565350 (21)

Course Name: English for Professional Purposes I

Course Outcome

CO1 create structurally effective, grammatically accurate and contextually appropriate written and spoken pieces for communication both independently and collaboratively

CO2 display competence in all aspects of language learning not limited to listening, speaking, reading and writing

CO3 develop independent perspectives and points of view and express them in a cohesive and in a meaningful way

CO4 produce a repertoire of register-specific and academic vocabulary appropriate in both oral and written communication

CO5 use language as an effective tool of communication for various contexts in both academic and professional setting, enhance articulation skills through improved pronunciation and acquire comprehensive presentation skills

Printed Pages: 12 **University Roll No. .....**

End Term Examination, Odd Semester 2024-25

B.Tech (All Branches), II Year, III Semester

BELH 2003 : English for Professional Purposes I

Time: 3 Hours **Maximum Marks: 50**

Instructions: *Manage your time effectively.*

Section – A

*Attempt **All** Questions* 4 X 5 = 20 Marks

Q	Detail of Question	Marks	CO	BL	KL
1	**A. Which sentence contains a subordinate clause?** i) The museum closes at sunset everyday but the shop nearby stays open. ii) She has completed her homework early since she wants to go home. iii) They have been out walking since the evening. iv) The old building needs renovation so they have closed it for visitors. **B. Identify the type of clause in the italicized part:** The girl **who won the championship celebrated enthusiastically** after the game was over. i) A principal clause ii) A relative clause iii) An adverbial clause iv) A noun clause **C. Identify the type of phrase embedded in the italicized part:** *Walking slowly through the dense forest,* we spotted several rare birds. i) Verb phrase ii) Participle phrase iii) Prepositional phrase iv) Adverb phrase **D. Replace the phrase "with exceptional skills" with a suitable clause in the sentence below:** The athlete with exceptional skills won the gold medal. i) who had exceptional skills ii) when she showed skills iii)where skills were shown iv) of which skills were exceptional **E. Identify the type of phrase(s) in the italicized part:** *The bright students who usually always submitted their assignments* before the deadline did not deliver the results as expected: i) A noun phrase containing a noun clause ii) A noun phrase containing a verb phrase iii) A noun phrase containing an adjective clause iv) A noun phrase containing an adverb phrase **F. Which sentence contains a principal clause with a noun clause?** i) That woman only speaks when she is angry. ii) All the members of the audience wondered what he would say. iii) The yellow book that I bought is expensive. iv) The gentlemen with big hats arrived after the movie started. **G. The workshop was designed to provide teachers _____.**	4	1	A	F

	i)in innovative teaching strategies ii)for innovative teaching strategies iii)by innovative teaching strategies iv)with innovative teaching strategies **H. Identify the function of the group of words in bold in the noun phrase in following sentence-** Apollo, a stray dog ***living at the Giza pyramids***, became an overnight sensation after a video of him scaling the great pyramid of Khafre went viral. a) Head word of noun phrase b) Premodifier c) Postmodifier d) A and c both		
2	**"The Future of Space Exploration: Opportunities and Challenges"** Write a detailed paragraph on the above topic. Ensure your paragraph: i. begins with a topic sentence introducing the significance of space exploration for humanity. ii. highlights at least two key opportunities, such as technological advancements or the potential for resource discovery. iii. discusses at least one major challenge, such as funding, ethical concerns, or technological limitations. iv. concludes with a reflection on how space exploration could shape the future of human civilization.	4	
3	*The four sentences (labelled i, ii, iii, and iv) given in this question, sequence the sentences to form a coherent paragraph:* **Question A:** 2314 i. Self-management is thus defined as the 'individual's ability to manage the symptoms, treatment, physical and psychosocial consequences and lifestyle changes inherent in living with a chronic condition'. ii. Most people with progressive diseases like dementia prefer to have control over their own lives and health-care for as long as possible. iii. Having control means, among other things, that patients themselves perform self management activities. iv. Supporting people in decisions and actions that promote self-management is called self management support requiring a cooperative relationship between the patient, the family, and the professionals. **Question B:** 3421 i. It is difficult to represent oneself as genuinely representing the common interest in an environment of general distrust. ii. However, this is not a promising strategy in certain political climates. iii. In a democratic culture, candidates who represent common interest would theoretically be the most attractive. iv. One way for political candidates to address the widespread disgust with hypocrisy is to represent themselves as champions of democratic values. **Question C:** 4321 i. First, the colonisers used clothes to impose the authority of 'western' ways; later, local people used indigenous clothes to resist that imposition. ii. Clothes became a weapon in the struggle between colonisers and colonised. iii. Acquisition of a new 'modern' cultural identity, along with indigenous languages, local dress codes were suppressed as if the acquisition of a new visible identity worn on the body ensured the	4	

