II Mid Term Examination, 2015-16
Course: B.Tech, Year: II, Semester: IV

Operating System (CSE 4001)

Uni. Roll No:

Time: 1.5 Hrs. **Total Marks: 20**

Notes:

1. All parts of a question should be answered at one place.
2. Answer should be brief and to-the-point and be supplemented with neat sketches.
3. Any missing or wrong data may be assumed suitably giving proper justification.
4. Figures on the right-hand side margin indicate full marks.

Section A

Note: Attempt All Questions (1x5=5)

I. Define Race condition.

II. Is it possible to have a deadlock involving only one single process? Explain your answer.

III. Define request edge and assignment edge in Resource Allocation Graph.

IV. What do you understand by Critical Section?

V. Write primitives of Test and Set Instructions.

Section B

Note: Attempt any Three Questions (2x3=6)

I. What do you mean by busy waiting? Write the definition of Semaphore without busy waiting.

II. Explain how deadlocks can be prevented from occurrence in any system.

III. How the recovery from deadlock is done using resource preemption?

IV. Consider the scenario that in a system 7 processes named A, B, C, D, E, F, and G and 6 resources named R, S, T, U, V, and W are present. Process A hold resource R and requesting resource S, Process B is requesting for resource T, Process C is requesting for resource S, Process D hold resource U and requesting for resource S & T. Process E hold resource T and requesting for resource V, Process F hold resource W and requesting for resource S and Process G hold resource V and requesting for resource U. Draw RAG for the above scenario and convert it into WFG.

Section C

Note: Attempt any Three Questions (3x3=9)

I. Explain Reader Writers problem with its semaphore solution and specify how it meets all three requirements of solution to its critical section problem.

II. It is proposed to use a multi-resource Banker's algorithm in an OS containing 3 resource classes. The current resource state is given below-

Process	Allocation			Maximum			Available		
	R1	R2	R3	R1	R2	R3	R1	R2	R3
P1	2	2	3	3	6	8	2	3	0
P2	2	0	3	4	3	3			
P3	1	2	4	3	4	5			

i. Is the current allocation state safe?

ii. Would the following request be granted in the current state -

- P1 request (1, 1, 0)
- P2 request (0, 1, 0)

III. Explain Peterson's solution for two process critical section problem and state how it satisfies all the three requirements.

IV. What do you mean by Inter Process Communication (IPC)? Explain two schemes of IPC. Differentiate between direct and indirect communications.

B. Tech. II Year, IV Semester, Mid-Term Examination, 2015-16
CSE-4002: Introduction to Microprocessor

Time: $1\frac{1}{2}$ Hour | Total Marks: 20

SECTION-A

Attempt ALL Questions. [5x1 = 5 marks]

I. What is the difference between maximum and minimum mode operation of the 8086?
II. What is the maximum frequency and duty cycle of the clock signal given to the 8086?
III. What are the content of the CS and IP registers immediately after the reset of the 8086?
IV. What do you mean by pipelined architecture?
V. What is role of stack in calling a subroutine?

SECTION –B

Attempt any THREE questions. [3x2 = 6 marks]

I. WAP to calculate the sum of the series of 10 numbers and the series itself begins from memory location 2200H. Assume the sum to be 8-bit number and store it at memory location 2400H.
II. Explain the bus interface unit of 8086.
III. Analyze the given program and find the content of register B and C.

```
LXI B 2345H
MOV A, B
RAR
ADI FA
MOV B, A
MOV A, C
RLC
SBI 03
MOV C, A
HLT
```

IV. What is meant by segmentation? What are its advantages?

SECTION –C

Attempt any THREE questions. [3 x 3 = 9 marks]

I. Draw the pin diagram of 8086 and explain the function of each pin.

II. Draw and discuss flag register of 8086 in brief.

III. Write a program to sort given 20 numbers from memory location 2100H in the descending order.

IV. Analyze the given program and find the content of memory location 2700, 2800 and 2801 if the content of 2500 is 07H.

```
      LXI B 2500
      LXI H 26FE
      LDAX B
      CMP L
      JNC  Next
      SUB H
Next  STA 2700
      INX H
      ADD L
      MOV H, A
      DCX H
      SHLD 2800
      HLT
```

MID TERM EXAMINATION 2015-16

University Roll No.....

B. Tech. II Year IV Semester

CSE-4003: Computer Networks

Time: 01 ½ Hours **Total Marks: 20**

Note: Attempt **all** questions from Section-A, **any three** from Section-B and **any three** from Section-C.

Section-A

Note: Attempt all Questions (1X5=5)

Q1. Find the range of addresses in a block of classless addresses if one of the addresses is 200.17.21.135/27

Q2.If the subnet mask is 255.255.255.128, which address class it corresponds to?

Q3. Out of HDLC and PPP, which one is byte-oriented; which one is bit-oriented?

Q4.A sender sends a series of packets to the same destination using 6-bit sequence numbers. If the sequence number starts with 0, what is the sequence number after sending 137 packets?

Q5. If we have k bits in sequence number field, then what is the size of sender window and receiver window in Go Back N protocol?

Section-B

Note: Attempt any three questions **(2x3=6)**

Q1. Show that the sender window size in Go Back N protocol with m=2 (where m represents the bits in sequence number field) can be 3 but not equal to 4.

