CS IInd year

Uni. Roll No:- _____

End Term Examination, 2016 – 17

B. Tech. II Year III Sem. (Common to ALL branches)

Subject: - ENGINEERING MATHEMATICS - III (AHM – 3101)

Time: - 2 Hrs. 30 Minutes **Total Marks:- 40**

Note: Attempt **ALL** sections. The terms, used in question paper, have their usual meanings.

SECTION A (16 x 1 = 16 marks)

Instructions: This section has **16** questions. Attempt **ALL** questions of this section.

Q.1. Mention any two applications of partial differential equations in Engineering.

Q.2. Solve the partial differential equation: $\frac{p}{\cos x}+\frac{q}{\cos y}=\sec z$

Q.3. Find the complementary function (C. F.) of the partial differential equation:

$$\frac{\partial^4 z}{\partial x^4}-\frac{\partial^4 z}{\partial y^4}=0$$

Q.4. Find the particular integral (P.I.) of the partial differential equation:

$$4r - 4s + t = 16 \log (2y + x).$$

Q.5. Solve the partial differential equation: $r + 2s + t = 0$

Q.6. Classify the partial differential equation: $u_{xx} + u_{yy} = u$.

Q.7. Find the Laplace transform of

$$F(t) = 2017$$

Q.8. Find the inverse Laplace transform of

$$f(p) = \frac{2p+6}{p^2+4}$$

Q.9. Find the Laplace transform of

$$F(t) = t e^t$$

Q.10. Find the inverse Lapiace transform of

$$f(p) = \frac{p}{p^2+1} e^{-\frac{\pi}{3}p}$$

Q.11. Find the Laplace transform of

$$F(t) = \frac{\sin 2t}{t}$$

Q.12. Find the inverse Laplace transform of $f(p) = \frac{1}{p^2(p^2+1)}$

Q.13. Evaluate $\oint_c \frac{dz}{z-2}$ around the circle $|z-2|=4$.

Q.14. What are Cauchy – Riemann equations?

Q.15. Show that the function $v = 3x^2y - y^3$ is harmonic.

Q.16. State Cauchy integral theorem.

SECTION B (4 x 3 = 12 marks)

Instructions: This section has 5 questions. Attempt **ANY FOUR** questions of this section.

Q.1. If f (z) is analytic within a circle C given by $|z-a|=R$ and if $|f(z)|<M$ on C, then prove that,

$$|f^n(a)| \leq \frac{M\lfloor n}{R^n}$$

Q.2. Evaluate: $\oint_c \frac{z^2+1}{z^2-1}dz$

where c is the circle:

(i) $|z|=3$

(ii) $|z-1|=1$

Q.3. Evaluate: $\oint_c \frac{1}{z^2+9}dz$ where c is $|z-3i|=4$

Q.4. (i) Discuss the nature of singularity of f (z) = $\frac{\sin(z-1)}{z-1}$ at z =1

(ii) Prove that f (z) = $\frac{e^z+e^{-z}}{2}$ is analytic.

Q.5. Evaluate $\int_0^{3+i} z^2 dz$ along the straight line $y=\frac{x}{3}$.

SECTION C (3 x 4 = 12 ma

Instructions: This section has 4 questions. Attempt **ANY THREE** questions of this sec

Q.1. Find the poles of the function $f(z) = \frac{z}{(z-1)(z-2)}$ and residues of f (z) at each of its poles. Also, evaluate $\oint_C f(z)dz$ using residue theorem where C is the circle $|z|=3$.

Q.2. An electrostatic field in the xy – plane is given by the potential function $\Phi = x^2 - y^2$. Find the stream function Ψ if $f(z) = \Phi + i\Psi$ is analytic. Also find f (z) in terms of z.

Q.3. Expand the function $f(z) = \frac{1}{(z+1)(z-3)}$ in the following regions:

(i) $|z-1|<2$

(ii) $-1<|z|<4$

(iii) $|z|>4$

Q.4. Using contour integration, prove that:

$$\int_0^\infty \frac{\log(1+x^2)}{1+x^2}dx = \pi \ln 2$$

University Roll No.....

End- Term Theory Examination, Odd Semester, 2016-17

B.Tech – Second (II) Year, III Semester

Industrial Economics **Paper Code: MBA5031**

Time: 0 2 ½ hours **Max Marks: 40**

Instructions:

1) Attempt **(Total All Questions from Section A), (Four questions from Section B) & (Three questions from Section C) Only.**
2) Answer should be to-the-point and must be supplemented with **neat graphical** illustration.

Section – A

Note: Attempt All Questions **1 × 16= 16 Marks**

I. Define Demonetization.
II. Define more elastic demand.
III. Define market.
IV. Name the factors of production and their payments.
V. Define shut down point of the firm.
VI. Define Marketing cost.
VII. Define discounting principle with an example.
VIII. Define Monopoly power with the help of formulae.
IX. How Economics is the study of choices?
X. Define NNP_{FC}.
XI. Write any two methods of quantitative demand forecasting?
XII. Is it practically possible to draw an upward sloping isoquant? Justify.
XIII. Who is price settler under perfect market?
XIV. Name any two methods of National Income calculation.
XV. Define hyper inflation.
XVI. Why total revenue changes with a constant rate Under Perfect Market?

Section – B

Note: Attempt ANY Four Questions **3 X 4 = 12 Marks**

I. Discuss Effect of demonetization on different groups of society.
II. Write down the important market equilibrium conditions for market. Must illustrate graphically.
III. Discuss phases of business cycle. Show them by a graphical representation.
IV. Discuss important characteristics of monopolistic competition with adequate examples?
V. Explain in detail value added & expenditure methods of national income calculation.

Section –C

Note: Attempt ANY Three Questions **4 x 3 = 12 Marks**

I. Discuss different types of market by classifying markets on the basis competition, time period and geographical dividend.
II. Discuss key characteristics of oligopoly market and compare it with monopoly.
III. What do you understand by inflation? How it can be controlled? Write an account on the basis of monetary and fiscal policies to control inflation.
IV. Discuss demand and marginal revenue curves for perfect market with respect to elasticity and slope of curves and output show them by graphical illustration.

C.S

Printed Pages: 02 **University Roll No.....**

End Term Examination, Odd Semester, 2016-17

CSE 3001 : Data Structures & Algorithms

Time: 02 ½ Hours **Max. Marks: 40**

Section – A

Note: Attempt All Questions. **(1x16=16)**

I. Define Abstract Data Type (ADT).
II. What are called Dynamic data structures?
III. What is worst-case efficiency?
IV. Minimum number of queues needed to implement the priority queue?
V. What is circular linked list?
VI. What is recursion?
VII. What is binary search?
VIII. Define the Complete Binary Tree.
IX. Write a difference between B trees and B+ trees.
X. In an AVL tree, at what condition the balancing is to be done?
XI. What is the difference between Inorder and Postorder tree traversal?
XII. What is the difference between binary tree and binary search tree?
XIII. What is the difference between a tree and a graph?
XIV. What is minimum spanning tree?
XV. What is Chained Hash Table?
XVI. Define the complete graph.

Section – B

Note: Attempt Any Four Questions. **(3x4=12)**

I. Explain Collision resolution strategies.

II. What is difference between file structure and storage structure?

III. What are the properties of spanning trees?

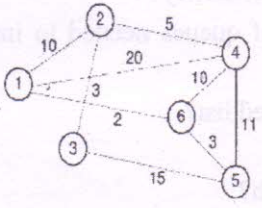

IV. What is Breadth First Searching in graphs? Which data structure is suitable for BFS algorithm? Justify your answer.

V. What are the methods available to storing sequential files?

Section – C

Note: Attempt Any Three Questions. **(4x3=12)**

I. Draw the adjacency matrix representation for the following graph.

II. Assume that you are hashing key K to a hash table of n slots (indexed from 0 to n − 1). For each of the following functions h(K), is the function acceptable as a hash function (i.e., would the hash program work correctly for both insertions and searches), and if so, is it a good hash function or not? Justify your answer (**Note: Function Random(n) returns a random integer between 0 and n − 1, inclusive**).

a) h(k) = k/n where k and n are integers.

b) h(k) = 1.

c) h(k) = (k + Random(n)) mod n.

d) h(k) = k mod n, where n is a prime number.

III. Write the algorithm for DFS.

IV. What are the different techniques used in allocating file blocks? Explain the pros and cons of each technique.

Printed Pages-3 **University Roll No.....**

End Term Examination, 2016-17

Course: B.Tech (CSE), Year: II, Semester: III

Computer Organization (CSE3002)

Time: 2.5 Hrs. **Total Marks: 40**

Notes:

1. All parts of a question should be answered at one place.
2. Answer should be brief and to-the-point and be supplemented with neat sketches.
3. Any missing or wrong data may be assumed suitably giving proper justification.
4. Figures on the right-hand side margin indicate full marks.

Section A

Note: Attempt All Questions **(1x16=16)**

I. How many AND gates are required in 4 x 4 binary multiplier?

II. Name the five building blocks of digital computer.

III. How many check bits are needed to detect single bit error in 1024 bits data word (Show all Steps)?

IV. What is the value of base b if the decimal roots of equation $X2-(10)\,b\,X+(31)\,b=0$ are 8 and 5?

V. In which format negative number are represented in Booth's Algorithm?

VI. A group of bits that tell the computer to perform a specific operation is known as .....

VII. Which register keeps track of the next instructions stored in memory?

VIII. Average access time of two level memory hierarchy is 12ns. The main memory has hit ratio of 90% and access time of 5ns. What is the access time of cache memory?