	iv. The integrity of non-western techniques of dress and decoration was demonstrated in countless instances of colonisation— dress codes were often treated as integral to the process of subjugation. **Question D:** 3 2 1 4 i. Thankfully, creating a backup doesn't have to be difficult or time-consuming, and if you set aside a little time for it now, you can automate the process so you never have to worry about it again. ii. It would only take one hardware failure, theft, and accident or ransomware attack for you to lose access to all the important files on your PC. iii. Backing up your PC is a very important task, but one that's very easy to put off. iv. There are free and premium versions of the restoring software available, but the free one will be enough for most standard home users.				
4	**A. Identify the types of finite verbs in the following sentence:** *In June, violence had spread to new areas such as Jiribam, which had largely remained unaffected by the ethnic violence in the past year.* i)had- main verb ii)spread- main verb iii)spread and remained- main verb iv)had- auxiliary verb, spread and remained- main verb **B. Identify the finite verb in the following sentence:** *Despite his best efforts, he failed to meet the deadline.* i) Despite ii) efforts iii) failed iv) to meet **C. Which of the following sentences contains an action verb?** i) Running in the park is relaxing. ii) The manager is reviewing the report. iii) To complete the project was his goal. iv) Having completed the task, she was happy. **D. Fill in the blanks with suitable verb forms-** In recent years, the field of robotics has_____(i) tremendous growth. Scientists and engineers are working tirelessly to develop machines that can replicate human intelligence and skills. Many researchers _____ (ii) that artificial intelligence (AI) will play a significant role in shaping the future of industries. While some robots are _____ (iii) to perform specific tasks, others are designed to learn and adapt to new environments. For instance, self-driving cars _____ (iv) on sensors and AI algorithms to navigate roads safely. However, ethical concerns about automation replacing human labor _____also_____(v), leading to debates across various sectors. i. a) saw. b) seen c) see d) sees ii. a) believe b) believes c) believed d) will believe iii. a) programming b) programmed c) programme d) been programmed iv. a) relies b) relied c) have relied d) rely v. a) have emerged b) is emerging c) have emerging d) being emerge	4	1	A	F
	Develop a Mind-Map using your ideas and concepts to develop the topic 'Proper Time Management.' I. Using the title connect your thoughts II. use your own design for branching and general structure III. Prepare 3 main and 3 sub-branches **Or**	4	5	An	M

5	Space exploration has always sparked a debate between its necessity and its cost. A survey conducted among 50 individuals revealed that the majority perceive space missions as a waste of money rather than a need of the hour. Based on this finding, prepare a detailed presentation addressing the following: *I. Analyze the survey results and their implications.* *II. Discuss the arguments for and against space missions, incorporating economic, scientific, and societal perspectives.* *III. Propose ways to bridge the gap between public perception and the potential benefits of space exploration.* Your presentation should include relevant data visualization (charts/graphs) and reflect critical thinking on the subject.	

