IInd year - IIIrd Sem (B.Tech)

II Mid-Term Examination, 2015-16

Mathematics –III **(AHM- 3001)**

Time:- 90 Minutes **Max. Marks:-20**

Section – A

Note: Attempt All Questions. **(1 × 5 = 05 Marks)**

Q.1 Find the Laplace transform of $\sin 2t.u(t-\pi)$.

Q.2 If $L\{f(t)\}=\frac{e^{-1/p}}{p}$, then find $L\{e^{-\lambda t} f(\omega t)\}$.

Q.3 Find the Inverse Laplace transform of $\frac{2p^2-6p+3}{(p-1)(p-2)}$.

Q.4 Find the inverse Laplace transform of $\frac{p}{(p^4+4a^4)}$.

Q.5 Find the value of $\int_0^\infty \cos 2t.\delta(t-\pi)dt$

Section – B

Note: Attempt Any three questions. **(2 × 3 = 06 Marks)**

Q1. Using Laplace Transform find the value of $\int_0^\infty \frac{\sin t}{t}dt$.

Q.2. Express the function in terms of unit step functions and then find the Laplace Transform of the function given by $f(t)=\begin{cases}0 & , \quad 0<t<1\\ t-1 & , \quad 1<t<2\\ 1 & , \quad t>2\end{cases}$

Q.3. Find the Inverse Laplace transform of $log\frac{(p+1)}{p(p-1)}$.

Q.4. Find the Laplace transform of the triangular wave function of period 2π given by

$$f(t)=\begin{cases}\sin t & , \quad 0<t<\pi \\ 0 & , \quad \pi<t<2\pi\end{cases}$$

Section – C

Note: Attempt Any three questions. **(3 × 3 = 09 Marks)**

Q.1 Using Laplace transform, solve the following differential equation

$\frac{d^2y}{dt^2}-4y=5\sin t$ Given that $y=1, \frac{dy}{dt}=0$ *at* $t=0$

Q.2 State convolution theorem and hence find the inverse Laplace transform of given function using convolution theorem $\frac{p}{(p-1)(p^2+1)}$.

Q.3 Using Laplace transform, solve the differential equation

$$t\frac{d^2y}{dt^2}+2\frac{dy}{dt}+ty=\cos t; \quad y(0)=1, \quad \frac{dy(0)}{dt}=0$$

Q.4. Using Laplace transform, solve the following simultaneous differential equations:

$\frac{dx}{dt}+y=0, \frac{dy}{dt}-x=0;$ Given that $x(0)=1, y(0)=0$.

MID Term Examination, 2015-16
B.Tech II YEAR CSE
Data Structures & Algorithms (CSE-3001)

Uni. Roll No: .....
Time: 1.5 Hrs. **Total Marks: 20**

Notes:

1. All parts of a question should be answered at one place.
2. Answer should be brief and to-the-point and be supplemented with neat sketches.
3. Any missing or wrong data may be assumed suitably giving proper justification.
4. Figures on the right-hand side margin indicate full marks.

Section A

Note: Attempt All Questions **(1x5=5)**

I. Construct the expression tree for the given expression
(A + B* C) – ((D * E + F)/G)

II. The following numbers are inserted into an empty BST in the given order 10, 15, 13, 14, 1, 4, 5, 7, 19. What is the height of the BST.

III. What are the minimum and maximum numbers of elements in a heap of height h?

IV. Write the applications of tree in Computer Science.

V. Discuss the behavior of partitioning algorithm in worst case for quick sort.

Section B

Note: Attempt any Three Questions **(2x3=6)**

I. Illustrate the operation of Max-Heapify(A,3) on array
A = (27, 17, 3, 16, 13, 10, 1, 5, 7, 12, 4, 8, 9, 0)

II. Construct the binary tree for the given in order and post order
In-order: A B * C D * E + + and
Post-order: B A D C E * + * +

III. Explain the cases of deletion of a node in a BST. What is the maximum height of a BST with n nodes?

IV. Explain the merge sort on the given array:

5 , 9 , 3 , 7 , 1 , 2 , 8 , 6 , 0 , 4.

