Course Name:

Course Outcome

CO1. create structurally effective, grammatically accurate and contextually appropriate written and spoken pieces for communication both independently and collaboratively.
CO2. display competence in all aspects of language learning not limited to listening, speaking, reading and writing.
CO3. develop independent perspectives and points of view and express them in a cohesive and meaningful way.
CO4. produce a repertoire of register-specific and academic vocabulary appropriate in both oral and written communication.
CO5. use language as an effective tool of communication for various contexts in both academic and professional setting

Printed Pages : **University Roll No. ……**

Mid Term Examination, Odd Semester 2024-25
B.Tech (All Branches), II Year, III Semester
English for Professional Purposes I BELH 2003

Time: 2 Hours **Maximum Marks: 30**

Section – A

*Attempt **All** Questions* 3 X 5 = 15 Marks

No.	Detail of Question	Marks	CO	BL	KL
1	1-Identify the independent clause in the following sentence- ***Health authorities in Kerala on Sunday confirmed that a 24-year-old from Wandoor in Malappuram district in the State had died from Nipah infection.*** A. Health authorities in Kerala on Sunday confirmed B. that a 24-year-old from Wandoor in Malappuram district in the state had died from Nipah infection C. had died from Nipah infection. D. a 24-year-old from Wandoor in Malappuram district 2- Teachers **who develop a critical perspective on their own teaching** not only refine their skills but also positively influence their colleagues and students. Identify the type of clause in **bold**- A. Subordinate- Adjective clause B. Dependent- Noun clause C. Independent clause D. Subordinate- Adverb clause 3-Scientists surprised themselves **when they found** they could instruct a version of chat gpt to gently dissuade people of their belief in conspiracy theories-	3	1	A	C

	such as notions that Covid-19 was a deliberate attempt at population control. The group of words can be tagged as- A.Subordinate noun clause B.Principal clause C.Adverb phrase D.Adverb clause 4- The amount **that Jio cinema coughed up to acquire the sports rights** are likely to result in substantial losses, Taurani adds. Identify the type of clause in **bold**- A. Both C and D B. Principal clause C. Adjective clause D. Subordinate clause 5-**The information and communication technology sector** creates one of the largest job pools in India and **contributes to around 13% of our GDP.** Group of words in **bold** in the above sentence can be tagged as- A.Independent clause B.Dependent clause C. Adjective clause D.Verb phrase 6- Union minister for electronics and IT, Information and Broadcasting and Railways Ashwini vaishnav has several first to his credit. Identify the clause- A. Union minister for electronics and IT, Information and Broadcasting, and Railways B. Union minister for electronics and IT C. several first to his credit D. Ashwini vaishnav has several first to his credit.				
2	Choose the most appropriate option to fill the blanks- **1.** In _____ world of fiction, imagination knows no bounds, and _____ limits that exist are only _____ boundaries of creativity. a) the, the, the b) a, the, little c) every, some, all d) this, each, those **2.** _____ knowledge can be more dangerous than _____ ignorance, especially when it is accompanied by _____ overconfidence. a) A, a, no determiner b) Some, no determiner, the c) Little, no determiner,no determiner d) Few, that, such	3	1	A	C