Q2. Given the data word 1010011110 and the divisor 10111. Show the generation of the codeword at the sender site (using binary division). Show the checking of the codeword at the receiver site (assume no error).

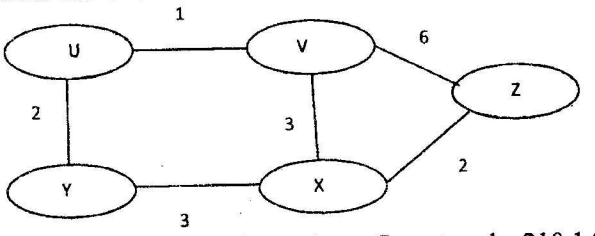

Q3. Suppose the seven bit data word 1101110 is to be encoded using an even-parity Hamming code. What is the binary value after encoding? Now assume that the 6th bit got corrupted during transmission. Find the error correcting codes.

Q4. What is bit stuffing? Suppose a bit-stuffing based framing protocol uses an 8-bit delimiter pattern of 01111110. If the output bit-string after stuffing is 01111100101, then what is the input bit-string?

Section-C

Note: Attempt any three questions **(3x3=9)**

Q1.Consider the network shown below, and assume that each node initially knows the costs to each of its neighbors. Consider the distance-vector algorithm and show the distance table entries at node z.

Q2.An organization is granted a class C network 210.1.2.0. The administrator wants to create 4 subnets each of size 64, 32, 16 and 16. Find the first address and last address of each subnet. Find the subnet mask of each subnet.

Q3.Explain VER, HLEN, Total Length and Protocol fields in IPv4 datagram header. The size of the option field of an IPv4 datagram is 20 bytes. What is the value of HLEN?

Q4.Compare Go-Back-N protocol with Selective-Repeat protocol in terms of efficiency, number of retransmissions and window size (both sender and receiver).

Second Term Examination, 2015-16

Course: B.Tech, Year- II: , Semester:IV

Object Oriented Programming (CSE4004)

Uni. Roll No:

Time: **90** minutes Max. Marks: **20**

Notes:

1. All parts of a question should be answered at one place.
2. Answer should be brief and to-the-point and be supplemented with neat sketches.
3. Any missing or wrong data may be assumed suitably giving proper justification.
4. Figures on the right-hand side margin indicate full marks.

Section-A

Note: Attempt All Questions **1*5=5 marks**

1. Write the output of the below code:

```
class Ba{
abstract public void myfunc();
public void another(){
System.out.println("Another method");
}}
public class Ab extends Ba{
public static void main(String args[]){
Ab a1=new Ab();
a1.mymethod();}
public void myfunc(){
System.out.println("My Function Java");}
public void  another(){
myfunc(); }}
```

2. Enlist the use of keyword final?
3. Name the sub classes of base class Throwable.

4. Enlist the AWT class hierarchy for Applet?
5. Enlist the different priorities assigned to a Thread with their values? Name the method along with syntax to change the default priority of a Thread?

Section: B

Note: Attempt Any Three Questions **2*3=6 marks**

1. Differentiate between Interface and abstract class?
2. Explain the different ways of creating Thread in java along with complete syntax declaration for the same? Design any program to demonstrate the use of sleep() method and stop() method for a Thread.
3. Differentiate between Java Applet and Java Application?
4. Write the missing statement to correct the below code:

```
class Btech implements Runnable
{
public static void main (String args[])
{
// Write the missing code to execute the Thread
}public void run()
{}
}
```

Section:C

Note: Attempt Any Three Questions **3*3=9 marks**

1. Discuss the different types of Exceptions in java? Design any program to handle user defined Exception in java.
2. Differentiate between AWT and Java Swings?
3. What are Layout Managers in Java? Discuss any two Layout Managers with their syntax for setting layout? Name the default Layout for Applet and Frame?
4. Explain Applet life cycle methods? Enlist any two methods of Graphics class with their argument set?

University Roll No . :

Second Term Examination , Even Semester 2015-16

B.Tech. (2nd Year)- IV Semester

Subject:- Discrete Mathematics **Subject Code:- CSE-4005**

Time: 1 ½ Hours **Max. Marks: 20**

Section-A

Note: ***Attempt All Questions*** : **1×5=5**

1. A committee of 5 people is to be formed randomly from a group of 10 women and 6 men. Find the probability that the committee has 3 women and 2 men.
2. Write the following in symbols: "If $f(z) = u + iv$ satisfies CR-equations and u_x, u_y, v_x, v_y are continuous, then $f(z)$ is analytic."
3. Show that converse and inverse of the conditional statement $p \Rightarrow q$ are logically equivalent.
4. Write the DNF of the proposition $p \wedge (p \Rightarrow q)$.
5. Negate the statement " $\exists x\ (x^2 = 1$ and $x^2 - 2x + 3 = 0)$".

Section –B

Note: ***Attempt Any Three Questions*** : **2×3=6**

1. Two cards are drawn in succession from a pack of 52 cards. Find the chance that the first is a king and the second a queen, if the first card is: (i) replaced , (ii) not replaced .
2. By truth table, show that $p \Leftrightarrow q$ and $(\sim p \vee q) \wedge (p \vee \sim q)$ are logically equivalent .

PTO.

