I Mid-Term Examination

Odd Semester, 2018-19

Programme: B-Tech **Branch:** CSE **Year:** II

Subject with Code: Operating Systems, BCSC 0004

Time: 1 Hour **Maximum Marks: 15**

Note: Attempt All the Questions

Section – A 3 x 2 = 6 Marks

I. Explain system call with example. Also, draw the process tree that results from three consecutive fork() system calls:

```
fork();  //A
fork();  //B
fork();  //C
```

Label each created process with appropriate fork() statement.

II. Differentiate between multi- programming, multi- tasking, multi- processing and multi- threading systems with the help of example.

III. Explain process control block. Draw the queuing diagram, containing appropriate queues and events that a process undergoes during its lifetime.

Section – B 3 x 3 = 9 Marks

I. What is the need of suspended state in Process state transition diagram? Explain Process state transition diagram with two suspended states.

II. Explain different types of operating system structures with the help of example.

III. A scheduling Algorithm assigns priority proportional to the waiting time of a process. Processes P1, P2 and P3 requires 10, 20 and 30 units of times(respectively) to complete their task and starts with priority zero (lowest priority). The scheduler reevaluates the process priority for every '5' time units and decides next process to be scheduled. If the processes have no I/O operations and all arrive at time zero, then draw the Gantt chart for the given process scheduling algorithm. Also, calculate the average TAT, average response time, average waiting time and number of context switches for the given scheduling algorithm.

I Mid-Term Examination
Odd Semester, 2018-19
B.Tech, III Sem, CSE , MCA I Year
Subject: Computer Organization (BCSC0005) MCAC 0003
Time: 1 Hour **Maximum Marks: 15**

Section – A **3X2= 6 marks**

Note: All questions are compulsory

1. A common bus system for digital computer is designed using multiplexers for k registers of n bits each.
   a. How many selection inputs are there in each multiplexer?
   b. What size of multiplexers are needed?
   c. How many multiplexes are there in the bus?
2. There is a memory unit that receives address from a register R100 and transfers the data to another register R1 then from R1 the data is transferred to another register whose address is X. Show the transfer operations to perform this task.
3. Perform the following operations using 2's complement arithmetic:
   a. $(80)_{10} + (20)_{10}$ b. $(-60)_{10} + (-30)_{10}$

Section – B **3X3= 9 marks**

Note: All questions are compulsory

1. Two numbers $(+11)_{10}$ and $(-13)_{10}$ are multiplied using Booth's algorithm assuming 6 bit registers that hold signed numbers. Show the step-by-step process to perform this task.
2. What are the advantages and disadvantages of carry look ahead adder? Explain the working of carry look ahead adder in detail.
3. Convert the following number into IEEE 32 bit floating point representation $(-15.345)_{10}$.

First Term Examination
Odd-Semester, 2018-19

Program: B.Tech. (Common to All branches) **Year II** **Semester III**
Subject with Code: Engg. Mathematics III (BMAS 0103)
Time: 1 Hour **Maximum Marks: 15**

SECTION-A

Attempt ALL questions. **3 x 2 = 6 Marks**

1. Show that the partial differential equation $\frac{\partial^2\Omega}{\partial v^2}+2v\frac{\partial^2\Omega}{\partial u\partial v}+(1-u^2)\frac{\partial^2\Omega}{\partial u^2}=0$ is elliptic for the values of u and v in the region $u^2+v^2<1$, parabolic on the boundary and hyperbolic outside this region.

2. Find the half range Fourier sine series for the function $f(t)=t-t^2$ in the interval $0<t<1$.

3. Use the method of separation of variables to solve: $\frac{\partial u}{\partial x}=4\frac{\partial u}{\partial y};u(0,y)=8e^{-3y}$

Section-B

Attempt ALL questions. **3 x 3 = 9 Marks**

1. What are Dirichlet's conditions for the uniform convergence of a Fourier series? Expand the function $f(x)=x^2$ as a Fourier series in the interval $-\pi\le x\le\pi$.

2. If a string of length l is initially at rest in equilibrium position and each of its points is given the velocity $\left(\frac{\partial y}{\partial t}\right)_{t=0}=b\sin^3\frac{\pi x}{l}$, find the displacement $y(x,t)$.

3. Solve the following Laplace's equation in polar coordinates:

$$r^2\frac{\partial^2 u}{\partial r^2}+r\frac{\partial u}{\partial r}+\frac{\partial^2 u}{\partial\theta^2}=0$$

and find all the possible solutions.

Printed Pages: 4 University Roll No: .....

First Term Examination, 2018-19

Course: B.Tech. (CSE) Year: II Semester: III

Object Oriented Programming (BCSC0002)

Time: 1 Hr. **Total Marks: 15**

Instructions: All Questions carries ½ mark each.

Section A

I. In java, Size of float data type is _____ and double data type is_____.

II. Which type of literal is written in pair of single quote? Mention Size & Range of that data type.

III. What is default value of boolean data type ?

IV. Which is Invalid out of following?

(a) int []arr1[];
(b) int[] arr3 = new int[3.5];
(c) int[] arr4 = new int[2147483648];
(d) int[][] arr5 = new int[][5];

V. What will be output of the following program?

```
class GLA{
public static void main(String args[]){
int roll_No = 1;
while(1)
System.out.print(" ROLL NO "+ roll_No);
    }
}
```

VI. What will be output of the following programs?

```
class Test {
  public static void main(String[] args) {
      int x = 10 ;
      int y = ++x ;
      int z = ++10 ;
System.out.println(" Value of x : "+ x);
System.out.println(" Value of y : "+ y);
System.out.println(" Value of z : "+ z);
 } }
```

VII. What will be output of the following program?

```
class Test {
  public static void main(String[] args) {
      byte a = 10;
      byte b = 20;
      byte c = a + b;
System.out.println(" Value of c : "+ c);
 }}
```

VIII. What will be output of the following program?

```
class Test {
  public static void main(String[] args) {
      int x = 10;
      int y = x / 0.0 ;
        System.out.println(" Value of y : "+ y);
  }}
```

IX. What will be output of the following program?

```
class Test {
public static void main(String[] args) {
if(true)
System.out.println("I Will pursue M.Tech");
System.out.println("I Will pursue MBA");
}}
```

X. What will be output of the following program?

```
class GLAU {
public static void main(String[] args) {
int x = 20;
switch(x+1){
case 10: System.out.println(" RADHE RADHE");
case 20: System.out.println(" HAREE HAREEE");
case 30: System.out.println(" HARI KRISHNA");
default : System.out.println("KRISHNA KRISHNA");
}}}
```

XI. What will be output of the following program?

```
class Test {
public static void main(String[] args) {
long it_s_a_very_long_identifier_which_error_it_should_give = 0x99fffL;
System.out.println(it_s_a_very_long_identifier_which_error_it_should_give );
}}
```

XII. Which of the following is/are not valid statement(s)? Give reason.

a) char[] c = new char();
b) char[] c = new char[5];
c) char[] c = new char(4);
d) char[] c = new char[];

XIII. Which of these is an incorrect array declaration?

a) int arr[] = new int[5];
b) int [] arr = new int[5];
c) int arr[] = new int[5];
d) int arr[] = int [5] new;

XIV. Find the output of the following code:

```
class D{
public static void main(String args[]){
System.out.println("G" + "L" + "A");
System.out.println("G" + 'L' + "A");
System.out.println('G' + "L" + 'A');
System.out.println('G' + 'L' + 'A');
}}
```

XV. Fill in the blanks to print the number and its square for each Natural number up to 10:

```
class M{
public static void main(String args[]){
int n, square;
for(_____)
System.out.println(_____);
}}
```

XVI. What will be output of the following programs?

```
class Andro {
public static void main(String args[]){
      double d = 0xBeef;
      System.out.println(d);
}}
```

What will be output of the following program when executed as case a and b?

```
class Andro {
public static void main(String args[]){
      int x;
      if(args.length > 0){
            x = 13;
      }
      else{
           x = 786;
      }
System.out.print(x);
      }}
```

XVII. Case a : :- javac Andro.java
java Andro

XVIII. Case b :- javac Andro.java
java Andro a

XIX. What will be output of the following programs?

```
class Test {
  public static void main(String[] args) {
    for(int i = 0; 0; i++) {
      System.out.println("Hello");
      break;
    }
}}
```

XX. What will be output of the following programs?

```
class GLA{
public static void main(String args[]){
      int String = 10;
      System.out.print(String);
      }
}
```

Section B

I. What will be output of the following program?

```
class AndroPie {
public static void main(String args[]){
      int cse  = 10;
      int ece  = 010;
      int me   = 0x10;
System.out.print(cse +""+ ece +""+ me);
 }}
```

II. What will be output of the following programs?

```
 class G{
public static void main(String args[]){
double a=35;
int b=20;
System.out.println("a-b="+a-b);
 }
}
```

III. State True OR False for the following. If False, Give reason.

A. The java compiler converts Source code to Machine code.

B. The default value of a local variable of integer datatype is zero.

IV. What will be output of the following programs?

```
class AndroPie {
  public static void main(String[] args) {
  int[] arry = {10,20,30,40,50} ;
  for(int i = 0; i <arry.length; i++)
  System.out.println(a[i]);
 }}
```

V. What will be output of the following programs?

```
class evaluate {
public static void main(String args[]){
int a[] = {1,2,3,4,5};
int d[] = a;
int sum = 0;
for (int j = 0; j < 3; ++j)
sum += (a[j] * d[j + 1]) + (a[j + 1] * d[j]);
System.out.println(sum);
  }
}
```