	3. _____ of the employees were informed about _____ upcoming changes, leaving _____ departments unaware of the new policies. a) Many, the, few b) None, some, another c) Several, any, that d) Few, an, one **4.** _____ opinion matters when making decisions that affect _____ group, but _____ leaders often overlook this. a) Every, an, many b) All, a, the c) No, the, most d) Each, the, some **5.** _____ of the solutions offered was practical, yet _____ of them were tested thoroughly before being implemented. a) None, all b) Each, any c) Few, many d) Neither, some **6.** _____ of the books in the library were borrowed, and _____ shelves remained empty for _____ entire semester. a) Most, few, an b) Many, several, the c) Some, all, that d) Few, many, a				
3	**Rearrange the following sentences to form a coherent and meaningful paragraph-** 1-(A) Experts such as Larry Burns, head of research at GM, reckon that only such a full hearted leap will allow the world to cope with the mass motorisation that will one day come to China or India. (B) But once hydrogen is being produced from biomass or extracted from underground coal or made from water, using nuclear or renewable electricity, the way will be open for a huge reduction in carbon emissions from the whole system. (C) In theory, once all the bugs have been sorted out, fuel cells should deliver better total fuel economy than any existing engines. (D) That is twice as good as the internal combustion engine, but only five percentage points better than a diesel hybrid. (E) Allowing for the resources needed to extract hydrogen from hydrocarbon, oil, coal or gas, the fuel cell has an efficiency of 30%.	3	1	A	C

	(a) CEDBA (b) CEBDA (c) AEDBC (d) ACEBD **2-**(A)Passivity is not, of course, universal. (B) In areas where there are no lords or laws, or in frontier zones where all men go armed, the attitude of the peasantry may well be different. (C) So indeed, it may be on the fringe of the unsubmissive. (D) However, for most of the soil-bound peasants, the problem is not whether to be normally passive or active, but when to pass from one state to another. (E) This depends on an assessment of the political situation. **(a) BEDAC (b) CDABE (c) EDBAC (d) ABCDE** **3-**The subject has two half ping-pong balls taped over his eyes and wears headphones that emit a roar of static—he is in a sensory cocoon, a uniform field of light and sound. (B) This is so he can pick up psychic signals without distraction. (C) On the top floor of the psychology department building at Edinburgh University, Professor Robert Morris and his team are performing an experiment. (D) You read that right: psychic signals. **(a) CABD (b) BCDA (c) ABCD (d) DABC**				
4	**A**1-What is the correct IPA transcription for the word "thought"? A. /tʃæt/ B. /θɔːt/ C. /θɒt/ D. /ʃɔːt/ 2-What is the correct IPA transcription for the word "judge"? A. /dʒʌdʒ/ B. /jʌdʒ/ C. /tʃʌdʒ/ D. /dʒɪdʒ/ 3-What is the correct IPA transcription for the word "laptop"? A. /ˈlæpˌtɒp/ B. /ˈlæpˌtɑːp/ C. /ˈlæptəʊp/ D. /ˈlɑːpˌtɒp/ **B.**1-"Reflection, **an integral part of my teaching philosophy,** helps me check whether I am on the right path." Identify the head word in the phrase in **bold**. A.teaching B.philosophy	1.5 + 1.5	4	U	F

	C.integral part D.part 2-This shows a strategic shift toward digital platforms **in the electoral strategies of political parties**. Choose the most appropriate option- A. Prepositional phrase containing an adverb phrase B.Prepositional phrase containing a prepositional phrase C. Adjective phrase containing a noun phrase D. prepositional phrase containing a noun phrase 3-**International Day of Democracy, celebrated globally on September 15 each year,** has passed, but it is crucial to push for reforms that expand the definition of rule of law to encompass the digital realm. Identify post modifier in the **bold** noun phrase- A. International B. Day C. celebrated globally on September 15 each year D. of Democracy				
5	1-Which of the following statements is indicative of an "egotist"? A. Someone who values team collaboration and shared success. B. An individual who frequently talks about his/her own achievements and seeks admiration. C. A person who is reserved and prefers to stay out of the limelight. D. An individual known for humility and selflessness in their work. 2-The flight _____ provided a realistic experience for pilot training, replicating various in-flight scenarios. A. apparatus B. simulation C. apparition D. gimmick 3-Which of the following best defines a "gullible" person? A. Someone who is overly cautious and skeptical of others. B. A person who easily believes things without critical thinking.	3	4	A	M