3. Test the validity of the argument " If I study, then I will pass in the examination. If I do not go to cinema, then I will study. But I failed in examination. Therefore, I went to cinema."

4. Translate into symbols, following statements using predicate logic: (i) "Any integer is either positive or negative"
(ii) If the product of a finite number of real numbers is zero, then at least one factor is zero.

Section – C

Note: ***Attempt Any Three Questions :*** **3×3=9**

1. There are 3 bags. First containing 2 white , 3 red , 1 green balls; second 1 white, 2 red, 3 green balls and third 3 white, 1 red , 2 green balls. Two balls are drawn from a bag chosen at random. These are found to be 1 white and 1 red. Find the probability that the balls so drawn came from :
(i) first bag , (ii) second bag, (iii) third bag.

2. For the compound proposition
$[(\mathbf{p} \wedge \mathbf{r}) \vee (\mathbf{q} \wedge \sim\mathbf{r})] \Leftrightarrow [(\sim\mathbf{p} \wedge \mathbf{r}) \vee (\sim\mathbf{q} \wedge \sim\mathbf{r})]$, find whether it is a Tautology or a Contradiction.

3. Obtain Principal CNF and Principal DNF of $(\mathbf{p} \wedge \mathbf{q}) \wedge (\mathbf{q} \rightarrow \mathbf{p})$.

4. Prove that $7^{2n} + 2^{3n-3}.3^{n-1}$ is divisible by $25 \ \forall\, n \in N$.

Mid Term Examination,
Even Semester 2015-16

Course: B. Tech. II Yr. **Univ. No.** ----------
Title of Paper: Environmental Studies
Paper Code: AHS-3001
Time: 1.5 Hours **Max. Marks**: 20

Section-A

Note: Attempt All Questions **1 X 5 = 5 Marks**

(I) What is pulvarization?
(II) Define secondary air pollutant with two examples.
(III) What is London Smog?
(IV) Write permissible noise level in residential and silence areas.
(V) What do you mean by hot spot of biodiversity?

Section-B

Note: Attempt Any three Questions **2 x 3 = 6 Marks**

(I) What is ozone cycle?
(II) Write Malthus theory of population growth.
(III) Why is India kwon as megadiversity nation?
(IV) Define acid rain? Write its effects on environment.

Section-C

Note: Attempt Any Three Questions **3 x 3 = 9 Marks**

(I) What is biomass energy? Discuss its production and uses.
(II) What are the ill effects of industries on environment.
(III) Define noise pollution. Explain its effects and control measures.
(IV) Discuss the reasons of solid wastes generation and effects of solid waste pollution.

University Roll No._____

GLA UNIVERSITY, MATHURA

B. Tech. II Year (Even Semester), II Term Examination, 2015-16

Subject: English for Professional Purposes–II Subject Code: AHE 4083
Time: 50 Minutes Max. Marks: 15

Notes:

- Answer all questions from Section A, any 3 out of 4 from Section B, and any 2 out of 3 from Section C.
- Answers should be to-the-point, and word limit for informative questions from Section B (approx 60 words) and Section C (150 words) should strictly be followed.
- All questions of a particular section should be answered at one place.

Section A

0.5 x 6=3

1. Mention any one referencing style sheet.
2. Information collected through a questionnaire is a secondary source. (True/False)
3. Accession date is an essential component while referencing print materials in an article. (True/False)
4. What information does the 'Title Slide' of a presentation contain?
5. What introduces a Résumé to a prospective employer?
   a. Bibliography b. Curriculum Vitae c. Biography
   d. Educational Qualifications e. None of these
6. Define plagiarism in one sentence.

Section B

2x3=6

1. What are the four essential information required for referencing a book?
2. Write any four characteristics of a good PPT slide.
3. Frame three titles for presentation on 'Pollution' with International, National and Regional focus.
4. Describe how 'time' and 'locale' (ambience) play their roles in the strategization of a presentation.

Section C

3x2=6

1. What is the importance of audience profiling/demographics?
2. Delivery of the presentation is as important as the content of it. Discuss.
3. Create a presentation of six slides on the topic 'Privatization of Education'.

*****

SET-A (All)

GLA University

Second Term Examination (Soft Skills)-2015-16

Course- B.Tech **Year- II** **Branch-All**

Instructions :

1. There are 2 sections in the paper.
2. Attempt all questions. The maximum marks for the test are 20.
3. The total time allocated is 60 minutes.
4. There will be no negative marking. Also, no marks will be awarded if more than one answer is marked.
5. The OMR form is printed on a special paper and the information given by the candidates will be scanned. Thus, the candidates are required to fill the forms carefully. Mutilated and damaged forms will be rejected by the scanner.
6. The candidates should ensure that the form is not folded, crumpled or mutilated in any manner. The candidates should not mark anything anywhere except wherever required. The black marks on the margin of the OMR form are important. The candidates should not tamper it with marker.
7. Only black& blue pen should be used to fill forms.
8. Each branch is identified with a specific subject code which should be written in subject column of OMR sheet
9. Write your University roll number in the roll no column of OMR sheet.

Name of Student:-.....

Branch:-.....

Section-.....

Uni. Roll No:.....

Signature of Invigilator-.....

Section-1 (Quantitative Aptitude)-No of question-20, marks-10

Directions for questions **1 to 14** Select the correct alternative from the given choices.

