Course Name: English For Professional Purposes I

Course Outcome

CO1- create structurally effective, grammatically accurate and contextually appropriate written and spoken pieces for communication both independently and collaboratively.

CO2-display competence in all aspects of language learning not limited to listening, speaking, reading and writing.

CO3-develop independent perspectives and points of view and express them in a cohesive and meaningful way.

CO4-produce a repertoire of register-specific and academic vocabulary appropriate in both oral and written communication.

CO5-use language as an effective tool of communication for various contexts in both academic and professional setting.

No.	Detail of Question	Mark	CO	BL	KL
1	i-Identify the grammatical function of the word fast in each of the following sentences 1- By the time I got home, the children were already fast asleep. A. Noun B. Verb C. Adverb D. Preposition 2- Some prisoners began a fast to protest against the appalling conditions A. Verb	4	1	A	F

B. Adjective
C. Noun
D. Interjection

i-Kelly has great confidence _____ her children's ability.
Choose the correct preposition.
A. on
B. at
C. for
D. in

iii. Unfortunately, many online courses do not provide students _____ the basic skills they need.
A. with
B. for
C. on
D. in

iv. They hope to can arrive before the start of the conference.
Identify the unnecessary word in the sentence and its part of speech.
A. can- linking verb
B. to- infinitive
C. the (second) – Definite article
D. can - Auxiliary Verb

v. J: I don't have any money.
K: I don't have no money.
L: I don't have money.
The grammatically correct sentences are:
A. J and K
B. K and L
C. J and L
D. J, K and L

vi. Leap year falls in _____ forth year.
A. Each
B. Every
C. One

51/159

	D. Any vii. He showed _____ concern for his nephew. A. the little B. a few C. little D. a little viii. Whether I shall turn out to be the hero of my own life, or whether that station will be held by anyone else, _____ pages must show. A. these B. this C. none D. third ix. _____truth must be spoken. A. a B. the C. no article D. Both A and B. x.In which year were both these articles circulated to all the students? Identify the determiners. A. to, all, these, both. B. both, the, all, in. C. to, year, all, the. D. these, the, both, all xi. Linear communication is _____ one-way process conducted in ____ straight line towards ____ main point. Fill in the blanks with correct determiners. A. a, the, the B. the, a, a C. a, the, a D. a, a, the xii. Most men and women will grow up to love _____				

servitude and will never dream of revolution.

Fill in the blank with the correct determiner.

A. our
B. there
C. their
D. Many

xiii-The manager said to me, "Complete it by tomorrow."

A. The manager requested me to complete it by tomorrow.
B. The manager instructed me to complete it by the next day.
C. I was ordered by the manager to complete the work by the next day.
D. The manager ordered me to complete the work by the next day.

xiv- J) Today it was first time we play such games.
k) Bacteria can kill you into a few days.
L) I am leaving a call at 10:00 AM.

The grammatically correct sentence is:

A. J and K
B. K and L
C. J and L
D. None of the above

xv- J) I will buy some mangoes.
K) I will not buy some mangoes.
L) A little knowledge is a dangerous thing.
M) A darkest cloud has a silver lining.

Which of the following sentences have the correct use of determiners?

A. J and L only
B. K, L and M are correct
C. Only J is correct
D. Only M is correct

xvi- He gave a talk _____ the causes of Dengue.

A. on

	B. for C. at D. of				
2	i He is an *absolutely honest* politician. A. Noun Phrase B. Prepositional Phrase C. Adjective Phrase D. Adverb Phrase ii.*In the realm of quantum mechanics*, researchers delve into the mysteries of subatomic particles. A. Prepositional Phrase B. Verb Phrase C. Adverb Phrase D. Independent Clause iii. The arrival *of the train* has been delayed. A. Adverb Phrase B. Prepositional Phrase C. Noun Phrase D. Verb Phrase iv. *All my sons* are good football players. A. Noun Phrase B. Adjective Phrase C. Adverb Phrase D. Verb Phrase v. It *has been raining* continuously for the last seven days. A. Verb Phrase B. Adverb Phrase C. Adjective Phrase D. Noun Phrase vi. The men in the red scarves dance *quite merrily* in the sun. A. Verb Phrase B. Noun Phrase C. Adverb Phrase D. Adjective Phrase vii.The people look solemn, yet they go to work every day. A. Independent Clause followed by a Dependent Clause. B. Dependent Clause followed by an Independent Clause. C. 2 Independent Clauses	4	1	U	F

D. 2 Dependent Clauses

viii. *Although the train arrived on time*, we still missed it.