IX. Consider a case of 6 segment pipeline with clock cycle time 20 ns in each sub operation to execute 25 tasks. Pipeline system will take how much time to complete the tasks?

X. Name all the stages of a instruction cycle.

XI. Write the sequence of control steps for storing a word in memory.

XII. How many address lines are required in a 4096 x 8 EPROM Chip?

XIII. Differentiate main memory and control memory.

XIV. The communication bus which is used to fetch the address of an instruction from memory is called the....

XV. The most recently fetched instruction is available in which register.

XVI. What is the difference between 2D, 2& Half D cache memory?

Section B

Note: Attempt any Four Questions **(3x4=12)**

I. Differentiate memories mapped I/0 and peripheral mapped I/0?

II. What do you mean by Interrupts? Explain various types of Interrupts with example.

III. Explain the read and write operation within cache memory with suitable example.

IV. Why I/0 interfaces are required? Describe various methods for I/0 interface together with their merits and demerits.

V. What do you mean by Bus, and Bus Arbitration, also write and explain different types of buses in short.

Section C

Note: Attempt any Three Questions **(4x3=12)**

I. A Computer uses RAM chips of 512 x 8 and ROM chips of 2048 x 8. How many RAM chips and ROM chips are needed to provide a RAM memory capacity of 2048 bytes and ROM memory of 2048 bytes? Draw the memory address map for the system and show CPU connection with memory.

II. A virtual memory system has an address space of 8k words, a memory space of 4k words, and page and block sizes of 1k words. The following page reference changes occurs during a given time interval.

5 3 2 1 7 0 4 6 4 2 0 1 3 5 7

Determine the number of page faults by using the following algorithms and also state which one is best?

a) LRU b) Optimal

III. What is DMA? Explain DMA operation with a diagram. Also explain data transfer modes in DMA.

IV. Consider a memory system that uses a 32-bit address to address at the byte level, plus a cache that uses a 64-byte line size.

a) Assume a direct mapped cache with a tag field in the address of 20 bits. Show the address format and determine the following parameters: number of addressable units, number of blocks in main memory, number of lines in cache, size of tag.

b) Assume an associative cache. Show the address format and determine the following parameters: number of addressable units, number of blocks in main memory, number of lines in cache, size of tag.

Printed Pages-4 **University Roll No.....**

B.Tech II Year III Semester, End Term Examination, 2016-17

CSE 3003: Data Base Management System

Time: 02 ½ Hours **Total Marks: 40**

Note:

1. Attempt **all** questions from Section-A, **any four** from Section-B and **any three** from Section-C.
2. Symbols have their usual meanings.

Section-A

Note: Attempt All Questions. **[1X16=16 marks]**

I. What are the two main disadvantages of file processing system which were removed by the DBMS?

II. What is meant by the degree of relationship set?

III. What is a data dictionary?

IV. Give example of a simple, composite attributes of an entity?

V. What is meant by lossless-join decomposition?

VI. Write the levels of data abstraction.

VII. Consider two tuples X and Y, Write the operation whose result includes tuples that are only in X but not in Y.

VIII. Consider the a relation schema Employee (Emp_id, Emp_name, Emp_sal) write a SQL query to find the top three highest salary paid employees?

IX. What is union compatibility?

X. What do you mean by referential integrity?

XI. Name the relational operation that yields all the possible pairs of rows from two tables.

XII. When is a transaction roll backed?

XIII. What are the properties of Transaction?

XIV. What are the attributes of a cursor?

XV. Write the syntax to delete a Trigger.

XVI. What are the pitfalls of lock based protocol?

Section-B

Note: Attempt Any Four Questions. **[3x4 = 12 Marks]**

I. Define Conflict and View serializable schedules. State whether the following schedule is conflict serializable or not.

T1	T2
Read(A)	
Write(A)	
	Read(B)
	Write(B)
Read(B)	
Write(B)	
	Read(A)
	Write(A)

II. Consider the following two transactions:

T_{31} : Read(A)
Read(B)
If A=0 then B:= B + 1
Write (B)

T_{32}: Read(B)
Read(A)
If B = 0 then A:= A +1
Write(A)

Add lock and unlock instructions to transactions T_{31} and T_{32}, so that they observe the two-phase locking protocol. Can the execution of these transactions result in a deadlock.

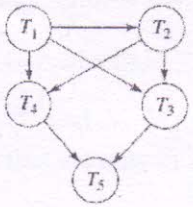

III. Consider table STU_MARKS as given below:

COLUMN NAMES	DESCRIPTION
STUD_NAME	Name of Student
PERCENTAGE	Percentage Marks

Create a trigger TRIG_STUD_DEL that will insert all deleted rows from table STU_MARKS to table BACKUP_STU_MARKS student.

IV. Discuss the salient features of Deferred database modification and Immediate database modification strategies in brief.

V. Consider the precedence graph of the given figure. Is the corresponding schedule conflict serializable? Explain your answer.

Section-C

Note: Attempt Any Three Questions **[4X3=12 marks]**

I. Write a PL/SQL code block that displays the Names, GPA of students along with the grades of students after calculation from Student table using an explicit cursor. Student table contains the field S_ID, S_Name, GPA and the criteria of grade can be considered as grade = A if GPA >7; and grade = B, otherwise.

II. Describe major problems associated with concurrent processing with examples. What is the role of locks in avoiding these problems?

III. State the working of multi-version timestamp based protocol. Suggest a scheme to avoid the phantom phenomenon.

IV. What are distributed databases? List advantage and disadvantages of data replication and data fragmentation.

ENGLISH FOR PROFESSIONAL PURPOSE - I (AHE 3083)

Paper Code : PG - 001 | Set No : Set-C | Session : 2016-17 | Time Allowed (Min) : 40

Univ Rno. : _____ | Name : _____ | Course & Sem : _____ | Section & Class RNo. : _____

1. A metaphor is a poetic device that deals with comparison. It compares similar qualities of two dissimilar objects.With a simple metaphor, one object becomes the other: Love is a rose.Although this does not sound like a particularly rich image,a metaphor can communicate so much about a particular image that poets use them more than
any other type of figurative language. The reason for this is that poets compose their poetry to express what they are experiencing emotionally at that moment. Consequently, what the poet imagines love to be may or may not be our perception of love. Therefore, the poet's job is to enable us to experience it, to feel it the same way that the poet does.We should be able to nod in agreement and say, "Yes, that's it! I understand precisely where this person is coming from."
Let's analyze this remarkably unsophisticated metaphor concerning love and the rose to see what it offers. Because the poet uses a comparison with a rose, first we must examine the characteristics of that flower. A rose is spectacular in its beauty, its petals are velvety soft, and its aroma is soothing and pleasing. It's possible to say that a rose is actually a veritable feast to the senses: the visual, the tactile, and the aural [more commonly known as the senses of sight, touch, and sound]. The rose's appearance seems to border on perfection, each petal seemingly symmetrical in form. Isn't this the way one's love should be? A loved one should be a delight to one's senses and seem perfect. However, there is another dimension added to the comparison by using a rose. Roses have thorns. This is the comprehensive image the poet wants to communicate; otherwise, a daisy or a mum would have been presented to the audience as the ultimate representation of love—but the poet didn't, instead conveying the idea that roses can be treacherous. So can love, the metaphor tells us. When one reaches out with absolute trust to touch the object of his or her affection, ouch, a thorn can cause great harm! "Be careful," the metaphor admonishes: Love is a feast to the senses, but it can overwhelm us, and it can also hurt us. It can prick us and cause acute suffering. This is the poet's perception of love—an admonition.
What is the point? Just this: It took almost 14 sentences to clarify what a simple metaphor communicates in only five words! That is the artistry and the joy of the simple metaphor.

The main idea of this passage is
a. poetic devices are necessary for poets.
b. poetry must never cater to the senses.
c. always use words that create one specific image.
d. the metaphor is a great poetic device.
e. None of the above

2. Susan fails all of her history exams. She _____ passes them.
A. ever
B. never
C. often
D. seldom
E. None of the above

3. A ideal presenter will:
a. Make maximum use of Non-Verbal Mannerism
b. Make minimum use of Non-Verbal Mannerism.
c. Make a perfect balance between Verbal and Non-Verbal Mannerism.
d. Never be sure about the use of Non-Verbal Mannerism
e. First confirm with audience which Non-Verbal Mannerisms they don't like.

4. The meeting taken (A)/place when (B)/you were at a (C)/ conference in Delhi last month (D)/No Error (E)

5. Robin promised his daughter that he'd present her a scooty. The underlined part is:
A. Subject
B. Predicate
C. Direct Object
D. Indirect Object
E. Adjunct

6. spot the erroneous part of the sentence:
I will call you (A)/ and your friends (B)/ with their classmates (C)/ when the dinner will be ready. (D)/ No Error (E).