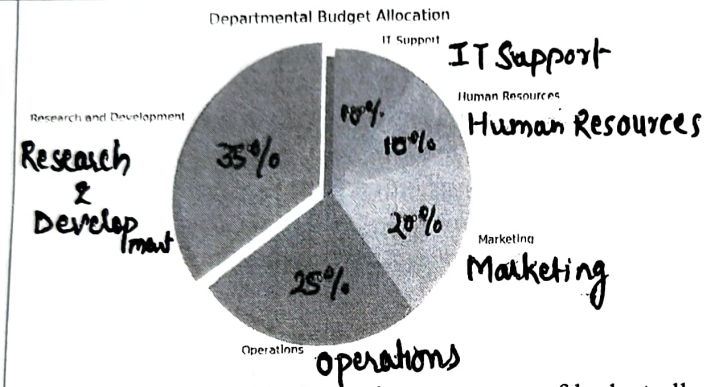

Section – B

*Attempt **All** Questions* 3 X 5 = 15

No.	Detail of Question	Marks
6	**A. Your manager tells you, "Let's break the ice with the new client before discussing the project." What does "break the ice" mean in this context?** i) To start speaking ii)Create a friendly atmosphere to ease communication iii) Disagree with the client. iv) Ignore the initial discussion. **B. A colleague mentions, "We need to ensure we are all on the same page before the presentation." What does "on the same page" mean?** i) Using the same visual aids. ii) Agreeing and understanding the details clearly. iii) Following the same book for guidelines. iv) Working on separate tasks simultaneously. **C. If someone "throws in the towel," what are they doing?** i) Giving up ii) Making an effort iii) Winning a fight iv) Starting fresh **D. During a meeting, someone says, "This idea is a win-win for both teams." What does "win-win" imply?** i) A situation where both sides benefit. ii) A competition where both teams win equally. iii) A solution that is only temporary iv) A project that is likely to fail. **E. The term "Think outside the box" encourages:** i) Lateral thinking ii) Adherence to norms iii) Avoiding risks iv) Sticking to the plan **F. Your team lead says, "Let's not jump the gun on the report submission." What does "jump the gun" mean here?** i) Avoid delaying the task ii) Start the task too early without proper preparation. iii) Focus on the task immediately. iv) Use innovative solutions.	4

7	**A. Select the sentence/s with correct subject-verb agreement:** a) The series of lectures, along with the workshops, were well organized by the team. b) The series of lectures, along with the workshops, was well organized by the team. c) The series of lectures, along with the workshops, have been well organized by the team. d) Both ii and iii **B. Which sentence demonstrates correct subject-verb agreement?** a) Neither the students nor the teacher were present at the meeting. b) Neither the students nor the teacher was present at the meeting. c) Neither the teacher nor the students was present at the meeting. d) Neither the teacher nor the students has been present at the meeting. **C. Choose the correct verb:** Three-fourths of the project _____ completed. a) has been b) have been c) is d) were **D Choose the correct subject-verb combination:** The police investigating the case, but neither the evidence nor the witnesses _____ been helpful. a) is, has b) are, has c) is, have d) are, have **E. Select the correct verb for the subject/s:** The scenery along with the props and costumes _____ to be changed before the next act. Select the correct form: a) need b) needs c) are needing d) were needing **F. Identify the sentence where the singular verb is used correctly:** a) The series of lectures on advanced algorithms and their applications were conducted by a renowned professor from IIT. b) Each of the experiments, along with its detailed observations, was documented in the final report submitted to the research committee. c) The list of items required for the construction of the prototype include several advanced materials and tools. d) Neither the design team nor the project managers have been able to finalize the budget due to unforeseen complications	3	1	A	F