A. Dependent Clause
B. Independent Clause
C. Prepositional Phrase
D. Verb Phrase

ix. Jane's reputation as a/an _____ grew as she consistently prioritized her own needs over those of her colleagues.

A. egoist
B. versatile
C. flamboyant
D. selfish

x. Before responding, he took a moment to _____, the impact of his words on the conversation.

A. contemplate
B. introspect
C. adapt
D. accustom

xi. When choosing mutual funds, individuals often prefer those with a ____ history of reliable returns and performance.

A. bankrupt
B. bankable
C. prominent
D. amateur

xii. The old computer system became _____ after the company upgraded to the latest technology.

A. famous
B. redundant
C. obsolete
D. obliterate

xiii. The Indian Army _____ INS Viraat in the year 2017.

A. decommissioned
B. simulate
C. reinstitute
D. rehabilitate

xiv. The math _____ effortlessly solved complex problems that left even seasoned mathematicians impressed.

A. novice
B. servile

	C. gifted D. prodigy xv. The jury decided on the capital punishment _____ A. impromptu B. solely C. unanimously D. servile xvi. The _____ of the situation was that the more she tried to control time, the more it seemed to slip away from her grasp. A. paradox B. agenda C. veteran D. fanciful				
3	i. Rewrite the following *para* to make it coherent. "Limited investment in the housing sector makes it practically impossible to allocate sufficient resources for urban dwellers' housing needs. A high rate of urban population growth has increased the country's needs for housing. A small group of city officials has laid out a new plan to combat the crisis. A solution to the housing-shortage problem is a vital policy issue here. The housing problem has grown in the last twenty years." ii. Fill in the blanks with the most suitable transitions from the list. Use each transition only once: in spite of, thanks to, although, similar to, like, also, in addition to, whereas, compared to, A._____ we have scientific evidence that women should not smoke when they are pregnant, many future mothers ignore this danger. These mothers endanger the physical health of their babies. B-_____, they could be contributing to even more problems in the future. C- _____ the known problems, recent studies have linked mothers' smoking during their pregnancy with sons who go on to become criminals. Researchers in Finland followed over 5000 males and their mothers from the time the mothers were six months pregnant until the young men	2+2	2	A	C

56/159

	were 28 years old. D- _____ sons whose mothers did not smoke during pregnancy, those young men whose birth mothers did smoke were more than twice as likely to commit criminal acts. The researchers theorized that smoking during pregnancy may alter the chemical balance in the baby's brain.				
4	Read the following passages and answer the questions that follow: About once in every seven years, the ocean surface off the coast of Peru warms up. This cuts the normal enriching of nutrient-rich cold water. Plankton production is drastically reduced. This phenomenon, known as El Nino (the child) because it starts during the Christmas season, usually lasts for up to a year. Occasionally, it goes on for long. Three times this century, it has persisted into a third year. The latest of these prolonged episodes have been blamed for much more than its effect on the Peruvian fishery. It certainly seems to have played a part in droughts in normally humid Indonesia as well as those that brought catastrophic fires to the outskirts of Sydney. It has been blamed for storms and landslides in coastal regions of Peru and Equator and is associated with drought in north-eastern Brazil. Its influence may stretch as far as western Europe where the recent winter brought heavy rainfall and flooding. El Nino is not the only ocean phenomenon to affect the weather. To understand how this might be done, it is useful to think about how the weather is forecast and about what makes it predictable. Weather forecasting uses two types of techniques, both of which rely on observations of what is going on at and shortly before the time of the forecast. To supply this information, national authorities operate extensive land, sea and air based observation networks. These are coordinated under the United Nations World Meteorological Organisation. There is an effective and almost instantaneous worldwide exchange of the information gathered. The first, classical forecasting method compares the set of observations with experience and bases the forecast on what has happened in the past from a similar starting point. The second, only possible since the advent of fast computers, applies the laws of physics through a numerical model of the atmosphere to	4	2	U	F