7. I plan to take my vacation _____ in June _____ in July.
A.whether / or
B. either / or
C. as / if
D.only/also
E.all of the above

8. Neelam doesn't like to drive, _____ she takes the bus everywhere.
A.but

B.yet
C.so
D.nor
E.all of the above

9. I haven't got _____pictures in my bedroom.
a.any
b. some
c. many
d. much
e. a little

10. Spot the Erroneous Part of the Sentnece

Twenty thousand rupees have been (A)/ allocated to conduct (B)/ a one-day seminar (C)/ in the department. (D)/ No Error (E).

11. If two employees face a barrier in their interpersonal communication regarding an official matter due to some problem in the official set-up, which level of barrier does it come under?
a. Organizational barrier
b. Inter-personal communication
c. Extra-personal barrier
d. Mass-communication
e. Intra-personal barrier

12. Spot the Erroneous Part of the Sentence

The news, India have won (A)/ the match by three goals to one (B)/ sent a happy wave among people (C)/ across the nation. (D)/ No Error (E).

13. Your defence that (A)/you found the purse (B)/ lying on the (C)/ floor cannot be trust (D)/ No Error (E)

14. Fill in the blanks with correct alternative:
Mrs. Singh _____awake the whole of last night worried about her husband's health.
a. Lied b. Laid c. Lay d. Had laid

15. Playing basketball is his only pastime. The underlined part of the sentence is:
A. Subject
B. Predicate
C. Direct Object
D. Indirect Object
E. Adjunct

16. Jane is in front of Tom. And so, Tom is _____ Jane.
A. beside
B. behind
C. before
D. between
E. None of the above

17. Find the erroneous part of the sentence
Big landlords in the villages (A)/ who were till now paid for electricity (B)/ at subsidized rates will soon (C)/ have to pay the government at full rates. (D)/ No Error. (E)

18. A metaphor is a poetic device that deals with comparison. It compares similar qualities of two dissimilar objects.With a simple metaphor, one object becomes the other: Love is a rose.Although this does not sound like a particularly rich image,a metaphor can communicate so much about a particular image that poets use them more than
any other type of figurative language. The reason for this is that poets compose their poetry to express what they are experiencing emotionally at that moment. Consequently, what the poet imagines love to be may or may not be our perception of love. Therefore, the poet's job is to enable us to experience it, to feel it the same way that the poet does.We should be able to nod in agreement and say, "Yes, that's it! I understand precisely where this person is coming from."
Let's analyze this remarkably unsophisticated metaphor concerning love and the rose to see what it offers. Because the poet uses a comparison with a rose, first we must examine the characteristics of that flower. A rose is spectacular in its beauty, its petals are velvety soft, and its aroma is soothing and pleasing. It's possible to say that a rose is actually a veritable feast to the senses: the visual, the tactile, and the aural [more commonly known as the senses of sight, touch, and sound]. The rose's appearance seems to border on perfection, each petal seemingly symmetrical in form. Isn't this the way one's love should be? A loved one should be a delight to one's senses and seem perfect. However, there is another dimension added to the comparison by using a rose. Roses have thorns. This is the comprehensive image the poet wants to communicate; otherwise, a daisy or a mum would have been presented to the audience as the ultimate representation of love—but the poet didn't, instead conveying the idea that roses can be treacherous. So can love, the metaphor tells us. When one reaches out with absolute trust to touch the object of his or her affection, ouch, a thorn can cause great harm! "Be careful," the metaphor admonishes: Love is a feast to the senses, but it can overwhelm us, and it can also hurt us. It can prick us and cause acute suffering. This is the poet's perception of love—an admonition.
What is the point? Just this: It took almost 14 sentences to clarify what a simple metaphor communicates in only five words! That is the artistry and the joy of the simple metaphor.

It can be inferred that the true meaning of the love is a rose metaphor is that
a. love is a true joy.
b. love comes only once in a lifetime.

c. love is never permanent.
d. love is a combination of good and bad experiences.
e. none of the above

19. Decide which sentence is the most preferable in respect to grammar/ meaning and usage, suitable for formal writing.
A. It was raining since I came home.
B. It has been raining since I came home.
C. It has rained since I came home.
D. It has been raining since I come home.
E. None of the above is correct.

20. I've got to solve_____ math problems before I go to sleep.
a. the little
b. all
c. some
d. none
e. none of these

This is the poet's perception of love—an admonition. What is the point? Just this: It took almost 14 sentences to clarify what a simple metaphor communicates in only five words! That is the artistry and the joy of the simple metaphor.

It can be inferred that a metaphor is
a. a type of figurative language.
b. the only poetic device.
c. not precise enough.
d. a type of flower in a poem.
e. none of the above

3. The meeting taken (A)/place when (B)/you were at a (C)/ conference in Delhi last month (D)/No Error (E)

4. Robin promised his daughter that he'd present her a scooty. The underlined part is:
A. Subject
B. Predicate
C. Direct Object
D. Indirect Object
E. Adjunct

5. Spot the Erroneous Part of the Sentence

Surprisingly, on reaching the class (A)/ I found (B)/ that no teacher and no student were (C)/ present there. (D)/ No Error (E).

6. Recently, running a coaching institute has become very difficult. The underlined part in the sentence is functioning as:
A. Subject
B. Predicate
C. Direct Object
D. Indirect Object
E. Adjunct

7. Spot the Erroneous Part of the Sentence

The news, India have won (A)/ the match by three goals to one (B)/ sent a happy wave among people (C)/ across the nation. (D)/ No Error (E).

8. There aren't _____students in the library.

a. Many
b. Much
c. the little
d. a lot
e. none of these

9. Denotative language is used in: a. Scientific Subjects
b. Politics
c. Literarature
d. Daily usage
e. None

10. Decide which sentence is the most preferable in respect to grammar/ meaning and usage, suitable for formal writing.
A. We are eating all day so we felt a bit ill.
B. We had been eating all day so we feel a bit ill.
C. We had been eating all day so we felt a bit ill.
D. We had been eaten all day so we felt a bit ill.
E. None of the above is correct.

11. She gave a cookie to _____child.
a. a few
b. some
c. each
d. all
e. any

12. It was clear from (A)/the way they (B)/were behaving (C)/ that they had been lost senses (D)/No Error (E)

13. Neelam doesn't like to drive, _____ she takes the bus everywhere.
A.but
B.yet
C.so
D.nor
E.all of the above

14. Fill in the blanks with correct alternative:
I _____ for morning walk regularly, but now I don't go.
a. Used to go b. Had used to go c. Am going d. Was used

15. It is only now that (A)/ government is waking up for (B)/ the danger and trying to enact (C)/ or enforce environmental laws on factories. (D)/ No Error. (E)

16. In his famous study of myth, The Hero with a Thousand Faces, Joseph Campbell writes about the archetypal hero who has ventured outside the boundaries of the village and, after many trials and adventures, has returned with the boon that will save or enlighten his fellows. Like Carl Jung, Campbell believes that the story of the hero is part of the collective unconscious of all humankind. He likens the returning hero to the sacred or tabooed personage described by James Frazier in The Golden Bough. Such an individual must, in many instances of myth, be insulated from the rest of society, "not merely for his own sake but for the sake of others; for since the virtue of holiness is, so to say, a powerful explosive which the smallest touch can detonate, it is necessary in the interest of the general safety to keep it within narrow bounds."

There is _____ between the archetypal hero who has journeyed into the wilderness and the poet who has journeyed into the realm of imagination. Both places are dangerous and full of wonders, and both, at their deepest levels, are journeys that take place in the kingdom of the unconscious mind, a place that, in Campbell's words, "goes down into unsuspected Aladdin caves. There are not only jewels but dangerous jinn abide . . . "

The phrase that would most accurately fit into the blank in the first sentence of the second paragraph is
a. much similarity.
b. a wide gulf.
c. long-standing conflict.
d. an abiding devotion.
e. none of the above

17. Jane is in front of Tom. And so, Tom is _____ Jane.
A. beside
B. behind
C. before
D. between
E. None of the above

18. I plan to take my vacation _____ in June _____ in July.
A.whether / or
B. either / or
C. as / if
D.only/also
E.all of the above

19. spot the erroneous part of the sentence:
I will call you (A)/ and your friends (B)/ with their classmates (C)/ when the dinner will be ready. (D)/ No Error (E).

20. Read the following conversation and answer the question:

Presenter: So, dear and respected doctors, as I have explained, my company is providing the best medicines in the cheapest rate in the market, I claim that you should prescribe our medicines. Now, I would like to welcome questions from the audiences.
Doctor 1: What will we get in return? The medicines are already so cheap the company is hardly earning any profit, as you claim. Why should we prescribe such medicines?

The presenter seems to be concluding:
a. a good and analytical presentation
b. the answer of a previous question
c. a talk on the power supply in a company
d. a presentation for the school teachers.
e. None

Printed Pages: 16 [SET A]

University Roll Number:

B. Tech II Year/ MCA III Semester, End Term Exam-2016

AHE-3001: Ethics & Values

Time: 2 ½ Hours **Max. Marks: 40**

Note: There are five passages in this paper. These are based on course discussion. Carefully read the passages and answer the following questions .Each question has multiple choices. Fill all the information in OMR sheet neatly in the blocks.

Each question has only ONE CORRECT ANSWER (one among a,b,c,d). Choose the most appropriate answer. No partial marking.