8	Do as directed: A. Identify and name any two non finite verbs in the following sentence- *Slamming the commission on air quality Management (CAQM) for delayed action even as pollution choked the national capital , the supreme court directed that stage IV of the Graded Response plan should continue.* B. Identify the infinitive in the sentence and change it into participle: *The Muziris Heritage Project (MHP) has announced a slew of events as part of World Heritage Week celebrations, from November 19 to 25.The initiative is aimed at creating awareness about the need to conserve the rich and varied culture of Kerala.* of I for conserving C. Identify the one present participle and one infinitive in the following sentence - 0✓ 6✓ *A viral video showing sprinkling lime on the road and cleaning the premises of the State-run Maharani Laxmi Bai Medical College, in Jhansi, to welcome Uttar Pradesh Deputy Chief Minister Brajesh Pathak sparked widespread attention and led to an uproar.*	3
9	**A. Assertion (A):** The sentence "To err is human" contains both finite and non-finite verbs. **Reason (R):** The verb "to err" is non-finite, and "is" is finite because it changes with the subject and tense. i. Both A and R are true, and R is the correct explanation of A. ii. Both A and R are true, but R is not the correct explanation of A. iii. A is true, but R is false. iv. A is false, and R is false. **B. Assertion (A):** The sentence "He prefers swimming in the evening" contains only finite verbs. **Reason (R):** The verb "swimming" is finite because it indicates an action. i. Both A and R are true, and R is the correct explanation of A. ii. Both A and R are true, but R is not the correct explanation of A. iii. A is true, but R is false. iv. A is false, and R is false. **C. Assertion (A):** In the sentence "He seems to understand the problem," the verb "to understand" is non-finite. **Reason (R):** The infinitive form of a verb is always non-finite. i. Both A and R are true, and R is the correct explanation of A. ii. Both A and R are true, but R is not the correct explanation of A. iii. A is true, but R is false. iv. A is false, and R is false. **D. Assertion (A):** The sentence "The children playing outside were noisy" contains a finite and a non-finite verb. **Reason (R):** The finite verb is "were," and "playing" is a gerund, which is also finite. i. Both A and R are true, and R is the correct explanation of A. ii. Both A and R are true, but R is not the correct explanation of A. iii. A is true, but R is false. iv. A is false, and R is false. E. **Assertion (A):** The sentence "They wanted him to leave early" contains a finite and a non-finite verb.	3

	Reason (R): "Wanted" is finite because it shows tense, and "to leave" is non-finite as it does not change with the subject. i. Both A and R are true, and R is the correct explanation of A. ii. Both A and R are true, but R is not the correct explanation of A. iii. A is true, but R is false. iv. A is false, and R is false. **F. Assertion (A):** In the sentence "To study diligently is important for success", "to study" is a finite verb. **Reason (R):** A verb in the infinitive form cannot be finite. i. Both A and R are true, and R is the correct explanation of A. ii. Both A and R are true, but R is not the correct explanation of A. iii. A is true, but R is false. iv. A is false, and R is false. Give marks if attempted				
10	 The pie chart above illustrates the percentage of budget allocation across five departments: Research and Development, Operations, Marketing, Human Resources, and IT Support. Analyze the chart and write a paragraph. Your paragraph must provide the following information: A. Which department receives the highest percentage of the budget? B. If the total budget is 1 crore, how much money is allocated to each department? C. Discuss why certain departments might receive more funding than others.	3	2	E	C

Section – C

*Attempt **All** Questions* 5 X 3 = 15 Marks

Q	Detail of Question	Marks	CO	BL	KL
	Read the following passage and answer the questions that follow- *As the system of intellectual property evolves, the ethos seems to be that if a little is good, then more is better. That is to say, if some property rights on inventions are beneficial, then increasing those rights–in scope, strength or duration–will increase the benefits. But that is a false assumption. There is even a body of evidence to suggest it is flatly wrong. The technology industry faces the question of whether today's abundance of patents, rather than lubricating the gears of innovation, may be clogging them up. Already, businesses are having to negotiate with other firms in order to do basic things such as reading files from different proprietary formats; and the design of new technology products now involves lawyers as well as engineers. The proliferation of*	5	1	E	M

patents might prove a serious encumbrance to businesses, just as travelers along the Rhine in medieval Europe were slowed down by having to pay a toll at every castle.

James Boyle, a legal scholar at Duke Law School in North Carolina, claims that the current increase in intellectual-property rights represents nothing less than a second "enclosure movement". In the first enclosures, in 18th and 19th century Britain, the commons–open fields used by many, belonging to all, owned by none–were fenced in, and nearly all land became private property. By analogy, the granting of property rights on ideas, to the extent it is happening today, is plundering the intellectual commons of our public domain.

Others see the expansion of intellectual-property rights as hugely beneficial, leading not only to more innovation but to more openness. The standard justification for the patent system is that it provides an incentive for innovation, allowing the inventor to reap rewards by protecting the work from imitators who would otherwise hitch a free ride on the investment.