Show clearly the order of splitting and merging of sub-arrays (step tracing).

Section C

Note: Attempt any Three Questions **(3x3=9)**

I. Insert the given keys in an empty B-Tree with minimum degree t=2.

5 9 3 7 1 2 8 6 0 4

Now delete the following keys in order a) Delete 9 b) Delete 8.

II. Construct an AVL tree for the given values:

15, 20, 24, 10, 13, 7, 30, 36, 25

Now delete the following keys in order a) Delete 7 b) Delete 20.

III. Can we use a binary search instead of linear search to improve the overall worst-case running time of insertion sort to $\Theta(n \lg n)$? Explain the algorithm clearly with example.

IV. Explain Divide and Conquer Approach. How to calculate the running time of any algorithm based on this approach. Explain with suitable example.

IInd year IIIrd Semester

B.Tech. II Year, III Semester, Mid-Term Examination, 2015-16
CSE-3002: Computer Organization
Time: $1\frac{1}{2}$ Hour **Total Marks: 20**

SECTION-A

Attempt ALL Questions. **[5x1 = 5 marks]**

I. What is meant by MAR and MDR??

II. How microprogram micro-instructions and micro-operations are related?

III. What will be content of R1 and R2 after executing following set of instructions

```
MOV R1,#05
MOV R2,#03
MOV R3,R1
MOV R1,R2
MOV R2,R3
```

IV. What are the steps required for a pipelined processor to process the instruction?

V. What is micro programmed control unit?

SECTION –B

Attempt any THREE questions. **[3x2 = 6 marks]**

I. Write a program to evaluate arithmetic expression:

X=(A-B)*(((C-D*E)/F)/G) using two address and one address instructions only.

II. Define addressing mode? Enumerate the various addressing modes with suitable examples.

III. Perform following Flip flop conversions

(a)JK to T (b)D to JK

IV. State the differences between hardwired and micro-programmed control unit.

SECTION –C

Attempt any THREE questions. **[3 x 3 = 9 marks]**

I. Give the organization of typical hardwired control unit and explain the functions performed by the various blocks.

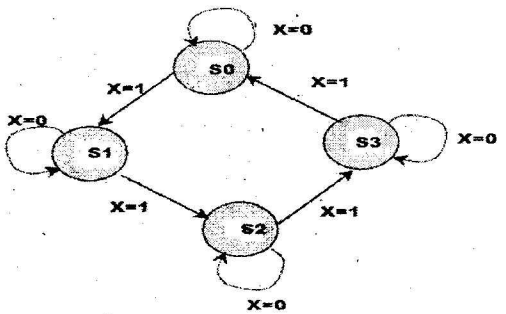

II. Explain the sequence of control operations needed to perform following CPU functions:

(a) Fetching a word from memory

(b) ADD R1, (R2)

III. Explain the control unit design for GCD processor using state table method (Draw state table and state diagram only).

IV. Implement following state diagram using JK flip flop.

Mid Term Examination, 2015-16
Course: B.Tech. (CSE), Year:II, Semester:III
Database Management System (CSE 3003)

Uni. Roll No: _____

Time: 1.5 Hrs. **Total Marks: 20**

Notes:

1. All parts of a question should be answered at one place.
2. Answer should be brief and to-the-point and be supplemented with neat sketches.
3. Any missing or wrong data may be assumed suitably giving proper justification.
4. Figures on the right-hand side margin indicate full marks.

Section A

Note: Attempt All Questions **(1x5=5)**

I. Given the following relation instance:

x	y	z
1	4	2
1	5	3
1	6	3
3	2	2

Find out all functional dependencies satisfied by this relation instance.

II. What is the minimal normal form that a relation must satisfy? Provide a definition to this normal form.

III. How does having clause differ from where clause? Can both of them be used in a single query?

IV. What is the difference between join and union? Explain with example.

V. Can primary key be replaced by unique and not null? Give reasons.

Section B

Note: Attempt any Three Questions **(2x3=6)**

I. The relation schema Student_Performance (name, courseNo, rollNo, grade) has the following FDs:

name,courseNo->grade
rollNo,courseNo->grade
name->rollNo
rollNo->name

Determine the highest normal form of this relation schema. Give reasons for your answer.