	C. A person known for their intellectual depth and insight. D. Someone who frequently deceives others for personal gain. 4-He was labeled a _____ after advocating for honesty while secretly lying about his own qualifications. A. paragon B. hypocrite C. mentor D. visionary 5-The scientist's theory was considered almost _____, but later research proved it wrong. A. fickle B. infallible C. faulty D. erroneous 6-The politician's statement was deliberately _____, leaving room for multiple interpretations depending on the audience. A. explicit B. unambiguous C. equivocal D. transparent				

Section – B

*Attempt **All** Questions* 5 X 3 = 15 Marks

No.	Detail of Question	Marks	CO	BL	KL
6	**A.Read The following paragraph and answer the questions that follow-** *The proliferation of digital technology has irrevocably transformed the fabric of modern societies, introducing both unprecedented opportunities and formidable challenges.Primarily, this technological revolution has democratized access to information, allowing individuals across the globe to engage in real-time communication and collaboration.For instance, platforms like social media and online forums have facilitated cross-cultural dialogue and knowledge exchange, thereby fostering global understanding.However, the pervasive nature of digital technology also raises significant concerns regarding privacy and security, as sensitive personal information is increasingly vulnerable to cyber threats and data breaches.Furthermore, the digital divide remains a critical issue, with marginalized communities often lacking the resources to fully participate in the digital economy, exacerbating existing inequalities.To address these issues, policymakers and technology companies must implement robust regulations and invest in initiatives*	3 + 2	4	U	F

	aimed at bridging the digital divide while ensuring the protection of user data. Ultimately, balancing the benefits of digital advancements with the need for ethical safeguards is essential for harnessing technology's potential while mitigating its risks." 1-Identify and label the sentence that introduces the main idea of the paragraph and also write the method/ approach followed to write the above paragraph. 2-Sub-Arguments: Find and label the sentences that support the main idea with specific points or arguments. 3-Identify and label the transition words or phrases (at least four) that connect different ideas within the paragraph. **B.** Based on your understanding of the structure of a paragraph, write a paragraph on the topic-*The Influence of Family Traditions on Personal Identity.*				
7	**A. Read the following article published in 'The Hindu' and do as directed-** 1-Identify author's purpose perspective intent 2-Evaluate the strength and validity of arguments 3-Analyze the emotional and intellectual impact of the text. 4-Predicting future developments based on the text. B. Can we apply the text's principles to solve real-world problems? If yes, how? **Health care using Al is bold, but much caution first** *by Dr. C. Aravinda* *an academic and public health physician* *News about the possibility of a "free Al powered primary-care physician for every Indian, available 24/7" within the next five years is ambitious. It raises critical questions about feasibility, sustainability, and the readiness of India to tackle such enormous undertakings.* *Primary health care (PHC) ensures the right to the highest attainable level of health by bringing integrated services closer to communities. It addresses health needs, tackles broader health determinants through multisectoral action, and empowers individuals to manage their health. We risk undermining this fundamental aspect of PHC by relying on Artificial Intelligence (Al) as it is impersonal, making people passive recipients of care rather than active participants.*	5	1	U	C

Al excels in processing and automating repetitive tasks but lacks characteristics of human intelligence such as understanding the physical world, retrieving complex information, maintaining persistent memory, and engaging in reasoning and planning. These are all fundamental to medicine, where understanding the nuances of a patient's condition goes beyond pattern recognition.

Delivering health care demands a human-centric approach of empathy and cultural understanding. Consciousness - the awareness and understanding of the real-world environment - underpins human decision-making, distinguishing human intelligence from AI. Al cannot replicate the moral and ethical reasoning that comes from conscious experience. Unlike other domains, health-care data is scattered, incomplete and often inaccessible for Al training, making it difficult to train a model.