Section C

I. What will be output of the following programs?

```
class array_output{
public static void main(String args[]){
int array_variable [] = new int[10];
for (int i = 0; i < 10; ++i){
array_variable[i] = i;
System.out.print(array_variable[i] + " ");
i++;
        }  }
 }
```

II. What will be output of the following programs?

```
class evaluate{
public static void main(String args[]){
int arr[] = new int[] {0 , 1, 2, 3, 4, 5, 6, 7,
8, 9};
int n = 6;
n = arr[arr[n] / 2];
System.out.println(arr[n] / 2);
  }
}
```

III. What will be output of the following program?

```
class Main {
  public static void main(String args[]) {
      int t;
      System.out.println(t);
  }
}
```

IV. What will be output of the following programs?

```
class GoogMap {
public static void main(String args[]){
char a = 'A';
a++;
System.out.print((int)a);
  }
}
```

V. Rewrite the following program to get the correct output for n=20:

```
class M{
public static void main(String args[]){
int n=20;
int f;
while(n>0){
f=f*n;  n--;
}
System.out.println("Factorial of " + n +
"is" + f);
 }}
```

SET-A University Roll No._____

I Term Examination, 2018-19
B. Tech. II Year (Odd Semester)

Subject: English for Professional Purposes–I **Subject Code: BELH 0003**
Time: 60 Minutes **Max. Marks: 15**

PART A - ORAL SKILLS **TIME: 30 MINUTES**

Section- A **0.5x4 = 2 Marks**

Note: Attempt all the questions.

1. Fear of superiors allows subordinate to speak frankly. True/False
2. Proxemics is the study of time management. True/False
3. A memo is a written_____ of communication.
4. Write an example of diagonal communication.

Section- B **1.5x2 = 3 Marks**

Note: Attempt any two questions.

5. Do you agree with the statement 'technical knowledge, even without good communication skills, can make you a good manager'? Why or why not?
6. Narrate how intrapersonal communication helps you overcoming your problems.
7. Identify and describe the communication barrier that describes the following situation.

Boss: Why have you not submitted the report within the fortnight?
Rohan: But you asked me to submit it bimonthly.

Section- C **2.5x1 = 2.5 Marks**

Note: Attempt any one question.

8. Discuss the process of communication with the help of diagram.
9. Improve the following sentences so as to make them suitable to be used in a professional environment:

A. We should cooperate together.
B. The Backspace Key is used to correct errors.
C. Majority of the IV year students of B.Tech. have got placement offers this year.
D. Take your mother-in-law out and shoot her.
E. They held a meeting and reached to the decision to send him an invitation.

PART B- VERBAL APTITUDE **TIME: 30 MINUTES**

Note: Attempt all the questions. Each question carries 0.25 marks.

Identify the error (1-10).

1. I didn't (A)/ received (B)/ any reply (C)/ so far. (D)/ No Error (E)
2. I have reached (A)/ the station (B)/ after the train (C)/ had left. (D)/ No Error (E)
3. I washed my hands (A)/ with soap and water (B)/ before (C)/ I sit down to eat. (D)/ No Error (E)
4. He invited me (A)/ to go riding with him (B)/but it was two years (C) since I rode a horse. (D)/ No error (E)
5. Rohan is my friend.(A)/ He has a house in Mathura (B)/ and another in Noida, (C)/ so he must be rich. (D)/ No error (E)
6. What is (A)/ the baby doing (B)/? He tears (C)/ the book of English.(D)/ No error (E)
7. I heard him (A)/ to make arrangements (B)/ for his journey (C)/ to London. (D)/No error (E)
8. The English teacher is popular (A)/ among students. (B)/He is known (C)/ by many. (D)/No error (E)
9. Convinced (A)/ that they were trying (B)/ poisoned him,(C)/he refused to eat anything. (D)/ No error (E)
10. 'Would you (A)/ like to have (B)/ a cup of tea (C)/.' 'Yes, I would love', (D)/answered he.(E).

In each of the following questions, identify part of speech of the underlined word (11-18).

11. Who do you think is a Chomsky here?
A. Adjective B. Adverb
C. Pronoun D. Noun
E. Preposition
12. Look around.
A. Adverb B. Conjunction
C. Preposition D. adjective
E. Pronoun
13. The crying baby did not let me work.
A. Noun B. Pronoun
C. Adjective D. Adverb
E. Conjunction
14. Here lies the difference.
A. Preposition B. Adverb
C. Conjunction D. Adjective
E. Conjunction
15. Where are you coming from?
A. Conjunction B. Adverb
C. Preposition D. Adjective
E. Pronoun
16. Reading is a good habit.
A. Noun B. Pronoun
C. Adjective D. Adverb
E. Conjunction
17. What are the don'ts of a good presentation?
A. Noun B. Pronoun
C. Adjective D. Adverb
E. Conjunction
18. Why are they not attending the classes?
A. Preposition B. Adverb
C. Conjunction D. Adjective
E. Conjunction

Mark the correct option (19-28).

19. Before the teacher came to class, the students_____ their assignments.

A. were completing
B. had completed
C. had had completed
D. would complete
E. completed

20. 'Nina has gone out.'
'Oh,_____? What time did she go?'

A. has she
B. she has
C. had she
D. is she
E. she is

21. Since this paper _____ with the practical business of extracting meaning from a text, I shall focus on different dimensions of pragmatic considerations.

A. is concerned
B. is concerning
C. has been concerned
D. was concerned
E. none of the above

22. Derrida's textual strategies _____ yet more extreme in the sense that they deny such appeals to a validating order of thought.

A. was
B. are
C. has
D. had
E. were

23. Globalization is a modernistic strategy _____ one-size-fits-all solutions.

A. to seek
B. seeking
C. is seeking
D. seek
E. none of the above

24. It _____ by a journalist that the team is leaving for Calcutta tonight.

A. is reported
B. was reported
C. reports
D. reported
E. none of the above

25. They are _____ knowing the fact.

A. interested in
B. interested by
C. interesting
D. interested for
E. none of the above

26. A technical report _____ a rather involved format including cover and title page, table of contents, list of illustrations etc.

A. uses
B. used
C. is used
D. was used
E. none of the above

27. The problem statement clearly specifies what it intends _____.

A. to investigate
B. to be investigated
C. investigated
D. investigating
E. none of the above

28. Without a catalogue, you might not even dare_____ the library.

A. to enter
B. enter
C. daring
D. dared
E. none of the above

Change the following sentences into passive voice:

29. Somebody has stolen my pen.

30. You gave me a book on technical communication.

[SET A]

Printed Page: 8 **University Roll No:**

First-Term Exam-2018 (B.TECH II yr)/MCA I & MCAII Year)

Ethics & Values: BELH-0006/AHE-3001

Time: 1 Hour **Max. Marks: 15**

Note: There are five passages in this paper. Read the passages carefully and answer the given questions. Each question is followed by multiple statements numbered 1,2,3,4. Please note that there is only ONE CORRECT ANSWER (one among a, b, c, d) Choose the most appropriate one. **Please don't forget to mark the SET No. on your OMR Sheet.**

Passage 1

Engineering involves creativity and innovation. It is about generating new concepts and converting them into realities. On the other hand, the field of ethics (or moral philosophy) involves systematizing, defending, and recommending concepts of right and wrong behaviour. Philosophers today usually divide ethical theories into three general subject areas: meta-ethics, normative ethics, and applied ethics. Meta-ethics investigates where our ethical principles come from, and what they mean. Are they merely social inventions? Do they involve more than expressions of our individual emotions? Meta-ethical answers to these questions focus on the issues of universal truths, the will of God, the role of reason in ethical judgments, and the meaning of ethical terms themselves. Normative ethics takes on a more practical task, which is to arrive at moral standards that regulate right and wrong conduct. This may involve articulating the good habits that we should acquire, the duties that we should follow, or the consequences of our behaviour on others. Finally, applied ethics involves examining specific controversial issues, such as infanticide, animal rights, environmental concerns or capital punishment.

Questions: (5 x .5=2.5 marks)

1. Which of the following statements are not correct about ethics?
   1. A systematic study of scientific facts.
   2. It involves defending concepts of right and wrong behaviour.
   3. One should merely follow the manners and customs of the society.
   4. Ethics deals with recommending one form of action over another.

   a)1,2&3 b)1&3 c) 2&4 d) 1&2

2. The Golden Rule comes under:
1. Normative Ethics 2. Non-consequentialist ethics 3. Applied Ethics 4. Meta-ethics

a) 2&4 b)1 c) only 2 d)None of these

3. Which among the following statements are true?
   1. The issue of nuclear war is a matter of normative ethics.
   2. The study of principles of moral actions belong to meta-ethics
   3. Moral psychology studies link between reason and emotion.
   4. Reason and arguments have a role to play in ethical judgements.

   a)1&2 b) 2,3&4 c)3&4 d) only 2
4. How is ethics different from engineering?
   1. Ethics is descriptive while engineering is based on creativity only.
   2. Ethics is prescriptive while engineering involves innovation.
   3. Ethics requires emotion only while engineering requires new concepts.
   4. Ethics is theoretical while Engineering is practical.

   a)1 b)3 c)2 d)4
5. Normative ethics is about:
   1. Good rules 2. Habits 3. Professional life 3. All of these

   a) 1&2 b) 2 c) 3 d) 4

Passage 2

The questions we primarily ask in meta-ethics are concerned about the origin We may define met-ethics as the study of the origin and meaning of ethical concepts. Two issues, though, are prominent: (1) metaphysical issues concerning whether morality exists independently of humans, and (2) psychological issues concerning the underlying mental basis of our moral judgments and conduct. The metaphysical component of meta-ethics involves discovering specifically whether moral values are eternal truths that exist in a spirit-like world, or simply human conventions. There are two general directions that discussions of this topic take, one other-worldly and one this-worldly. Proponents of the other-worldly view typically hold that moral values are objective in the sense that they exist in a spirit-like realm beyond subjective human conventions. They also hold that they are absolute, or eternal, in that they never change, and also that they are universal insofar as they apply to all rational creatures around the world and throughout time. A different other-worldly approach to the metaphysical status of morality is divine commands issuing from God's will. God wills all moral values into existence. The second and more this-worldly approach to the metaphysical status of morality denies the objective status of moral values. Moral values,

they argue, are strictly human inventions, a position that has since been called moral relativism. There are two distinct forms of moral relativism. The first is individual relativism, which holds that individual people create their own moral standards. The second is cultural relativism which maintains that morality is grounded in the approval of one's society - and not simply in the preferences of individual people. In addition to accepting relativism, this-worldly approaches to the metaphysical status of morality deny the absolute and universal nature of morality and hold instead that moral values in fact change from society to society throughout time and throughout the world.

