Overview

- 60 minutes | 40 Questions
- Each of which is worth one mark.
- The Reading test has **three Sections**
- There are 13 or 14 questions associated with each of the readings.
- Negative marking does not exist.
- You must transfer all of your responses onto an answer sheet. No extra time will be provided to transfer the answers.

Useful Reading Tips

- Don't start reading the passage. Begin with the questions.
- Read and follow the instructions carefully.
- Emphasize/underline the main terms/keywords.
- Try not to mark too much detail that is mentioned in the passage.
- Always use the spelling that is specified in the paragraph.
- Avoid spending too much time on a single question.

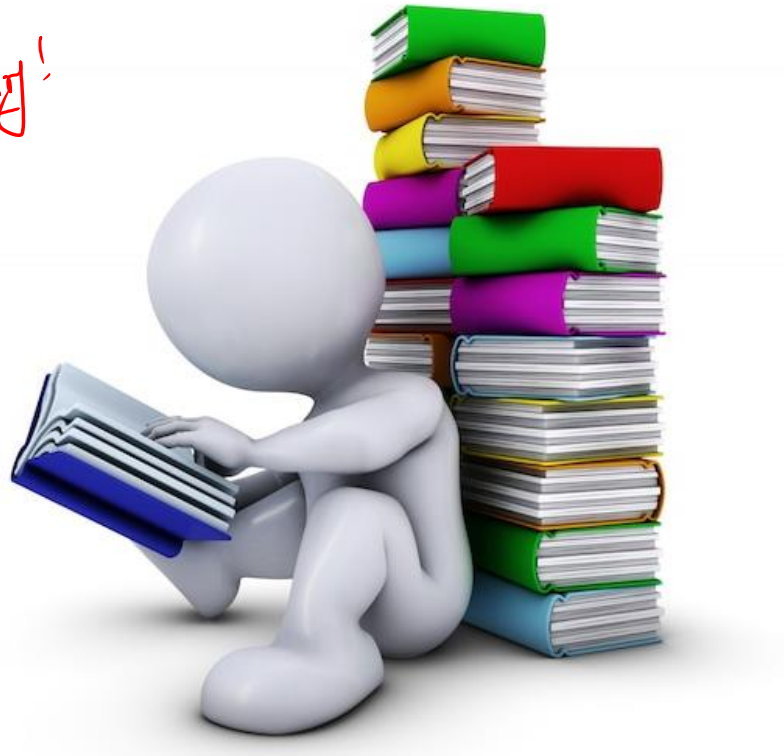

What type of questions will I need to answer?

- Sentence completion
- Summary, note, table, flow-chart completion
- Short-answer question
- Diagram label completion
- Multiple choice
- Matching heading
- Matching information
- Matching features
- Matching sentence ending
- Summary completion

Reading Skills

Important IELTS Reading Skills

- Skimming: to get the overview/ gist/crux/main idea of the passage
- Scanning: to look for specific details in the passage
- Detail reading or careful reading
- Marking keywords: proper nouns, numbers, dates, years
- Prediction: nature of the answer to be predicted, whether it will be a noun or a verb or it will be a number.
- Deducing meaning from the context.

Skimming

Answer!

Deducing meaning from the context

- Can I have a word with you?
- Your words do not match with your actions.
- I repeated his speech word to word.

Instructions Check

1. If the question asks you to write TWO WORDS AND/OR A NUMBER, this means the answer may be:
   - One word
   - One word + a number
   - Two words
   - Two words + a number

   Remember that even if a number is written as a word, it counts as a number (e.g. twenty-five trees- one word and a number)

Strategies for Sentence Completion

1. Read the title of the passage then move on to the questions.
2. Identify keywords
3. Scan the passage to find the keywords
4. Read carefully
5. Choose the word as it is

Let's Go Bats

The Sonar and Radar pioneers didn't know it then, but all the world now knows that bats, or rather natural selection working on bats, had perfected the system tens of millions of years earlier, and their radar achieves feats of detection and navigation that would strike an engineer dumb with admiration. It is technically incorrect to talk about bat 'radar', since they do not use radio waves. It is sonar but the underlying mathematical theories of radar and sonar are very similar and much of our scientific understanding of the details of what bats are doing has come from applying radar theory to them. The American zoologist Donald Griffin, who was largely responsible for the discovery of sonar in bats, coined the term 'echolocation' to cover both sonar and radar, whether used by animals or by human instruments.

Questions 1-4

Complete the sentences below. Choose **NO MORE THAN TWO WORDS** from the passage for each answer.

1. Long before the invention of radar, _____ had resulted in a sophisticated radar-like system in bats.

2. Radar is an inaccurate term when referring to bats because _____ are not used in their navigation system

3. Radar and sonar are based on similar _____

4. The word 'echolocation' was first used by someone working as a _____

Answers:

1. Natural selection
2. Radio waves
3. Mathematical theories
4. Zoologist

Delivering The Goods

Countries still trade disproportionately with their geographic neighbours. Over time, however, world output has shifted into goods whose worth is unrelated to their size and weight. Today, it is finished manufactured products that dominate the flow of trade, and, thanks to technological advances such as lightweight components, manufactured goods themselves have tended to become lighter and less bulky. As a result, less transportation is required for every dollar's worth of imports or exports.