II. What advantages does a view offer? In what cases a view is non-updateable?

III. Create a SQL table called *employees* that stores emp_id, emp_name, dept_no, mgr_id and salary information. The primary key for the *employees* table should be emp_id. Create a foreign key on the *employees* table, dept_no that references the *departments* table based on the dept_id field, apply a constraint such that salary entered must be greater than 10000. Also, apply a constraint such that values in mgr_id are derived from emp_id of *employees* table.

IV. Given the table below for a relation R (A, B, C, D, E). The functional dependencies for this relation are not known.

A	B	C	D	E
'a'	122	1	's1'	'a'
'e'	236	4	'e2'	'b'
'a'	199	1	'b5'	'c'
'b'	213	2	'z8'	'd'

Suppose this relation is decomposed into the following two tables: R1 (A, B, C, D) and R2 (A, C, E). Is this decomposition lossless? Explain your reasoning.

Section C

Note: Attempt any Three Questions **(3x3=9)**

I. Given below functional dependencies for relation R(A,B,C,D,E)

F= {AB→C, AB→D, D→A, BC→D, BC→E}.

a) Find all candidate keys.

b) Is this relation in BCNF? If not, show all dependencies that violate it.

c) Is this relation in 3NF? If not, show all dependencies that violate it.

II. Given the below set of functional dependencies for a relation R(A, B, C, D, E, F, G),

F = {AD→BF, CD→EGC, BD→F, E→D, F→C, D→F}

Find a minimal cover for the above set of dependencies. Show all the steps clearly.

III. For the following relation schema:

Employee (employee-name, street, city)

Works (employee-name, company-name, salary)

Company (company-name, city)

Manages (employee-name, manager-name)

Give an expression in SQL for each of the following queries:

a) Find the names, street address, and cities of residence for all employees who work for 'First Bank Corporation' and earn more than $10,000.

b) Find the names of all employees in the database who live in the same cities as the companies for which they work.

c) Find the names of all employees who earn more than the average salary of all employees of their company.

IV. Explain the following with example: (1+2)

a) Multi-valued dependency

b) Update Anomalies

Printed Pages: 8 University Roll Number:

Mid Term Exam-2015 [B]
Ethics & Values: AHE-3001

Time: 1 ½ Hours Max. Marks: 20

Note: There are three passages in this paper. The passages are not unseen and are based on course discussion. They help in your analytical problem solving. Carefully read the passages and answer the following questions having the multiple answers. Carefully fill all the information in OMR sheet: Neatly in the blocks. No partial marking.
Full marks (assigned) will be given for a complete answer that means all correct choices.

Section A

Passage 1 (4X1.5=6) (Attempt All Questions)

Religious ethics is really important for the common social life. If people do not have proper ethical understanding and the feeling of co-existence then they are easily mobilized by the irrational sentiments in name of religion. However, the ethical analysis to both religion and morality provides a clear picture to understand the political and other misinterpretations that people do for polarization of the votes of people: What we call the sectarian politics which is wrong political approach. Religion can be understood in two different ways: 1) Dharma as a right action that can be recommended, can be followed, and can be practiced. and 2) Dharma as religious practices that we usually do in our mundane life; worshiping god, enchanting mantras etc...However, the ethical sense of dharma as a right conduct is essential to purify the core practices of religion. The humanity should be the ground for any religion while maintaining the variety of the religious practices.