Questions: (5 x .5=2.5 marks)

6. Which of the following statements are incorrect about the Objectivism?

1. Morality is independent to society.
2. Morality changes from time to time.
3. Moral values are created by humans.
4. Morality is subjective.

a)1&2 b)2&3 c)1&4 d) 2, 3&4

7. What is this-worldly approach in meta-ethics?

1. It accepts the universal nature of morality.
2. It believes that moral values change from time to time.
3. This approach believes that ethical facts are commanded by God.
4. It favours the view that morality is human invention.

a)2&4 b)2&3 c)3&4 d) 2,3&4

8. What do you mean by social relativism?

1. Moral truths exist independently of humans.
2. Each society creates his moral code.
3. It takes the other-worldly approach to ethics.
4. Ethics depends on society.

a)1,2&3 b)2,3&4 c)1,3&4 d)2&4

9. What does the other-worldly approach to ethics involve?

1. This approach takes the view that ethical truths are man-made.
2. It believes that moral values are subjective.
3. The objective nature of morality is emphasized in this approach.
4. It considers moral truths to be eternal and universal.

a)1&2 b)3&4 c)2&3 d)1&4

10. The difference between right and wrong according to the individual relativists depends on

1. The attitudes of individuals.
2. The different moral perception.
3. The difference in the environmental and climatic conditions.

4. None of these.

a)1&2 b)1&4 c) 2&3 d)2&4

Passage 3 (5 x .5=2.5 marks)

A second area of meta-ethics involves the psychological basis of our moral judgments and conduct, particularly understanding what motivates us to be moral. We might explore this subject by asking the simple question, "Why be moral?" Even if I am aware of basic moral standards, such as don't kill and don't steal, this does not necessarily mean that I will be psychologically compelled to act on them. Some answers to the question "Why be moral?" are to avoid punishment, to gain praise, to attain happiness, to be dignified, or to fit in with society. One important area of moral psychology concerns the inherent selfishness of humans. 17th century British philosopher Thomas Hobbes held that many, if not all, of our actions are prompted by selfish desires. Even if an action seems selfless, such as donating to charity, there are still selfish causes for this, such as experiencing power over other people. This view is called psychological egoism and maintains that self-oriented interests ultimately motivate all human actions. Closely related to psychological egoism is a view called psychological hedonism which is the view that pleasure is the specific driving force behind all of our actions. 18th century British philosopher Joseph Butler agreed that instinctive selfishness and pleasure prompt much of our conduct. However, Butler argued that we also have an inherent psychological capacity to show kindness to others. This view is called psychological altruism and maintains that at least some of our actions are motivated by instinctive kindness.

Questions

11. Which of the following statements are **wrong** about Thomas Hobbes?
    1. All of our ethical motives are duty governed.
    2. Many actions have selfish motives.
    3. Many actions have selfless motives.
    4. Even selfless actions are caused by selfish reasons.

    a)1,2&3 b)2,3&4 c)1,3&4 d)1 & 3
12. What is "psychological altruism"?
    1. All human actions are selfish in nature.
    2. People have some motives to do good for others.
    3. All human actions are not selfish.
    4. Some human actions are motivated by instinctive kindness.

    a)1&3 b)1&4 c) 2&3 d)2,3&4
13. Which of the following are true about Psychological hedonism ?

1. The basic motive behind all actions is pleasure.
2. The only motive of our actions is to attain pleasure and avoid pain.
3. The driving force behind human action is the sense of duty.
4. It is reason that governs all human actions.

a)1,2&3 b)2,3&4 c)1&2, d)1,2&4

14. Which of the following statements are true about emotivism?
    1. A moral statement is an expression of rational thinking.
    2. A moral statement is an expression of feelings only.
    3. A moral judgement cannot have a true or false value.
    4. Morality is only prescriptive in nature.

    a)1&3 b)1&4 c) 2&3 d)2&4

15. The rationalist believes that
    1. Passions are master of reasons.
    2. Reason is capable of governing our actions.
    3. Passions must be slave of reason.
    4. Moral judgements are reactions.

    a)1&3 b)1&4 c) 2&3 d)3&4

Passage 4 (5 x .5=2.5 marks)

Normative ethics involves arriving at moral standards that regulate right and wrong conduct. In a sense, it is a search for an ideal litmus test of proper behaviour. The Golden Rule is a classic example of a normative principle: We should do to others what we would want others to do to us. Since I do not want my neighbour to steal my car, then it is wrong for me to steal her car. Since I would want people to feed me if I was starving, then I should help feed starving people. Using this same reasoning, I can theoretically determine whether any possible action is right or wrong. So, based on the Golden Rule, it would also be wrong for me to lie to, harass, victimize, assault, or kill others. The Golden Rule is an example of a normative theory that establishes a single principle against which we judge all actions. Other normative theories focus on a set of foundational principles, or a set of good character traits. The key assumption in normative ethics is that there is only one ultimate criterion of moral conduct, whether it is a single rule or a set of principles. Three strategies will be noted here: (1) virtue theories, (2) duty theories, and (3) consequentialist theories.

Questions

16. Normative Ethics is about:
    1. the origin and meaning of ethical concepts.
    2. the good habits and rules.

3. the standards by which human behaviour can be measured.
4. Source of ethics.

a)1,2&3 b)2 & 3 c)1,3&4 d)1,2&4

17. Which of the following are concerns for Normative Ethics?
    1. The theories of ethical decision making.
    2. The meaning of moral terms and concepts.
    3. The principles on which actions can be called right or wrong.
    4. The issue of universal moral truths and the will of God.

    a)1,2&3 b)2,3&4 c)1,3&4 d)1&3

18. Virtue theory differs from that of consequentialism because:
    1. It is based on results.
    2. It is based on character of the agent
    3. It talks about utility.
    4. It talks about virtues.

    a)1&3 b)1&4 c) 2&3 d)2&4

19. Duty theories in Normative Ethics emphasised on that:
    1. Rightness of an action depends on the character of the person.
    2. The duty of a person is to follow the results.
    3. Performance of one's duty is the standard for judging an action.
    4. The duty in a situation does not simply depend on results of the act.

    a)1&3 b)1&4 c) 2&3 d)3&4

20. Which of the following statements are **not** true about the "consequentialist" school of ethics?
    1. An action should be judged by its intention.
    2. What matters in an action is the character of the agent.
    3. The only important thing is to look at the results.
    4. An action is right if its consequences are favourable.

    a)1&3 b)1&2 c) 2&3 d)3&4

Passage-5 (10 X .5 = 5 Marks)

Imagine you are driver of a runaway trolley hurtling down the tracks towards five workers who cannot hear it coming. Even if they do spot it, they won't be able to move out of the way in time. As you think about preventing this disaster, you suddenly see a side track away from the five workers. However, down this side track is one lone worker, who is as unaware as his colleagues. So, would you switch to the side track leading to one death but saving five? This is the crux of the classic thought experiment known as the trolley dilemma. The trolley dilemma allows us to think through the consequences of an action and consider whether its moral value is determined only by its outcome. The trolley dilemma has since proven itself to be a helpful guide in

understanding our moral sense. Consider now the second variation of this problem.

Imagine you are standing on a footbridge above the tracks. You can see the runaway trolley hurtling towards the same five unaware workers. There's no side track this time. However, there is fat man standing next to you on the footbridge. You're confident that his bulk would stop the trolley in its tracks. So, would you push the man on to the tracks, sacrificing him in order to stop the trolley and thereby saving five others?

The outcome of this scenario is identical to the previous one: one person dies; five people live. What do you think is the majority response this time? If a person dies in both scenarios, and both deaths directly result from an action you take, what's the difference between the two? Philosophical questions like this have real-world implications for how people behave in society, governments, science, law and even war.

Questions (10x1 mark=10 marks)

21) Majority decline to push the fat man in second version?

1. Only results cannot be the motive.
2. Majority feel that it's morally wrong.
3. it's against of human rights.
4. None of these.

a) 1&2 b)2&4 c)1,2 &3 d) 1&4

22) What would be the intention and the reason of the people who decide to save the five men in all versions?

