialists.
3. They value the freedom and right of people to live.
4. Their choice is always based on cost benefit analysis.

a)2&4 b)1&3 c)3&4 d)1,2&4

23) In the second version, if one pushes the large fat man, the justification would be that

1. It maximizes happiness of the maximum number
2. The life of a fat man is less worthy than a healthy man.
3. One person can be sacrificed to save many lives.
4. The fat man has no individual right.

a) 1&2 b)1&4 c)2&3 d) 1&3

24) Which of the following statements are **not** true about the second version of trolley car case?

1. The trolley car can be turned on the side track in this version.
2. Majority is not as confident about saving six lives as they were in

the first case.

3. Majority would push the fat man.
4. Majority would decline to save six men.

a) 1&2 b) 2&3 c) 3&4 d)1&3

25) In the first version, the majority think that

1. It is morally optional to turn
2. It is morally required to turn
3. It is immoral to turn
4. It is neither moral nor immoral to turn.

a)1 b)2 c)3 d)4

26) What are the insights from the Run way trolley car case?

1. Our automatic response is often based on unclear reasons.
2. Our mind has several moral principles which may conflict at times.
3. Emotions are a better guide than thinking in decision making.
4. There are moral standards that exert pressure on our decisions.

a)2&4 b)1&3 c) 3&4 d)1,2&4

27) The difference in the majority's response to the first and the second version is because

1. In the first version we are not concerned about saving lives
2. In the second version we are not concerned about human life
3. In the second version individual rights also becomes a factor.
4. The choice is easier in the first version than the second one.

a)1&2 b)3&4 c)2&3 d)2&4

28) Which of the following is **not** a majority decision in the Trolley case?

1) Turning the trolley to the side track in the first version 2) Not turning the trolley to the side track in the first version 3) Pushing the large man in the second version 4) Not Pushing the large man in the second version

a)1&2 b)3&4 c)2&3 d)2&4

29) The trolley case is an example of a _____ experiment.

1) Real 2)Thought c) Laboratory d) possible

a)1 b)2 c)3 d)4

30) In the first version, the majority response is based only on

1) rights 2) duty 3)Results 4) Destiny

a)1 b)2 c)3 d)4

C. Anna and Michael studied together, but Anna is little prepared.
D. Anna and Michael studied together, but Anna is the less prepared.
E. Anna and Michael studied together, but Anna is so prepared as Mini.

32. A. The vase that Rishu cracked was more unique.
B. The vase that Rishu cracked was fairly unique.
C. The vase that Rishu cracked was almost unique.
D. The vase that Rishu cracked was very unique.
E. The vase that Rishu cracked was unique.

Read the passages carefully and answer the questions that follow them. (Q 33-36 & 37-40).

India is a secular, democratic nation. This implies that every religion is treated equally and at par with every other religion. No religion is accorded any preferential treatment of any kind. All citizens are also free to practice, preach or profess any religion of their choosing. The state does not have a unified or homogeneous religious following

This unique characteristic of India ensures its unity in diversity. India has been the birthplace of several religions and is the land where all these religions - such as Hinduism, Christianity, Buddhism, Sikhism, Zoroastrianism, Jainism and so on exist simultaneously, peacefully and harmoniously.

But, some anti-social elements have interpreted the sanctity of religions in a twisted way. No religion preaches violence or rioting. All the religions are but various ways to reach the Supreme Being, they are paths which lead to the ultimate truth and salvation, though we refer to the destination by various names such as Jesus, Krishna, Buddha. Allah and so on. It is important to realize that in order to ensure a peaceful mosaic of cultural distinctness, the path of non-violence or ahimsa, as given by the Father of the nation, must be followed unwaveringly.

God created man in his own image. Hence, it follows naturally that there is some divinity within all human beings. Thus, to kill and murder in the name of religion is blasphemy. Only once the religious fanatics understand this, will there be perpetual peace in the land.

33. What is meant by the term "Secular"?
A. It is a unique characteristic of India.
B. To live peacefully
C. One religion is given preferential treatment over other
D. Secular - there is no state religion, all religions enjoy equal importance.
E. Both A. and B.

34. What is special about India's association with religion?
A. It is the birthplace of religions where one religion displaces the other.
B. Some people have interpreted religion for their own gains.
C. Religions are use to kill and murder people.
D. India has been the birthplace of several religions and here, all of them co-exist harmoniously.
E. None of the above

35. Why are human beings divine?
A. Because they follow religions originated in India.
B. Because they pray and do good to their fellow beings.
C. Because India is a secular country.
D. Because God created man in his own image.
E. Both A. and B.

36. How can all religions co-exist peacefully?
A. By according preferential treatment to some religions
B. By showing all religions originated in India
C. By showing that all religions are ways to reach the God
D. By adopting the path of non-violence or ahimsa
E. Both C. and D.

The Mona Lisa was one of Leonardo da Vinci's favourite paintings, and he carried it around with him until he died. Today it is regarded as the most famous painting in the world, and is viewed by thousands of people annually. Who is this painted figure? Many suggestions have been made, and the most likely candidate is Lisa Gherardini, the wife of a Florentine silk merchant.

Another more likely, but popular theory, is that the painting was a self-portrait. There are certainly similarities between the facial features of the Mona Lisa and the artist's self-portrait painted many years later. Could this be the reason for Vinci giving the portrait such an enigmatic smile?

Today, the Mona Lisa looks rather sombre, in dull shades of brown and yellow. This is due to layer of varnish covering the paint, which has yellowed over the years. It is possible that the painting was once brighter and more colourful than it is now.

The Mona Lisa was stolen from the Louvre in 1911, by a former employee who believed that the painting belonged in Italy. The thief walked out of the gallery with the picture underneath his painter's smock. He was apprehended by the police two years later and the painting was returned to the Louvre, where it is placed even today.

37. The reason for Vinci giving the portrait an enigmatic smile is because:
A. There are similarities between the painting and the artist's self portrait.
B. It is a portrait
C. It is the wife of the silk merchant
D. None of the above
E. All of the above

38. Which is least likely true about the painting?
A. It is a self portrait of the painter
B. It is a portrait of Lisa Gherardini
C. It is Da Vince's Portraying himself
D. None of the above
E. Both A. and C.

39. Why do you think it is possible that the painting was once brighter and more colourful than it is now?
A. Due to layer of varnish covering the paint
B. Because it was stolen
C. Because of its dull shades of brown and yellow
D. None of the above
E. Both A. and C.

40. The Mona Lisa looks somber because:
A. It is old
B. Of its dull shades of brown and yellow
C. Of its layer of varnish covering the paint
D. All of the above
E. Only B. and C.