Following the so vast and reach Indian culture we can argue on the recent controversies regarding the cow and the beef that the Indian culture has been eco-friendly and universal since immemorial time. It is the way that we have respected and worshiped not only humans but animals and trees with the reason that there is universal energy and sense of spirituality. There is life everywhere and we should collectively protect and celebrate it together. The following mantra so neatly put

the whole idea: "सर्वे भवन्तु सुखिनः सर्वे सन्तु निरामया। सर्वे भद्राणि पश्यन्तु मा कश्चित् दुःखभाग् भवेत्", it's not the utilitarian approach that we should protect cow but is our cultural and rational approach that all the animals and even trees (the whole nature) feel pain and pleasure. Thus, it's wrong to hurt and kill them and is against of our understanding of the culture.

Questions:

1) What kind of people show irrational religious sentiments?
a) Those who do not believe in co-existence.
b) Those who have ethical understanding.
c) Those who do not have clear understanding to religion.
d) All above.
2) What do you mean by the sectarian politics?
a) It usually provokes the religious sentiments.
b) It is done for mobilizing the vote
c) It usually disturbs the peace of society.
d) It is a right view of politics.
3) "सर्वे भवन्तु सुखिनः सर्वे सन्तु निरामया। सर्वे भद्राणि पश्यन्तु मा कश्चित् दुःखभाग् भवेत्", what can be inferred from this mantra?
a) We should not try to get rid of everyone from pain.
b) We should wish happiness for one and all.
c) There is life everywhere.
d) We should not protect the nature.
4) What is the ethical understanding to recent Cow and beef issue?
a) Indian culture put emphasis only on protecting cows.
b) Protecting cow and the beef issue should not be judged on the ground of utility.
c) Indian culture put emphasis on protecting all the animals and nature as a whole.
d) We should not kill animals because they can feel pain and pleasure.

Passage 1 (6X1.5=9) (Attempt All Questions)

Inquiring into the nexus of religion, morality and god, we logically understand that religion can be possible without morality and god. So is true about the morality that it is possible without religion. One can be atheist and can meaningfully hold the humanitarian moral attitude. Both religion and god are not the logical necessity to live a moral life. However, looking at the common social life we can understand the importance of both the god and religion. This is pivotal to the whole debate on religion and god that the most of the religious beliefs have their deeper groundings in the god. And, then most of the philosophers and scientists have questioned the existence of god. Some philosophers have defended the existence and some have rejected. We can meaningfully raise the fundamental question: Does god exist? This question is like a double edged sward as if the answer is positive it cuts all the criticism to the religion and god. But, if the answer is negative then it cuts the foundational beliefs of both religion and god.

We will take up two of the long debated arguments for the existence of god: Ontological and cosmological arguments. These are two different types of argument. Ontological argument which tries to prove the existence of the god is a priori in nature. It defends the god on purely logical understanding the way we understand the mathematical concepts. On the other hand, the cosmological argument is a posteriori based on our common human experiences. Ontological argument originally developed by the St. Anselm offers a logical proof for the god. He argues that god is such an entity than grater cannot be conceived. It means it is by the virtue of our understanding that whatever we can conceive exists and is really inferior to god as we have this understanding in our mind. Now, if we can conceive god and we know that nothing can be greater than god so god must exist. This is a kind of logical trap because if we really believe in the concept of god then we cannot deny this argument. But if one does not believe that there is X that is god and X is greater. There is nothing greater than god. So, that person can reasonably deny the X without any contradiction that X is grater and X does not exist. Immanuel Kant criticized the argument in the same manner and argues that if we reject the concept of god we can meaningfully understand that god does not exist in the way other things do.

On the other hand, the cosmological argument is a posteriori. According to this argument when we look at the whole cosmos it reflects as a complex, well

designed and gigantic creation. We logically understand that whole cosmos is a creation requires a creator. We people are creator but limited and we know that we have not created the cosmos: The big-bang, galaxies, stars and planets and earth and its various systems. We cannot create universal laws, energy systems and eco-life system on the earth. Philosophers defend the existence of the god as a creator of the whole cosmos who created the whole universe. They argue that creation needs an intelligent infinite being to create the universe. And, we humans cannot create and even the particles and the material bodies cannot create the intelligent systems. Thus, it logically proves that there is god who has created this whole cosmos.