1. They decide on the basis of results only.
2. They would all be duty biased.
3. Maximum good for maximum number.
4. Their choice is based on human rights.

a)2&4 b)1&3 c)3&4 d)1,2&4

23) In the First version, if one did not change the track, the justification would be that

1. It maximizes happiness of the maximum number.
2. It is wrong to intentionally kill even a single person.
3. One is strict duty based person.
4. None of these.

a) 1&2 b)1&4 c)1&3 d) 2&3

24) Which of the following statements are true about the second version of trolley car case?

1. The trolley car can be turned on the side track in this version.
2. Majority is not as confident about saving six lives as they were in

the first case.

3. Majority would not push the fat man.
4. Majority would decline to save six men.

a) 1&2 b) 2&3 c) 3&4 d)2,3 & 4

25) In the first version, the majority think that

1. It is reasonably right to turn.
2. It is grounded in results.
3. Changing the track is morally appropriate in that situation.
4. It is neither moral nor immoral to turn.

a)1 b)1,2&3 c)3 d)4

26) What are the insights from the Run way trolley car case?

1. Our ordinary responses are unclear.
2. Our mind has several moral principles which do not conflict at times.
3. Emotions are a better guide than thinking in decision making.
4. There are moral standards that exert pressure on our decisions.

a)2&4 b)1&3 c) 3&4 d)1&4

27) The difference in the majority's response to the first and the second version is because

1. In the first version we are not concerned about saving lives
2. In the second version we are not concerned about human life
3. In the second version individual rights also becomes a factor
4. The choice is easier in the first version than the second one.

a)1&2 b)3&4 c)2&3 d)2&4

28) Which of the following is **not** a majority decision in the Trolley case?

1) Turning the trolley to the side track in the first version 2) Not turning the trolley to the side track in the first version 3) Pushing the fat man in the second version 4) Not Pushing the fat man in the second version

a)1&2 b)3&4 c)2&3 d)2&4

29) What do you mean by a thought experiment?

1) It is based on real conditions 2) it's based on fixed conditions c) it's not a real case d) All above

a) 1 b) 2 & 3 c) 3 d) 4

30) In the second version, the majority response is based only on

1) Rights 2) duty 3) Results 4) Destiny

a) 1 b) 2 c) 3 d) 4

Ethics & Values: BELH-0006/AHE-3001

Time: 1 Hour **Max. Marks: 15**

Note: There are five passages in this paper. Read the passages carefully and answer the given questions. Each question is followed by multiple statements numbered 1,2,3,4. Please note that there is only ONE CORRECT ANSWER (one among a, b, c, d) Choose the most appropriate one. **Please don't forget to mark the SET No. on your OMR Sheet.**

Passage 1

The questions we primarily ask in meta-ethics are concerned about the origin We may define met-ethics as the study of the origin and meaning of ethical concepts. Two issues, though, are prominent: (1) metaphysical issues concerning whether morality exists independently of humans, and (2) psychological issues concerning the underlying mental basis of our moral judgments and conduct. The metaphysical component of meta-ethics involves discovering specifically whether moral values are eternal truths that exist in a spirit-like world, or simply human conventions. There are two general directions that discussions of this topic take, one other-worldly and one this-worldly. Proponents of the other-worldly view typically hold that moral values are objective in the sense that they exist in a spirit-like realm beyond subjective human conventions. They also hold that they are absolute, or eternal, in that they never change, and also that they are universal insofar as they apply to all rational creatures around the world and throughout time. A different other-worldly approach to the metaphysical status of morality is divine commands issuing from God's will. God wills all moral values into existence. The second and more this-worldly approach to the metaphysical status of morality denies the objective status of moral values. Moral values, they argue, are strictly human inventions, a position that has since been called moral relativism. There are two distinct forms of moral relativism. The first is individual relativism, which holds that individual people create their own moral standards. The second is cultural relativism which maintains that morality is grounded in the approval of one's society - and not simply in the preferences of individual people. In addition to accepting relativism, this-worldly approaches to the metaphysical status of morality deny the absolute

and universal nature of morality and hold instead that moral values in fact change from society to society throughout time and throughout the world.

Questions: (5 x .5=2.5 marks)

1. Which of the following statements are incorrect about the Objectivism?
   1. Morality is independent to society.
   2. Morality changes from time to time.
   3. Moral values are created by humans.
   4. Morality is subjective.

   a)1&2 b)2&3 c)1&4 d) 2, 3&4
2. What is this-worldly approach in meta-ethics?
   1. It accepts the universal nature of morality.
   2. It believes that moral values change from time to time.
   3. This approach believes that ethical facts are commanded by God.
   4. It favours the view that morality is human invention.

   a)2&4 b)2&3 c)3&4 d) 2,3&4
3. What do you mean by social relativism?
   1. Moral truths exist independently of humans.
   2. Each society creates his moral code.
   3. It takes the other-worldly approach to ethics.
   4. Ethics depends on society.

   a)1,2&3 b)2,3&4 c)1,3&4 d)2&4
4. What does the other-worldly approach to ethics involve?
   1. This approach takes the view that ethical truths are man-made.
   2. It believes that moral values are subjective.
   3. The objective nature of morality is emphasized in this approach.
   4. It considers moral truths to be eternal and universal.

   a)1&2 b)3&4 c)2&3 d)1&4
5. The difference between right and wrong according to the individual relativists depends on
   1. The attitudes of individuals.
   2. The different moral perception.
   3. The difference in the environmental and climatic conditions.
   4. None of these.

   a)1&2 b)1&4 c) 2&3 d)2&4

Passage 2:

Engineering involves creativity and innovation. It is about generating new concepts and converting them into realities. On the other hand, the field of ethics (or moral philosophy) involves systematizing, defending, and recommending concepts of right and wrong behaviour. Philosophers today

usually divide ethical theories into three general subject areas: meta-ethics, normative ethics, and applied ethics. Meta-ethics investigates where our ethical principles come from, and what they mean. Are they merely social inventions? Do they involve more than expressions of our individual emotions? Meta-ethical answers to these questions focus on the issues of universal truths, the will of God, the role of reason in ethical judgments, and the meaning of ethical terms themselves. Normative ethics takes on a more practical task, which is to arrive at moral standards that regulate right and wrong conduct. This may involve articulating the good habits that we should acquire, the duties that we should follow, or the consequences of our behaviour on others. Finally, applied ethics involves examining specific controversial issues, such as infanticide, animal rights, environmental concerns or capital punishment.

Questions: (5 x .5=2.5 marks)

6. Which of the following statements are not correct about ethics?
   1. A systematic study of scientific facts.
   2. It involves defending concepts of right and wrong behaviour.
   3. One should merely follow the manners and customs of the society.
   4. Ethics deals with recommending one form of action over another.

   a)1,2&3 b)1&3 c) 2&4 d) 1&2

7. The Golden Rule comes under:

1. Normative Ethics 2. Non-consequentialist ethics 3. Applied Ethics 4. Meta-ethics

   a) 2&4 b)1 c) only 2 d)None of these

8. Which among the following statements are true?
   1. The issue of nuclear war is a matter of normative ethics.
   2. The study of principles of moral actions belong to meta-ethics
   3. Moral psychology studies link between reason and emotion.
   4. Reason and arguments have a role to play in ethical judgements.

   a)1&2 b) 2,3&4 c)3&4 d) only 2

9. How is ethics different from engineering?
   1. Ethics is descriptive while engineering is based on creativity only.
   2. Ethics is prescriptive while engineering involves innovation.
   3. Ethics requires emotion only while engineering requires new concepts.
   4. Ethics is theoretical while Engineering is practical.

   a)1 b)3 c)2 d)4

10. Normative ethics is about:

1. Good rules 2. Habits 3. Professional life 3. All of these

a) 1&2 b) 2 c) 3 d) 4

Passage 3 (5 x .5=2.5 marks)

A second area of meta-ethics involves the psychological basis of our moral judgments and conduct, particularly understanding what motivates us to be moral. We might explore this subject by asking the simple question, "Why be moral?" Even if I am aware of basic moral standards, such as don't kill and don't steal, this does not necessarily mean that I will be psychologically compelled to act on them. Some answers to the question "Why be moral?" are to avoid punishment, to gain praise, to attain happiness, to be dignified, or to fit in with society. One important area of moral psychology concerns the inherent selfishness of humans. 17th century British philosopher Thomas Hobbes held that many, if not all, of our actions are prompted by selfish desires. Even if an action seems selfless, such as donating to charity, there are still selfish causes for this, such as experiencing power over other people. This view is called psychological egoism and maintains that self-oriented interests ultimately motivate all human actions. Closely related to psychological egoism is a view called psychological hedonism which is the view that pleasure is the specific driving force behind all of our actions. 18th century British philosopher Joseph Butler agreed that instinctive selfishness and pleasure prompt much of our conduct. However, Butler argued that we also have an inherent psychological capacity to show kindness to others. This view is called psychological altruism and maintains that at least some of our actions are motivated by instinctive kindness.

Questions

11. Which of the following statements are **wrong** about Thomas Hobbes?
    1. All of our ethical motives are duty governed.
    2. Many actions have selfish motives.
    3. Many actions have selfless motives.
    4. Even selfless actions are caused by selfish reasons.

    a)1,2&3 b)2,3&4 c)1,3&4 d)1 & 3
12. What is "psychological altruism"?
    1. All human actions are selfish in nature.
    2. People have some motives to do good for others.
    3. All human actions are not selfish.
    4. Some human actions are motivated by instinctive kindness.

    a)1&3 b)1&4 c) 2&3 d)2,3&4
13. Which of the following are true about Psychological hedonism ?
    1. The basic motive behind all actions is pleasure.