To see how this influences trade, consider the business of making disk drives for computers. Most of the world's disk-drive manufacturing is concentrated in South-east Asia. This is possible only because disk drives, while valuable, are small and light and so cost little to ship. Computer manufacturers in Japan or Texas will not face hugely bigger freight bills if they import drives from Singapore rather than purchasing them on the domestic market. Distance, therefore, poses no obstacle to the globalisation of the disk-drive industry.

Questions 1-4

Complete the summary using the list of words, **A-K,** below.

Write the correct letter, **A-K,** in boxes **1-4** on your answer sheet.

THE TRANSPORT REVOLUTION

Modern cargo-handling methods have had a significant effect on **1.** …….. as the business of moving freight around the world becomes increasingly streamlined. Manufacturers of computers, for instance, are able to import **2.** …….. from overseas, rather than having to rely on a local supplier.

The introduction of **3.** …….. has meant that bulk cargo can be safely and efficiently moved over long distances.

While international shipping is now efficient, there is still a need for governments to reduce **4.** …….. in order to free up the domestic cargo sector.

A.	Tariffs	**B.**	Components
C.	Containers ships	**D.**	Output
E.	Employees	**F.**	Insurance costs
G.	Trade	**H.**	Freight
I.	Fares	**J.**	Software
K.	International standards		

ANSWERS:

G

B

C

A

Short-Answer Question

- Short-answer questions often begin with wh-words because they are designed to test whether you can find concrete facts and information.
- Read the instructions and questions carefully before you start.
- You need to scan (e.g. to find a word/name/number) or skim for the answer.

Diagram Completion

In this question type, you will be asked to complete labels on a diagram, which relates to a description contained in the text.

The instructions will make it clear how many words or numbers you should use in your answers, e.g. 'NO MORE THAN THREE WORDS AND/OR A NUMBER from the passage.

The answers do not necessarily occur in order in the passage. However, they will usually come from one section rather than the entire text.

The diagram will be one of the following:

1. A design or plan
2. A technical drawing, e.g. a machine or invention
3. A diagram of something in the natural world

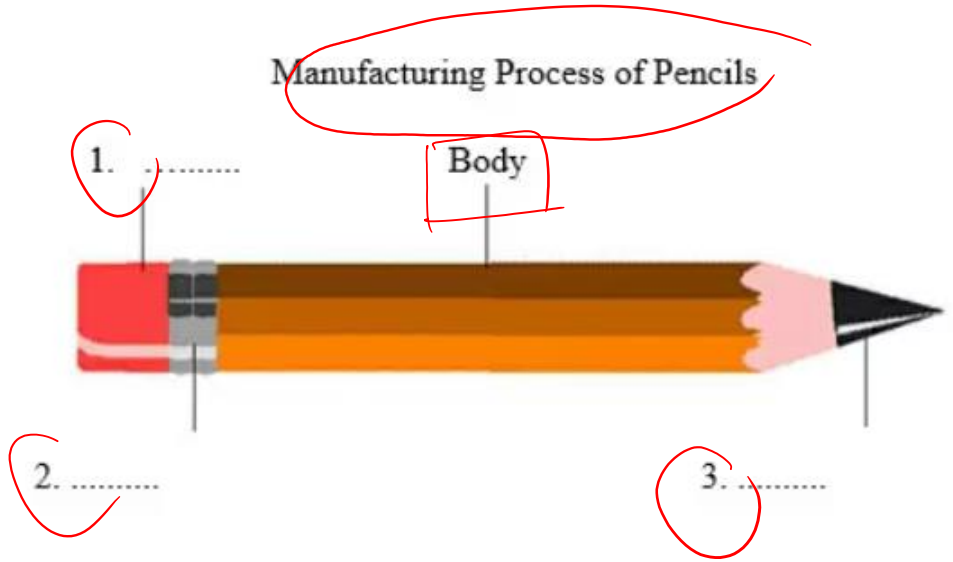

The first step of making pencils concerns the wood. First, there are blocks of wood that are longer than the pencil's size. Those blocks get sliced using very tin saws, forming thinner slats.

Machines create grooves that allow space for lead to be inserted in a single slat. A second slat is placed over the first one using glue. Once the glue dries, it can be shaped like the pencil we know. This forms the body of the pencil.

The ferrule, which is a metal ring that holds the eraser, is creased together with the eraser into the pencil, using a tipping machine.

Choose NO MORE THAN ONE WORD

Manufacturing Process of Pencils

Matching Sentence Ending

- This question type requires you to match matching sentence endings.
- You need to understand how ideas are connected within the reading passage.

How to approach

- Use keywords in the question (part sentence) to locate the idea in the passage.
- Read the idea in the passage very carefully.
- Select the correct sentence ending/idea from the passage.

Matching features

- Matching features tasks are used with Reading passages that contain theories or comments about different people, place, years and things.
- Question will not be in the same order as in the passage.
- The people mentioned may appear in several different sections. You need to scan the whole passage carefully.
- Some of the people on the list may be distractors, and you may not need to use all of the letters.
