ROLE PLAY TASK 1: Project Coordination Meeting

Situation

Your team is developing a **mobile app for smart buildings**. A **weekly review meeting** is taking place to discuss progress, issues, and the action plan.

Roles:

- Project Lead
- Developer
- QA Analyst
- UX Designer
- Design Engineer
- Client Representative

Project Lead

Goal: Collect progress updates and finalize the action plan and deadline.
Use **any two** of the following phrases:

"Let's prioritize…", "Can we commit to…?"

Developer

Goal: highlight one technical issue and ask for more time
Must say: "I'm concerned about…", "We should test…"

QA Analyst

Goal: report a bug and suggest a solution
Must say: "During testing, we noticed…", "I recommend…"

UX Designer

Goal: suggest improvements to layout and user experience.
Must say: "From user feedback…", "A simpler layout…"

Design Engineer

Goal: propose an adjustment without increasing cost
Must say: "We may need a small change…", "It won't affect cost…"

Client Representative

Goal: ask about cost, deadline and ease of use
Must say: "What's the impact on…", "Our priority is…"

Parameters for Evaluation

Students will be evaluated on the following points:

- Spoke fluently (less hesitation)
- Used professional phrases
- Asked at least one question
- Gave a solution with a reason
- Maintained eye contact and appropriate body language

Scenarios to Practice

Scenario 1: Presentation Deadline Discussion
Situation: One intern says the deadline is impossible. Another intern says it can be managed. The mentor asks for a clear plan.

Focus Areas:

1. agreement
2. disagreement
3. planning and decision-making

Scenario 2: Critical Bug Before Presentation to College Tech competition 'TECHNAVYA 2026'

Situation: A critical bug appears just before the final release. One member wants a quick fix. Another insists on proper testing. The project lead must decide.

Focus Areas:

- justification
- decision-making
- Teamwork under pressure