2. The only motive of our actions is to attain pleasure and avoid pain.
3. The driving force behind human action is the sense of duty.
4. It is reason that governs all human actions.

a)1,2&3 b)2,3&4 c)1&2, d)1,2&4

14. Which of the following statements are true about emotivism?
    1. A moral statement is an expression of rational thinking.
    2. A moral statement is an expression of feelings only.
    3. A moral judgement cannot have a true or false value.
    4. Morality is only prescriptive in nature.

    a)1&3 b)1&4 c) 2&3 d)2&4

15. The rationalist believes that
    1. Passions are master of reasons.
    2. Reason is capable of governing our actions.
    3. Passions must be slave of reason.
    4. Moral judgements are reactions.

    a)1&3 b)1&4 c) 2&3 d)3&4

Passage 4 (5 x .5=2.5 marks)

Normative ethics involves arriving at moral standards that regulate right and wrong conduct. In a sense, it is a search for an ideal litmus test of proper behaviour. The Golden Rule is a classic example of a normative principle: We should do to others what we would want others to do to us. Since I do not want my neighbour to steal my car, then it is wrong for me to steal her car. Since I would want people to feed me if I was starving, then I should help feed starving people. Using this same reasoning, I can theoretically determine whether any possible action is right or wrong. So, based on the Golden Rule, it would also be wrong for me to lie to, harass, victimize, assault, or kill others. The Golden Rule is an example of a normative theory that establishes a single principle against which we judge all actions. Other normative theories focus on a set of foundational principles, or a set of good character traits. The key assumption in normative ethics is that there is only one ultimate criterion of moral conduct, whether it is a single rule or a set of principles. Three strategies will be noted here: (1) virtue theories, (2) duty theories, and (3) consequentialist theories.

Questions

16. Normative Ethics is about:
    1. the origin and meaning of ethical concepts.
    2. the good habits and rules.
    3. the standards by which human behaviour can be measured.

4. Source of ethics.

a)1,2&3 b)2 & 3 c)1,3&4 d)1,2&4

17. Which of the following are concerns for Normative Ethics?
    1. The theories of ethical decision making.
    2. The meaning of moral terms and concepts.
    3. The principles on which actions can be called right or wrong.
    4. The issue of universal moral truths and the will of God.

    a)1,2&3 b)2,3&4 c)1,3&4 d)1&3

18. Virtue theory differs from that of consequentialism because:
    1. It is based on results.
    2. It is based on character of the agent
    3. It talks about utility.
    4. It talks about virtues.

    a)1&3 b)1&4 c) 2&3 d)2&4

19. Duty theories in Normative Ethics emphasised on that:
    1. Rightness of an action depends on the character of the person.
    2. The duty of a person is to follow the results.
    3. Performance of one's duty is the standard for judging an action.
    4. The duty in a situation does not simply depend on results of the act.

    a)1&3 b)1&4 c) 2&3 d)3&4

20. Which of the following statements are **not** true about the "consequentialist" school of ethics?
    1. An action should be judged by its intention.
    2. What matters in an action is the character of the agent.
    3. The only important thing is to look at the results.
    4. An action is right if its consequences are favourable.

    a)1&3 b)1&2 c) 2&3 d)3&4

Passage-5 (10 X .5 = 5 Marks)

Imagine you are driver of a runaway trolley hurtling down the tracks towards five workers who cannot hear it coming. Even if they do spot it, they won't be able to move out of the way in time. As you think about preventing this disaster, you suddenly see a side track away from the five workers. However, down this side track is one lone worker, who is as unaware as his colleagues. So, would you switch to the side track leading to one death but saving five? This is the crux of the classic thought experiment known as the trolley dilemma. The trolley dilemma allows us to think through the consequences of an action and consider whether its moral value is determined only by its outcome. The trolley dilemma has since proven itself to be a helpful guide in

understanding our moral sense. Consider now the second variation of this problem.

Imagine you are standing on a footbridge above the tracks. You can see the runaway trolley hurtling towards the same five unaware workers. There's no side track this time. However, there is fat man standing next to you on the footbridge. You're confident that his bulk would stop the trolley in its tracks. So, would you push the man on to the tracks, sacrificing him in order to stop the trolley and thereby saving five others?

The outcome of this scenario is identical to the previous one: one person dies; five people live. What do you think is the majority response this time? If a person dies in both scenarios, and both deaths directly result from an action you take, what's the difference between the two? Philosophical questions like this have real-world implications for how people behave in society, governments, science, law and even war.

Questions (10x.5 mark=5 marks)

21) Majority decline to push the fat man in second version?

1. Only results cannot be the motive.
2. Majority feel that it's morally wrong.
3. it's against of human rights.
4. None of these.

a) 1&2 b)2&4 c)1,2 &3 d) 1&4

22) What would be the intention and the reason of the people who decide to save the five men in all versions?

1. They decide on the basis of results only.
2. They would all be duty biased.
3. Maximum good for maximum number.
4. Their choice is based on human rights.

a)2&4 b)1&3 c)3&4 d)1,2&4

23) In the First version, if one did not change the track, the justification would be that

1. It maximizes happiness of the maximum number.
2. It is wrong to intentionally kill even a single person.
3. One is strict duty based person.
4. None of these.

a) 1&2 b)1&4 c)1&3 d) 2&3

24) Which of the following statements are true about the second version of trolley car case?

1. The trolley car can be turned on the side track in this version.
2. Majority is not as confident about saving six lives as they were in

the first case.

3. Majority would not push the fat man.
4. Majority would decline to save six men.

a) 1&2 b) 2&3 c) 3&4 d)2,3 & 4

25) In the first version, the majority think that

1. It is reasonably right to turn.
2. It is grounded in results.
3. Changing the track is morally appropriate in that situation.
4. It is neither moral nor immoral to turn.

a)1 b)1,2&3 c)3 d)4

26) What are the insights from the Run way trolley car case?

1. Our ordinary responses are unclear.
2. Our mind has several moral principles which do not conflict at times.
3. Emotions are a better guide than thinking in decision making.
4. There are moral standards that exert pressure on our decisions.

a)2&4 b)1&3 c) 3&4 d)1&4

27) The difference in the majority's response to the first and the second version is because

1. In the first version we are not concerned about saving lives
2. In the second version we are not concerned about human life
3. In the second version individual rights also becomes a factor
4. The choice is easier in the first version than the second one.

a)1&2 b)3&4 c)2&3 d)2&4

28) Which of the following is **not** a majority decision in the Trolley case?

1) Turning the trolley to the side track in the first version 2) Not turning the trolley to the side track in the first version 3) Pushing the fat man in the second version 4) Not Pushing the fat man in the second version

a)1&2 b)3&4 c)2&3 d)2&4

29) What do you mean by a thought experiment?

1) It is based on real conditions 2) it's based on fixed conditions c) it's not a real case d) All above

a) 1 b) 2 & 3 c) 3 d) 4

30) In the second version, the majority response is based only on

1) Rights 2) duty 3) Results 4) Destiny

a) 1 b) 2 c) 3 d) 4

First-Term Exam-2018 (B.TECH II yr)/MCA I & MCAII Year)

Ethics & Values: BELH-0006/AHE-3001

Time: 1 Hour **Max. Marks: 15**

Note: There are five passages in this paper. Read the passages carefully and answer the given questions. Each question is followed by multiple statements numbered 1,2,3,4. Please note that there is only ONE CORRECT ANSWER (one among a, b, c, d) Choose the most appropriate one. **Please don't forget to mark the SET No. on your OMR Sheet.**

Passage 1 (5 x .5=2.5 marks)

A second area of meta-ethics involves the psychological basis of our moral judgments and conduct, particularly understanding what motivates us to be moral. We might explore this subject by asking the simple question, "Why be moral?" Even if I am aware of basic moral standards, such as don't kill and don't steal, this does not necessarily mean that I will be psychologically compelled to act on them. Some answers to the question "Why be moral?" are to avoid punishment, to gain praise, to attain happiness, to be dignified, or to fit in with society. One important area of moral psychology concerns the inherent selfishness of humans. 17th century British philosopher Thomas Hobbes held that many, if not all, of our actions are prompted by selfish desires. Even if an action seems selfless, such as donating to charity, there are still selfish causes for this, such as experiencing power over other people. This view is called psychological egoism and maintains that self-oriented interests ultimately motivate all human actions. Closely related to psychological egoism is a view called psychological hedonism which is the view that pleasure is the specific driving force behind all of our actions. 18th century British philosopher Joseph Butler agreed that instinctive selfishness and pleasure prompt much of our conduct. However, Butler argued that we also have an inherent psychological capacity to show kindness to others. This view is called psychological altruism and maintains that at least some of our actions are motivated by instinctive kindness.

Questions

1. Which of the following statements are **wrong** about Thomas Hobbes?
   1. All of our ethical motives are duty governed.
   2. Many actions have selfish motives.