predict how the weather will develop from the observed starting point. This method is the basis of modern weather forecasting. But neither method will produce useful predictions for more than a few days ahead. This is because the behaviour of the atmosphere is governed in the medium term by energy exchanges with the land and ocean. The latter is much more important as the sea surface stores energy which it exchanges with the atmosphere in a surface layer 100 m or so thick. The energy storage capacity of the layer is many times greater than that of the whole atmosphere. This had prompted the suggestion that longer term forecasting might be practicable if a coupled computer model of the atmosphere and ocean could be constructed.

A great deal of research has been put into this with some success but progress has been limited by two factors. The first is that coupled ocean-atmosphere models require enormously greater computing capacity than is provided even by the super computers used in weather forecasting. The second is that not enough is known about the state of the ocean at any given time - there is no global observation network as there is for the atmosphere–or about the processes that govern the interactions. When these limitations have been overcome, it seems likely that coupled models will permit prediction of such climatological factors as frequency and intensity of rainfall for seasons and perhaps years ahead.

In the meantime, climatologists have begun to be able to predict the onset and consequences of phenomena such as El Nino using techniques like those used in the classical weather forecasting method. These examine the condition of the ocean at a given instant and, by comparison with past experience, attempt to predict in a statistical way how the ocean or the atmosphere—and hence the climate—are likely to behave for the next few months. As with the weather forecasts, this depends critically on the existence of a bank of past experience, in this case, particularly of sea-surface temperatures. A key contribution to this, recently completed by the UK Meteorological Office, has been the analysis of many millions of sea-surface temperatures. This has led to the publication of the first globally complete monthly fields of sea-surface temperature from 1871 to the present day. This

58/159

type of information may be used to predict events such as El Nino.

Various scientific groups have tried to do so with varying degrees of success. In the meantime, Meteorological Office scientists have also compared the temperature fields statistically with climatological factors. They have shown that, particularly in the tropics, there are significant correlations between sea-surface temperature anomalies and climate statistics. This does not necessarily mean that one causes the other, though some degree of direct linkage seems likely. But it does open up the possibility of predicting short-term climate fluctuations.

The UK Meteorological Office has approached this by a rigorous comparison between rainfall statistics in the Nordeste area of Brazil, whose crops can be seriously affected by drought, with contemporaneous sea-surface temperatures world-wide. This has revealed significant links, verified over the period 1901-85, between rainfall and sea-surface temperatures in the north and south tropical Atlantic and the western tropical Pacific, the area most strongly affected by El Nino.

1. Which of the following is NOT TRUE about 'El Nino'?
(1) It is the most important ocean phenomenon to affect a region's weather pattern.
(2) There seems to be a statistical link between sea-surface temperatures and the occurrence of El Nino.
(3) The consequences of El Nino can vary with the geographical position of the affected area.
(4) As El Nino results in higher oceanic temperatures, the number of fish comes down due to lower plankton production.

2. Which of the following data will be helpful in the prediction of El Nino?
(1) Daily temperatures recorded in coastal areas.
(2) Daily atmospheric pressure levels for one previous year.
(3) A data bank of sea-surface temperatures.
(4) All of the above

3. The frequency of occurrence of El Nino, approximately, is
(1) once every year
(2) about three times in a century
(3) once in three years

	(4) once every seven years 4. The passage talks about (1) the factors that can trigger phenomena like El Nino. (2) the advances being made in the field of meteorological predictions through a greater study of ocean-atmosphere interactions. (3) phenomenon like El Nino that affect the planet's climate. (4) the predisposing factors that result in El Nino and the ways to construct them.				
5	Assuming yourself participating in a debate write four arguments in favour or against on one of the following topics- i-Robots increase people's quality of life. ii-Modern parenting has made kids impolite and less developed.	4	3	E	C

6	i-What tips will you give to your friend about proper use of eye contact in Presentation? Choose the correct option- 1. Deciding it was time to sit down and begin a novel, the would-be writer spent the first several hours deciding upon a suitable ..... A.extempore B.nom de plume C.ad hoc D.vis à vis 2. Central High School is my ..... A. au revoir B. vide C. sangfroid D. alma mater 3. He has a ..... of knowledge when it comes to human psychology.	1+2	5,4	U,R	F