1. The average height of 24 students is 155 cm. If a new student joins the group, the average height decreases by 1 cm. Find the height of the new student (in centimeters).
(1) 165 (2) 155 (3) 130 (4) 150

2. The average weight of 12 students in a class is 26 kg. If one student leaves the class, the average weight increases by 1 kg. Find the weight of that student.
(1) 26 kg (2) 21 kg (3) 15 kg (4) 30 kg

3. Dinesh, Damodar and Dhruva are three friends. The average age of any two of them exceeds one-third the age of the third by 10 years. Find the age of Dinesh.
(1) 16 years (2) 12 years
(3) 14 years (4) 15 years

4. A group of members planned to go for a picnic. The total expenditure involved is ₹540. If three members are absent, each has to pay fifteen rupees more as the total expenditure remains the same. Find the number of members in the group initially.
(1) 15 (2) 14 (3) 12 (4) 9

5. The average marks of a student in English, Biology and Physics are 70. His average marks in English, Biology and Chemistry are 66. The average of his marks in Physics and Chemistry are 68. Find his marks in Physics and Chemistry.
(1) 64, 72 (2) 74, 62 (3) 62, 64 (4) 64, 74

6. The total weight of Murthy, Murali and Mukund is four more than thrice the weight of Madhu. The total weight of Murty, Murali and Madhu is four more than thrice the weight of Mukund. The average weight of all the four is 53 kg. Find the average weight of Mukund and Madhu (in kgs).
(1) 54 (2) 53 (3) 52 (4) 55

7. The average marks of 28 boys in a class are 58. The average marks for the girls are 63. If the average of all the boys and the girls in the class is 60.2, find the number of girls in the class.
(1) 24 (2) 22 (3) 25 (4) 26

8. The average weights of students of the classes A, B and C are 35 kg, 41 kg and 35 kg respectively. The number of students in A and B are in the ratio of 6 : 5 and the number of students in B and C is in the ratio $\frac{1}{4}:\frac{1}{5}$. Find the average weight of all the students.
(1) 35 kg (2) 37 kg
(3) 26 kg (4) 33 kg

9. There are two baskets of apples. The average weight of an apple in the first basket is 250 grams and that of second basket is 280 gms. If the total number of apples in two baskets is 94, what is the average weight of the apples?
(1) 270 gms (2) 265 gms
(3) 260 gms (4) Cannot be determined

10. The average price of books bought from a book shop remains unchanged if 3 books whose average price is ₹25 are removed from that group of books and two new books whose average price is ₹23.50 are added to it. Find the average price of the books.
(1) ₹28 (2) ₹26 (3) ₹27 (4) ₹25

11. The number of boys in a class is four more than thrice the number of girls in it. If the average ages of the boys and girls in the class are 14 years and 16 years respectively, the average age of the class cannot exceed _____ years.
(1) $14\frac{3}{4}$ (2) $14\frac{2}{3}$ (3) 15 (4) $14\frac{1}{2}$

12. In the previous question, the average age of the class cannot be less than _____ years.
(1) $14\frac{1}{3}$ (2) $14\frac{1}{4}$
(3) $14\frac{2}{3}$ (4) $14\frac{3}{4}$

13. A vessel contains 8 liters of sugar solution with 28% sugar in it. Another sugar solution with 4% sugar is added to that. If the quantity of the resulting solution is 24 liters, find the concentration of sugar in the mixture.
(1) 24% (2) 20% (3) 16% (4) 12%

14. Copper sulphate solution contains copper sulphate particles dissolved in water. A 15-liter copper sulphate solution containing 275 gms of copper sulphate per liter is mixed with another copper sulphate solution containing 175 gms of copper sulphate per liter. The resulting solution contains 200 gms of sulphate per liter. Find the volume of the second copper sulphate solution.
(1) 45 liters (2) 25 liters
(3) 35 liters (4) 40 liters

15. The largest number which divides 49 ,98, 147 leaving remainders 1, 2, and 3 respectively is
(a) 24 (b) 36 (c) 48 (d) 96 (e) None of these

16. How many zeros does 1012! end with ?
(a) 249 (b) 250 (c) 251 (d)252 (e) None of these

17. The highest power of 3 in 729!
(a) 364 (b) 360 (c) 359 (d)370 (e) None of these

18. Find the smallest four digits number which when increased by 1 is divisible by 3,5,7,11.
(a) 1154 (b) 1155 (c) 1156 (d)1157 (e) None of these

19. The number of factors of 596 excluding '1' and itself is ...
(a) 2 (b) 4 (c) 6 (d) 8 (e) None of these

20. The smallest three digit number , when decreased by '5' is divisible by 4,5,6 and 7 is ?
(a)425 (b) 420 (c) 215 (d) 210 (e) None of these

Section-2 (Reasoning Aptitude)-No of question-20, marks-10

Complete the following series

21. 7 , 29 , 57 , 91 , 131,.....

(a) 187 (b) 177 (c) 175 (d) 139

22. 2 , 12 , 36 , 74 , 126 , ...

(a) 180 (b) 192 (c) 164 (d) 172

23. 7 , 9 , 13 , ..., 27 , 37

(a) 17 (b) 18 (c) 49 (d) 19

24. 2, 4, 11 , 37 , 153 , ...