But that is a simplification. The initial intention was in fact to make inventions available to the public as well.

In principle, patents open up innovations in two ways. First, they confer only temporary rights; once patents expire or are abandoned, the intellectual property they are designed to protect passes into the public domain. Second, they require the details of the invention to be disclosed so they can be replicated. This permits follow-on innovation, which is essential for industrial progress.

More recently, as the patent system has evolved, it has been seen to provide other benefits. It leads to a degree of economic specialisation that makes business more efficient. Patents are transferable assets, and by the early 20th century they had made it possible to separate the person who makes an invention from the one who commercialises it. This recognized the fact that someone who is good at coming up with ideas is not necessarily the best person to bring those ideas to market.

Such specialisation is now so common that it is taken for granted. Semiconductors, the silicon chips that power digital devices, are typically designed by specialist firms that are good at engineering, but physically produced by other firms whose expertise lies in manufacturing. As the patent system has matured and licensing has become much more widespread, these transfers are turning business relationships on their head. Some economists argue that the growth of patent transactions is establishing a proper "market for technology." The creation of any market takes time and trouble. When such an institution develops, those outside the system feel threatened by it and condemn it. Yet just as the banking system created a market for capital and the insurance industry created a market for risk, the growth of the patent system may be creating a market for innovation.

This provides a sort of "liquidity" to knowledge that did not previously exist, argue Ashish Arora, Andrea Fosfuri and Alfonso Gambardella in their book, "Markets for Technology, the Economics of Innovation and Corporate Strategy"

Seen that way, the evolution of the patent system in IT and telecoms is simply part of a broader movement to create an institutional mechanism for the transfer of ideas to fuel economic progress.

That is the context in which commercial battles are taking place in the

11

technology industry today. The convergence of IT and telecoms is forcing companies to work together in new ways in order to both protect and exchange their technology. "How do you create a marketplace for ideas in that converged marketplace?" asks David Kaefer, director of intellectual property licensing at Microsoft. "That is really the big question. In the past, two parties would haggle over a pound of wheat. Today, they haggle over the patent of the week".

These markets for technology are expanding. For instance, 60% of technology and telecoms firms report an increase in licensing compared with the previous decade, and 70% report fewer obstacles to reaching such agreements, according to a survey by the Organisation for Economic Co-operation and Development in 2004. "Intellectual property is the next asset class. Companies are creating a market," says Eric Gillespie, the co-founder of ipIQ, one of the new crop of firms that are fuelling patent transactions. But when talking to executives in the technology firms themselves, the language you hear most often is that of "the arms race" and "mutually assured destruction". Companies amass patents as much to defend themselves against attacks by their competitors as to protect their inventions.

Seen that way, the evolution of the patent system in IT and telecoms is simply part of a broader movement to create an institutional mechanism for the transfer of ideas to fuel economic progress.

A. In the second paragraph, what is NOT the meaning of the word Proliferation?

i. accretion
ii. depletion
iii. augmentation
iv. mushrooming.

B. Which of the following idea/ideas is implied in the remark, 'they haggle over the patent of the week'?

i. There is an increasing market for ideas and innovation.
ii. Techno-battles have replaced product and price wars in the corporate world.
iii. Knowledge has become encashable.
iv. Patents are like trade commodities.

(I) Only I and II.
(II) Only I and III
(III) Only II and IV.
(IV) I, II, III and IV

C. Choose the word that is most nearly the SAME in meaning (as is used in the passage) to the word printed in bold

Lubricating

i. Facilitating
ii. Enhancing
iii. Simplifying
iv. Easing
v. Greasing

D. Which of the following developments led to the abolition of royal privileges and monopolies?

i. Introduction of intellectual property law
ii. Emergence of trade guilds
iii. First enclosure movement
iv. Evolution of IT and telecom

E. According to the passage, the language used by executives in technology firms suggest that they:

i. oppose increasing patent transactions.

ii. support the patent regime.
iii. want reforms in patent laws.
iv. are equipping themselves to face the reality of trade war

Read the following article and prepare arguments in favour and against (at least 5 arguments)

India cannot play in Pakistan: Cricket and terror do not go together

India's stance is consistent — as long as there is Pakistan-sponsored terrorism, there cannot be a business-as-usual approach elsewhere

The BCCI's decision to not send the cricket team to Pakistan for Champions Trophy raises a question: Should the political acrimony between the two countries impact sporting ties?