	A. plethora B. ad hoc C. pro bono D. phobia 4. The restaurant had a delightful ..... A. gratis B. status quo C. ambiance D. gourmet				
7	i. Having encountered several challenges, they _____ unchartered territories now. a. hated to explore b. explore c. are exploring d. hate Choose the most suitable option: A. only a B. only d C. Both c and d D. Both b and d ii. The project _____ undergone significant modifications. Use the most suitable primary auxiliary verb: A. is B. is doing C. has D. was iii. He _____ have completed the task by now. Choose the least suitable modal auxiliary verb: A. ought to B. must C. should D. can iv. _____ a marathon requires months of dedicated training. Use a non-finite verb as a noun: A. Winning	3	1	A	F

61/159

	B. Run for C. Participating D. Training v. The decision _____ these changes was not taken lightly. Choose the most appropriate option: A. was taken to implement B. is to implement C. to implement D. implement vi. I need to go to the doctor as I think that I might have a chronic disease. Which of the following verbs is NOT used in the sentence given below? A. primary auxiliary verb B. main verb C. semi modal auxiliary verb D. non-finite verb				
8	**Read the following passage. Identify sentence type-** i-These interfaces accept requests written in English or some other language and attempt to understand them. ii. A natural language interface usually has its own schema, which is similar to the database conceptual schema, as well as a dictionary of important words. iii. The natural language interface refers to the words in its schema, as well as to the set of standard words in its dictionary, to interpret the request. iv. If the interpretation is successful, the interface generates a high-level query corresponding to the natural language request and submits it to the DBMS for processing; otherwise, a dialogue is started with the user to clarify the request. v. The capabilities of natural language interfaces have not advanced rapidly. vi. Today, we see search engines that accept strings of natural language (like English or Spanish) words and match them with documents at specific	3	1	U	F

62/159

	sites (for local search engines) or Web pages on the Web at large (for engines like Google or Ask). i A. Simple B. Complex C. Negative D. Compound ii. A. Simple, complex B. Complex, compound C. Simple D. Compound, complex iii. A. Simple, complex B. Complex, compound C. Simple D. Compound iv A. Simple, complex B. Complex, compound C. Simple D. Compound, complex v. A. Simple B. Complex C. Complex, Compound D. Compound vi A. Simple, complex B. Complex, compound C. Simple D. Compound, complex				
9	Read the following passage and answer the questions that follow- In the forsaken outskirts of the bustling city, where dim lights flicker and children fear to tread at night, a mysterious figure appeared. It was the detective known for solving	3	1	A	F

63/159

	perplexing cases. The police department was instructed to carefully examine the evidence and submit a preliminary investigation report. The detective could help piece together fragments of a puzzle that seemed unsolvable. The witnesses whispered about the rumours surrounding the young man's demise as the detective hurriedly typed something on her phone. Having hurt her foot in the day, the detective struggled to jump over the stretched wires. The pine trees stood alongside the road like students lined up in a parade but they appeared formidable, not fragile. A suffocating smell filled the air as the night wore on and the city held its breath awaiting the revelation of the truth. In the above paragraph, identify the following: i. Two past participles used as adjectives ii. a. One present participle used as a verb, b. One perfect participle iii. a. One linking verb, b. One modal auxiliary verb iv. Two transitive verbs along with their objects v. Two intransitive verbs vi. one bare infinitive and one split infinitive				
10	Frame sentences as directed- i- Inquire about the objective of your project. ii- Show surprise on receiving an award. iii-Share any experience in a complex sentence. iv-Instruct your friend the way to the hostel in simple sentence. v-Congratulate your friend on his placement. vi-Write a declarative sentence about GLA University.	3	2	C	F