Passage 1 (10X1 = 10) (Attempt All Questions)

According to some thinkers, justice in society means to give one what he/she deserves. In other words, if one performs good meritorious acts, one must be rewarded and if one does something wrong one must be punished accordingly. This argument is called "moral desert". These theorists define social justice as distribution of social goods in accordance with people's talents and merits. However, some policies of governments all around the world seem to go against this principle- in particular, the policy of "Affirmative action". The moral desert argument does not seem to apply on "Affirmative action" – the policy by which a government usually acts pro-actively to redress the past injustice to certain sections of society by reserving seats and positions in the areas of education, employment and business. We need to understand this issue in light of different views and theories of social justice.

There are three prominent views on the justice and its distribution to the common people. Let's first talk about the John Rawls who in his book "A Theory of Justice" advances a thought experiment -what he calls the "Original Position"-which is a situation in which all rational and self-interested individuals take decisions or make choices on the benefits and developments without having a prior knowledge of their arbitrary facts like race, ability, cast, gender and class etc.-termed the "veil of ignorance" by Rawls. Under the "veil of ignorance" they have to choose and decide on the principles of justice by which a fair distribution of resources, powers and rights can be done. Rawls argues that two principles seem reasonable in such a situation: 1) Equality principle, according to which each individual must be

provided equal rights with the most extensive basic liberties compatible with similar liberties for others, and 2) Difference principle what he calls qualified equality principle that maintains that socio-economic inequalities have to arranged in a manner so that they are to the greatest benefit of the least advantaged members of society.

Before we understand what Rawls actually means by his difference principle let us try o understand three basic arguments of Affirmative action theory: 1) Corrective argument; according to which a government should take positive actions to redress the wrongs of past by benefiting some cast, race, gender or group who have not been given the proper resources to develop and compete 2) Compensatory argument which points out the fact that some advantaged groups of people have to compensate for some least advantaged groups of people who have been deprived of basic resources for development, and 3) Social Representation / Diversity argument that maintains that the different variety of groups who actually make up the whole society should be given proper and proportionate socio-political-economic representation in terms of education, job and business. However, Rawls in his qualified equality principle argues that socio-economic inequalities in terms of government affirmative action policies and provisions must be in favor of least well-off.

The second prominent view is Aristotelian Virtue theory in which he criticizes the Utilitarian view of justice in favor of what he calls the Teleological view of justice. Aristotle asks: if you have to distribute best flutes, to who would you give them? There could be those who are needy while some might want it because they are interested in playing flutes. Some might even be willing to pay a huge price for the best flutes. However, surprisingly, Aristotle says the best flutes have to be distributed to the best flute players who have the best excellence or virtues to practice flute playing. Here, Aristotle offers his teleological explanation of the idea of justice that society consists of different kinds of people having different virtues and people must be rewarded according to their best virtues so that the best society can be created. Thus, justice in fair distribution has got a "telos" or purpose to give resources and opportunities to the people who can create a good society by practicing their virtues.

Aristotelian view really throws a different light on the issue of affirmative action. A group of people who are suffering from the socio-economic equalities in education, job and business usually criticize the other benefited groups and argue that there should not be inequalities in allocation of seats or positions. They further argue that due to reservation less qualified and skilled people get the powers and positions in governance and they produce poor quality results. But, this view is questionable on the grounds that the people of either group, advantaged or non-

advantaged, meritorious or less qualified are doing the same thing, corruption in the various systems without practicing their skills or virtues. As a result, the so called merit is not serving the purpose to create a better society and most of the people those who are getting opportunity and resources are utilizing and exploiting their powers and positions. Nevertheless, the reservation given in the name of cast and other arbitrary facts which are only by chance and not chosen by any individual is really poses a moral problem of forced discrimination. Therefore, the reservation policies must be in Rawlsian terms be based on qualified equality principle serving the least well-off to really improve the socio-economic condition of less advantaged people.

The third prominent view offers a criticism of both the Rawlsian and Aristotelian views of justice. The third view advocates individual rights and is against active roles of government in fair distribution of resources. Immanuel Kant and Robert Nozick are the two main philosophers who defend the theory of rights and liberty of people. Immanuel Kant argues that individuals have rationality to decide and thereby they must be given autonomy to choose their own ideas of good life. We should not be led by any purpose to create a better society; rather a better society will automatically come when the individuals are given basic liberties and rights with a sense of autonomy. On the other hand, Robert Nozick rejects the active roles of governments and affirmative action theories. He argues that government roles should be limited to the security and protection of people. There should not be any paternalistic legislation, moral legislation, and wealth re-distribution through taxation. Government intervention in individuals' lives is violation of individual liberty which limits their choices relating to education, job, business and life as a whole.

The first two views and the third view in contrast give the impression of a tussle between the Fit versus freedom. Rawls and Aristotle argue about the fitness of the principles and virtues, while Nozick and Kant defend the rights and freedom of individuals. However, Rawls rejects Nozick's point that merit should be the criteria for just distribution. He says merit is just moral luck and no one can claim moral credit for his merits. Merit too, he says, is an arbitrary fact that is not entirely one's own creation.

Reservation alone is not the solution. Creamy layer must be excluded from the benefit of reservation. The policy should purposefully lessen the socio-economic gaps amongst the people so that they can all compete in the race of development with, if not an equal start then at least, a fair start. Reservation in this way can rationally be based on socio-economic real facts and conditions, and the socio-economic benefits should be distributed to those who really deserve without

considering the arbitrary facts like cast, class, race and gender. Indeed we cannot really go in the past to rectify what has been done but taking meaningful lessons from the past it is better to give proper resources to all those who deserve and want to compete and develop.

Questions:

1. Which of the following points are right about the moral desert argument?

1. One should be respected on the grounds one actually deserves.
2. One should be rewarded for one's good actions and punished for the bad.
3. Distribution of social goods should be based on one's effort.
4. Socio-economic inequality should be for least well-off

a)2&3 b)3&4 c)2&3 d)1,3&4

2. "The best flutes must go to the best flute players according to Aristotle". Which of the following statements cannot be said to be right according to Aristotle?

1. Best flute players require best flutes.
2. Best flute players derive pleasure in best flutes.
3. Best flute players would use flutes at best.
4. Best flute players have virtue to play flutes well.

a)1 b)3 c)2 d)4

3. What is "veil of ignorance"?

1. It is a thought experiment.
2. It is the position in which people don't know their arbitrary facts.
3. It is the position where we don't know about our history.
4. In this people know their arbitrary facts.

a) 1&2 b) 1,2&3 c)1,3&4 d)1&2

4. Which of the following statements are NOT true about Affirmative Action Theory?

1. A government should not take positive actions to redress the wrongs of past.
2. Some disadvantaged groups of people have to compensate for some advantaged groups of people.
3. The different variety of groups who actually make up the whole society should be given proper and proportionate socio-political-economic representation.
4. Socio-economic inequalities should not be based on arbitrary facts

a) 1&2 b) 1&4 c) 2&3 d) 2&4

5. What is Teleological view of justice?

1. Different kinds of people have different virtues to create a society.
2. People must be respected according to their best virtues.

3. Justice has a purpose to create a better society.
4. Justice is a distributive notion

a)2&3 b)1&3 c) 3&4 c)4

6. Which of the following statements are right about the Difference Principle of John Rawls?

1. It is the principle of qualified inequality.
2. It allows the socio-economic inequalities that are best for least well off.
3. It respects both one's efforts and the benefit of disadvantaged people.
4. Difference principle believes in distribution according to merit.

a)1&4 b)1,2&3 c)1,3&4 d)2,3&4

7. Which of the following statements are NOT correct about corrective and compensatory arguments?

1. A governments should not take any positive action to correct the past wrongs.
2. Those cast, race, and gender groups will be benefited who have been privileged in history.
3. Advantaged groups have to compensate for least advantaged group.
4. There should not be any discrimination

a)1&2 b)3&4 c)4 d)3

8. Why does Robert Nozick criticize the Affirmative action theory?

1. Because a government takes positive actions to intervene in individuals lives.
2. Because a government re-distributes the wealth in the name of taxation to benefit unprivileged people.
3. Because a government limits their choices relating to education, job, business and life as a whole.
4. Because a government protects and secures people from external threats

a)1,2&3 b)1&2 c)1&3 d)2,3&4

9. What is criticism of Immanuel Kant on the Aristotelian view of justice?

1. Every individual can have a different autonomous purpose.
2. People have rationality to decide about their life.
3. People must be given autonomy to choose their own ideas of good life.
4. We should respect only virtuous people who are fit for society.

a)1&3 b)1,2&3 c)1,3&4 d)1&2

10. What are the views of Robert Nozick that John Rawls would Not accept?

1. Merit is criteria for just distribution.
2. Merit is one's ownership.
3. We have moral credit to our merits.
4. Merit is just our moral luck.

a)1,3&4 b)1,2&3 c)3&4 4)1,2&4

Passage: 2 (6X1=6) (Attempt All Questions)

According to moral desert argument, what one deserves is based on his or her merit, skills and efforts. In ancient times, Aristotle made this point clear that justice is giving people what they deserve. But how do we know what people deserve? What goods and opportunities should go to which persons? Aristotle's answer is that we have to consider the telos—the point, the end, or the purpose—of the good in question. Say we have some nice flutes. Who should get them? According to Aristotle, it's not the rich person, since playing flutes has nothing to do with money, nor is it the person who will be made most happy, since making good music is different than being happy. The purpose of a flute is to be played and to be played well. Therefore, Aristotle thinks, the flutes should go to the best flute players. Aristotle's method is to think about justice by thinking about the purpose of a good, an institution, or even a person. If the purpose of a tennis court is to play tennis, then the best tennis players should get priority. If the purpose of universities is to create knowledge and to foster excellence, then the best students should be admitted and the best scientists and professors should be allowed to work at them. If the purpose of being human is to live a good life, then society should promote the good life by ensuring that citizens have the resources necessary for living a good life and by encouraging them in the pursuits that make for a good life. Is this the right way to think about justice?