Given the nationwide love for the game, India should play cricket anywhere and everywhere. As someone who employed cricket as a peace-making instrument in Kashmir through the organisation of the Kashmir Premier League (KPL) in 2011 and 2012, I retain confidence in the game's "beyond sports" credentials. KPL was all about restoring dignity and pride to the people of Kashmir once the situation came under control there. We were not building bridges but rather cementing relationships and trust.

So, if someone uses this analogy to suggest that cricket and the love for it among the people of India and Pakistan can make it an instrument of peace between our two nations, would I be tempted to fall for it? The answer is, not really. Because even while the people of the two nations have no real problem with each other, there is the looming presence in Pakistan of a deeper-than-most deep state. Its multiple layers lead to a grey zone with threat perceptions difficult to realistically estimate —peace and hostility may depend on the time of the day.

12 *The ICC Champions Trophy 2025 (ODI) is being hosted by Pakistan from February 19 to March 9 next year. Only three venues are being used for the 15 matches being played — Lahore, Karachi and Rawalpindi.* 5 3 E

India has asked for a change from Lahore to Dubai for all its matches as the Indian government does not want our team playing in Pakistan. The ICC earlier accepted the hybrid model under which India played Pakistan in multi-nation tournaments only but in a third country. However, here there is a problem because of Pakistan's ownership of the tournament, its pride and more. Hence, the impasse.

India's policy continues without compromise. First and foremost, it does not wish to convey a dichotomous policy of fighting Pakistan-sponsored terrorism and allowing a business-as-usual approach elsewhere. That would allow Pakistan to legitimise its proxy support to terrorism in J&K. Our stance would find little credence in the face of international understanding of Pakistan as a core centre of global terror. Sports is a means of projection of normalcy. Hence, an incorrect idea of the geopolitical dynamics would emerge. For Pakistan, a nation under constant international scrutiny, every positive act in the domain of international relations is a plus point.

The visit of an Indian cricket team to Pakistan, under these circumstances, would be an incorrect indicator of the internal security situation and the legitimacy of the government which has come to power by illegal suppression of the opposition. If India, suffering the travails of Pakistan's sponsorship of cross-border terror, is itself willing to re-establish sporting ties with it there would be no grounds for the international community to name and shame it.

Naming and shaming Pakistan for its support for terror has been India's constant endeavour and it has often succeeded but not always. Pakistan would get big power endorsement if India is seen as pursuing a line of normalising the bilateral relationship. Even External Affairs Minister S Jaishankar while at Islamabad last month, exercised full caution with his statements and body language. Displaying excellent diplomatic skills, he ensured no warmth was exuded by his presence which was purely a responsibility towards SCO.

India must play in Pakistan: Weakening terror means reopening closed doors of cricket, cinema, trade

Sport for Peace" has been a motto of the Olympic movement since its inception in 1894. The history of the Olympic Truce in the ninth century BC tells us that it was used by the warring kings in Greece to allow peaceful competition among athletes as a substitute for the actual conflict. By also allowing participation by spectators in the sporting contests, the kings implicitly conceded that people — that is, non-athletes — also have an important contribution to make in ending hostilities, enhancing mutual goodwill and promoting peace.

Sadly, when it comes to the cricketing contest between India and Pakistan, sport has metaphorically become an extension of the battlefield. The Indian government apparently believes that neither athletes nor non-athletes have any role to play in Indo-Pak peace-building. This is the only meaning that can be derived from its decision — conveyed by the Board of Control for Cricket in India (BCCI) to the International Cricket Council (ICC) — that the Indian cricket team would not be allowed to travel to Pakistan to participate in the eight-nation Champions Trophy early next year.