Philosophers have defended the cosmological argument in two ways: 1) Minimal defense, god has only caused the big-bang and universe is created by the particles and material bodies. Stephens hawking argued in his book the brief history of time that there should be god invoking the big-bang. He defends the minimal existence of god in the book. On the other hand, there are the philosophers who offer maximal defense, god caused the big-bang and created the universe and is imminent in the universe. However, Stephen Hawking rejected both views in his second book, the Grand Design. He concludes that the cosmos, the big-bang and the universe has evolved through a sui-generis process. Universe has self evolved and maintained system. We can say that universe does not require god but self sustaining process. It has originated, decaying and will disappear one day.

Although scientists reject the arguments to prove the existence of god, god is unavoidable necessity for the common people who do not hold the scientific attitude. We do not have any right to discard their belief in religion and god unless we cannot surely disprove the existence and importance of religion and god in their life. In this way, William James pragmatic defense of god seems right that god brings about positivity in our social life and is something extra that makes our social life more practical. Finally we can have this rational understanding that we can be religious and a true believer of god but the benchmark should be that we remain right and positive in our social conduct and if we turn to be negative we should meaningfully doubt on both religion and god.

Questions:

5) "Both religion and god are not the logical necessity to live a moral life". What can you infer from this statement?
   a) Moral life is possible without god.
   b) Moral life is possible without being religious.
   c) An atheist can live a moral life.
   d) Moral life logically depends on god.

6) If you believe in such an X that X is something than greater cannot be conceived. All the entities you can conceive exist and are inferior to X. What you **cannot** conceive about X?
   a) X does not exist.
   b) X exists.
   c) X is greater.
   d) X is inferior.

7) How does cosmological argument defend the existence of god?
   a) We humans are limited beings.
   b) Cosmos requires an intelligent creator.
   c) Cosmos cannot be created out of the material bodies only.
   d) God is an intelligent infinite existence to create the cosmos.

8) How does Stephen Hawking offer minimal defense of cosmological argument in his first book?
   a) God has invoked the big-bang.
   b) The whole cosmos is not created by the god.
   c) The material bodies are not created by the god.
   d) None of these.

9) How does Immanuel Kant reject the ontological argument?
   a) If we do not accept the god we do not commit any logical contradiction.
   b) If we do not believe in the concept of X, we can deny its existence.
   c) There is no X and X is not greater.
   d) God does not exist in the way other things do.

10) What is pragmatic defense for the god according to William James?
   a) God is something extra.
   b) God brings about the negativity in the life.
   c) We can be religious and true believer of god in a practical manner.
   d) The benchmark to be a theist should be our positive attitude in the social life.

Passage 3 (5X1=5) (Attempt All Questions)

Morality must be grounded in reason and it is in this sense we understand morality in a qualified sense. We take up a case in order to really test the above premise. The case of Afghan Goatherds is really a good case. In June 2005, a special force team made up of Petty Officer Marcus Luttrell and three other U.S. Navy SEALs set out on a secret reconnaissance mission in Afghanistan, near Pakistan border, in search of a Taliban leader, a close associate of Osama bin Laden. While taking position on a mountain ridge the special force team overlooked the village. Two Afghan farmers with about a hundred bleating goats happened upon them and with them was a boy about fourteen years old. The Afghan were unarmed. The American soldiers trained their rifles on them, motioned for them to sit on the ground, and debated what to do about them. On the one hand, the goatherds appeared to be unarmed civilians. On the other hand, letting them go would run risk that they would inform the Taliban of the presence of the U.S. soldiers. (Sandel: 2009)