Questions:

11) We should respect the virtues. Which of the following points are consistent with this Aristotelian view?

1. The best flutes must get best flute players.
2. We should distribute according to merits.
3. The best flute players morally deserve to get best flute.
4. The best flute must go to one who can best utilize it for social good.

a) 2 b) 1,2&4 c)1,2&3 d)4

12) What is the teleological view of justice?

1. It is to create a society in which everybody is equal.
2. A person or an institution deserves according to their purpose.
3. It is to ensure that rights are not violated.
4. It is to fulfill everyone's need.

a)3 b)4 c)1 d)2

13) Which of the following statements cannot be said to be the purpose of a university according to Aristotle?

1. It is to provide a good placement.
2. It is to give admission to the needy people.
3. It is to admit best students.
4. It is to allow best scientists and professors to work

a)3 b)1&2 c)1&4 d)1

14) Which of the following are Not questions about the Aristotelian view of justice?

1. How do we know what people need?
2. What goods and opportunities should go to which persons?
3. Who can best utilize the resources?
4. What is the best utility of a resource in distribution?

a) 1&4 b) 1&2 c)2&3 d)2&4

15) Which of the following statements are right about justice according to Aristotle?

1. Justice is based on moral desert.
2. All social institutions should fulfil their purpose.
3. Justice is equality in society.
4. It is based on respect for a human being's needs.

a) 1&2 b) 1,2 &3 c) 3&4 d) 1&4

16) The purpose of justice is to create a better society according to Aristotle. What we can conclude from this statement?

1. Political Power should be based on democracy.
2. Justice is about social justice taking care of all irrespective of the merits.
3. Better society can be formed only by best people doing the right things.
4. Only meritorious people can create better society.

a)1&2 b)2 c)3&4 d)1&4

Passage: 3 (8X1=8) (Attempt All Questions)

To ask whether a society is just is to ask how it distributes the things we prize-income and wealth, duties and rights, powers and opportunities, offices and honors. A just society distributes these goods in the right way: it gives each person what s/he deserves. It cares for the social welfare and also for individual freedom & rights. It honors the virtues and respects the moral persons. There basically are three different approaches to understand the justice in society: Welfare approach, Freedom & Rights approach, and the Virtue approach. Each of these ideals suggests a different way of thinking about justice.

For Utilitarians like Bentham, happiness is simply pleasure and the absence of pain. People are happy insofar as they feel pleasure, unhappy insofar as they feel pain; there is nothing else that goes into happiness. Abilities, achievements, friendship, love—all these are, at best, only means to being happy, and only insofar as they give rise to pleasure. For Bentham, there is no intrinsic difference among different kinds of pleasures. They only differ in degrees of intensity, not in kind. Utilitarians think that the right thing to do is whatever produces the greatest amount of happiness for the greatest number.

Libertarians disagree on this point and argue that we must never violate anyone's rights—even if doing so would increase overall happiness. According to libertarians, the greatest threat to individual rights comes from the government. You should be able to drive without a seat belt if you want. The government should not fine you. That is unacceptably paternalist. And if you want to use drugs or engage in unconventional behavior, you should be free to do so, provided you don't violate anyone else's rights in the process. The government has no business passing moralistic legislation. It shouldn't tell you how to live your life. Most important, the government should never tax for redistributive purposes. Redistributive taxation is theft. Taking your earnings and giving it to other people is like forcing you to work for those people. Libertarians say it's almost like slavery. Libertarians make strong claims.

So we see that in contrast to utilitarians, who believe that the right thing to do is always to maximize happiness, the Libertarians think that the right thing to do is to let people do whatever they want as long as they don't interfere with other's rights.

Kant holds the view that rationality is the goal of morality; unlike the libertarians, Kant denies that freedom consists in doing whatever one wants. Kant thinks that morality is a kind of universal law which everyone has to obey. Therefore, he thinks it must be the case that everyone could obey it. This is his test for morality. According to Kant, your action is moral only if you acted on a maxim that is universalizable- which you can will to become a universal law. Morality of an action depends on whether it was done with this sense of duty, or not.

The question "What is moral?" for John Rawls is a question concerning justice. According to John Rawls, principles of justice are whatever principles would be agreed to behind a "Veil of ignorance," where no one knows his or her age, sex, race, intelligence, strength, social position, family wealth, religion, or even life goals. If we were unaware of these particular facts about ourselves, we would not propose social rules designed to give ourselves an unfair advantage over other people. Therefore, according to Rawls, the principles we would agree to behind a veil of ignorance would be fair and just.

Aristotle's method of reasoning about justice asks us to reason from the purpose of an institution to a conclusion about how the institution should function. In other words, we start with the purpose, and then ask how the institution can best serve this purpose. For example on political leadership Aristotle would argue that we should elect the leaders who have the virtues of administration and leadership to create a better society; the leaders who can think about society as a whole.

Questions:

17) Which of the following statements are right according to Bentham?

1. Pleasure and pain differ only in degree, not in kind.
2. There is no qualitative difference amongst the pleasures.
3. We should aim at maximizing pleasure.
4. We should aim at pleasures that are qualitatively higher.

a) 1 b) 3 c) 1,2,&3 d) 4

18) Which of the following statements are true about the Libertarians?

1. We must not violate anyone's rights.
2. The greatest threat to individual rights comes from the government.
3. Individual liberty is dependent on maximizing happiness in the society.
4. A government should not pass moral legislation for the individuals

a) 1,3 &4 b)1,2&3 c)2,3&4 d)1,2&4

19) "Someone taking drugs or engaging oneself in deviant wrong practices, should be free to do so, if he or she does not violate anyone's rights in the process". Why would Kant criticize the above statement?

1. Individual liberty to act on something should not be based on desire satisfaction.
2. Individual rights are not grounded in human nature.
3. By harming one's life through wrong practices; we do not treat humanity as an end in itself.
4. We should satisfy our desires

a)1&2 b)1&4 c)4 d)1&3

20) What is a just society?

1. A society that respects only discrimination.
2. It gives each person what s/he deserves.
3. It respects the virtues.
4. It cares for the ideals of welfare, freedom and virtues.

a)1&2 b)3 c)2&3 d)4

21) "You should be able to drive without a seat belt if you want. The government should not fine you. That is unacceptably paternalist". What you can conclude from the above statement?

1. Government should not make paternalistic laws.
2. Paternalistic laws restrict our freedom.
3. Such laws do not respect the ownership of our own person.
4. Such laws are necessary for freedom.

a)1&2 b)3&4 c)1,2&3 d)2,3&4

22) What is just according to John Rawls?

1. The fairness in distribution of resources.
2. Principles that we chose behind the veil of ignorance.
3. A society that promotes virtues.
4. The principle which gives unfair advantage to people.

a)1&3 b)1,2&3 c)1&2 c)2&3

23) Which of the following statements are wrong about the Kantian system of morality?

1. Happiness is the goal of morality.
2. Desire satisfaction is the goal of morality.
3. Morality is to discover moral law through feelings.
4. Morality is to be motivated by a sense of duty.

a)3&4 b)1&2 c)1,2&3 d)2,3&4

24) What kind of leader we should elect for a better society according to Aristotle?

1. The leaders who have virtues.
2. The leaders who are democratically elected.
3. The leaders who can understand the purpose of an institution.
4. They leaders who can control the society by power.

a)1&2 b)2&3 c)2,3&4 d)1&3

Passage: 4 (10X1=10)

What matters is the motive behind the action, not the consequence. Based on the idea of motive, Immanuel Kant goes on to describe the moral world i.e., the community of rational and free individuals whose actions can be morally assessed whether they are right or wrong. Kant argues that moral actions, rules and principles have their own moral worth and their moral worth is not dependent on either the desires or the results of actions. He says we act morally only when we act rationally and with a sense of duty. Hence, performing moral actions for Kant is to act out of respect for duty. Let's take an example. Suppose if you are asked why do students work hard in their academics? Most of the students would answer:

it is to get good grades or marks in the exam. However, Kant would object to this motivation for working hard in the student life because he would say that your action is not governed by the right kind of motive. Your action does not follow the right reason. Moreover, when you act with this motive, you are not free. The result, which is your motive, is not within your control. You have control only on your actions and on that you can reason, plan and perform. A similar line of reasoning we find in the Shrimad Bhagwad Geeta where Lord Krishna tries to convince Arjuna to fight the war of Mahabharata without being influenced by feelings or results because being a warrior, it was his duty to do so. So, the right reason for working hard in academics would be that being a student, it is one's duty to learn and gain knowledge. Good grades, success and job are mere outcomes. For Kant morality is based on rationality and through rationality we can have freedom to perform our actions. In this way Kant puts emphasis on the sense of duty and rejects the sense of our desires or inclinations as a source of right reason for moral actions. For Kant morality is an expression of rational freedom. It is a matter of self-realization, self-evolution and self-imposition. He says morality cannot be imposed as a law from the outside. Humans have got the capacity to give moral laws to themselves. Kant explains that moral actions are those which are done out of a sense of duty and they are like laws in the sense that they are one and the same for all human beings for the same reason. There cannot be different moral standards for the same actions followed by the same reasons. For example, being a teacher, it is his/her duty to look after the students in the academics. But a teacher has to have the same kind of treatment for all students to improve their academics. A teacher cannot have different standards based on the results and grades of the students. Result can be important from the student point of view but from the viewpoint of a teacher, he/she has to improve all the students from the sense of duty regardless of their results and performance.