(a) 661 (b) 771 (c) 512 (d) 669

25. 2, 4, 5 , 13 , 23, ...

(a) 97 (b) 52 (c) 67 (d) 69

26. 1, $\bar{5}$/2, 11/3, 19/4, ...

(a) 27/5 (b) 28/5 (c) 31/5 (d) 29/5

27. 11 , 29 , 55 , 129 , ...

(a) 140 (b) 161 (c) 151 (d) 179

28. 2, 12 , 36 , 80 , 150, ...

(a) 252 (b) 219 (c) 271 (d) 262

29. 1, 7 , 21, 43, 73, ...

(a) 110 (b) 121 (c) 111 (d) 131

30. 3, 4, 5, 5, 7 ,7, 9 ,....., 11, 14

(a) 9 (b) 10 (c) 11 (d) 8

31. 1, 4, 27, 16, 125 , 36, ...

(a) 512 (b) 49 (c) 216 (d) 343

32. 193 , 144 , 108, 83 , 67, ...

(a) 59 (b) 58 (c) 69 (d) 48

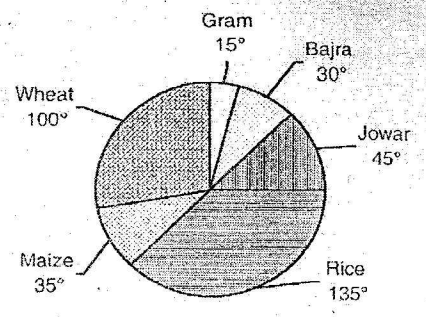

33. 4, 14 , 44 , 134, ...
(a) 246 (b) 394 (c) 404 (d) 412

34. 24, 12, 26, 13, 30, 15 ..... 18, 44
(a) 36 (b) 32 (c) 20 (d) 17

35. IJ : L :: GH: .....
(a) K (b) D (c) N (d) S

Directions for questions **36 to 40** These questions are based on the following pie chart.

The following pie chart represents the production of major crops in a particular region 'x' in the year 2001.

Total production = 72 million tonnes

36. If the total production of wheat and rice together in 2001 is 88% more than that in the previous year, then what was the total production (in million tonnes) of wheat and rice in 2000?
(A) 30 (B) 20
(C) 25 (D) 35

37. In 2001, by what percentage is the production of rice more than that of wheat?
(A) 30% (B) 25%
(C) 24% (D) 35%

38. If in the next year, the production of rice increases by 25% and the total production of crops increases by 15%, then what will be the total production (in million tonnes) of the given crops (except rice) in that year?
(A) 42 (B) 46·35
(C) 48·25 (D) 49.05

39. If in 2001, half of the wheat got spoiled due to rain and 25% of the remaining wheat got spoiled due to improper storage, then what would be the approximate angle made by the wheat left, if a new pie chart is drawn, all other values remaining the same?
(A) 37·5° (B) 40·2°
(C) 35·4° (D) 45°

40. Due to a mistake, the production of rice in 2001 had been under quoted by 40%. If this mistake is corrected, then wheat contributed what percentage of the production of major crops in that year?
(A) 27·42% (B) 24·82%
(C) 14·37% (D) 22.22%

SET- A

University Roll No._____

GLA UNIVERSITY, MATHURA

B. Tech. 2nd Year (Even Semester), Term II Examination, 2015-16

Subject: English for Professional Purposes–II | Subject Code: AHE 4083

Time: 40 Minutes | Max. Marks: 20

VERBAL APTITUDE

Spot the error in the following sentences.

1. While it is apparent (A)/ that Biotechnology offers significant (B)/ benefits, adequate attention has not been (C)/ focussed to this vital area. (D)/ No Error (E)
2. The CM assured the citizens (A)/ that stringent action (B)/ would be taken for (C)/ all those involved in corruption. (D)/ No Error (E)
3. All states protect their (A)/ citizens in the best of (B)/ their ability with the help (C)/ of the police or the army.(D)/ No Error (E)
4. Citizenship carries to it (A)/ a great burden of responsibility (B)/ especially in democratic countries which (C)/ have a free electoral system (D)./ No Error (E)
5. Pieces of popcorn and dropped chocolate (A)/ on the theatre floor (B)/ has stuck (C)/ in the treads (D)/ of Larry's new running shoes. (E)
6. Every love bug smashed on his windshield (A),/ every cockroach poisoned by insecticide (B),/ and every trapped spider starving to death (C)/ in a dusty corner cause Ernie (D),/ an aspiring Buddhist, a pang of guilt. (E)
7. Lincoln is one of those people (A)/ who thinks (B)/ eating at Tito's Taco Palace (C)/ is an (D)/ authentic multicultural experience. (E)

27. A brave and honest man will speak out and he will not be afraid .....consequences.
    A. A brave and honest man will speak out and he will not be afraid by consequences.
    B. A brave and honest man will speak out and he will not be afraid of consequences.
    C. A brave and honest man will speak out and he will not be afraid for consequences.
    D. A brave and honest man will speak out and he will not be afraid off consequences.
    E. A brave and honest man will speak out and he will not be afraid about consequences.
28. Usually he does not watch TV but he watches ___ movie every Saturday night.
    A. too few
    B. not enough
    C. a few
    D. the enough
    E. none of these
29. There's ___ crime in this part of Bristol but the City Centre is quite dangerous.
    A. a few
    B. not much
    C. not enough
    D. too much
    E. none of these
30. Have you ever visited ___ East?
    A. the
    B. a
    C. an
    D. an/ the
    E. none is required
31. They arrived soon after. The underlined word is a/an-
    A. Adjective
    B. Adverb
    C. Preposition
    D. Conjunction
    E. none of these
32. How ___ good would it do if we watered the plants ourselves?
    A. many
    B. lot
    C. most
    D. a lot of
    E. none of these

Read the passages carefully and answer the questions (Q. Nos. 33-36 & 37-40) based on them.