3. Many actions have selfless motives.
4. Even selfless actions are caused by selfish reasons.

a)1,2&3 b)2,3&4 c)1,3&4 d)1 & 3

2. What is "psychological altruism"?
   1. All human actions are selfish in nature.
   2. People have some motives to do good for others.
   3. All human actions are not selfish.
   4. Some human actions are motivated by instinctive kindness.

   a)1&3 b)1&4 c) 2&3 d)2,3&4
3. Which of the following are true about Psychological hedonism ?
   1. The basic motive behind all actions is pleasure.
   2. The only motive of our actions is to attain pleasure and avoid pain.
   3. The driving force behind human action is the sense of duty.
   4. It is reason that governs all human actions.

   a)1,2&3 b)2,3&4 c)1&2, d)1,2&4
4. Which of the following statements are true about emotivism?
   1. A moral statement is an expression of rational thinking.
   2. A moral statement is an expression of feelings only.
   3. A moral judgement cannot have a true or false value.
   4. Morality is only prescriptive in nature.

   a)1&3 b)1&4 c) 2&3 d)2&4
5. The rationalist believes that
   1. Passions are master of reasons.
   2. Reason is capable of governing our actions.
   3. Passions must be slave of reason.
   4. Moral judgements are reactions.

   a)1&3 b)1&4 c) 2&3 d)3&4

Passage 2

The questions we primarily ask in meta-ethics are concerned about the origin We may define met-ethics as the study of the origin and meaning of ethical concepts. Two issues, though, are prominent: (1) metaphysical issues concerning whether morality exists independently of humans, and (2) psychological issues concerning the underlying mental basis of our moral judgments and conduct. The metaphysical component of meta-ethics involves discovering specifically whether moral values are eternal truths that exist in a spirit-like world, or simply human conventions. There are two general directions that discussions of this topic take, one other-worldly and one this-worldly. Proponents of the other-worldly view typically hold that moral values are objective in the sense that they exist in a spirit-like realm beyond

subjective human conventions. They also hold that they are absolute, or eternal, in that they never change, and also that they are universal insofar as they apply to all rational creatures around the world and throughout time. A different other-worldly approach to the metaphysical status of morality is divine commands issuing from God's will. God wills all moral values into existence. The second and more this-worldly approach to the metaphysical status of morality denies the objective status of moral values. Moral values, they argue, are strictly human inventions, a position that has since been called moral relativism. There are two distinct forms of moral relativism. The first is individual relativism, which holds that individual people create their own moral standards. The second is cultural relativism which maintains that morality is grounded in the approval of one's society - and not simply in the preferences of individual people. In addition to accepting relativism, this-worldly approaches to the metaphysical status of morality deny the absolute and universal nature of morality and hold instead that moral values in fact change from society to society throughout time and throughout the world.

Questions: (5 x .5=2.5 marks)

6. Which of the following statements are incorrect about the Objectivism?

1. Morality is independent to society.
2. Morality changes from time to time.
3. Moral values are created by humans.
4. Morality is subjective.

a)1&2 b)2&3 c)1&4 d) 2, 3&4

7. What is this-worldly approach in meta-ethics?

1. It accepts the universal nature of morality.
2. It believes that moral values change from time to time.
3. This approach believes that ethical facts are commanded by God.
4. It favours the view that morality is human invention.

a)2&4 b)2&3 c)3&4 d) 2,3&4

8. What do you mean by social relativism?

1. Moral truths exist independently of humans.
2. Each society creates his moral code.
3. It takes the other-worldly approach to ethics.
4. Ethics depends on society.

a)1,2&3 b)2,3&4 c)1,3&4 d)2&4

9. What does the other-worldly approach to ethics involve?

1. This approach takes the view that ethical truths are man-made.
2. It believes that moral values are subjective.
3. The objective nature of morality is emphasized in this approach.

4. It considers moral truths to be eternal and universal.

a)1&2 b)3&4 c)2&3 d)1&4

10. The difference between right and wrong according to the individual relativists depends on

1. The attitudes of individuals.
2. The different moral perception.
3. The difference in the environmental and climatic conditions.
4. None of these.

a)1&2 b)1&4 c) 2&3 d)2&4

Passage 3 (5 x .5=2.5 marks)

Normative ethics involves arriving at moral standards that regulate right and wrong conduct. In a sense, it is a search for an ideal litmus test of proper behaviour. The Golden Rule is a classic example of a normative principle: We should do to others what we would want others to do to us. Since I do not want my neighbour to steal my car, then it is wrong for me to steal her car. Since I would want people to feed me if I was starving, then I should help feed starving people. Using this same reasoning, I can theoretically determine whether any possible action is right or wrong. So, based on the Golden Rule, it would also be wrong for me to lie to, harass, victimize, assault, or kill others. The Golden Rule is an example of a normative theory that establishes a single principle against which we judge all actions. Other normative theories focus on a set of foundational principles, or a set of good character traits. The key assumption in normative ethics is that there is only one ultimate criterion of moral conduct, whether it is a single rule or a set of principles. Three strategies will be noted here: (1) virtue theories, (2) duty theories, and (3) consequentialist theories.

Questions

11. Normative Ethics is about:

1. the origin and meaning of ethical concepts.
2. the good habits and rules.
3. the standards by which human behaviour can be measured.
4. Source of ethics.

a)1,2&3 b)2 & 3 c)1,3&4 d)1,2&4

12. Which of the following are concerns for Normative Ethics?

1. The theories of ethical decision making.
2. The meaning of moral terms and concepts.
3. The principles on which actions can be called right or wrong.
4. The issue of universal moral truths and the will of God.

a)1,2&3 b)2,3&4 c)1,3&4 d)1&3

13. Virtue theory differs from that of consequentialism because:
    1. It is based on results.
    2. It is based on character of the agent
    3. It talks about utility.
    4. It talks about virtues.

    a)1&3 b)1&4 c) 2&3 d)2&4

14. Duty theories in Normative Ethics emphasised on that:
    1. Rightness of an action depends on the character of the person.
    2. The duty of a person is to follow the results.
    3. Performance of one's duty is the standard for judging an action.
    4. The duty in a situation does not simply depend on results of the act.

    a)1&3 b)1&4 c) 2&3 d)3&4

15. Which of the following statements are **not** true about the "consequentialist" school of ethics?
    1. An action should be judged by its intention.
    2. What matters in an action is the character of the agent.
    3. The only important thing is to look at the results.
    4. An action is right if its consequences are favourable.

    a)1&3 b)1&2 c) 2&3 d)3&4

Passage 4

Engineering involves creativity and innovation. It is about generating new concepts and converting them into realities. On the other hand, the field of ethics (or moral philosophy) involves systematizing, defending, and recommending concepts of right and wrong behaviour. Philosophers today usually divide ethical theories into three general subject areas: meta-ethics, normative ethics, and applied ethics. Meta-ethics investigates where our ethical principles come from, and what they mean. Are they merely social inventions? Do they involve more than expressions of our individual emotions? Meta-ethical answers to these questions focus on the issues of universal truths, the will of God, the role of reason in ethical judgments, and the meaning of ethical terms themselves. Normative ethics takes on a more practical task, which is to arrive at moral standards that regulate right and wrong conduct. This may involve articulating the good habits that we should acquire, the duties that we should follow, or the consequences of our behaviour on others. Finally, applied ethics involves examining specific controversial issues, such as infanticide, animal rights, environmental concerns or capital punishment.

Questions: (5 x .5=2.5 marks)

16. Which of the following statements are not correct about ethics?
    1. A systematic study of scientific facts.
    2. It involves defending concepts of right and wrong behaviour.
    3. One should merely follow the manners and customs of the society.
    4. Ethics deals with recommending one form of action over another.

    a)1,2&3 b)1&3 c) 2&4 d) 1&2

17. The Golden Rule comes under:

    1. Normative Ethics 2. Non-consequentialist ethics 3. Applied Ethics 4. Meta-ethics

    a) 2&4 b)1 c) only 2 d)None of these

18. Which among the following statements are true?
    1. The issue of nuclear war is a matter of normative ethics.
    2. The study of principles of moral actions belong to meta-ethics
    3. Moral psychology studies link between reason and emotion.
    4. Reason and arguments have a role to play in ethical judgements.

    a)1&2 b) 2,3&4 c)3&4 d) only 2

19. How is ethics different from engineering?
    1. Ethics is descriptive while engineering is based on creativity only.
    2. Ethics is prescriptive while engineering involves innovation.
    3. Ethics requires emotion only while engineering requires new concepts.
    4. Ethics is theoretical while Engineering is practical.

    a)1 b)3 c)2 d)4

20. Normative ethics is about:
    1. Good rules 2. Habits 3. Professional life 3. All of these

    a) 1&2 b) 2 c) 3 d) 4

Passage-5 (10 X .5 = 5 Marks)

Imagine you are driver of a runaway trolley hurtling down the tracks towards five workers who cannot hear it coming. Even if they do spot it, they won't be able to move out of the way in time. As you think about preventing this disaster, you suddenly see a side track away from the five workers. However, down this side track is one lone worker, who is as unaware as his colleagues. So, would you switch to the side track leading to one death but saving five? This is the crux of the classic thought experiment known as the trolley dilemma. The trolley dilemma allows us to think through the consequences of an action and consider whether its moral value is determined only by its outcome. The trolley dilemma has since proven itself to be a helpful guide in

understanding our moral sense. Consider now the second variation of this problem.

Imagine you are standing on a footbridge above the tracks. You can see the runaway trolley hurtling towards the same five unaware workers. There's no side track this time. However, there is fat man standing next to you on the footbridge. You're confident that his bulk would stop the trolley in its tracks. So, would you push the man on to the tracks, sacrificing him in order to stop the trolley and thereby saving five others?

The outcome of this scenario is identical to the previous one: one person dies; five people live. What do you think is the majority response this time? If a person dies in both scenarios, and both deaths directly result from an action you take, what's the difference between the two? Philosophical questions like this have real-world implications for how people behave in society, governments, science, law and even war.