For Kant moral actions are those which follow moral laws. Kant further differentiates between a Moral law and a maxim. Moral law is universally applicable to all human beings. However, a maxim is moral rule or principle that an individual gives to one-self t in the course of reasoning about the morality of an action. Kant further says that there should be Universalizability in the maxims we give to ourselves. What it means is that we should act only on a maxim through which one can at the same time accept that the maxim could be adopted by everyone thereby making it a moral law. This sort of universal agreement grounded in rationality becomes the mark of morality for the Kant. If something is morally right then it has to have the universal acceptance of humanity. Thereafter, Kant talks about the supreme principle of morality what he calls "Categorical

Imperative". According to him the categorical imperative is unconditional and does not depend on the consequent factor, while a hypothetical imperative conditionally depends upon the consequences of an action or the consequent factor. For example, work hard if you want to get the 1st rank in the exam. It is a hypothetical imperative because in this statement the hard work is a means to achieve the 1st rank and it is the purpose of the hard work. Working hard in this sense not guided by the sense of duty but is guided by the sense of results. According to Kant this imperative is conditional and cannot give the moral command for the moral actions. First categorical imperative Kant analyzes is: Universalize your Maxim. By this Categorical Imperative Kant means that your individual rule for your actions has that reasonable motive which can be universalized. For example; we usually take loan from one-another in the course of our needs. Suppose a person is in need of money and he goes to his friend to ask for a loan. However, this person who wants loan knows very well that he cannot repay the money. Nevertheless, he makes a false promise of repaying the loan to his friend for the sake of getting the money. Kant asks the question: can we universalize this maxim (motive grounded in false promise)? Answer is no because if everyone would act according to this motive then no one would believe on the other and the tradition of promise keeping would be lost. Therefore if we reflected in this way, we would reasonably reject the corrupt, wrong and immoral maxims.

The second categorical imperative according to Kant is: Treat persons as ends. He argues that there is a significant difference between a person and a thing. A person cannot be used as a means like a thing. He has the rationality to live a free life. And no one has any right to exploit the dignity of the human beings by using them as means. Kant writes, "Treat human whether in your own person or in the others never as means but always as an end". On this reason he rejects the view that one has right to take one's life or commit suicide. He argues that we should not treat life as though it is a means to our desire satisfaction or to derive pleasures and joys. We are misled because life has its own worth and we must respect the humanity either in our own or in the other person as an end. So according to Kant suicide is disrespectful to the humanity in one's own person.

Questions:

25) According to Kant, moral worth of an action depends on

1. The character of the person who performs it
2. The consequences of the action
3. The motive of the action
4. The reason for which the action was done.

a)2&4 b)1&2 c)3&4 d)2&3

26) What, among the following, is wrong about the meaning of the word "Maxim"?

1. A maxim is an unreasonable principle.
2. A moral rule or principle by which an individual governs his moral actions.
3. A moral rule that is not for an individual.
4. Moral rules that cannot be universalized

a)1 b)2&3 c)2 d)2&4

27) What is similarity between the Shrimad Bhagwat Geeta and the Kantian theory?

1. Both accept result as the ground for right action.
2. Both argue that actions should be detached from our desires.
3. Both focus on dutifulness.
4. Both views advocate doing actions without considering the consequences.

a)1&4 b)2,3&4 c) 1,2&4 d)1,2&3

28) What is right action according to Kant?

1. An action that is performed with the motive of duty.
2. An action based on self-legislated moral law.
3. An action which is commanded by God
4. An action which is prescribed by the society

a)1&3 b)1,2&4 c)1&2 d)3&4

29) What is a "categorical imperative" ?

1.An unconditional moral command.
2.An imperative which is not based on desires.
3.An imperative which is grounded in results.
4.An imperative which has universalizability.

a)1,3&4 b)1,2&3 c)2,3&4 d)1,2&4

30) What is the second categorical imperative or the humanity principle?

1. Always treat persons as ends and never as merely means.
2. Suicide is disrespect to the humanity in one's own person.
3. A person is not like an animal or a thing.
4. We should respect only useful persons

a)1,3&4 b)1,2&4 c)2,3&4 d)1,2&3

31) Why does a teacher who behaves badly with students who have poor grades cannot be said to be moral according to Kant?

1. Because a teacher should behave in a good manner with only those who score well.
2. A teacher should not mind the results but his duty.

3. A teacher should treat all students with the same moral standards.
4. Treating students badly would lead to even poorer grades for those students.

a)1,3&4 b)1,2&4 c)2&3 d)1,2&3

32) What is the moral law?

1. A moral law is self-imposed.
2. A moral law is based on reason.
3. A moral law has universalizability.
4. A moral law is enforced by an authority

a)1,3&4 b)1,2&4 c)2&3 d)1,2&3

33) What is universalizability?

1. Universal acceptance grounded in rationality.
2. Keeping in view the purpose of nature & society.
3. It makes a maxim universal and morally right.
4. Universal disagreement on a reasonable principle

a)1,3&4 b)1&3 c)2,3&4 d)1,2&3

34) "It is duty of a student to work hard". What we can conclude about this categorical imperative?

1. This motive is not based on external factors like desires and results.
2. This motive is hypothetical imperative.
3. This motive will lead to a successful career.
4. This motive follows the sense of duty.

a)1&2 b)2&4 c)1,2&3 d)1&4

Passage: 5 (6X1=6 Marks) (Attempt All Questions)

"Euthanasia" means termination of a very sick person's life in order to relieve them of their suffering. It can also be called assisted suicide. Euthanasia has been a long debated issue in Ethics. It is a morally baffling issue which needs some clarification. Euthanasia is only considered when: a) the person has been suffering from a terminal (incurable) disease; b) the person has been suffering from intense physical and psychological pains c) The death of the person is quite predictable, and d) the person, undergoing such pains, wants to die with the assistance of other. For instance, somebody is suffering from a terminal physical disease and is on the life support system. However, there are three fundamental questions underlying the debate. First, do we have right to take the course of assisted suicide? Second, is mercy killing justified? Third, is moral sanctioning of assisted suicide consistent with humanitarian spirit? Such questions are really tough to answer. We have two theoretical points of views to discuss this issue: 1) Libertarianism, and 2) Kantianism. Libertarians argue that we own ourselves in the way that an individual has got complete freedom over oneself to decide in what manner one wants to live one's life. Since we possess ourselves, we have freedom to decide even on the

question of living or dying. Libertarians would sanction euthanasia on the grounds that an individual has got complete rights on his/her own life. And, if one's decision does not harm the other then one is free to take any decision. Kantians, on the other hand, unlike Libertarians, would consider the issue of euthanasia on the ground of rationality. Although like Libertarians, Kantians advocate the rights of individuals and admit that we own ourselves and one must be given complete rights of decision-making to oneself, Kantians maintain that one's decision making must be governed by reasons. Kantian morality is deontological in its nature. Deontological system of morality is a system in which the moral worth of rules and responsibilities is based on duty. In this system, humanity is viewed as an end in itself. Hence, Kantians would argue that the complete freedom to decide for oneself is fine but in case of euthanasia if we demand assisted suicide or mercy killing then we actually treat life as a means to achieve relief from pain or suffering. Therefore, Kantians would not sanction euthanasia because for them life is valuable in itself; an end in itself that cannot be treated as a means to fulfill some other end

Questions:

35) Which of the following points are correct about Euthanasia?
1. It is about willful mercy killing.
2. In Euthanasia the death of a person is predictable.
3. It is assisted suicide.
4. It is suicide.

a)1,3&4 b)1,2&4 c)2,3&4 d)1,2&3

36) What are the fundamental questions on the issue of Euthanasia?
1. Justification for mercy killing.
2. Moral sanctioning of Euthanasia is against humanitarian spirit.
3. Right to assisted suicide.
4. Euthanasia is legal or not.

a)1,3&4 b)1,2&4 c)2,3&4 d)1,2&3

37) Why would a libertarian permit Euthanasia?
1. Everyone has complete right to decide about one's own life.
2. We own ourselves including our bodies.
3. We are free to ask for assisted suicide.
4. We have no freedom to die.

a)1,3&4 b)1,2&4 c)2,3&4 d)1,2&3

38) Why would a Kantian not permit Euthanasia?