A few years ago, it was call centers that were outsourced to India, then came the technical and animation outsourcing phase. The last year has seen a rapid growth in a new form of outsourcing - Education Process Outsourcing (EPO) or online tutoring.

Indian teachers are being looked upon by countries like US, UK and Australia to groom their students. With rapid development in online learning, tutoring companies have. also got a boost. Many are investing in technologies like multimedia chat rooms, Interwise Enterprise Conferencing (IEC), Voice-over-Internet Protocol (VoIP) and so students from anywhere across the globe, log on to a website at a pre-determined time for a

particular course an Indian teacher logs on to the same website at the same time. The technology used is IEC, which integrates web, video and voice in an IP-based software platform. While it is a one-on-one session for a student, the teacher usually attends to multiple students simultaneously on different links. The session is generally of an hour, providing sufficient time to even ask questions.

There can be three methodologies to conduct online tutoring. The most expensive but beneficial is the one-to-one session, which allows tutoring companies to create customized tutoring solutions to suit individual needs as well. The second is virtual classroom which is ideal for small group learning around the word or limited to a classroom. The third can be web seminars which are for large group presentations that aim to build awareness and transfer knowledge to a segment of students

For online tutoring, 24 x 7 learning is now a norm, especially with learners living in practically every time-zone and having unpredictable learning habits. For teachers, apart from being competent in their fields, they need to have experience in tutoring over the web. The major subjects are Maths, English grammar, comprehension and writing, Science, Social Studies and Engineering.

33. Which of the following statements can be inferred from the passage?
    A. There is no scope for the EPOs in India due to technological incompetencies.
    B. Online tutoring is student-friendly.
    C. There has been an increase in the number of internet subscribers in the country.
    D. The concept of EPO is only a fantasy and cannot be practically supported by India.
    E. None of these
34. Identify the style of the passage.
    A. Analytical
    B. narrative
    C. descriptive
    D. abstruse
    E. none of these
35. Which of the following options is **not true** according to the passage?
    A. The least expensive method of conducting online tutorials is web seminars.
    B. The most expensive method of conducting online tutorials is the one-to-one session.
    C. The most beneficial method of conducting online tutorials is the one-to-one session.
    D. The teachers need to have experience for tutoring over the web.
    E. All true
36. Which of the following feature of an EPO Business?
    A. EPO makes it possible to deliver education to the desktop of the student irrespective of the location.
    B. One need not to be computer literate to work with an EPO firm.
    C. It is an older concept than Business Process Outsourcing.
    D. The concept of EPO has not actually materialized in any of the countries.
    E. None of these

It is now increasingly recognized that a balanced view of education should be adopted. In addition to intellectual training, imagination should be fostered and the emotions refined. The inquisitive mind, the intuitive heart, the sensitive spirit and the searching conscience should all be developed. In this age of science and technology, we should remember that the tree of life is something quite distinct from a grid of steel. Even as we try to remove poverty by the application of science and technology, poverty of mind requires to be removed by fine arts. Man does not live by bread alone though he cannot live without bread. Material poverty is not the only source of unhappiness. We should serve not the power interests of community but its human interests. Man is not mere clay on the whirling potter's wheel of an increasingly dehumanized society. He is a master of his social environment, a creative force himself, working for human purposes. He is not merely a Pavlovian dog with conditioned reflexes trained to serve the power interests. He is not a guinea pig or a monkey tested in the hands of a cosmic experimenter for life beyond this planet. Aesthetic and spiritual values contribute to the making of a full man. Man's creative side is nourished by art. (Cited from an article of Dr. Renu Nanda on Radhakrishnan's Views on Education")

37. Which of the following is not a purpose of education according to Dr. Radhakrishnan?
    A. Education should not only sharpen intellect but also foster imagination and refine emotions
    B. To nicely dehumanize social environment
    C. A student should be trained in creative art
    D. Education should make a student's mind inquisitive and heart intuitive
    E. Education should develop sensitive spirit and searching conscience
38. Which of the following is the theme of the passage?
    A. The source of happiness
    B. Need of fine arts
    C. Aim of education
    D. Spirituality in social circles
    E. Science and technology in society
39. Which of the following statements is not textually supported in this passage?
    A. Fostering imagination of the students is as important as intellectual training
    B. Man is a creative force and he should work for worthy purposes
    C. Poverty of mind can be removed by science and technology
    D. Aesthetic values and social values are required for being a full person
    E. Unhappiness is a result of poverty and lack of fine arts
40. Which of the following statements best summarises this passage?
    A. Keeping a trained dog and tested monkey makes a person happy
    B. Fertile imagination, sensitive spirit, love of arts together with intellectual training, make a person truly educated and happy
    C. Material poverty can be removed by fine arts and searching conscience
    D. Bread nourishes body but art nourishes mind
    E. Complete dehumanization of art and values should be objectively nurtured

A. a lot of
B. most
C. a little
D. little
E. few

32. I did not use ___ fertilizer last spring, and that has made an impact.
A. much
B. many
C. most
D. a few
E. few

Read the passage carefully and answer the questions (Q. Nos. 33-36 & 37-40) based on them.