New Delhi's reasons for this decision, although not yet officially spelt out, run along familiar lines. Pakistan continues to be a sponsor of terrorist activities in India. Therefore, "terror and sport" cannot go together just as "terror and talks" cannot. The GoI's argument is right on facts but flawed on its conclusions. Let's first look at the facts. Pakistan has not stopped exporting terror to India. Pakistan-based terrorists have mounted several attacks on our security forces and civilians in Jammu and Kashmir after the successful conclusion of Assembly elections early last month.

However, Pakistan's support to terrorism is not new. It dates back to the late 1970s and early 1980s when it started bleeding India first on two fronts — by propping up separatists in Punjab (through Khalistani outfits) and Kashmir — and later by striking deeper into Indian territory in Mumbai, Delhi and elsewhere. Encouragement of religious extremism was an essential part of this evil design, which, nevertheless, has utterly failed in its strategic objective to weaken India. Instead, India has emerged stronger in recent decades.

The net outcome of this misadventure – also of the related policy of aiding and abetting jihadi terrorism in Afghanistan – was that Pakistan itself became a much bigger victim of homegrown terrorism and Islamist extremism. The resultant unsettled conditions domestically, and the opprobrium it earned globally as a hub of terrorism, caused many cricketing nations to avoid touring to Pakistan.But is it right to conclude from this that India should sever all its cricketing links with Pakistan? No. As a matter of fact, India continued to play cricket with Pakistan even after the 1993 terror attacks on Mumbai and the attack on Parliament in 2001, to cite just two of the most gruesome instances of Pakistan-sponsored terrorism. Test series were played on both Pakistani and

	Indian soils with the blessings of prime ministers Atal Bihari Vajpayee and Manmohan Singh. The two teams have played even after Narendra Modi became prime minister, albeit in third countries such as the UAE and Sri Lanka. This demolishes the conclusion that "terror and cricket cannot go together". *What about the other conclusion that it is unsafe for the Indian team to play in Pakistan? Well, the government of Pakistan has made concerted – and successful – efforts to convince ICC members that it is safe to play Test, ODI and T20 series on Pakistani soil. In recent years, Pakistan has hosted teams from Australia, Bangladesh, England, New Zealand, South Africa, Sri Lanka, and the West Indies. Spectators have obviously loved this turnaround, because it is a matter of national pride for a nation that is itself a major cricketing nation. Therefore, India cannot advance the "safety" argument to buttress its decision not to let its team travel across the border for the Champions Trophy. With Pakistan's national honour itself at stake, its government will surely make redoubled efforts to ensure the safety and security of all the participating teams. If the BCCI insists on moving the Champions Trophy games to Dubai, and if Pakistan turns down the demand, the only option left for India would be to boycott the competition. Jingoists might hail this as their victory, but what would India have gained except loss of face in the global sporting fraternity?* *True, Pakistan needs to do a lot more than hosting the Champions Trophy to become a normal nation. The extent of the abnormality in its politics can be gauged from the fact that the greatest cricketer in its history — Imran Khan, who also became its prime minister — has been languishing in jail on flimsy charges. The sooner Islamabad and Rawalpindi cut all their ties to terrorism and religious fanaticism, the better it is for Pakistan's democracy, its deeply troubled economy and its global reputation.* *But New Delhi also must realise that its "big-nation arrogance", which all our smaller neighbours complain about, cannot succeed in isolating Pakistan globally.* *Better to weaken terrorism by strengthening bonds of friendship and mutual trust with Pakistani people. This is best achieved by reopening the closed doors of cricket, cinema, trade and thousands of years of socio-spiritual fraternity. Remember: the Olympic Truce of yore has endured not because of the kings' self-interest but because of the wisdom of peace-loving players and the people.*				
13	You are a cyber-security consultant conducting a survey to "assess the awareness and perception of cyber-security threats among young professionals". During your initial research, you find that: I. 40% of employees have experienced phishing attempts II. Only 25% regularly update their software III. Many rely solely on workplace-provided training for cyber-security knowledge **Task:** Based on this scenario, design a questionnaire (at least 10 questions) that can: 1) measure employees' understanding of phishing attacks. 2) assess their software update habits 3) evaluate their reliance on workplace training for cyber security awareness.	5	3	E