1. Because it will violate humanity principle.
2. Because it will be treating life as a matter of happiness and pleasure.
3. Because we have duty to go on living even if it is painful
4. Because we have a right to our life

a)1,3&4 b)1,2&4 c)2,3&4 d)1,2&3

39) Kantian argument is different from the libertarian because:

1. It believes that life is valuable in itself.
2. Assisted suicide or mercy killing treats life as a means to fulfill some other ends.
3. Kantian would say that right to life is more important than freedom.
4. Kantian argument is grounded in rationality while Libertarian idea is based on feelings:

a)1,2&4 b)1&2 c)2,3&4 d)1,2&3

40) The root cause of differences in opinion about morality of euthanasia is:

1. The different laws prevalent in different countries
2. The difference in the meaning and value of human existence
3. People follow different customs & traditions
4. Some value rights& freedom more than duties.

a)1&4 b)2&3 c)3&4 d)2&4

GLA University

SET-A

Soft-Skills

End Term Examination (2016-17)

Course- B.TechYear- II **Branch-All Branches**

Instructions :

1. **There are 2sections in the paper.**
2. **Attempt all questions. The maximum marks for the test are 40.**
3. **The total time allocated is 120 minutes.**
4. **There will be no negative marking. Also, no marks will be awarded if more than one answer is marked.**
5. **The OMR form is printed on a special paper and the information given by the candidates will be scanned. Thus, the candidates are required to fill the forms carefully. Mutilated and damaged forms will be rejected by the scanner.**
6. **The candidates should ensure that the form is not folded, crumpled or mutilated in any manner. The candidates should not mark anything anywhere except wherever required. The black marks on the margin of the OMR form are important. The candidates should not tamper it with marker.**
7. **Only black& blue pen should be used to fill forms.**
8. **Each branch is identified with a specific subject code which should be written in subject column of OMR sheet.**
9. **Write your University roll number in the roll no column of OMR sheet.**

6	ME	1200

Section-1 (Quantitative Aptitude)-No of question-40, marks-20

1. If 5967X13 is divisible by 3. Find X.
A) 2 B) 4 C) 6 D) None of these

2. The price of Rajinikanth's clock was Rs. 1200. Due to devaluation of rupee, its value increased to Rs. 2100. What is the percentage increase in the price of the clock?
A) 50% B) 75% C) 80% D) None of these

3. The price of sugar increased by 20%. By what percent Rajinikanth should reduce the consumption of sugar, as her overall expenditure remains same.
A) 16.66% B) 50% C) 16.25% D) None of these

4. Rajinikanth scored 110 runs which included 3 boundaries and 8 sixes. What percent of his total score did he make by running between the wickets?
A) 45% B) $45\frac{5}{11}\%$ C) 50% D) 55%

5. During the day, the stock price of a commodity decreases by 11.11%, then again decreases by 10%. Find the ratio of the initial price to the final price.
A) 5 : 8 B) 5 : 4 C) 1 : 2 D) None of these

6. Ram sells his goods 25% cheaper than Shyam and 25 % dearer than Bram. How much percentage is Bram's good cheaper than Shyam's.
A) 33.33% B) 40% C) 66.66% D) None of these

7. A number is decreased by 6.25%. By what percent should the new value be increased to result in original value again?
A) 6.66% B) 7.14% C) 10% D) None of these

8. If cost price of an article is Rs. 250 and the selling price is Rs. 300. Find the gain percentage.
A) 20% B) 25% C) 33.33% D) None of these

9. If I buy @ 3 articles in Rs. 5 and sells @ 5 articles in Rs. 8. Find the profit or loss percentage.
A) 6% gain B) 8% gain C) 4% Loss D) None of these

10. CP of 12 articles is equal to SP of 10 articles. Find the profit or loss percentage.
A) 20% B) 25% C) 16.66% D) None of these

11. A sells an article to B at 20% profit. B sells the article to C at 25% profit. If the article has costed A Rs. 144, how much did C pay for the article?
A) Rs. 180 B) Rs. 320 C) Rs. 216 D) None of these

12. A trader lists his articles 20% above the cost price and allows a discount of 10% on cash payment. His gain percent is?
A) 5% B) 8% C) 10% D) None of these

13. Rajinikanth claims to sell his goods at the same rate as his purchase rate. However his balance reads 1 kg for 900 gms. Find his profit percentage.
A) 11.11% B) 10% C) 20% D) None of these

14. Rajinikanth buys a bike for Rs. 1400 and sells it at a loss of 15%. What is the selling price of the cycle?
A) Rs. 1090 B) Rs. 1160 C) Rs. 1190 D) Rs. 1202

15. When a plot is sold for Rs. 18,700, the owner loses 15%. At what price must that plot be sold in order to gain 15%?
A) Rs. 21,000 B) Rs. 22,500 C) Rs. 25,300 D) Rs. 25,800

16. A sum of money invested at Simple Interest doubles itself in 12 years. Find the rate percentage per annum.
A) 8.33 % B) 10% C) 15% D) None of these

17. A certain sum amounts to Rs. 1008 in 2 years, Rs. 1112 in 3 years. Find the rate of interest.
A) 10% B) 15% C) 13% D) None of these

18. A sum was put at SI at a certain rate for 2 years. Had it been put at 3% higher rate, it would have given Rs. 300 more. Find the principal.
A) Rs. 10000 B) Rs. 5000 C) Rs. 20000 D) None of these

19. What annual installment will discharge a debt of Rs. 4200 which will be due in '5' years @ 10% per annum simple interest.
A) Rs. 500 B) Rs. 700 C) Rs. 140 D) None of these

20. Find the simple interest on Rs. 200 for 6% per annum for 5 years.
A) Rs. 20 B) Rs. 30 C) Rs. 60 D) None of these

21. Find the Compound Interest on a sum of Rs. 8000 for 3 years @ 20% p.a.c.a
A) 6832 Rs. B) 5824 Rs. C) 8324 Rs. D) None of these

22. Find the compound interest on a sum of Rs. 640 for 2.5 years @ 25% p.a.c.a.
A) 610 Rs. B) 585 Rs. C) 485 Rs. D) None of these

23. Find the compound interest on a sum of Rs. 8000 for 9 months @ 20% per annum compounded quarterly
A) 1426Rs. B) 1261 Rs. C) 1024 Rs. D) None of these

24. Find the principal if the difference between compound interest and simple interest for 2 years @ 4% p.a.c.a is R. 20.
A) 1250 Rs. B) 12500 Rs. C) 15000 Rs. D) None of these

25. Find the principal if the Amount is 2560 Rs., rate of interest is 14.28% p.a.c.a. for 2 years.
A) 1960 Rs. B) 1980 Rs. C) 2000 Rs. D) None of these

26. Calculate the Compound interest on Rs. 6300, if the rate of interest for 1st year is 14.28% and for 2nd year is 11.11 %.
A) 1900 Rs. B) 1700 Rs. C) 1500 Rs. D) None of these

27. At what rate of compound interest per annum will a sum of Rs. 1200 become Rs. 1348.32 in 2 years?
A) 6% B) 5% C) 10% D) None of these

28. Find the principal if the rate of interest is 6.67% p.a.c.a. and compound interest for 2nd year is 256 Rs.
A) 4800 Rs. B) 2600 Rs. C) 3600 Rs. D) None of these

29. What annual installment will discharge a loan of 1640 Rs. If the rate of interest is 5% p.a.c.a. and time is 2 years?
A) 441 Rs. B) 882 Rs. C) 841 Rs. D) None of these

30. P and Q started a business investing Rs 85000 and Rs 15000 respectively. In what ratio the profit earned after 2 years be divided between P and Q respectively.
A) 15:3 B) 16:7 C) 17:3 D) None of these

31. Kamal started a business investing Rs 9000. After five months, Sameer joined with a capital of Rs 8000. If at the end of the year, they earn a profit of Rs. 6970, then what will be the share of Sameer in the profit?
A) 2380 Rs. B) 2590 Rs. C) 2830 Rs. D) None of these

32. A starts business with Rs. 3500 and after 5 months, B joins with A as his partner. After a year, the profit is divided in the ratio 2 : 3. What is B's contribution in the capital?
A) 10000 B) 9000 C) 8000 D) None of these

33. A and B entered into partnership with capitals in the ratio 4 : 5. After 3 months, A withdrew one fourth of his capital and B withdrew one fifth of his capital. The gain at the end of 10 months was Rs. 760. A's share in this profit is?
A) 760 Rs. B) 440 Rs. C) 330 Rs. D) None of these

34. A, B and C start a venture with investments of Rs. 12000, Rs. 16000 and Rs. 10000 respectively. A left after 2 months. B left after another 2 months at that time A re-joined with only 2/3rd of his original investment. A month later B re-joined with one quarter less than his original investment. C remained throughout the year. The profit at the end of the year was Rs. 267000. How much more did B earn than A?
(A) 30000 (B) 45000 (C) 60000 (D) None of these

35. The average of first seven multiples of 5 is:
A) 20 B) 25 C) 15 D) None of these

36. The average score of a cricketer for ten matches is 38.9 runs. If the average for the first six matches is 42, then find the average for the last four matches.
A) 33.25 B) 33.5 C) 34.25 D) None of these

37. A Batsman makes a score of 87 runs in the 17th inning and thus increases his average by 3. Find his average after 17th inning.
A) 40 B) 39 C) 52 D) 55

38. Nine persons went to a hotel for taking their meals. Eight of them spent Rs.12 each on their meals and the ninth spent Rs.8 more than the average expenditure of all the nine. What was the total money spent by them.
A) Rs. 115 B) Rs. 116 C) Rs. 117 D) Rs. 118