Debating on the point what to do in such a situation either to leave or to shoot the two farmers and a 14 years old boy soldier reach to conclusion to kill them all since the team is on the secret mission and leaving them would be dicey as the mission and the whole team will be in life threat. However, Luttrell came up with a surprising decision to leave them all. It was what Luttrell further writes in his reminiscence, a most lame brained stupid decision for which he cannot forgive himself until he will be put in grave as the decision actually taken the life of whole team except the Luttrell and another sixteen American Soldiers who came to rescue the team while fighting against 200 Taliban militants. Was the decision taken by Officer Luttrell's ethically justified? Luttrell made a decision that unarmed people who were seemingly innocent and nobody could surely deny the innocence of those formers and a boy with them must not be killed. In such a

scenario Luttrell made the decision that no innocent be killed and found those people innocent. but the way he drawn the conclusion was not based on a certain reason as he says that he was feeling a torturing moral dilemma that was related to his Christianity a moral believes system that it is wrong to punish someone without being guilty. and the conviction of his other fellow SEAL commanders who were waiting for his final order to kill those formers and a boy. Luttrell ordered to commanders to let them go. However, the decision Luttrell took up in the situation was not right on the grounds that it was taken on sheer religious faith. and there arises a question supposing if the Christianity would have permitted innocent killing in such a situation then what could have been the Luttrell's decision? Well, Luttrell's decision can be justified with the same facts but a with different ground that if he would have based his decision on ethical reason that killing innocent in the veil of ignorance is wrong so better to leave the innocent. Well. undoubtedly someone defending the military decision can deny the decision in saving the mission and the lives of commanders. But, on ethical grounds, the justification is reasonably right or otherwise on the grounds of faith which seems wrong.

Questions:

11) What you can argue about the Luttrell's decision?

a) A stupid decision

b) A lame brined decision

c) Morally right decision.

d) Decision based on Christianity faith.

12) Which of the following statements are **false** about this case?

a) The mission was operated near Indian border.

b) It was a reconnaissance mission.

c) One Petty Officer Marcus Luttrell and three other U.S. Navy SEALs were on the mission

d) It was a secret mission.

13) The case put the whole Navy SEAL team including Luttrell in a dilemma because:

a) Letting them go would run risk that they would inform the Taliban of the presence of the U.S. soldiers.

b) The Afghan goatherds appeared to be armed civilians.

c) Nobody could surely deny the innocence of those formers and a boy.

d) The team was in dilemma precisely because of the 14 years old innocent boy.

14) What can be inferred from this case?

a) Faith cannot be a ground for moral decisions.

b) Morality must follow the reason.

c) Religious faith can be inconsistent to reasons.

d) Religious faith can be a ground for moral decision making.

15) Which of the following statements are true about the case?

a) Luttrell's decision was grounded in faith.

b) Luttrell's decision was ethically right.

c) Three other Navy SEAL commanders wanted to kill the unarmed Afghan goatherds.

d) Luttrell later regretted his own decision.

University Roll No. .....

B.Tech. II Year, III Semester, II[nd] Mid Term Examination

MBA-5031: Industrial Economics (2015-16)

Time: 90 Mins. **Total Marks: 20**

Section –A

Attempt All Questions **1×5=5 Marks**

1. What is Delphi Method?
2. What do you mean by "Inflection Point"?
3. What do you mean by Production Function?
4. "No Isoquant can touch either axis". Why?
5. What do you mean by "Spreading the Overhead"?

Section –B

Attempt Any Three Questions Only **2×3=6 Marks**

6. Discuss the following: (i) Isoquant & Isoquant Map (ii) Opportunity Cost
7. Discuss the relationship between Marginal Cost Curve & Average Cost Curve.
8. What is the shape of Long Run Average Cost Curve and Why?
9. "The LRAC curve is called the envelop curve as it envelops the SAC's". Comment.

Section –C

Attempt Any Three Questions Only **3×3=9 Marks**

10. Discuss the various factors affecting Demand Forecasting? Also point out the importance of Demand Forecasting.
11. Write short notes on following: (i) Consumer Survey Methods (ii) Survey of the Sales Force (iii) Time Series Analysis
12. Discuss "Law of Returns to scale" with its assumptions and the stages of production.
13. The annual sales data of a company is as follows:

Year	2001	2002	2003	2004	2005
Sales '000	75	46	78	56	45

Using the method of least squares (taking deviation from Year 2000), estimate the annual sales of Year 2006, 2007 and 2008.