Marks

No.	Detail of Question	Marks	CO	BL	KL
11	The sentences (labeled 1, 2, 3, 4, 5) given in this question, when properly sequenced, form a coherent paragraph. Each sentence is labeled with a number. Decide on the proper order for the sentences and key in this sequence of five numbers as your answer. i- 1. The implications of retelling of Indian stories, hence, takes on new meaning in a modern India. 2. The stories we tell reflect the world around us. 3. We cannot help but retell the stories that we value — after all, they are never quite right for us — in our time. 4. And even if we manage to get them quite right, they are only right for us — other people living around us will have different reasons for telling similar stories. 5. As soon as we capture a story, the world we were trying to capture has changed. A. 25341 B. 32145 C. 12345 D. 42315 ii- 1. People with dyslexia have difficulty with print-reading, and people with autism spectrum disorder have difficulty with mind-reading. 2. An example of a lost cognitive instinct is mind-reading: our capacity to think of ourselves and others as having beliefs, desires, thoughts and feelings. 3. Mind-reading looks increasingly like literacy, a skill we know for sure is not in our genes, since scripts have been around for only 5,000-6,000 years. 4. Print-reading, like mind-reading varies across cultures, depends heavily on certain parts of the brain, and is subject to developmental disorders. A. 3214 B. 2341 C. 4321 D. 1234 iii- 1. If you've seen a little line of text on websites that says something like "customers who bought this also enjoyed that" you have experienced this collaborative filtering firsthand.	5	2	U	C

2. The problem with these algorithms is that they don't take into account a host of nuances and circumstances that might interfere with their accuracy.
3. If you just bought a gardening book for your cousin, you might get a flurry of links to books about gardening, recommended just for you! – the algorithm has no way of knowing you hate gardening and only bought the book as a gift.
4. Collaborative filtering is a mathematical algorithm by which correlations and cooccurrences of behaviors are tracked and then used to make recommendations.

A. 3214 B. 4123 C. 1234 D. 2314

iv-

1. It advocated a conservative approach to antitrust enforcement that espouses faith in efficient markets and voiced suspicion regarding the merits of judicial intervention to correct anticompetitive practices.
2. Many industries have consistently gained market share, the lion's share – without any official concern; the most successful technology companies have grown into veritable titans, on the premise that they advance 'public interest'.
3. That the new anti competitive risks posed by tech giants like Google, Facebook, and Amazon, necessitate new legal solutions could be attributed to the dearth of enforcement actions against monopolies and the few cases challenging mergers in the USA.
4. The criterion of 'consumer welfare standard' and the principle that antitrust law should serve consumer interests and that it should protect competition rather than individual competitors was an antitrust law introduced by, and named after, the 'Chicago school'.

A.1234 B. 4123 C. 3124 D. 4321

v-

1. The woodland's canopy receives most of the sunlight that falls on the trees.
2. Swifts do not confine themselves to woodlands, but hunt wherever there are insects in the air.
3. With their streamlined bodies, swifts are agile flyers, ideally adapted to twisting and turning through the air as they chase flying insects – the creatures that form their staple diet.

	4. Hundreds of thousands of insects fly in the sunshine up above the canopy, some falling prey to swifts and swallows. A.1234 B. 1324 C. 4321 D. 1432				
12	Rewrite the following sentences in minimum possible words so as to make them as brief as possible- i. As of 4 August, students will be selected using processes which have been created in accordance with legal requirements. These processes will be used along with our diversity strategy and all of its relevant policies about student selection. ii. The Passport Office is replacing free of charge until the dates specified any current passport lost, damaged or destroyed as a result of the recent floods. Eligible applicants should contact the Passport Information Service (PIS) on 998 9988 for further information. iii.If an agency or organization breaches the privacy principles, our office may investigate the matter. Individuals can also make a privacy complaint to us about an agency or organisation if they think their information has been mishandled. iv. Aid Agency works to bring immediate assistance to people whose lives have been devastated by natural disasters and conflict. Through our work we provide emergency relief in the initial stages of the disaster, and we also provide continued support to affected communities as they rebuild and rehabilitate towards a sustainable future. v. It is apparent that the tragedy could have been avoided if the company had talked to workers regarding hazards which existed in the workplace.				
13	You have to give a presentation analyzing the data on the topic 'Is Hybrid Work Sustainable?' Prepare a questionnaire for the same. (Minimum 5 questions & personal information detail)	5	5	An	C