The late Eugene Talmadge, in my opinion, possessed one of the better minds of Georgia, or even America. Moreover, he wore the Phi Beta Kappa key. By all measuring rods, Mr. Talmadge could think critically and intensively; yet he contends that I am an inferior being (because the writer was a coloured American). Are those the types of men we call educated?

We must remember that intelligence is not enough. Intelligence plus character--that is the goal of true education. The complete education gives one not only power of concentration, but worthy objectives upon which to concentrate. The broad education will, therefore, transmit to one not only the accumulated knowledge of the race but also the accumulated experience of social living. If we are not careful, our colleges will produce a group of close-minded, unscientific, illogical propagandists, consumed with immoral acts. Be careful, "brethren!" Be careful, teachers! (Cited from an article of Dr. Martin Luther King Junior)

33. Which of the following is not a purpose of education according to Martin Luther King Junior?
A. To enable the students to think critically and intensively
B. To train the students to concentrate upon worthy objectives
C. To inculcate intelligence and morality
D. To impart information and social values and experiences
E. To impart educational egoism and moral deprivation

34. Which of the following is the theme of the passage?
A. Intellectual gravity of Eugene Talmadge
B. Racial discrimination in the American society
C. Education of King Junior
D. Close-minded intellectual deprivation
E. True aim of education

35. Which of the following statements is not textually supported in this passage?
A. Eugene Talmadge was a very intelligent man of America
B. Inculcating intelligence and moral character is the true aim of education
C. Intellectual insolvency leads to character development

D. True education gives power of concentration along with worthy objectives in life
E. Good colleges should not produce illogical propagandists

36. Which of the following statements best summarises this passage?
A. Eugene Talmadge was the most intelligent man of America but he was unkind
B. Truly educated men have ability to concentrate objectively on things
C. True education produces an individual who has not only information and moral character but also power of concentration and worthy objectives.
D. Education should create a culture of propaganda on social experiences accumulated by people over time
E. A truly educated person has critical and intensive thinking devoid of worthy objectives in life

Expressways. Skyscrapers. Shopping malls. Flashing lights. Designer labels. Brighter sun. Cleaner air. Sweeter water... China's charms are endless. Every time an Indian finds himself in heady Beijing or Shanghai– the glitz and glamour so dazzles the eye that it produces instant awe and wonder. On the road to riches, the red dragon has left us for dead. Our half-reformed quota raj is no match for their miracle economy.

Barely 25 years ago, so runs the rueful refrain, the two South Asian giants were almost at par, equitably sharing the tag of being the world's two great partners in poverty. But look how they have leap-frogged ahead of us since: FDI, GDP, growth rate, you name it.
But in India, from tax reforms to fertilizer price hike, from VAT to disinvestment, no sooner is a major policy decision announced, than the government is forced to put it on hold, thanks to the perennial democratic fear - losing votes.

Our leaders must believe that democracy is, as the textbook says, truly about the people rather than a chosen few like the urban middle classes, countryside kulaks, CII and FICCI. But neither democracy nor totalitarianism has as yet found a formula to ensure these qualities in its leaders.

The lack of political freedom has played rather a small part in the dragon story. The Chinese tale is evidently a complex one. But it can't be told through starry-eyed envy and facile political binaries. Just to take one illustrative strand, unlike democratic India, communist China has shown an exemplary historical commitment - and in this it has followed Japan and other East Asian tigers - in the social sector. From a well-developed system of elementary education - China has only a sixth of our university graduates out it is much closer to universal literacy - to land reforms and health care. These "inclusionary arrangements", in Amartya Sen's famous phrase, have facilitated widespread economic participation, laying the basis for long-term growth.

If India has something to learn from the so-called Asian way, then, it is not that we need less of democracy. With one-third of Indians illiterate and nearly half without health care, there are strong structural impediments to how quickly we can grow.

Truth is, there is little hard empirical evidence to support the belief that democracy is usually a drag on economic growth. If many still want to blame it for our failures, the reason for that lies not in economic theory in a mindset which is increasingly suspicious of democratic politics for opening the door to the money.

37. The passage aims to:
A. Eulogize India's stand on democracy as against the totalitarian regime in China.
B. Defend India's democracy as a path to progress ever if some totalitarian regimes show success.
C. Show that the benefits of a totalitarian regime cannot be compared with the basic freedom provided by a democracy.
D. Analyze the pros and cons of both totalitarianism and democracy as paths to success.
E. All of these.

38. The author would most likely agree to the suggestion Indian democracy, one first needs to:
A. Improve infrastructural facilities.
B. Remove corruption in the bureaucracy.
C. Ensure universal economic participation.
D. Direct resources to where they are most needed.
E. None of these.

39. One may infer from the passage that "inclusionary arrangements" refer to policies that:
A. Improve employment opportunities.
B. Raise the standard of living.
C. Broaden the scope of eco-social benefits.
D. Encourage greater productivity.
E. All of these.