Data, models and issues

Naegele's rule from obstetrics, which has been in use for over 200 years, can be used to highlight the challenges in health care. It is based on 18th century reproductive habits of European women, which may not be applicable today. This method is used to predict the birth date of a child during pregnancy. It relies solely on the length of the last first addressing menstrual cycle and has a 4% accuracy. It fails to account for critical factors such as maternal age, nutrition, height, race, and uterus type, health system

which are essential for accurate prediction. Developing a better predictive model than Naegele's rule requires vast amounts of personal data, which belong rightfully to patients. This illustrates the inherent paradox in AI development in health care - the need for extensive data collection to improve accuracy is at odds with privacy and ethical concerns.

The costs involved in establishing infrastructure to capture, collect, and train this data are substantial. As reproductive health and fertility rates change over time, constant fine-tuning of Al models is necessary, leading to recurring expenses. Health-care data is complex and personal, making it difficult to standardise it across populations.

India's diversity complicates the issue further.This diversity means that data for Al models must be extensive and deeply contextualised, but generating such data requires access to personal and behavioural information.

Al's utility in health care

Al can play a crucial role in specific, well-defined tasks within health care, particularly through narrow intelligence, diffusion models and transformers. Narrow intelligence focuses on specialised tasks such as predicting hospital

	kitchen supply needs, managing biomedical waste, or optimising drug procurement. Diffusion models, which are adept at predicting patterns from complex datasets, can help screen histopathology slides or screen only a subset of the population using medical images. *Large Language Models (LLMs) and Large Multimodal Models (LMMs) are emerging as powerful tools in medical education and research writing. These can provide rapid access to medical knowledge, simulate patient interactions, and support the training of health-care professionals. By offering personalised learning experiences and simulating complex clinical scenarios, LLMs and LMMs can complement traditional medical education* *A significant issue with Al in health care is the "black box" problem, where the decision-making processes of Al algorithms are not transparent or easily understood. This poses risks in health care, where understanding the rationale behind a diagnosis or treatment plan is critical.* *Health-care providers are left in the dark about how certain conclusions are reached, leading to a lack of trust and potential harm if the Al makes an incorrect or inappropriate recommendation.* *Google DeepMind's Al mysterious algorithm defeating world-class players in the GO game (board game) can be celebrated. While such feats are acceptable for games, they raise concerns in real-life health-care decisions. The stakes are serious in human health, where the consequences of a mistake can be life-threatening.* ***India and the issue of Al governance*** *A recent petition in the Kenyan Parliament by content moderators against OpenAI's ChatGPT has highlighted the ethical complexities in Al development, revealing the exploitation of underpaid workers in training Al models. This raises concerns about the exploitation of vulnerable populations in Al training. It underscores the importance of safeguarding the interests of Indian patients because the data required to train the model legally belong to patients.* *While population-level data generated by health systems can be useful, it is prone to ecological fallacy. India lacks comprehensive regulation or legislation addressing Al such as the European Union Artificial Intelligence Act, making it all the more critical. Al tools in health care must be developed and deployed with the core medical ethics of "Do No Harm".* *Al-powered health care in India promises increased efficiency and reduced error rates.* *Advanced Al technologies require significant investments in research, data infrastructure, and continuous updates - costs*				

	that someone must bear. India cannot leapfrog into Al-driven health care without first addressing the foundational issues in its health system. The complexities of patient care, the need for high-quality data, and the ethical implications of Al demand a more measured approach.				
8	**A.**"You are presenting a project proposal to a skeptical board of directors. How would you structure your opening to capture their attention and establish credibility within the first few minutes?" Describe two ways. **B.** You are going to deliver a presentation to the students of B.Tech of GLA University Mathura. Prepare a slide deck of five slides on one of the following topics in the format given- *The Impact of Social Media on Mental Health: A Critical Analysis* ***or*** *Augmented Reality: Transforming Education and Training* 1. Slide 1 – Title & Introduction 2. Slide 2 – Key Concept/Problem Statement 3. Slide 3 – Data/Analysis 4. Slide 4 – Solution/Approach 5. Slide 5 – Conclusion & Call to Action if required When designing the deck please ensure that the information is easy to understand. Keep the content concise.	2.5 + 2.5	5	A	M