39. A cricketer whose bowling average is 12.4 takes 5 wickets for 26 runs in his last match and thereby improves his average by 0.4.The number of wickets taken by him till the last match was?
A) 82 B) 83 C) 84 D) 85

40. The average of runs of a cricket player of 10 innings was 32. How many runes must be made in his next innings so as to increase his average of runs by 4?
A) 72 B) 74 C) 70 D) 76

Section-2 (Reasoning Ability)-No of question-40, marks-20

41. Meenakshi starts at point A, walks straight to point B which is 4 m away. She turns left at 90° & walks to C which is 4m away. Turns 90° right & goes 3m to D, turns 90° right & walks 1m to E turns left at 90° & goes to F which is 1m away & once again turns 90° right & goes to G 3m away. What is distance between A & G?
a) 4m b) 5m c) 7m d) 8m e) CND

42. A watch is so placed that at 4 pm the minute hand points towards West, in which direction does the hour hand points at 10 pm?
a) north-east b) south-east c) north-west d) south-west

43. One morning after sunrise, Reena and Tina were standing at CP road in Delhi with their back towards each other. Reena's shadow fell exactly right hand side. Which direction was Tina facing?
a) east b) west c) north d) south

44. Neema started from her house and walked 20m towards east, where her brother Ram joined her. Both of them turned left and walked 20m.There was a quarrel between the two and got separated. Neema turned right and her brother turned left. Neema walked 20m and turned left. Ram walked 30m and then turned left. Neema walked 10m to the left. Finally she turned left again, walked 6m and reached her friend's house. Ram who turned left walked 10m and finally he turned left, walked 4m and reached his friend's house. Which direction is Ram facing now?
a) west b) east c) north d) south

45. City A is situated east of city B. City C is situated south of city B. City D is situated north of city C, in which direction city A is situated with respect to city D?
a) north b) south c) east d) Cannot be determined

46. P, Q, R, S, T, U, V, W & X are nine houses. R is 2km east of Q. P is 1km North of Q & W is 2km South of P. V is 1km West of W while S is 3km East of V & U is 2km North of V. X is situated just in middle of Q & R while T is just in middle of W & S. So distance between P & U is?
a) 1km b) 1.41km c) 2km d) 3km e) CND

47. Sector 'C' is 20km to the North of Sector 'B'.
Sector 'R' is 18km to the East of Sector 'B'.
Sector 'A' is 12km to the west of Sector 'C'.
If Sanjay starts from Sector 'R' and goes to Sector 'A' in which direction is he from his starting point?
a) North b) North- West c) South d) South- East

48. Q is to the South-West of P,R is to the East of Q and South East of P , S is to the North of R in the line with Q and P. S is in which direction, with respect to P?
a) North b) East c) South- East d) North- East

49. A watches Read 7.30. If the minute hand points east. In which direction will the hour hand point?
a) South- East b) North East c) North d) North West

50. One evening at sunset, Mohan & Sohan were talking to each other face to face in front of GLAU AB-1. If the Sohan's shadow was exactly to the right of Mohan, which direction Sohan was facing?
a) North b) South c) East d) Data Inadequate E) None

51. Pointing towards Mona, Rajkumar says that "Her mother is the only daughter of my mother". How is Rajkumar's sister related to Mona ?
a) Grandmother b) Aunt c) Daughter d) Mother

52. Introducing a boy Aditya says, "The brother of this boy's mother, is the only son of my mother's father." How is the mother of the boy related to Aditya ?
a) Grandmother b) Either Aunt or Mother c) Mother d) Aunt

53. Pointing to a lady in the photograph, 'X' said, "She is the daughter of the daughter of the only son of my paternal grandfather." How is the lady related to 'X' ?
a) Sister b) Maternal aunt c) Niece d) Cousin

Q(54-57)Six members of a family P, Q, R, S, T and U are doctor, inspector, lawyer, jeweler, manager and engineer, but not in the same order.
Manager is the grandfather of U who is a doctor.
Inspector S is married to P.
R, who is a jeweler, is married to lawyer.
Q is the mother of U and T.
There are two married couples in the family.

54. What is the profession of T?
a) Manager b) Inspector c) Engineer d) Doctor

55. How many female members are there in the family?

a) Two b) Three c) Four d) CND

56. How is P related to T?

a) Wife b) Father c) Grandmother d) Grandfather

57. What is the profession of Q?

a) Lawyer b) Inspector c) Engineer d) Manager

Q(58-60)

I. X+Y means X is mother of Y.
II. X-Y means X is sister of Y.
III. X$Y means X is father of Y.
IV. X#Y means X is brother of Y.

58. Which of the following means D is definitely daughter of A?

A) A+B#C#D B) C+A$D-B C) A+C$B-D D) B+A$D#C

59. Which of the following means R is brother of T?

A) R+S#U$T B) U+R#S#T C) U+R-S+T D) K#S$Q-R

60. Which of the following means A is a Nephew of C?

A) D#C$B#A-E B) A#B$D-E$C C) C#D$B#A$E D) B+E#C$E-A

Directions for Q 61 to Q 65.

P, Q, R, S, T, U, V and W are sitting around a square table facing the center in such a way that four of them sit at four corners of the square while four sit in the middle of each of the four sides.
i)P sits second to the right of U. U sits in the middle of one of the sides of the table.
ii)V who does not sit at any of the corners of the table sits second to the right of S.
iii)only two people sit between S and Q.(taken from one side)
iv)R is not an immediate neighbour of V.
v)W sits second to the left of Q.
vi)T is not an immediate neighbour of V or U.

61. Who sits exactly between U and P?

a)Q b)R c)T d)W e)None of these

62. How many persons sit between P and W when counted in anti-clockwise direction from P?

a)None b)One c)Two d)Three e)Four

63. Four of the following five are alike in a certain way based on their sitting positions in the above arrangement and so form a group. Which is the one that does not belong to that group?

a)S b)U c)P d)T e)V

64.What is the position of U with respect to R?
a)Third to the left b)Immediate to the right c)Second to the left
d)Third to the right e)Immediate to the left

65. Four of the following five are alike in a certain way based on their sitting positions in the above arrangement and so form a group. Which is the one that does not belong to that group?
a)WV b)PT c)QU d)TS e)VP

Q(66-70). A, B, C, D and E are five friends sitting in a restaurant. They are wearing t-shirt of five different colours — yellow, blue, green, white and red. Also they are drinking five different cold drinks — pepsi, coke, limca, dew and slice.
I. The person wearing a red t-shirt is drinking dew.
II. A does not drink limca and C is drinking coke.
III. B is wearing a yellow t-shirt and A is wearing a blue t-shirt.
IV. E is drinking slice and is not wearing a green t-shirt.

66. What is A drinking?
a) Pepsi b) Coke c) Limca d) Dew

67. Who among the following friends is wearing the green t-shirt?
a) B b) A c) D d) C

68. Who among the following friends is drinking Limca?
a) A b) B c)C d) D

69. Find out the correct combination for B?
a)Blue-Coke b) Red-Pepsi c)Yellow-Limca d) None of these

70. Who among the following friends is drinking dew?
a) A b) D c) E d) B

Q(71-75)Directions : Study the following information carefully and answer the following questions :
There are five men, Anoop, Kumar, Subhash, Rakesh and Hitkar. The one who is tallest is not the youngest. Kumar is older than only Hitkar. Subhash is older than Rakesh but shorter than him. Only one person is taller than Rakesh. Anoop is shortest while younger than only Subhash and Rakesh. Only two men are shorter than Subhash.

71. Which of the following men is third tallest of the five?
a) Subhash b) Rakesh c) Hitkar d) Kumar e) Kumar or Rakesh

72. Who among the following men is tallest?
a) Subhash b) Rakesh c) Kumar d) Hitkar e) Subhash or Hitkar

73. If the five men are made to stand in a line according to the height, first in ascending order, then in descending order, then whose position will remain the same in both the arrangements?
a) Hitkar b) Rakesh c) Kumar d) Subhash e) Rakesh and Anoop

74. Who among the following is older than Kumar but younger than Rakesh?
a) Hitkar b) Subhash c) Anoop d) Data inadequate e) Subhash or Anoop

75. Who among the following is taller than Anoop only?
a) Subhash b) Hitkar c) Rakesh d) Kumar e) Kumar or Hitkar

76. In a certain code COMMON is coded as APKNMO, how is DOCTOR coded?
a)BPARPP b)BPAUPS c)EMDRPP d)BPAUMS

77. In a certain code, 'ABUTMENT' be written as 'UOFNUVCB', how will 'CONSIDER' be written in that code?
a)SFEJTOPD b)SEFJTOPD c)QFETJOPD d)QEFJTOPD e)none of these

78. In a certain code, 'DESCRIBE' be written as 'SEJFCTFD' ,how will 'CONSIDER' be written in that code?
a)JDEPFTSO b)JDEPFOST c)JDETJOPD d)QEJTFOST e)none of these

79. If in a certain code language, DELHI is written as CCIDD, then what will be the code for BOMBAY?
a)AMJPTS b)AMJXSG c)AMJXVS d)AMJXVL

80. In a certain code PRODUCT is coded as RTQFWEV, how is CHILDREN coded?
a)EJKNEGTP b)EGKNFITP c)EJKNFGTO d)EJKNFTGP