Set – B University Roll No._____

GLA UNIVERSITY, MATHURA
B. Tech. II Year (Odd Semester), II Mid Term Examination, 2015-16

Subject: Business English
Subject Code: AHE 281
Time: 90 Minutes
Max. Marks: 20

Notes:

- Read the instructions carefully before you answer the question.
- Answer all questions from Section A, any 3 out of 4 from Section B, and any 2 out of 3 from Section C.
- Answers should be to-the-point, and word limit for informative questions from Section B (approx 60 words) and Section C (150 words) should be maintained.
- All questions of a particular section should be answered at one place.
- Figures on the right-hand margin indicate marks.

Section A

PART 1 **0.5 x 6=3**

1. What is visualization in negotiation skills?
2. In which particular step of team-formation do we lay down the rules and distribute the responsibilities?
3. In the acronym SMART, what do 'A' and 'R' represent?
4. Do you think that a person who delegates all the tasks among the team members is a good leader? –Yes/No.
5. What is 'clarity' in goal-setting?
6. Which of the following is **not** a negating emotion?
   a. Anger b. Hatred c. Vengeance d. Fear e. Pride

PART 2 **0.5 x 10=5**

Identify the part of the sentence that is erroneous:

7. **A.** An Italian, visiting the Taj **B.** Couldn't put up in Hotel Taj **C.** simply because the boarding & lodging charges **D.** were exorbitant **E.** No Error

8. **A.** In the NJAC decision, they followed **B.** past precedents abundantly **C.** in arriving to the conclusion that **D.** the autonomy of the judiciary is **E.** an essential feature of the basic structure.

9. Mark the option which is synonymous with the word 'sterile'

A. Fertile B. Strait C. Stringent D. Barren E. None of these

In question 10 & 11 mark the option which is synonymous to the EMBOLDENDED word:

10. I have two VIVID memories that stand out for me from that remarkable afternoon.

A. Dying **B.** Fabulous **C.** Flamboyant **D.** Ordinary **E.** Empathetic

11. By then Nash's schizophrenia was in utter REMISSION

A. Deduce **B.** Increase **C.** Prolific **D.** Generosity **E.** Reduction

In question 12 & 13 mark the option which is antonymous to the EMBOLDENDED word

12. Prime Minister Modi is receiving lots of ODIUM due to Kejari-LG spat

A. Hatred B. Detest C. Affection D. Odd E. None of these

13. It was a deliberate AUDACIOUS attempt to malign the image of politicians in India

A. Bold B. Dauntless C. Ferocious D. willingly E. Timid

In question 14 7 15 mark the option which is antonymous with the given word(s):

14. Odium

A. Detest B. Odd C. Hatred D. Affection E. none of these

15. Abridge

A. Abundance B. Enlarge C. Discourage D. Shortage E. Appropriate

16. Clinton has said that setting a timeline for withdrawal was an important step but the Afghanistan government would need to step up to make it work. As secretary of state, Clinton supported Obama's troop surge in Afghanistan, writing in her book "Hard Choices" that she was "under no illusions about how difficult it would be to turn around this war. But all things considered I believed that the president had made the right choice and put us in the best position to succeed."

Which of the following best supports the view of Hillery?

A. As Hillery runs for next presidential elections, it's mandate for her to defend every move of Obama Government.

B. It reasserts the fact that America never imagined that despite killing its biggest enemy, Afghanistan, would still remain a fertile land for terror.

C. Withdrawal of US military force would give rise to Pakistan based Fringe elements.

D. The flamboyant rise of ISIS has forced US to re-strategize its stand on Afghanistan

E. America needs to continue to strategically remain in the affairs of Asian countries because of rise in power of China-Pakistan and India

2x3=6

Section B

1. Read the lines given below. Identify words expressing emotions and then, categorize them into positive and negative emotions.
   Without fear you would be reckless.
   Without anger you would have no drive.
   Without sadness you would have no empathy.
   Without guilt you would happily hurt everyone.
2. 'Measurable' and 'Time-bound'/'Timely' are two essential components of a SMART goal. Explain.