Questions (10x.5 mark=5 marks)

21) Majority decline to push the fat man in second version?

1. Only results cannot be the motive.
2. Majority feel that it's morally wrong.
3. it's against of human rights.
4. None of these.

a) 1&2 b)2&4 c)1,2 &3 d) 1&4

22) What would be the intention and the reason of the people who decide to save the five men in all versions?

1. They decide on the basis of results only.
2. They would all be duty biased.
3. Maximum good for maximum number.
4. Their choice is based on human rights.

a)2&4 b)1&3 c)3&4 d)1,2&4

23) In the First version, if one did not change the track, the justification would be that

1. It maximizes happiness of the maximum number.
2. It is wrong to intentionally kill even a single person.
3. One is strict duty based person.
4. None of these.

a) 1&2 b)1&4 c)1&3 d) 2&3

24) Which of the following statements are true about the second version of trolley car case?

1. The trolley car can be turned on the side track in this version.
2. Majority is not as confident about saving six lives as they were in

the first case.

3. Majority would not push the fat man.
4. Majority would decline to save six men.

a) 1&2 b) 2&3 c) 3&4 d)2,3 & 4

25) In the first version, the majority think that

1. It is reasonably right to turn.
2. It is grounded in results.
3. Changing the track is morally appropriate in that situation.
4. It is neither moral nor immoral to turn.

a)1 b)1,2&3 c)3 d)4

26) What are the insights from the Run way trolley car case?

1. Our ordinary responses are unclear.
2. Our mind has several moral principles which do not conflict at times.
3. Emotions are a better guide than thinking in decision making.
4. There are moral standards that exert pressure on our decisions.

a)2&4 b)1&3 c) 3&4 d)1&4

27) The difference in the majority's response to the first and the second version is because

1. In the first version we are not concerned about saving lives
2. In the second version we are not concerned about human life
3. In the second version individual rights also becomes a factor
4. The choice is easier in the first version than the second one.

a)1&2 b)3&4 c)2&3 d)2&4

28) Which of the following is **not** a majority decision in the Trolley case?

1) Turning the trolley to the side track in the first version 2) Not turning the trolley to the side track in the first version 3) Pushing the fat man in the second version 4) Not Pushing the fat man in the second version

a)1&2 b)3&4 c)2&3 d)2&4

29) What do you mean by a thought experiment?

1) It is based on real conditions 2) it's based on fixed conditions c) it's not a real case d) All above

a) 1 b) 2 & 3 c) 3 d) 4

30) In the second version, the majority response is based only on

1) Rights 2) duty 3) Results 4) Destiny

a) 1 b) 2 c) 3 d) 4

[SET D]

First-Term Exam-2018 (B.TECH II yr)/MCA I & MCAII Year)

Ethics & Values: BELH-0006/AHE-3001

Time: 1 Hour **Max. Marks: 15**

Note: There are five passages in this paper. Read the passages carefully and answer the given questions. Each question is followed by multiple statements numbered 1,2,3,4. Please note that there is only ONE CORRECT ANSWER (one among a, b, c, d) Choose the most appropriate one. **Please don't forget to mark the SET No. on your OMR Sheet.**

Passage-1

Imagine you are driver of a runaway trolley hurtling down the tracks towards five workers who cannot hear it coming. Even if they do spot it, they won't be able to move out of the way in time. As you think about preventing this disaster, you suddenly see a side track away from the five workers. However, down this side track is one lone worker, who is as unaware as his colleagues. So, would you switch to the side track leading to one death but saving five?

This is the crux of the classic thought experiment known as the trolley dilemma. The trolley dilemma allows us to think through the consequences of an action and consider whether its moral value is determined only by its outcome. The trolley dilemma has since proven itself to be a helpful guide in understanding our moral sense. Consider now the second variation of this problem.

Imagine you are standing on a footbridge above the tracks. You can see the runaway trolley hurtling towards the same five unaware workers. There's no side track this time. However, there is fat man standing next to you on the footbridge. You're confident that his bulk would stop the trolley in its tracks. So, would you push the man on to the tracks, sacrificing him in order to stop the trolley and thereby saving five others?

The outcome of this scenario is identical to the previous one: one person dies; five people live. What do you think is the majority response this time? If a person dies in both scenarios, and both deaths directly result from an action you take, what's the difference between the two? Philosophical questions like this have real-world implications for how people behave in society, governments, science, law and even war.

Questions (10x.5 mark=5 marks)

1) Majority decline to push the fat man in second version?

1. Only results cannot be the motive.

2. Majority feel that it's morally wrong.
3. it's against of human rights.
4. None of these.

a) 1&2 b)2&4 c)1,2 &3 d) 1&4

2) What would be the intention and the reason of the people who decide to save the five men in all versions?

1. They decide on the basis of results only.
2. They would all be duty biased.
3. Maximum good for maximum number.
4. Their choice is based on human rights.

a)2&4 b)1&3 c)3&4 d)1,2&4

3) In the First version, if one did not change the track, the justification would be that

1. It maximizes happiness of the maximum number.
2. It is wrong to intentionally kill even a single person.
3. One is strict duty based person.
4. None of these.

a) 1&2 b)1&4 c)1&3 d) 2&3

4) Which of the following statements are true about the second version of trolley car case?

1. The trolley car can be turned on the side track in this version.
2. Majority is not as confident about saving six lives as they were in the first case.
3. Majority would not push the fat man.
4. Majority would decline to save six men.

a) 1&2 b) 2&3 c) 3&4 d)2,3 & 4

5) In the first version, the majority think that

1. It is reasonably right to turn.
2. It is grounded in results.
3. Changing the track is morally appropriate in that situation.
4. It is neither moral nor immoral to turn.

a)1 b)1,2&3 c)3 d)4

6) What are the insights from the Run way trolley car case?

1. Our ordinary responses are unclear.
2. Our mind has several moral principles which do not conflict at times.
3. Emotions are a better guide than thinking in decision making.
4. There are moral standards that exert pressure on our decisions.

a)2&4 b)1&3 c) 3&4 d)1&4

7) The difference in the majority's response to the first and the second version is because

1. In the first version we are not concerned about saving lives
2. In the second version we are not concerned about human life
3. In the second version individual rights also becomes a factor
4. The choice is easier in the first version than the second one.

a)1&2 b)3&4 c)2&3 d)2&4

8) Which of the following is **not** a majority decision in the Trolley case?

1) Turning the trolley to the side track in the first version 2) Not turning the trolley to the side track in the first version 3) Pushing the fat man in the second version 4) Not Pushing the fat man in the second version

a)1&2 b)3&4 c)2&3 d)2&4

9) What do you mean by a thought experiment?

1) It is based on real conditions 2) it's based on fixed conditions c) it's not a real case d) All above

a) 1 b) 2 & 3 c) 3 d) 4

10) In the second version, the majority response is based only on

1) Rights 2) duty 3) Results 4) Destiny

a) 1 b) 2 c) 3 d) 4

Passage 2

Engineering involves creativity and innovation. It is about generating new concepts and converting them into realities. On the other hand, the field of ethics (or moral philosophy) involves systematizing, defending, and recommending concepts of right and wrong behaviour. Philosophers today usually divide ethical theories into three general subject areas: meta-ethics, normative ethics, and applied ethics. Meta-ethics investigates where our ethical principles come from, and what they mean. Are they merely social inventions? Do they involve more than expressions of our individual emotions? Meta-ethical answers to these questions focus on the issues of universal truths, the will of God, the role of reason in ethical judgments, and the meaning of ethical terms themselves. Normative ethics takes on a more practical task, which is to arrive at moral standards that regulate right and wrong conduct. This may involve articulating the good habits that we should acquire, the duties that we should follow, or the consequences of our behaviour on others. Finally, applied ethics involves examining specific controversial issues, such as infanticide, animal rights, environmental concerns or capital punishment.

Questions: (5 x .5=2.5 marks)

11. Which of the following statements are not correct about ethics?
1. A systematic study of scientific facts.
2. It involves defending concepts of right and wrong behaviour.
3. One should merely follow the manners and customs of the society.
4. Ethics deals with recommending one form of action over another.

a)1,2&3 b)1&3 c) 2&4 d) 1&2

12. The Golden Rule comes under:

1. Normative Ethics 2. Non-consequentialist ethics 3. Applied Ethics 4. Meta-ethics

a) 2&4 b)1 c) only 2 d)None of these

13. Which among the following statements are true?
1. The issue of nuclear war is a matter of normative ethics.
2. The study of principles of moral actions belong to meta-ethics
3. Moral psychology studies link between reason and emotion.
4. Reason and arguments have a role to play in ethical judgements.

a)1&2 b) 2,3&4 c)3&4 d) only 2

14. How is ethics different from engineering?
1. Ethics is descriptive while engineering is based on creativity only.
2. Ethics is prescriptive while engineering involves innovation.
3. Ethics requires emotion only while engineering requires new concepts.
4. Ethics is theoretical while Engineering is practical.

a)1 b)3 c)2 d)4

15. Normative ethics is about:

1. Good rules 2. Habits 3. Professional life 3. All of these

a) 1&2 b) 2 c) 3 d) 4

Passage 3

The questions we primarily ask in meta-ethics are concerned about the origin We may define met-ethics as the study of the origin and meaning of ethical concepts. Two issues, though, are prominent: (1) metaphysical issues concerning whether morality exists independently of humans, and (2) psychological issues concerning the underlying mental basis of our moral judgments and conduct. The metaphysical component of meta-ethics involves discovering specifically whether moral values are eternal truths that exist in a spirit-like world, or simply human conventions. There are two general directions that discussions of this topic take, one other-worldly and one this-worldly. Proponents of the other-worldly view typically hold that moral values are objective in the sense that they exist in a spirit-like realm beyond subjective human conventions. They also hold that they are absolute, or

eternal, in that they never change, and also that they are universal insofar as they apply to all rational creatures around the world and throughout time. A different other-worldly approach to the metaphysical status of morality is divine commands issuing from God's will. God wills all moral values into existence. The second and more this-worldly approach to the metaphysical status of morality denies the objective status of moral values. Moral values, they argue, are strictly human inventions, a position that has since been called moral relativism. There are two distinct forms of moral relativism. The first is individual relativism, which holds that individual people create their own moral standards. The second is cultural relativism which maintains that morality is grounded in the approval of one's society - and not simply in the preferences of individual people. In addition to accepting relativism, this-worldly approaches to the metaphysical status of morality deny the absolute and universal nature of morality and hold instead that moral values in fact change from society to society throughout time and throughout the world.