40. Which of the following is not mentioned in the passage as a group whose opinion is given weightage in India's democracy?
A. Countryside Kulaks
B. Rich farmers
C. Powerful bureaucrats
D. Salaried middle class
E. All of these

C. few
D. a few
E. none of these

32. ___ information proved to be outdated.
A. a lot
B. a majority of
C. plenty
D. plentiful
E. None of these

Read the passage carefully and answer the questions (Q. Nos. 33-36 & 37-40) based on them.

The Super-Industrial Revolution will consign to the archives of ignorance most of what we now believe about democracy and the future of human choice.

Today, in the techno societies, there is an almost iron-clad consensus about the future of freedom. Maximum individual choice is regarded as the democratic ideal. Yet most writers predict that we shall move further and further from this ideal. They conjure up a dark vision of the future, in which people appear as mindless consumers - creatures, surrounded by standardized goods, educated in standardized schools, fed a diet of standardized mass culture, and forced to adopt standardized styles of life.

Such predictions have spawned a generation of future - haters and technophobes as one might expect. One of the most extremes of these is a French religious mystic, Jacques Ellul, whose books are enjoying a campus vogue. According to Ellul, man was far freer in the past when "Choice was a responsibility for him". By contrast today, "The human being is no longer in any sense the agent of choice". And, as for tomorrow: "In the future, man will apparently be confirmed to the role of a recording device". Robbed of choice, he will be acted upon, not active. He will live, Ellul warns, in a totalitarian state run by velvet-gloved Gestapo.

This same theme - the loss of choice - runs through much of the work of Arnold Toynbee. It is repeated by everyone from hippie gurus to Supreme Court justices, tabloid editorialists and existentialist philosophers. Put in its simplest form, this Theory of vanishing Choice rests on a crude syllogism: science and technology have fostered standardization. Science and technology will advance, making the future even more standardized than the present. Ergo: Man will progressively lose his freedom of choice.

33. Which of the following best represents the key argument made by the author?
A. Techno societies are creating a dark image of the future by contributing towards the death of democracy.
B. A large generation of future-haters and technophobes are being spawned due to the Super-industrial revolution.

C. Standardization due to the advancement of science and technology will deprive human beings of their freedom of choice.
D. Man lives in a dictatorial state controlled by a strict police force.
E. None of these

34. We can infer from the passage that the author is:
    A. Pro-democracy.
    B. Pro-communalism.
    C. A technophobe.
    D. Against the advancement of science and technology
    E. can't determine
35. Which of the following examples best suits the theory of Vanishing Choice?
    A. Waiting in line at the supermarket to buy groceries for the week.
    B. A robot planning the menu for the office party
    C. Investing in a public sector bank rather than in a private sector one.
    D. Booking your flight ticket online.
    E. online shopping
36. Jacques Ellul believes that:
    A. Man had more to choose from in the past.
    B. Man had more freedom to make choices in the past.
    C. Man made better choices in the past.
    D. Man had less to choose from in the past.
    E. Man has better choices now

It seems to me that education has a two-fold function to perform in the life of man and in society: the one is utility and the other is culture. Education must enable a man to become more efficient, to achieve with increasing facility the legitimate goals of his life.

Education must also train one for quick, resolute and effective thinking. To think incisively and to think for one's self is very difficult. We are prone to let our mental life become invaded by legions of half truths, prejudices, and propaganda. At this point, I often wonder whether or not education is fulfilling its purpose. A great majority of the so-called educated people do not think logically and scientifically. Even the press, the classroom, the platform, and the pulpit in many instances do not give us objective and unbiased truths. To save man from the morass of propaganda, in my opinion, is one of the chief aims of education. Education must enable one to sift and weigh evidence, to discern the true from the false, the real from the unreal, and the facts from the fiction.

The function of education, therefore, is to teach one to think intensively and to think critically. But education which stops with efficiency may prove the greatest menace to society. The most dangerous criminal may be the man gifted with reason, but with no morals. (Cited from an article of Dr. Martin Luther King Junior)

37. Which of the following is not a purpose of education according to Martin Luther King Junior?
    A. To train students to think logically and critically
    B. To enable students to achieve success that has good purpose
    C. To enable the students to create the morass of propaganda
    D. To train the students to accept unbiased truth
    E. To enable the students to differentiate the truth from the falsehood
38. Which of the following is the theme of this passage?
    A. The importance of logic and critical thinking
    B. Prevailing scientific temper among students
    C. Higher goals of life
    D. Purpose of education
    E. Religious propaganda
39. Which of the following statements is not textually supported in this passage?
    A. By and large education is fulfilling its purpose.
    B. Purpose of education needs to be reconsidered.
    C. The press and the religion do not give us unbiased truths.
    D. Education enables us to realize our legitimate goals.
    E. The greatest social evil may come from an efficient mind devoid of morals.
40. Which of the following statements best summarises this passage?
    A. The greatest purpose of one's life should be to follow the truth that comes from the pulpit.
    B. To achieve lawful goals and think logically and critically without losing morals are the aims of education.
    C. Creating morass of propaganda scientifically is what should be the purpose of education.
    D. An individual with religiosity and high morality is the true product of modern education.
    E. Intellectual rigidity and moral propaganda are the attributes of true education.