Questions: (5 x .5=2.5 marks)

16. Which of the following statements are incorrect about the Objectivism?

1. Morality is independent to society.
2. Morality changes from time to time.
3. Moral values are created by humans.
4. Morality is subjective.

a)1&2 b)2&3 c)1&4 d) 2, 3&4

17. What is this-worldly approach in meta-ethics?

1. It accepts the universal nature of morality.
2. It believes that moral values change from time to time.
3. This approach believes that ethical facts are commanded by God.
4. It favours the view that morality is human invention.

a)2&4 b)2&3 c)3&4 d) 2,3&4

18. What do you mean by social relativism?

1. Moral truths exist independently of humans.
2. Each society creates his moral code.
3. It takes the other-worldly approach to ethics.
4. Ethics depends on society.

a)1,2&3 b)2,3&4 c)1,3&4 d)2&4

19. What does the other-worldly approach to ethics involve?

1. This approach takes the view that ethical truths are man-made.
2. It believes that moral values are subjective.
3. The objective nature of morality is emphasized in this approach.
4. It considers moral truths to be eternal and universal.

a)1&2 b)3&4 c)2&3 d)1&4

20. The difference between right and wrong according to the individual relativists depends on
    1. The attitudes of individuals.
    2. The different moral perception.
    3. The difference in the environmental and climatic conditions.
    4. None of these.

    a)1&2 b)1&4 c) 2&3 d)2&4

Passage 4 (5 x .5=2.5 marks)

A second area of meta-ethics involves the psychological basis of our moral judgments and conduct, particularly understanding what motivates us to be moral. We might explore this subject by asking the simple question, "Why be moral?" Even if I am aware of basic moral standards, such as don't kill and don't steal, this does not necessarily mean that I will be psychologically compelled to act on them. Some answers to the question "Why be moral?" are to avoid punishment, to gain praise, to attain happiness, to be dignified, or to fit in with society. One important area of moral psychology concerns the inherent selfishness of humans. 17th century British philosopher Thomas Hobbes held that many, if not all, of our actions are prompted by selfish desires. Even if an action seems selfless, such as donating to charity, there are still selfish causes for this, such as experiencing power over other people. This view is called psychological egoism and maintains that self-oriented interests ultimately motivate all human actions. Closely related to psychological egoism is a view called psychological hedonism which is the view that pleasure is the specific driving force behind all of our actions. 18th century British philosopher Joseph Butler agreed that instinctive selfishness and pleasure prompt much of our conduct. However, Butler argued that we also have an inherent psychological capacity to show kindness to others. This view is called psychological altruism and maintains that at least some of our actions are motivated by instinctive kindness.

Questions

21. Which of the following statements are **wrong** about Thomas Hobbes?
    1. All of our ethical motives are duty governed.
    2. Many actions have selfish motives.
    3. Many actions have selfless motives.
    4. Even selfless actions are caused by selfish reasons.

    a)1,2&3 b)2,3&4 c)1,3&4 d)1 & 3

22. What is "psychological altruism"?

1. All human actions are selfish in nature.
2. People have some motives to do good for others.
3. All human actions are not selfish.
4. Some human actions are motivated by instinctive kindness.

a)1&3 b)1&4 c) 2&3 d)2,3&4

23. Which of the following are true about Psychological hedonism ?
    1. The basic motive behind all actions is pleasure.
    2. The only motive of our actions is to attain pleasure and avoid pain.
    3. The driving force behind human action is the sense of duty.
    4. It is reason that governs all human actions.

    a)1,2&3 b)2,3&4 c)1&2, d)1,2&4

24. Which of the following statements are true about emotivism?
    1. A moral statement is an expression of rational thinking.
    2. A moral statement is an expression of feelings only.
    3. A moral judgement cannot have a true or false value.
    4. Morality is only prescriptive in nature.

    a)1&3 b)1&4 c) 2&3 d)2&4

25. The rationalist believes that
    1. Passions are master of reasons.
    2. Reason is capable of governing our actions.
    3. Passions must be slave of reason.
    4. Moral judgements are reactions.

    a)1&3 b)1&4 c) 2&3 d)3&4

Passage 5 (5 x .5=2.5 marks)

Normative ethics involves arriving at moral standards that regulate right and wrong conduct. In a sense, it is a search for an ideal litmus test of proper behaviour. The Golden Rule is a classic example of a normative principle: We should do to others what we would want others to do to us. Since I do not want my neighbour to steal my car, then it is wrong for me to steal her car. Since I would want people to feed me if I was starving, then I should help feed starving people. Using this same reasoning, I can theoretically determine whether any possible action is right or wrong. So, based on the Golden Rule, it would also be wrong for me to lie to, harass, victimize, assault, or kill others. The Golden Rule is an example of a normative theory that establishes a single principle against which we judge all actions. Other normative theories focus on a set of foundational principles, or a set of good character traits. The key assumption in normative ethics is that there is only one ultimate criterion of moral conduct, whether it is a single rule or a set of principles. Three

strategies will be noted here: (1) virtue theories, (2) duty theories, and (3) consequentialist theories.

Questions:

26. Normative Ethics is about:
    1. the origin and meaning of ethical concepts.
    2. the good habits and rules.
    3. the standards by which human behaviour can be measured.
    4. Source of ethics.

    a)1,2&3 b)2 & 3 c)1,3&4 d)1,2&4

27. Which of the following are concerns for Normative Ethics?
    1. The theories of ethical decision making.
    2. The meaning of moral terms and concepts.
    3. The principles on which actions can be called right or wrong.
    4. The issue of universal moral truths and the will of God.

    a)1,2&3 b)2,3&4 c)1,3&4 d)1&3

28. Virtue theory differs from that of consequentialism because:
    1. It is based on results.
    2. It is based on character of the agent
    3. It talks about utility.
    4. It talks about virtues.

    a)1&3 b)1&4 c) 2&3 d)2&4

29. Duty theories in Normative Ethics emphasised on that:
    1. Rightness of an action depends on the character of the person.
    2. The duty of a person is to follow the results.
    3. Performance of one's duty is the standard for judging an action.
    4. The duty in a situation does not simply depend on results of the act.

    a)1&3 b)1&4 c) 2&3 d)3&4

30. Which of the following statements are **not** true about the "consequentialist" school of ethics?
    1. An action should be judged by its intention.
    2. What matters in an action is the character of the agent.
    3. The only important thing is to look at the results.
    4. An action is right if its consequences are favourable.

    a)1&3 b)1&2 c) 2&3 d)3&4

I Mid-Term Examination

Odd Semester, 2018-19

Programme: B.Tech Branch: CSE Year: II

Subject with Code: Database Management System, BCSC0003

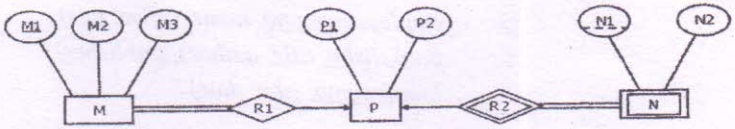

Time: 1 Hour **Maximum Marks: 15**

Section – A

Note: Attempt All Questions. 3 x 2 = 6 Marks

I. Let a relation R have attributes {a1, a2, a3, a4} & a1 is the candidate key. Then how many super keys are possible? Write down all the super keys.

II. Consider the following ER diagram:

How many minimum numbers of tables needed to represent the above ER diagram and construct the appropriate tables?

III. Differentiate between the following:

a. Intension and Extension

b. Candidate key, Surrogate key and Unique key

Section – B

Note: Attempt All Questions. 3 x 3 = 9 Marks

I. A database is being constructed to keep track of the teams and games of a sports league. A team has a number of players, not all of whom participate in each game. It is desired to keep track of the players participating in each game for each team, the positions they played in that game, and the result of the game. Design an ER schema diagram for this application, stating any assumptions you make. Choose your favorite team sport (e.g., soccer, baseball, football)

II. What are the different levels of abstraction in the DBMS? Explain each level in detail.

III. Consider the relational database schema:

employee(empno, name, office, age)
books(isbn, title, authors, publisher)
loan(empno, isbn, date)

where the primary keys are underlined. Give an expression in the relational algebra to express each of the following queries:

a. Find the names of employees who have borrowed a book published by McGraw-Hill.

b. Find the name of all employees who have borrowed all book published by McGraw.

c. Find the names of employees who have borrowed more than five different books published by McGraw-Hill.
